Note 1 - Plan Description

The following description of Firelands Regional Medical Center Retirement Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General - The Plan is a defined benefit plan covering all eligible employees of Firelands Regional Medical Center (the "Hospital") and every employee who was a member of either Good Samaritan Hospital Retirement Plan or Sandusky Memorial Hospital Retirement Income Plan prior to the merger into the Plan. Through December 31, 2006, employees of the Hospital were eligible to become participants after completing one year of service (having completed 1,000 hours or more).

During 2001, the Hospital acquired Providence Hospital. Effective September 1, 2001, former Providence Hospital employees began participating in the Plan. The Plan will recognize prior service of such employees with Providence Hospital for eligibility and vesting purposes but not for accrual and calculation of benefit expense in the Plan.

On December 31, 2006, the Plan was frozen. All participants enrolled in the Plan as of December 31, 2006 will continue to accrue benefits. No new participants are allowed in the Plan subsequent to December 31, 2006.

Contributions - All contributions to the Plan are made by the Hospital. The Hospital's policy is to make contributions necessary to satisfy ERISA funding standards. The Hospital contributes such amounts, as determined on an actuarial basis, to provide the Plan with assets sufficient to meet the projected benefits to be paid to plan participants. Annual contributions meet the minimum funding requirements of ERISA. No participant contributions are permitted.

Pension Benefits - Eligible employees with five or more years of service are entitled to normal annual pension benefits beginning at the participant's normal retirement age of 65 as described in the Plan. The individual pension benefit is equal to credited service times a monthly pension basic benefit. Special provisions for retirement at other than the normal retirement age are described in the plan agreement, if applicable.

Party-in-interest Transactions - Certain plan assets are in investment funds managed by SEI Private Trust Company. Fees paid for legal, accounting, and other services were based on customary rates for services and were paid by the Hospital. These transactions are considered party-in-interest transactions.

Note 2 - Summary of Significant Accounting Policies

Actuarial Present Value of Accumulated Plan Benefits - Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service that employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. The present value of accumulated plan benefits is actuarially determined and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment due to death, disability, or retirement between the valuation date and the expected date of payment.

Actuarial Assumptions - The actuarial present value of accumulated plan benefits is determined by consulting actuaries from Findley Davies and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation of the Plan at December 31, 2012 and 2011 are summarized as follows:

Actuarial cost method	-	Projected unit credit
Assumed rate of return	-	8.00%
Mortality basis	-	RP 2000 static, non-generational
Incident of retirement	-	Participants are assumed to retire between 60 and 65

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Investment Valuation - The Plan's investments are stated at fair value. The common collective trust funds are valued at net asset value per share (or its equivalent) of the funds, which are based on the fair value of the funds' underlying net assets. Investment in the limited partnership fund is valued at net asset value per share (or its equivalent) of the fund based on audited financial statements of the fund where available, with adjustments to account for partnership activity and other applicable valuation adjustments, if any. All other investments are based on quoted market prices.

See Note 7 for additional information.

Note 2 - Summary of Significant Accounting Policies (Continued)

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Benefit Payments - Benefits are recorded when paid.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of additions and deductions during the reporting period. Actual results could differ from those estimates.

Risks and Uncertainties - Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, employee compensation, and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks, such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the statement of net assets available for benefits.

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including September 30, 2014, which is the date the financial statements were available to be issued.

Note 3 - Unaudited Information

SEI Private Trust Company (the "Trustee") holds the Plan's investment assets and executes related transactions. The investment balances and related investment income and losses included in the accompanying financial statements and supplemental schedule of assets held at end of year and schedule of reportable transactions are based solely on information provided by the Trustee.

Note 3 - Unaudited Information (Continued)

Significant investments of net assets held at end of year are as follows:

	2013	2012
Mutual funds - At fair value:		
SEI SIIT Large Cap Disciplined Equity Fund	$ 23,483,504	$ 19,289,901
SEI SIIT Small/Mid Cap Equity Fund	7,071,670	5,610,453
SEI SIIT World Equity Ex-US Fund	14,582,951	13,014,675
SEI SIIT High Yield Bond Fund	3,770,320	3,570,514
SEI SIIT Long Duration Fund	11,870,904	11,801,060
SEI Dynamic Asset Allocation Fund	4,357,579	3,603,436
Common collective trust funds - At fair value -		
SEI Opportunity Collective Fund CL A	3,885,206	3,722,790

Note 4 - Benefits

The actuarial present value of accumulated plan benefits is determined by consulting actuaries from Findley Davies as of the beginning of each plan year. The calculation of the estimated present value of accumulated plan benefits attributable to participants in the Plan are made as of and for the year ended December 31, 2012 are as follows:

Actuarial present value of accumulated plan benefits:	
Vested benefits:	
Participants currently receiving benefit payments	$ 6,332,703
Other vested participants	56,224,516
Total vested benefits	62,557,219
Nonvested benefits	554,066
Total actuarial present value of accumulated plan benefits	$ 63,111,285
Actuarial present value of accumulated plan benefits - Beginning of year	$ 60,341,703
Increase (decrease) during the year attributable to:	
Benefits accumulated	3,258,410
Interest due to the decrease in the discount period	4,606,537
Benefits paid	(5,095,365)
Net increase	2,769,582
Actuarial present value of accumulated plan benefits - End of year	$ 63,111,285

Note 5 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro-rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guaranty while other benefits may not be provided for at all.

