Notes to Financial Statements
(Modified Cash Basis)

1. Description of the Plans

The accompanying financial statements comprise the ADM Retirement Plan (the Retirement Plan) and the ADM Pension Plan for Hourly-Wage Employees (the Hourly Plan) (collectively, the Plans) of Archer-Daniels-Midland Company (ADM or the Company) that participate in the Archer Daniels Midland Master Retirement Trust (the Master Trust).

The Company's funding policy with respect to the Plans is to contribute at least the necessary amount each year to meet the minimum amount required by the Employee Retirement Income Security Act of 1974, as amended (ERISA). The Plans have met the ERISA minimum funding requirements for 2013 and 2012.

The Company is free to terminate the Plans at any time, subject to the provisions of ERISA. In the event of the termination of the Plans, the net assets of the Plans shall be allocated to provide benefits in the order of priority prescribed by ERISA. However, the Pension Benefit Guaranty Corporation guarantees the payment of all nonforfeitable basic benefits subject to certain limitations prescribed by ERISA.

More complete information about the Plans, including vesting and benefit provisions, is contained in a summary plan description available from the Company.

On September 20, 2012, the Company amended the Plans and notified certain former employees of the Company of its offer to pay those employees' pension benefit in a lump sum. Former employees eligible for the voluntary lump-sum payment option were generally those who were vested traditional formula participants of the Plans who terminated employment prior to August 1, 2012, and who had not yet started receiving monthly payments of their pension benefits. In accordance with the terms of these amendments, voluntary lump sum payments of \$90 million were made to participants in the Retirement Plan and \$44 million to participants in the Hourly Plan in 2012.

Notes to Financial Statements
(Modified Cash Basis)

1. Description of the Plans (continued)

ADM Retirement Plan

The Retirement Plan is a defined benefit plan covering substantially all regular salaried employees of ADM and its participating affiliates.

In January 2012, the Retirement Plan was amended to offer one-time incentives to certain salaried employees as part of a voluntary early retirement window.

From time to time, the assets and liabilities of acquired pension plans covering the salaried employees of acquired ADM subsidiaries or locations are merged into the Retirement Plan, as is the policy of ADM.

ADM Pension Plan for Hourly-Wage Employees

The Hourly Plan is a defined benefit plan covering those employees of ADM and its participating affiliates who are working at participating locations (as described in the plan document) and who are paid on an hourly rate basis. The Hourly Plan provisions for those locations that are not represented by a collective bargaining agreement, as well as those represented by a collective bargaining agreement, have been modified by the addition of appendices to the Hourly Plan specifying those provisions for the locations that differ from the corresponding provisions of the basic plan provisions.

From time to time, the assets and liabilities of acquired pension plans covering the hourly employees of acquired ADM subsidiaries or locations are merged into the Hourly Plan, as is the policy of ADM.

2. Significant Accounting Policies

Basis of Accounting

The accounting records of the Plans are maintained on a modified cash basis, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States. Under the modified cash basis, investments are recorded at fair value, and transactions are recorded when cash is received or paid rather than in the time period in which income is earned or expenses are incurred.

Benefits Paid

Benefits are recorded when paid.

Notes to Financial Statements
(Modified Cash Basis)

2. Significant Accounting Policies (continued)

Investments

The Plans' investments held in the Master Trust are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). See Note 4 for further discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded as earned. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Master Trust's gains and losses on investments bought and sold as well as held during the year.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (see Note 5) are those estimated future periodic payments, including lump-sum distributions, attributable under the Plans' provisions to services rendered by employees through the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries and (b) present employees or their beneficiaries. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included to the extent they are deemed attributable to employee service rendered through the valuation date.

ADM Retirement Plan

Effective January 1, 2009, salaried employees who were vested (five or more years of service before January 1, 2009) continued with the existing traditional pension formula. Salaried employees with less than five years of service before January 1, 2009, participate in a point-based cash balance pension formula with a three-year vesting schedule.

