Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Shortfall Amortization

The amount needed to amortize the Funding Shortfall to the Applicable Funding Target for the plan year beginning January 1, 2013 is determined below. The net Funding Shortfall for a plan year is amortized in seven level payments. The present value and amortization factors shown below are based on the interest rates for determining the Applicable Funding Target for the current plan year.

1. Present value of remaining prior Shortfall Amortizations

	Date Established	Amortization Amount	Years Remaining	Present Value Factor	Present Value
a.	January 1, 2008	$10,039	2	1.95293	$19,605
b.	January 1, 2009	6,445	3	2.86099	18,439
c.	January 1, 2010	43,289	4	3.72631	161,308
d.	January 1, 2011	40,714	5	4.55090	185,285
e.	January 1, 2012	(35,910)	6	5.29289	(190,068)
f.	Total	64,577			194,569

2. Shortfall Amortization for current plan year

a.	Applicable Funding Target	2,061,944
b.	Actuarial Value of Assets less Prefunding Balance	1,765,558
c.	Funding Shortfall [(a) - (b), but not < $0]	296,386
d.	Net Funding Shortfall [if (c) > $0, (c) - (1f), otherwise, $0]	101,817
e.	Amortization factor	5.99190
f.	Shortfall Amortization for current plan year [(d) / (e)]	16,992

3. Total Shortfall Amortizations [(1f) + (2f), but not < $0] $81,569

The ultimate cost of a pension plan is the excess of actual benefits and administrative expenses paid over actual net investment return on plan assets during the plan's existence until the last payment has been made to the last participant. The plan's "actuarial cost method" determines the expected incidence of actuarial costs by allocating portions of the ultimate cost to each plan year. The cost method is thus a budgeting tool to help ensure that the plan will be adequately and systematically funded and accounted for. Annual contributions and accounting expense also are affected by the "asset valuation method" (as well as the plan provisions, actuarial assumptions, and actual plan demographic and investment experience each year).

Actuarial Cost Method

The actuarial cost method used for determining the plan's ERISA funding requirements is the unit credit method, as required by the Pension Protection Act of 2006. Under this method, an accrued benefit is determined at each active participant's assumed retirement age based on compensation and service at both the beginning and the end of the current year. The plan's normal cost is the sum of the present value of the excess of each active participant's accrued benefit at the end of the current year over that at the beginning of the current year. The plan's accrued liability is the sum of (a) the present value of each active participant's accrued benefit at the beginning of the current year plus (b) the present value of each inactive participant's future benefits.

The actuarial cost method used for determining the plan sponsor's accounting requirements also is the unit credit method, as required by FASB ASC Topic 715.

Asset Valuation Method

The Actuarial Value of Assets used for determining the plan's ERISA funding requirements is equal to the Adjusted Market Value of Assets minus a decreasing fraction of the investment gain or loss for each of the two immediately preceding plan years, but it cannot be less than 90% nor more than 110% of the Adjusted Market Value of Assets. The expected investment return for a plan year is based on the lesser of the expected rate of return on plan assets (currently 7% per year) or the applicable statutory interest rate for the year.

The Market-Related Value of Plan Assets used for determining the plan sponsor's accounting requirements is equal to the Fair Value of Plan Assets (without inclusion of any contributions receivable).

Changes in Actuarial Methods Since Prior Valuation

None.

Interest Rates

For minimum contribution purposes: Segment rates (based on statutory rates in effect four months prior to beginning of plan year, limited by MAP-21 interest rate stabilization) of 4.94% per year for first 5 years, 6.15% per year for next 15 years, and 6.76% per year thereafter. The equivalent Effective Interest Rate is 6.15% per year.

For maximum deductible contribution purposes: Segment rates (based on statutory rates in effect four months prior to beginning of plan year, not limited by MAP-21 interest rate stabilization) of 1.75% per year for first 5 years, 4.62% per year for next 15 years, and 5.72% per year thereafter.

For FASB ASC Topic 715 purposes: Discount rate of 3.19% per year and expected long-term rate of return on plan assets of 6.5% per year.

For FASB ASC Topic 960 purposes: Discount rate of 3.19% per year.

Mortality

For contribution purposes: Statutory static tables for 2013 based on RP-2000 Mortality Table projected to anticipate greater future longevity, with separate rates for non-annuitants and annuitants.

For FASB ASC Topics 715 and 960 purposes: RP-2000 Mortality Table projected with Scale AA on a generational basis, with employee rates before termination and healthy annuitant rates after termination. As a generational table, it reflects mortality improvements both before and after the valuation date.

Retirement

The later of Normal Retirement Date or attained age on valuation date.

Form of Payment

Life annuity, with Postretirement Death Benefit if married.

Marital Characteristics

For participants not in pay status: 100% of participants are assumed to be married, with males 3 years older than females.

For participants in pay status: Actual birth dates of spouses are included in the census data, where relevant.

Expenses

Expected administrative expenses payable from the trust are explicitly loaded to the normal cost. For the current valuation, the loading for expenses (assumed to be payable mid-year) is $65,000.

