Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Independent Auditors' Report

The Plan Administrator
Gerber Life Insurance
Company Retirement Plan:

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of the Gerber Life Insurance Company Retirement Plan (the Plan), which comprise the statements of net assets available for benefits and statements of accumulated plan benefits as of December 31, 2013 and 2012, and the related statement of changes in net assets available for benefits and statement of changes in accumulated plan benefits for the year ended December 31, 2013, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States of America. Because of the matters described in the *Basis for Disclaimer of Opinion* paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in notes 5, 7, and 8, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the Plan Administrator that the trustee holds the Plan's investment assets and executes investment transactions. The Plan Administrator has obtained a certification from the trustee as of December 31, 2013 and 2012, and for the year then ended December 31, 2013, that the information provided to the Plan Administrator by the trustee is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the *Basis for Disclaimer of Opinion* paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Report on Form and Content in Compliance with Department of Labor's Rules and Regulations

The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Notes to Financial Statements

December 31, 2013 and 2012

(1) Description of the Plan

The following brief description of the Gerber Life Insurance Company Retirement Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan Document for a more complete description of the Plan's provisions.

(a) General

The Plan is a noncontributory defined benefit pension plan covering substantially all of the salaried employees of Gerber Life Insurance Company (Gerber Life), a wholly owned subsidiary of Nestlé SA (Nestlé). Nestlé has designated Nestlé USA, Inc. (the Company) as the Plan sponsor and administrator.

Prior to January 1, 1982, the Plan was a contributory plan that required participants to contribute a percentage of their gross annual compensation up to an established maximum. Effective December 31, 2004, Gerber Life froze the Plan and ceased additional benefit accruals for participants. All active participants employed on September 1, 2007 (the date Nestlé acquired Gerber Life), who were not otherwise vested under the Plan, were made fully vested.

The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Effective December 31, 2013, the assets and related accumulated benefit obligation of the Plan were merged into the Nestlé Pension Plan. None of the Plans' provisions were materially changed as a result of the merger.

(b) Pension, Death, and Disability Benefits

The normal form of payment is life annuity payable in monthly installments. A participant may elect various optional forms of payment, which are actuarially equivalent to the normal form. Unless revoked in writing, a married participant will be deemed to have automatically elected a 50% contingent annuitant option with his or her spouse named as beneficiary.

Subject to provisions applicable to grandfathered participants, a participant's benefit is a monthly amount, determined on an actuarial equivalent basis, of the participant's adjusted lump sum benefit expressed as a life annuity payable on the participant's normal retirement date.

A participant's lump sum benefit will be equal to the following calculated amount:

- (a) The sum of base credits (see below) times final average pay, plus

**GERBER LIFE INSURANCE
COMPANY RETIREMENT PLAN**

Notes to Financial Statements

December 31, 2013 and 2012

- (b) The sum of excess credits (see below) times final average pay greater than covered compensation:

<u>Sum of attained age and years of credited service during the plan year</u>	<u>Base credits</u>	<u>Excess credits</u>
30 – 34	2.0%	1.0%
35 – 39	3.0	1.5
40 – 44	4.0	2.0
45 – 49	5.0	2.5
50 – 54	6.0	3.0
55 – 59	7.0	4.0
60+	10.0	5.0

A participant's adjusted lump sum benefit is equal to the participant's lump sum benefit increased by 5% per year from the earlier of the date of the participant's termination of employment or December 31, 2004, to the participant's annuity starting date.

For a participant subject to grandfathered provisions, the annual benefit will be no less than the amount applicable under such provisions.

The Plan permits early retirement with reduced retirement benefits at or after age 57 and five years of participation, although participants subject to the formula above may elect to commence receiving vested benefits following termination of employment, regardless of age. If a vested participant dies prior to commencing his benefit, the Plan provides a preretirement death benefit to a surviving spouse or other named beneficiary where applicable. Certain grandfathered provisions may apply. A participant who becomes permanently disabled may be entitled to a monthly pension benefit, as determined under the Plan's provisions.

(2) Summary of Significant Accounting Policies

The following is a summary of the significant accounting policies followed by the Plan:

(a) Basis of Accounting

The financial statements of the Plan are prepared under the accrual basis of accounting in accordance with U.S. generally accepted accounting principles.