Benefits for retired or terminated employees or their beneficiaries under the traditional pension formula are based on the employees' highest average monthly salary for 60 consecutive months out of the last 180 consecutive months of credited service. Benefits for retired or terminated employees or their beneficiaries under the cash balance pension formula are based on the employee's cash balance account.

ADM Pension Plan for Hourly-Wage Employees

Effective January 1, 2009, most non-bargaining hourly employees, as well as those represented by a collective bargaining agreement, who were hired prior to January 1, 2009, that have a pension plan at their location continued with the existing traditional pension formula. Non-bargaining hourly employees who are hired or rehired on or after January 1, 2009, participate in a point-based cash balance pension formula. Employees represented by a collective bargaining agreement who were hired or rehired on or after January 1, 2009, participate in the pension formula applicable to their respective location.

Benefits for retired or terminated employees or their beneficiaries under the traditional formula are based on the applicable benefit level and the employees' credited service as determined by hours worked. Benefits for retired or terminated employees or their beneficiaries under the cash balance pension formula are based on the employee's cash balance account.

Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Plan Expenses

All costs and expenses incurred in connection with the operation of the Plans with regard to the purchase and sale of investments, as well as certain professional fees, are paid out of the Master Trust. Other administrative expenses and actuarial and audit fees are paid by ADM, the plan sponsor.

Subsequent Events

On August 5, 2014, the Company amended its U.S. qualified pension plans and began notifying certain eligible individuals of its offer to pay those individuals' pension benefit in a lump sum. Individuals eligible for the voluntary lump sum payment option are generally those who are retirees, surviving joint annuitants, beneficiaries, and alternate payees of the U.S. qualified pension plans who are currently receiving a payment and commenced their benefit prior to June 30, 2014. The voluntary lump sum payments, to be paid from plan assets, will depend on actual participation rates and payout amounts, which will not be known until October 2014.

Management evaluated subsequent events for the Plans through October 9, 2014, the date that these financial statements were available to be issued.

3. Master Trust Investment Information

All investment information disclosed in the accompanying financial statements for the Plans and Master Trust, including investments held at December 31, 2013 and 2012, and net appreciation (depreciation) in fair value of investments, interest, dividends, and investment expenses for the years ended December 31, 2013 and 2012, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by Northern Trust Company, the custodian.

The Plans' investments are held in the Master Trust established for the investment of assets of the Plans. Each participating retirement plan has an undivided interest in the Master Trust. The Retirement Plan and Hourly Plan's interest in the net assets of the master trust was approximately 72% and 28%, respectively, at December 31, 2013 and 2012. Investment income (loss) and expenses are allocated among the Plans based upon each plan's pro rata share in the net assets of the Master Trust.

4. Fair Value Measurements

The Master Trust assets are valued as required by Accounting Standards Codification (ASC) 820. ASC 820 establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). The three levels are described below:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Observable inputs, including Level 1 prices that have been adjusted, quoted prices for similar assets or liabilities, quoted prices in markets that are less active than traded exchanges, and other inputs that are observable or can be substantially corroborated by observable market data.

Level 3: Unobservable inputs that are supported by little or no market activity and that are a significant component of the fair value of the assets or liabilities.

Following is a description of the valuation techniques and inputs used for instruments measured at fair value, including the general classification of such instruments pursuant to the valuation hierarchy.

Common stock:

Equity securities are valued based on quoted exchange prices and are classified within Level 1 of the valuation hierarchy.

Equity mutual funds:

Equity mutual funds are valued at the closing price reported on the active market on which they are traded and are classified within Level 1 of the valuation hierarchy.

Common collective trust (CCT) funds:

The fair values of the CCTs are based on the cumulative net asset value (NAV) of their underlying investments. The investments in CCTs are comprised of international equity and short-term investments. The investments are valued at NAV based on the closing market value of the units bought or sold as of the valuation date and are classified in Level 2 of the fair value hierarchy.

4. Fair Value Measurements (continued)

U.S. Treasury instruments:

U.S. Treasury instruments are valued at the closing price reported on the active market on which they are traded and classified within Level 1 of the valuation hierarchy.

