NOTE 1 - SUMMARY DESCRIPTION OF THE PLAN

The following description of Aspen Surgical Products, Inc. (Company) Savings and Retirement Plan (Plan) provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Plan was a defined contribution retirement plan covering all eligible employees, as defined, of the Company who are age 18 or older. It was subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Trust

A trust had been established under the Plan to hold the Plan's assets. The Company had appointed an individual as trustee.

Contributions

Subject to certain limitations, Company employees participating in the Plan could make voluntary contributions to the Plan through a salary reduction program. The Company's contributions to the Plan were discretionary and could be made in two forms. The Company could make matching contributions equal to a uniform percentage of each participant's deferred compensation. Company contributions could also be in the form of a profit-sharing contribution. Company discretionary, lump-sum contributions were allocated to participants based on each participant's relative compensation. Participants could also contribute amounts representing rollovers from other qualified defined-benefit or contribution plans.

Allocation to Participants

Each participant's account was credited with the participant's elective salary reductions and allocations of the Company's contributions (when made), Plan earnings, and charged with an allocation of administrative expenses. Allocations were based on participant earnings or account balances, as defined. The benefit to which a participant was entitled was the benefit that could be provided from the participant's account. Investment earnings were allocated daily, based on unit values and units owned in accounts.

Notes Receivable from Participants

Participants could borrow from their fund accounts in any amount greater than $1,000 but less than 50% of the participant's vested account balance. In no event could a participant borrow more than $50,000. Historically, the Plan did not have any significant uncollectible receivables; therefore, an allowance for doubtful accounts had not been established.

Vesting

Each participant was vested in his or her account balance based on years of service as defined. Vesting percentages for employer matching contributions and allocations of net investment earnings on these funds ranged from 33% after two years of service to 100% after four years of service. Vesting percentages for employer profit-sharing contributions and allocations of net investment earnings on these funds was 0% in the first year, then 20% per year thereafter. All employee contributions along with allocations of net investment earnings on these funds were fully vested and non-forfeitable. Non-vested amounts become 100% vested upon death of the participant.

Forfeitures

Forfeitures resulting from matching contributions were applied to reduce the next matching contribution and allocated as part of that contribution. Any remaining forfeitures resulting from any other Company contribution were allocated as an additional profit-sharing contribution. Total balances forfeited due to non-vesting totaled $11,187 and $12,181 for the years ended December 31, 2013 and 2012, respectively.

Payment of Benefits

Upon retirement, termination of employment, or death, participants or their beneficiaries could receive the value of their accumulated plan benefits in a lump-sum distribution. Participants could also request a distribution of some or their entire vested portion of their accounts under certain circumstances defined by the Plan as "hardships."

Hardship

Hardship withdrawals were permitted upon approval by the Plan administrator.

Investment Manager

The Plan was party to a deposit contract with John Hancock Life Insurance Company (U.S.A.) (John Hancock). John Hancock offered participants numerous investment options, which were maintained in pooled accounts. The accounts were credited with actual earnings of the underlying investments and charged for Plan withdrawals. The investment accounts were included in the financial statements as certified to the Plan by John Hancock.

NOTE 2 - PLAN MERGER

In July of 2012, the plan sponsor was acquired by another entity. The Plan sponsor's board of directors voted to merge the Plan, with all Plan assets transferred into a separate Plan controlled by the acquiring entity effective December 31, 2013. The plan transfers on the Statements of Changes in Net Assets Available for Benefit represents the monies transferred to the new plan via a discontinuance transfer.

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

The financial statements of the Plan are prepared in accordance with the liquidation basis of accounting as of and for the year ended December 31, 2013 and with accounting principles generally accepted in the United States of America as of and for the year ended December 31, 2012.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The Statement of Net Assets Available for Benefits presents the fair value of the investment contracts as well as the contract value which approximates fair value as of December 31, 2013 and 2012.

Investment Valuation and Income Recognition

Investments were stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for discussion of fair value measurements.

Purchases and sales of securities were recorded on a trade-date basis. Interest income was recorded on the accrual basis. Dividends were recorded on the ex-dividend date. Net appreciation (depreciation) includes the plan's gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits

Benefits were recorded when paid.

Subsequent Events

Management has evaluated significant events or transactions occurring subsequent to December 31, 2013 for potential recognition or disclosure in these financial statements. The evaluation was performed through September 30, 2014, the date the financial statements were available for issuance.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

NOTE 4 - FAIR VALUE MEASUREMENTS

U.S. generally accepted accounting principles establish a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted market prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under U.S. generally accepted accounting principles are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;

- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy was based on the lowest level of any input that was significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2013 and 2012.

Mutual Funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan were open-end mutual funds that were registered with the Securities and Exchange Commission. These funds were required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan were deemed to be actively traded.

Guaranteed Interest Accounts: Valued at fair value based on contractual rates of interest and stated maturity dates. The fund was vested in guaranteed investment contracts (GICs).

The methods described above could produce a fair value calculation that may not be indicative of net realized value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods were appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.