Benefits Not Valued

The 40% Preretirement Death Benefit is not valued because it is assumed to have insignificant cost.

Special Data Adjustments

None.

Changes in Actuarial Assumptions Since Prior Valuation

Minimum contribution interest rates: From 5.54%, 6.85%, and 7.52% per year to 4.94%, 6.15%, and 6.76% per year, respectively.

Maximum deductible contribution interest rates: From 2.06%, 5.25%, and 6.32% per year to 1.75%, 4.62%, and 5.72% per year, respectively.

Contribution mortality: From statutory tables for 2012 to statutory tables for 2013.

This summary of plan provisions is intended to only describe the essential features of the plan. All eligibility requirements and benefit amounts shall be determined in strict accordance with the plan document itself.

Definitions

Accrued Benefit: The accrued benefit determined under the provisions of the plan as of the earlier of the date of termination of employment or December 31, 1988. A portion of the Accrued Benefit for some participants is provided outside of the plan by annuity contracts with Principal Financial Group. The Accrued Benefit is payable in monthly installments.

Actuarially Equivalent: Equality in value such that the present value of the amount under any form of payment is essentially the same as the present value of the amount under the normal form of annuity payment for single participants. For purposes other than determining lump sum amounts, Actuarially Equivalent factors are based on the 1984 Unisex Pensioners Mortality Table and an 8% interest rate. For purposes of determining lump sum amounts, Actuarially Equivalent factors are based on the applicable mortality table specified in IRS Notice 2008-85 for the Plan Year of distribution and the statutory three-tier segment interest rates in effect for the November prior to the Plan Year of distribution.

Plan Effective Date: December 1, 1952; the plan was last amended effective January 1, 2008.

Plan Year: The 12-month period beginning January 1 and ending December 31.

Normal Retirement

Normal Retirement Date: The first day of the month coincident with or next following attainment of age 65.

Normal Retirement Benefit: The Accrued Benefit.

Early Retirement

Early Retirement Date: The first day of any month coincident with or next following attainment of age 55 and completion of 15 years of service.

Early Retirement Benefit: The Accrued Benefit, reduced by 0.5% for each of the first 60 months and by 0.333% for each of the next 60 months by which the Early Retirement Date precedes the Normal Retirement Date.

Deferred Retirement

Deferred Retirement Date: The first day of the month coincident with or next following the date of termination of service if it occurs after the Normal Retirement Date.

Deferred Retirement Benefit: The Accrued Benefit determined as of the Deferred Retirement Date.

Termination

Termination Date: The date of termination of service other than for reasons of retirement or death.

Termination Benefit: The Accrued Benefit, multiplied by the Vested Percentage below, payable at the Normal Retirement Date, or payable as of the first day of any month coincident with or next following attainment of age 55 if at least 15 years of service have been completed (reduced by 0.5% for each of the first 60 months and by 0.333% for each of the next 60 months by which the benefit commencement date precedes the Normal Retirement Date).

Years of Service	Vested Percentage
Less than 5	0%
5 or more	100

Preretirement Death

Preretirement Death Benefit Eligibility: Surviving spouses of participants with a vested Accrued Benefit who die before commencement of payments or disabled participants in pay status who die before attainment of age 65.

Preretirement Death Benefit: For surviving spouses of disabled participants in pay status whose age plus service equals 40 or more, 40% of the Accrued Benefit, reduced by 5% for each complete year in excess of five by which the surviving spouse is younger than the participant, payable commencing one year after the participant's death until the earlier of the surviving spouse's remarriage or death. To the extent that it provides a greater benefit for such surviving spouses, or for surviving spouses of other participants, 50% of the Early Retirement Benefit which would have been payable had the deceased participant instead terminated service on the date of death, survived to his earliest possible benefit commencement date, and died on that same date.

Postretirement Death Benefit

Postretirement Death Benefit Eligibility: Surviving spouses of participants in pay status (other than disabled participants under age 65) who are married to the participant for at least one year immediately before the participant's benefit commencement date.

Postretirement Death Benefit: The greater of (i) 40% of the Accrued Benefit, reduced by 5% for each complete year in excess of five by which the surviving spouse is younger than the participant, or (ii) 50% of the benefit which would have been payable had the deceased participant elected an Actuarially Equivalent joint and 50% survivor annuity as of the participant's benefit commencement date.

Postretirement Lump Sum Death Benefit

Postretirement Lump Sum Death Benefit Eligibility: Beneficiaries of retired and disabled participants in pay status who have attained age 65, provided that such participants are former Citrus employees (but excluding participants who retired or became disabled before 1976 or who terminated employment before their Early Retirement Date).

Postretirement Lump Sum Death Benefit: $2,500.

Forms of Payment

Normal Forms: Life annuity if single; Actuarially Equivalent joint and 50% survivor annuity if married (without form of payment reduction until after participant's death).

Optional Forms: Actuarially Equivalent joint and 75% survivor annuity.

Small Lump Sum: Payable if the Actuarially Equivalent present value of the vested Accrued Benefit is $5,000 or less.

Changes in Principal Plan Provisions Since Prior Valuation

None.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