(b) Valuation of Investments

Plan assets are held in the Nestlé in the USA Pension Trust (Pension Trust), which was established by the Company for the pooled investment of assets for various qualified pension plans sponsored by the Company. The Pension Trust is maintained by The Northern Trust Company, as trustee.

The Pension Trust investments are stated at fair value, in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures*.

**GERBER LIFE INSURANCE
COMPANY RETIREMENT PLAN**

Notes to Financial Statements

December 31, 2013 and 2012

Purchases and sales of securities are recorded on a trade-date basis. Interest and other income are recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation/depreciation includes the Pension Trust's gains and losses on investments bought and sold as well as held during the year.

(c) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries; (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries.

Benefits under the Plan for employees or their beneficiaries are based on the employee's years of credited service and highest average compensation earned during five consecutive years. The accumulated plan benefits for active employees are based upon years of credited service during the year ending on the date as of which the benefit information is presented (the valuation date). Benefits payable under all circumstances – retirement, death, disability, or termination of employment – are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary, Towers Watson, and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations as of December 31, 2013 and 2012 were as follows:

Life expectancy of participants	RP-2000 Mortality Tables
Retirement age	Probabilities varying by age
ASC 960 discount rate	7.80% and 7.00% respectively

Assumption changes from Plan year 2012 within the calculation of the actuarial present value of accumulated plan benefits are primarily driven by the decrease in the ASC 960 discount rate. These rates are consistent with the long-term expected return on assets. The mortality table of RP-2000 remains the same for 2013 and 2012; however, mortality projections have been changed in 2013 from 2028 to 2029 for preretirement participants and from 2020 to 2021 for postretirement participants.

The foregoing actuarial assumptions used are based on the presumption the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

COMPANY RETIREMENT PLAN**

Notes to Financial Statements

December 31, 2013 and 2012

(d) *Administrative Expenses*

The Plan allows for administrative expenses such as trustee fees, investment management fees, actuarial valuation fees, accounting fees, and recordkeeping fees to be paid from Plan assets. Effective January 1, 2013, the administrative expenses are being paid by the Company as allowed per the Plan document.

(e) *Payment of Benefits*

Benefit payments to participants are recorded upon distribution.

(f) *Use of Estimates*

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosures of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

(g) *Risks and Uncertainties*

The Pension Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate risk, market risk and credit risk. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and those changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

(h) *Derivative Financial Instruments*

The Plan accounts for derivatives and hedging activities in accordance with ASC 815, *Derivatives and Hedging*, which requires that all derivative instruments not qualifying for hedge accounting be recorded on the statements of net assets available for benefits at their respective fair values.

The Company uses derivatives for the benefit of the plans in the Pension Trust as a tool to reduce risk and as an investment strategy. The Pension Trust will enter into the following types of derivative instruments: interest rate swaps, credit default swaps (CDS), equity swaps, commodity swaps, financial futures, commodities futures, foreign exchange forward contracts and options, and swaptions and options. The derivative instruments outstanding as of period-end and the amounts of realized and unrealized gains and losses, as well as other income on derivative instruments during the period (as disclosed in the derivatives tables in note 7), serve as indicators of the volume of derivative activity for the Pension Trust. Derivative strategies involve risk and like other

**GERBER LIFE INSURANCE
COMPANY RETIREMENT PLAN**

Notes to Financial Statements

December 31, 2013 and 2012

investments, can lose money. The impact on Pension Trust performance can be positive or negative, and will vary depending on market movements.

The Company manages the Pension Trust's interest rate risk using interest rate swaps and/or US Treasury futures (interest rate hedge). The objective of the interest rate hedge is to lengthen the effective duration of the Pension Trust's assets to better match its defined benefit obligations, thereby protecting the funded ratio of the Pension Trust as interest rates fluctuate. Interest rate swaps used in this manner adjust interest rate and yield curve exposures and substitute for physical securities.

The Company also uses derivatives as a substitute for physical securities in order to gain exposure to certain asset classes. Using derivatives instead of physical securities may be a more efficient means to gain exposure to an index or a market sector due to its characteristics of increased liquidity and reduced transaction costs. Using derivatives may also reduce the need to sell assets when there is a difficult trading environment. Swaps and futures are used to create credit, equity, and commodities exposure. Commodities exposure may only be obtained through the use of either futures or swaps derivative instruments, which is industry standard.