U.S. government agency, state, and local government bonds:

U.S. government agency obligations and state and municipal debt securities are valued using third-party pricing services and are classified within Level 2 of the valuation hierarchy.

Corporate debt instruments:

Corporate debt instruments are valued using pricing models maximizing the use of observable inputs for similar securities. This includes basing value on yields currently available on comparable securities of issuers with similar credit ratings. These debt instruments are classified within Level 2 of the valuation hierarchy.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the plan administrator of the Plans believes the valuation methods are appropriate and consistent with other market participants' methods, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The Plans' overall investment strategy is to achieve broad diversification of asset types, fund strategies, and fund managers. The target allocations for the Plans' assets are 60% equity securities and 40% fixed income. Equity securities include investments in large-cap, mid-cap, and small-cap companies located in the U.S. and globally. Fixed income securities include corporate bonds of domestic and foreign companies from diversified industries, mortgage-backed securities, U.S. Treasury instruments, U.S. government agencies, and state and local issuers.

4. Fair Value Measurements (continued)

a) International equity: The fund's investment objective is to seek long-term growth of capital and income through investing primarily in foreign equity securities. Issuances and redemptions are restricted to the last day of the month. The fund units are valued at NAV based on the closing market value of the units bought or sold as of the valuation date and are classified in Level 2 of the fair value hierarchy.

b) Short-term investments: Securities are valued at fair value. There are no redemption restrictions for this fund. The fund units are valued at NAV based on the closing market value of the units bought or sold as of the valuation date and are classified in Level 2 of the fair value hierarchy.

Level 3 Gains and Losses:

There are no assets in the Plans classified as Level 3 in the fair value hierarchy; therefore, there are no gains or losses to disclose.

5. Accumulated Plan Benefits

The Plans' consulting actuaries estimate the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements for death, disability, withdrawal, or retirement) between the valuation date and the expected payment date.

As of the latest actuarial valuation of the Plans, the present values of accumulated plan benefits were as follows:

	<u>December 31, 2012</u>	
	Retirement Plan	Hourly Plan
Actuarial present value of vested benefits:		
Participants and beneficiaries currently receiving payments	\$ 622,813,356	\$202,839,127

From December 31, 2011 to December 31, 2012, the valuation discount rate and cash balance interest rate decreased from 4.00% to 3.90% and 3.13% to 2.90%, respectively. The mortality table used to calculate accumulated plan benefits changed from the 2012 Static Mortality Table for Annuitants and Non-Annuitants to the 2013 Static Mortality Table for Annuitants and Non-Annuitants for healthy lives. The effect of these changes in assumptions from the December 31, 2011 valuation to the December 31, 2012 valuation increased the present value of accumulated plan benefits by \$20.9 million. The present value of accumulated plan benefits as of December 31, 2011 was \$1,317 million.

From December 31, 2011 to December 31, 2012, the valuation discount rate and cash balance interest rate decreased from 3.95% to 3.80% and 3.13% to 2.90%, respectively. The mortality table used to calculate accumulated plan benefits changed from the 2012 Static Mortality Table for Annuitants and Non-Annuitants to the 2013 Static Mortality Table for Annuitants and Non-Annuitants for healthy lives. 7. Income Tax Status

The Plans received determination letters from the Internal Revenue Service (IRS) dated March 13, 2013, stating the Plans are qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related trust is exempt from taxation. Subsequent to this determination by the IRS, the Plans were amended. Once qualified, the Plans are required to operate in conformity with the Code to maintain their qualification. The plan administrator believes the Plans are being operated in compliance with the applicable requirements of the Code and, therefore, believes the Plans, as amended, are qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States require plan management to evaluate uncertain tax positions taken by the Plans. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plans and has concluded that as of December 31, 2013, there are no uncertain positions taken or expected to be taken. The Plans have recognized no interest or penalties related to uncertain tax positions. The Plans are subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2010.

