Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

A ACTUARIAL COST METHOD

The actuarial cost method used to determine the target normal cost, target liability and required contribution amounts for the plan is the Traditional Unit Credit Actuarial Cost Method. Under this method, both the target normal cost and target liability are based on the annual accrual of benefits as accruals occur each year.

The target liability for each active plan participant is equal to the actuarial present value of the participant's accrued benefit as of the valuation date. The total target liability of the plan is equal to the sum of such liabilities as determined for each active participant plus the actuarial present value of benefits being paid, or due to be paid, to retirees, beneficiaries and former participants with deferred vested benefits.

The target normal cost for each active participant is equal to the actuarial present value of the benefit expected to be earned during the year starting on the valuation date. The total target normal cost of the plan is the sum of the target normal costs for each active plan participant.

All employees who are plan participants on a valuation date are included in the actuarial valuation.

B ASSET VALUATION METHOD

The actuarial value of assets is equal to the market value of assets on the valuation date reduced by the sum of:

1. 66.67% of gains and losses of the prior year;
2. 33.33% of gains and losses of the second prior year.

Investment gains and losses are determined by the excess or deficiency of the expected return over the actual return on the market value (including employer contributions receivable for any given year. However, the expected return on assets may be limited by certain statutory interest rates.

The actuarial valuation of assets is further constrained to be not less than 90% or more than 110% of market value (including employer contributions receivable).

Normal Form of Annuity

The normal form of payment is a life annuity. A participant who is married at the time of retirement will automatically receive a reduced joint and 50% survivor annuity unless another form of payment is elected with the consent of the participant's spouse.

Optional Forms of Payment

Life annuity; life annuity with 120 monthly payments guaranteed; joint and survivor options with 50%, 66-2/3%, 75% or 100% to beneficiary.

Actuarial equivalent is based on 6% interest and the 71 GAM Male Mortality rates, no age set back for participants, 6 year setback for beneficiaries.

Early Retirement

A plan participant may retire early if he has attained age 55 and completed 10 years of service.

The benefit payable to a plan participant who retires early is the participant's normal retirement benefit as determined by the benefit formula, but using service to his early retirement date only. The benefit is reduced by ¼% for each month benefits commence early.

Postponed Retirement

A participant who retires on a postponed retirement date will be paid a benefit calculated on the same basis as it would be if the participant had retired on his Normal Retirement Date, but on the basis of the benefit level and service in effect on the Postponed Retirement Date.

Preretirement Death Benefit

Upon the death of a participant who has completed five (5) or more years of service, a monthly benefit shall be payable to the participant's surviving spouse, if any. The amount of the benefit is 61.75% of the amount payable to a participant as if the participant had retired early on the first day of the month of death, provided the participant had been married at least one year at death. The benefit begins no earlier than the first day of the month the participant could have retired, and no later than the participant's Normal Retirement Date.