The Company uses a mix of equity, fixed income and commodity futures to securitize a large cash position. Use of these derivatives enables the cash of the Pension Trust to earn a return as if it were invested in the various asset classes as defined by the strategic asset allocation. It allows the Pension Trust to retain liquidity and flexibility, while still earning equity, fixed income, or commodity returns.

The Company uses derivatives to execute portable alpha strategies. Portable alpha strategies involve the use of futures or swaps to provide market exposure in equities, fixed income and commodities, combined with investment in market neutral total return strategies. Use of derivatives in this manner enables the Pension Trust to use market neutral strategies to earn an active return, while still complying with the strategic asset allocation.

The Company manages credit risk through use of CDS. These derivatives are used to manage credit exposure without buying or selling securities outright. Written CDS increase credit exposure (selling protection), obligating the portfolio to buy bonds from counterparties in the event of a default. Purchased CDS decrease exposure (buying protection) providing the right to "put" (sell) bonds to the counterparty in the event of a default.

The Company manages the foreign currency risk inherent in international equity portfolios through the use of foreign exchange forwards, which are foreign exchange transactions that have settlement periods longer than three days. The Company also uses foreign exchange forwards and currency options as an investment strategy.

Counterparty risk for swaps and forwards, that are not cleared through a central exchange, is mitigated through the use of International Swaps and Derivatives Association (ISDA) standardized agreements that require gains and losses owed to and from the counterparty to be agreed daily, and gains or losses to be collateralized with cash. For futures, the gain (loss) is calculated and funds are transferred to and from the Pension Trust on a daily basis, based on the prior day's market valuation.

Notes to Financial Statements

December 31, 2013 and 2012

The types of counterparties are large banks and brokers, and the investment managers each have netting arrangements within their accounts to reduce the exposure to any single counterparty.

Holding derivatives has a significant impact on cash flow. Daily mark to markets and accumulated gains and losses can be large, depending on the volatility of the markets. The Company has maintained liquidity necessary to settle any losses, regardless of the severity of the market change. In addition, the Pension Trust has the ability to borrow from the Company through an interest-free loan, if needed, to cover cash flow needs.

(i) Foreign Currency

The Pension Trust's investment securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at the date of valuation. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions.

The Pension Trust does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net appreciation and depreciation from investments.

(3) Funding Policy

The Company's general funding policy is to make contributions to the Plan for each plan year in an amount not less than the minimum required contribution under ERISA, and to target 100% funded status on a Pension Protection Act (PPA) basis. This will not exceed the maximum tax-deductible contribution. The minimum and maximum contributions are calculated on an annual basis by the Plan's actuary. No contributions were made to the Plan during the year ended December 31, 2013 and met the Company's policy.

(4) Plan Termination

Subject to the freezing of the Plan effective December 31, 2004, all participants stopped accruing benefits at that time. The Plan was merged into the Nestlé Pension Plan as of December 31, 2013.

(5) Trustee Certifications

The plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-5 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the plan administrator has obtained a certification from The Northern Trust Company, the trustee of the Plan, as of December 31, 2013 and 2012 and for the year ended December 31, 2013 that all of the information provided by them is complete and accurate. Information included in the accompanying financial statements and notes thereto, as to investments and investment income (loss), is presented in reliance upon those certifications, with the exception of the Pension Trust's investments in

real estate funds, hedge funds, and venture capital and partnership funds. These investments are held by the investment fund managers, who report the net asset values of the Pension Trust's interests to the Company and trustee on a periodic basis. Information included in the accompanying financial statements related to these funds is based upon these net asset values as of December 31, 2013 and 2012.

(6) Parties in Interest

During 2013 and 2012, Nestle in the USA Pension Trust had parties in interest that included Plan sponsor, trustee, investment advisory, legal, actuarial, and administrative service providers. The fees paid by the Pension Trust to these parties-in-interest were \$16,730,905 in 2013. The Plan's share of these expenses was approximately 0.2% for the Plan year ended 2013. In addition, the Pension Trust also invests in the common stock of The Northern Trust Company. The fair value of this investment was \$1,555,000 and \$1,254,000 in 2013 and 2012, respectively. Furthermore, the Pension Trust acquired a Northern Trust corporate bond with a fair value of \$578,901 in 2013.