8. Risks and Uncertainties

The Plans invest in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risks associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.</p> <p>A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).</p>

Schedule SB, Part V—Summary of Plan Provisions

History of Plan

The Archer Daniels Midland Retirement Plan was established effective December 27, 1943, as a group annuity contract with the Equitable Life Assurance Society. Effective September 1, 1952, a separate plan was established for hourly employees.

In December, 1954, a change was made in financing the plan from a deposit administrative group annuity contract to a trustee basis. No further contributions were made to the Equitable deposit administration fund. The existing deposit administration contract funds were used to purchase benefits upon retirement and such funds were sufficient to purchase the benefits of all participants who retired prior to July 31, 1963. The Trustee currently is the National City Bank of Minneapolis.

Effective January 1, 1968, the benefit formula was changed from a career average pay formula to a final average pay formula. The final average pay formula adopted was 1% of all pay plus 1/2% of pay in excess of an average Social Security wage base for all years of service up to 35 years.

Effective January 1, 1973, the method of integrating the benefit formula with Social Security was changed from a step rate basis (a higher benefit rate on pay over a wage base) to an offset basis (same benefit rate on all pay with the plan benefit reduced by some portion of Social Security benefits). The formula adopted was 56% of final average compensation minus 50% of primary Social Security, times the ratio of credited service to 35 years. In addition, a minimum benefit formula of 9.00 times credited service up to 35 years was added, the disability benefit was removed (now covered by an insured long-term disability plan), the retirement death benefit provisions were liberalized, and the eligibility provisions for vesting were liberalized.

Effective January 1, 1976, the plan was amended to comply with the Employee Retirement Income Security Act of 1974 (ERISA). These changes included providing the rule of 45 for vesting.

During 1978, the plan was amended retroactive to January 1, 1976, to increase the minimum benefit to \$9.00 times credited service.

Effective January 1, 1983, the plan was amended to be in accordance with the maximum benefit rules of TEFRA.

The plan was amended effective August 1, 1984, to extend preretirement death coverage to terminated vested employees on an employee paid basis as required by the Retirement Equity Act.

Effective January 1, 1987, the plan was amended to be in accordance with the maximum benefit rules of TRA-86.

Effective January 1, 1989, in accordance with the Tax Reform Act of 1986, a 5-year cliff vesting schedule was adopted and the maximum compensation taken into account in determining benefits was limited to \$200,000 subject to future indexing.

Amount of Benefits
(Traditional Formula)
Normal

A monthly amount equal to:

- a. 36% of final average compensation, plus 16.5% of final average compensation in excess of Covered Compensation reduced proportionately for service less than 30 years; plus

Early

The normal benefit, reduced for payments prior to age 65 as in the table on page 64.

Disability

Deferred Vested

The normal benefit payable at 65 accrued to date of termination. If payments commence prior to age 65, reduction is 6-2/3% for each of the first five years and 3-1/3% for each additional year. Benefits cannot begin before age 55. For former Pfizer employees, reduction is 4% per year with benefits commencing no earlier than age 50.

Preretirement Surviving Spouse Annuity

One-half of the vested benefit payable immediately to the surviving spouse until death. For former Pfizer employees, 50% of the amount the deceased participant would have been entitled to receive if the employee had survived to age 50 and then retired the day before death with a 50% joint and survivor annuity. The benefit is payable to the spouse for life and may commence no earlier than the participant's attainment of age 50.

Death while active and after

Death while inactive and before
benefit commencement

50% of the amount the deceased participant would have been entitled to receive if the employee had retired if over 55 or survived to age 55 and then retired the day before death and chose the qualified joint and survivor annuity. The benefit is payable to the spouse for life and may commence no earlier than the participant's attainment of age 55. For former Pfizer employees, same as for active deaths.

Amount of Benefits
(Cash Balance Formula)
Initial Cash Balance Account Balance

An eligible employee who did not have five years of continuous service as of December 31, 2008 will have an initial account balance established as of January 1, 2009. It will equal the actuarial equivalent lump-sum value of his/her Traditional Formula Accrued Benefit as of December 31, 2008.