Note 6 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination letter, management believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

The trust established under the Plan to hold the Plan's assets is intended to qualify pursuant to Section 501(c)(9) of the Internal Revenue Code (the "Code") and, accordingly, the Plan's net investment income is exempt from income taxes. The Plan has obtained a favorable tax exemption letter from the Internal Revenue Service, and the plan sponsor believes that the trust continues to qualify and to operate in accordance with applicable provisions of the Code.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the trust and recognize a tax liability (or asset) if the trust has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS or other applicable taxing authorities. The plan administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2013 and 2012, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to tax examinations for years prior to 2010.

Note 7 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

Note 7 - Fair Value Measurements (Continued)

The following tables present information about the Plan's assets measured at fair value on a recurring basis at December 31, 2013 and 2012.

Level 1 - Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and inputs other than quoted prices that are observable for the asset.

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset. Significant Level 3 inputs include the use of the audited financial statements of the limited partnership to determine the value of the Plan's Level 3 investments at year end.

In instances whereby inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

Total	$ 61,348,274	$ 6,338,742	$ 962,225	$ 68,649,241

(1) This category class represents investments in actively managed common collective trust funds with investments in both equity and debt securities. The investments may include common stock, corporate bonds, U.S. and non-U.S. municipal securities, interest rate swaps, options, and futures. Investments are valued at the net asset value per share multiplied by the number of shares held as of the measurement date. This investment has no significant unfunded commitments or redemption restrictions.

(2) This category class represents an investment in a partnership where the fair value of the investment held is estimated based on the net asset value per share (or its equivalent) of the investment company. The partnership was organized to invest directly and indirectly in a diversified pool of private investment vehicles. This investment has no significant unfunded commitments or redemption restrictions.

The Plan's policy is to recognize transfers between levels of the fair value hierarchy as of the actual date of the event of change in circumstances that caused the transfer. There were no transfers between levels of the fair value hierarchy during 2013 and 2012.

Note 7 - Fair Value Measurements (Continued)

Changes in Level 3 assets measured at fair value on a recurring basis for the years ended December 31, 2013 and 2012 are as follows:

	Investment in Limited Partnership
Balance at January 1, 2013	$ 962,225
Sales	(136,887)

Purchases	63,313
Total realized gains	96,704
Total unrealized gains	118,374
Balance at December 31, 2012	$ 962,225

Quantitative Information about Level 3 Fair Value Measurements

The following table summarizes the valuation methods and inputs used to determine fair value at December 31, 2013 for assets and liabilities measured at fair value on a recurring basis using unobservable inputs (Level 3 inputs).

Note 7 - Fair Value Measurements (Continued)

	Fair Value at December 31, 2013	Valuation Technique	Significant Unobservable Inputs Used	Range (Weighted Average)
Assets -				
Investment in limited partnership	$ 1,139,416	60 day lag	Diversified strategy of private equity funds	N/A

For those assets with fair value measured using Level 3 inputs, the plan administrator determines fair value measurement policies and procedures. Those policies and procedures are reassessed at least annually to determine if the current valuation techniques are still appropriate. At that time, the unobservable inputs used in the fair value measurements are evaluated and adjusted, as necessary, based on current market conditions and other third-party information.

Assumptions Made In Valuing Spouse's Benefit

Eighty percent of the males and sixty percent of females included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband.

Annual Increases to Maximum Benefits and Plan Compensation Limits

Funding: 2.50%

Annual Increases to Social Security

	Taxable Wage Base	Cost of Living Index	Average Earnings
Funding:	3.25%	2.50%	2.50%

Provision for Expenses

The expected administrative (i.e. non-investment) expenses that will be paid from plan assets, which were assumed to equal actual expenses during the prior year, were included in the Target Normal Cost for minimum contribution purposes. Expenses were subtracted from the Expected Return on Assets for ASC 715-30 expense purposes.

APPENDIX B (Continued)

Asset Method	Funding: Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.
Standing Elections	The client has not signed an election that provides for the automatic use of the Carryover and/or Prefunding Balance if necessary at the end of the plan year to meet the minimum funding requirement.
Employees Valued	Only participants as of the valuation date were valued.
Changes in Assumptions and Methods since the Last Actuarial Valuation	The segmented interest rates used for determining the funding target were 2.06%, 5.25% and 6.32%. These rates were updated to the rates required for the current plan year and to reflect MAP-21. The mortality table for the funding target was changed as required under PPA '06.
Justification for Changes in Actuarial Assumptions	The only assumption changes were to prescribed actuarial assumptions or as a result of At-Risk status. Therefore, the plan did not need IRS approval to change assumptions and there is no need to disclose any "Change in Actuarial Assumptions."