(7) Interest in Nestlé in the USA Pension Trust

The assets of the Plan are invested in the Pension Trust, in which the assets of the Plan are combined with the assets of other affiliated Company plans for investment purposes.

Pursuant to the trustee's method of allocating the investment holdings between the plans, contributions into the Pension Trust are treated as additions in the Pension Trust, withdrawals are treated as deductions in the Pension Trust, and investment income (loss) is allocated proportionately. Accordingly, the value of the Plan's investment in the Pension Trust is equal to the Plan's interest in each applicable investment increased or decreased by the Plan's allocated share in income, gains, and losses attributable to each applicable investment, which share is generally based upon the Plan's respective share of the Pension Trust's combined net assets available for benefits each month before investment income (loss) and net appreciation (depreciation) in the fair value of investments. Those investment expenses of the Pension Trust, which can be specifically identified as being applicable to the Plan, are charged to the Plan. The remaining investment expenses are allocated to the Plan based on the Plan's respective share of the Pension Trust's combined net assets available for benefits on a monthly basis.

Notes to Financial Statements

December 31, 2013 and 2012

As discussed in note 2(h), the Pension Trust uses derivative financial instruments as part of its investment strategy. Refer to note 8 for a description of valuation methodologies. Gains and losses on derivative financial instruments are realized in investment income (loss) on a daily basis. As of December 31, 2013 and 2012, the Pension Trust held the following derivatives:

2012		
	Asset derivatives Fair value	Liability derivatives Fair value
Derivatives not accounted for as hedging instruments under ASC 815:		
Interest rate	\$ 41,873,183	(14,735,879)

Commodity	846,850	(1,251,147)
	<u>\$ 58,450,251</u>	<u>(23,382,514)</u>

The fair values of the derivatives are located within Unencumbered Investments held by the Pension Trust in other investments in assets and liabilities, cash and cash equivalents, fixed income, and equities. There is no concentration of derivatives in any of the categories. Swap valuations are also represented in the Pension Trust Receivables and Liabilities.

For the year ended December 31, 2013, the Pension Trust recognized in investment income the following:

2013		
	Amount of gain (loss)	Amount of other income (expense)
Derivatives not accounted for as hedging instruments under ASC 815:		
Interest rate	\$ (121,333,163)	9,305,685

(8) Fair Value Measurements

The Plan has adopted the guidance in ASC 820, which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The fair value framework requires the categorization of assets and liabilities into three levels based upon the assumptions (inputs) used to price the assets or liabilities. Level 1 provides the most reliable measure of fair value, whereas Level 3 generally requires significant judgment. The three levels are defined as follows:

- Level 1: Assets or liabilities that are valued based on unadjusted quoted prices in active markets that are accessible at measurement date.
- Level 2: Assets or liabilities that are valued based on observable inputs, other than those included in Level 1, based on quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in inactive markets, or financial instruments for which all significant inputs are observable; either directly or indirectly.
- Level 3: Assets or liabilities that are valued based on unobservable inputs, including the reporting entity's own analysis of the underlying economic data that market participants would factor into the pricing of the asset or liability.

**GERBER LIFE INSURANCE
COMPANY RETIREMENT PLAN**

Notes to Financial Statements

December 31, 2013 and 2012

Due to the Company's policy to diversify the holdings of the Pension Trust portfolio, there is no significant concentration of investments within any particular class of investments included above. The valuation methodologies utilized by the Plan and Pension Trust for the above investments as of December 31, 2013 and 2012, are as follows:

- (a) Based on quoted market prices in active markets
- (b) Based on investment manager or industry pricing services over investments. Certain fixed income pricing is on a bid-evaluation basis. Institutional bid evaluations are estimated prices. Pricing vendors use models, which are generally proprietary, to arrive at the estimated prices. These prices represent the price a dealer would pay for a security. Model inputs vary depending on the type of security, but typically include trade data, institutional bids, comparable trades, dealer quotes, and news media. Market data is provided by multiple independent sources, including primary and secondary dealers, portfolio managers, and research analysts.

Collateralized mortgage models are based on trade and quote activity of bonds with similar features including issuer, vintage, prepayment speeds, and purpose of the underlying loan (first or second lien).

Cash equivalents include short term fixed income instruments whose valuations are determined based upon maturity date, issue date, and credit ratings.