Pay Credits

The cash balance account will be credited with an amount equal to the applicable percentage based the employees points as of the last day of the plan year (see table below) multiplied by compensation.

Points	Percentage
Less than 40	2.00%
At least 40 but less than 50	2.25%
At least 50 but less than 60	2.50%
At least 60 but less than 70	3.00%
At least 70 but less than 80	3.50%
80 or more	4.00%

Interest Credits

The employee's account shall be credited with interest, based on the beginning of year balance, which is added to the account balance at the end of the year. The credited interest rate is equal to the greater of the average annual interest rate on 30-year Treasury rate for third month prior to the beginning of the plan year or 1.95%.

Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following non-prescribed assumption changes:

- The cash balance interest crediting rate was updated from 3.13% (October 2011 30-year Treasury rate) to 2.90% (October 2012 30-year Treasury rate).
- The optional payment form election for Golden Peanut participants without cash balance benefits was updated to assume that 75% of these participants will elect lump sum at termination.

These changes were made to better reflect the anticipated plan experience. The funding assumption changes did not reduce the funding shortfall more than the thresholds stated in Internal Revenue Code Section 430(h)(5), so approval of the Commissioner is not required.

Schedule SB, Part V—Summary of Plan Provisions

History of Plan

The Archer Daniels Midland Retirement Plan was established effective December 27, 1943, as a group annuity contract with the Equitable Life Assurance Society. Effective September 1, 1952, a separate plan was established for hourly employees.

In December, 1954, a change was made in financing the plan from a deposit administrative group annuity contract to a trustee basis. No further contributions were made to the Equitable deposit administration fund. The existing deposit administration contract funds were used to purchase benefits upon retirement and such funds were sufficient to purchase the benefits of all participants who retired prior to July 31, 1963. The Trustee currently is the National City Bank of Minneapolis.

Effective January 1, 1968, the benefit formula was changed from a career average pay formula to a final average pay formula. The final average pay formula adopted was 1% of all pay plus 1/2% of pay in excess of an average Social Security wage base for all years of service up to 35 years.

Effective January 1, 1973, the method of integrating the benefit formula with Social Security was changed from a step rate basis (a higher benefit rate on pay over a wage base) to an offset basis (same benefit rate on all pay with the plan benefit reduced by some portion of Social Security benefits). The formula adopted was 56% of final average compensation minus 50% of primary Social Security, times the ratio of credited service to 35 years. In addition, a minimum benefit formula of 9.00 times credited service up to 35 years was added, the disability benefit was removed (now covered by an insured long-term disability plan), the retirement death benefit provisions were liberalized, and the eligibility provisions for vesting were liberalized.

Effective January 1, 1976, the plan was amended to comply with the Employee Retirement Income Security Act of 1974 (ERISA). These changes included providing the rule of 45 for vesting.

During 1978, the plan was amended retroactive to January 1, 1976, to increase the minimum benefit to \$9.00 times credited service.

Effective January 1, 1983, the plan was amended to be in accordance with the maximum benefit rules of TEFRA.

The plan was amended effective August 1, 1984, to extend preretirement death coverage to terminated vested employees on an employee paid basis as required by the Retirement Equity Act.

Effective January 1, 1987, the plan was amended to be in accordance with the maximum benefit rules of TRA-86.

Effective January 1, 1989, in accordance with the Tax Reform Act of 1986, a 5-year cliff vesting schedule was adopted and the maximum compensation taken into account in determining benefits was limited to \$200,000 subject to future indexing.

Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following non-prescribed assumption changes:

- The cash balance interest crediting rate was updated from 3.13% (October 2011 30-year Treasury rate) to 2.90% (October 2012 30-year Treasury rate).
- The optional payment form election for Golden Peanut participants without cash balance benefits was updated to assume that 75% of these participants will elect lump sum at termination.

These changes were made to better reflect the anticipated plan experience. The funding assumption changes did not reduce the funding shortfall more than the thresholds stated in Internal Revenue Code Section 430(h)(5), so approval of the Commissioner is not required.
