APPENDIX B

STATEMENT OF ACTUARIAL ASSUMPTIONS AND METHODS

Interest Rates	Funding: 24-month segment rates averaged through the end of August 2012 and published in September 2012:		
		Before <u>MAP-21</u>	Reflecting <u>MAP-21</u>
a.	First Rate, Years 1-5	1.75%	4.94%
b.	Second Rate, Years 5-20	4.62%	6.15%
c.	Third Rate, Years 20+	5.72%	6.76%
d.	Effective Interest Rate using the above rates	4.45%	6.08%
e.	Interest rate for developing expected value of assets (limited by statute)		4.00%
Salary Scale	Future salaries are projected using the appropriate salary scale below. For accrued benefits actual individual pay histories have been used with missing years filled in using the appropriate salary scale below.		
	Funding:	3.00%	
Mortality	Funding: RP-2000 static, non-generational Mortality Table as described in Regulation 1.430(h)(3) projected by Scale AA, to between 7 and 15 years beyond the year of obligation, male and female, with combined rates for annuitants and nonannuitants.		
Rates of Retirement	100% at age 65.		
	Weighted Average Retirement Age is 65. This is the average retirement age for someone eligible to retire at all ages using the assumed retirement rates and no other decrements.		
Rates of Disability	None.		
Rates of Turnover	None.		
Assumptions Made In Valuing Spouse's Benefit	Eighty percent of the male and fifty percent of the female employees included in the valuation are assumed to be married. These percentages are used as the probabilities that survivor benefits will be payable due to preretirement deaths. The wife is assumed to be three years younger than the husband.		

APPENDIX B (Continued)

<i>Optional Form Election</i>	All employees are assumed to elect the life annuity benefit.
<i>Annual Increases to Maximum Benefits and Plan Compensation Limits</i>	Funding: 0.00%
<i>Provision for Expenses</i>	The expected administrative (i.e. non-investment) expenses that will be paid from plan assets, which were assumed to equal actual expenses during the prior year, were included in the Target Normal Cost for minimum contribution purposes.
<i>Standing Elections</i>	Lima Memorial Hospital has signed an election that provides for the automatic use of the Prefunding Balance if necessary at the end of the plan year to meet the minimum funding requirement. This election also provides for excess contributions to be added to the Prefunding Balance.
<i>Asset Method</i>	Funding: Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.
<i>Employees Valued</i>	Only participants as of the valuation date were valued.