Commingled Funds are valued based on the net asset value of the fund as determined by the investment manager. The net asset value is the market value of all of the securities owned by a fund, minus its total liabilities divided by the number of shares issued. There are no redemption restrictions that would impact the liquidity of the fund. These funds are valued and traded at the net asset value on a daily basis.

U.S. Treasuries are priced by obtaining feeds from various live data sources including market makers and interdealer brokers.

Currency forwards use quoted foreign exchange rates in an active market or exchange. Over-the-counter options are valued using bid, ask/offer quotes that are binding and corroborated. Swaps are valued using the discounted cash flow method. The two legs (fixed and floating) are priced independently as the present value of their expected cash flows.

- (c) Certain fixed income securities (primarily certain collateralized obligations) are valued based upon evaluated prices using unobservable inputs (i.e., extrapolated data, proprietary models, and indicative quotes).
- (d) Investments in real estate funds, hedge funds, and private equity funds are based on the net asset values reported to the Company and trustee by the fund managers or the general partners of the fund. These net asset values are based on the fair value of the underlying portfolio investments held by the investment fund.

**GERBER LIFE INSURANCE
COMPANY RETIREMENT PLAN**

Notes to Financial Statements

December 31, 2013 and 2012

These fair values are determined by a variety of methods: real estate investments are valued at appraised values plus undistributed rental and interest income; hedge funds are valued by the investment manager using quoted market prices of underlying investments and evaluations supplied by industry pricing vendors; and private equity investments are valued using income and market based analysis.

Management has used the net asset value as a practical expedient to estimate the fair value of these investment funds. Limited partnerships are held until they unwind, which is typically ten years from the date of entering the investment. As of December 31, 2013 and 2012, unfunded commitments were \$197 million and \$215 million, respectively. For investments in hedge funds and real estate that allow partial and/or full redemptions, upon notice and upon the approval of the fund manager, the funds are typically paid out over multiple quarters. The redemption approval is based on factors including market conditions and other redemption requests in the queue. There are no gates or lock ups that would substantially impact the liquidity of the investments for either complete or partial liquidations. Redemptions occur at fair value, which is based on the most recent net asset value prior to the redemption. The Company currently has no intention of selling any of these investments at an amount other than the net asset value.

- (e) Fair value is based on the net asset value of the Core Collateral Fund as determined daily, by the trustee, using market prices of underlying investments and evaluations supplied by industry pricing vendors.

The Company's Level 3 investments are in venture capital, infrastructure, real estate, hedge funds, and fixed income partnerships. These investments are primarily limited partnership investments and are fair valued almost entirely using an audited net asset value (NAV). The fair values of Level 3 investments are estimated using techniques that may rely heavily on the investment managers' assumptions and qualitative observations. The Company uses the fair valuations from the investment managers and reviews and validates their valuation methods and processes throughout the year. The Company did not make any adjustments to any valuations. The Company's Director of Retirement Investments is responsible for ensuring accurate fair valuations of the Level 3 investments. The Director of Retirement Investments reports to the Chief Financial Officer of the Company. The Company establishes and follows valuation policies and procedures. The Company employs specialized investment consultants who perform due diligence on the valuation policies and procedures of the general partners before making the investments and periodically thereafter. Using their own procedures and systems, they evaluate the reasonableness of the partnerships' NAVs on a monthly and quarterly basis using industry comparisons, operating performance metrics and they conduct frequent reviews with the general partners. The Company periodically evaluates the fair valuation policies and procedures of these specialized investment consultants and requests and reviews the valuation policies of the investment managers and general partners annually. In addition to the funds and partnerships, in 2012, certain collateralized mortgage obligations are reported in the Level 3 investments as they were valued using nonbinding broker quotes.

* The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another.

The significance of transfers between levels is evaluated based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. There were no transfers into or out of Level 3 in 2013. While not considered significant, a transfer of \$6 million of fixed income investments was made from Level 3 to Level 2 in 2012. This is due to the inclusion of observable inputs in pricing the investments resulting in improved pricing transparency. There were no significant transfers into or out of Level 1 during 2013 or 2012.

(9) Tax Status

The Internal Revenue Service (IRS) has determined and informed the Plan by a letter dated June 20, 1995, and updated with a letter dated June 11, 2013, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since the most recent determination letter filing submission; however, the Plan Administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

**GERBER LIFE INSURANCE
COMPANY RETIREMENT PLAN**

Notes to Financial Statements

December 31, 2013 and 2012

U.S. generally accepted accounting principles require the Plan Administrator to evaluate tax positions taken by the Plan. The financial statement effects are recognized when the Plan has taken an uncertain position that more likely than not would be sustained upon examination by the IRS. The Plan Administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2013, there are no uncertain tax positions taken or expected to be taken.

The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan Administrator believes the Plan is no longer subject to income tax examinations for years prior to 2010.

(10) Subsequent Events

The Plan has evaluated subsequent events through October 8, 2014, the date these financial statements were available for issuance. Except as otherwise noted throughout the notes to financial statements, there are no material subsequent events to report.

Schedule SB - Statement by Enrolled Actuary

Plan Sponsor	Nestlé USA, Inc.

Plan Name	Gerber Life Insurance Co. Retirement Plan
Valuation Date	January 1, 2013
Enrolled Actuary	Thad Summersett
Enrollment Number	14-07261

The actuarial assumptions that are not mandated by IRC § 430 and regulations, represent the enrolled actuary's best estimate of anticipated experience under the plan, subject to the following conditions:

The actuarial valuation, on which the information in this Schedule SB is based, has been prepared in reliance upon the employee and financial data furnished by the plan administrator and the trustee. The enrolled actuary has not made a rigorous check of the accuracy of this information but has accepted it after reviewing it and concluding it is reasonable in relation to similar information furnished in previous years. The amounts of contributions and dates paid shown in Item 18 of Schedule SB were listed in reliance on information provided by the plan administrator and/or trustee.

Gerber Life Insurance Company Retirement Plan

Plan Provisions

The most recent amendment reflected in the following plan provisions was effective in 2010.

Covered Employees	Salaried employees of Gerber Life Insurance Company
Participation Date	Age 21 and one year of service. Closed to new entrants effective December 31, 2004.
Type of plan:	Frozen pension equity plan

Definitions

Vesting service	The number of completed full plan years of employment with the Company or any Affiliate in which the employee works 975 hours. Service prior to January 1, 1998 is based on prior plan provisions. Automatic vesting was granted on September 1, 2007.
Credited service	Same as vesting service. Service was frozen as of December 31, 2004.
Pensionable earnings	Total compensation including section 125 and 401(k) contributions but excluding deferred compensation.
Covered compensation	Average of Social Security wage bases over the 35 years prior to the participants Social Security Normal Retirement Age (SSNRA).

Accumulated benefit:

Lump Sum Benefit: A participant's Lump Sum Benefit is equal to the following calculated as if the person terminated employment on December 31, 2004:

1. The sum of base credits (see below) times Final Average Pay
plus
2. The sum of Excess Credits (see below) times Final Average Pay greater than covered compensation

**Sum of Attained
Age and Year of
Credited Service
During the Plan**

<u>Year</u>	<u>Base Credits</u>	<u>Excess Credits</u>
0 – 34	2.0%	1.0%
35 – 39	3.0%	1.5%
40 – 44	4.0%	2.0%
45 – 49	5.0%	2.5%
50 – 54	6.0%	3.0%
55 – 59	8.0%	4.0%
60 +	10.0%	5.0%

Adjusted Lump Sum Benefit: A participant's Adjusted Lump Sum Benefit is equal to the Participant's Lump Sum Benefit increased by 5% per year from the earlier of the date of the Participant's termination of employment and December 31, 2004 to the Participant's Annuity Starting Date.

Pension Equity Benefit: The monthly amount of each Participant's Pension Benefit is equal to the amount, determined on an Actuarial Equivalent basis, of the Participant's Adjusted Lump Sum Benefit expressed as a life annuity payable on the Participant's Annuity Start Date.

Grandfathered Benefit: The benefit, determined in accordance with the plan in effect prior to 2002, for participants who were accruing benefits under the prior plan as of January 1, 2002.

Eligibility for Benefits

Normal retirement	Retirement on SSNRA
Early retirement	Retirement before NRD and on or after both attaining age 57 and completing three years of vesting service
Postponed retirement	Retirement after SSNRA
Vested termination	Termination for reasons other than death or retirement after completing three years of vesting service
Disability	Permanent and total disability on or after both attaining age 50 and completing fifteen years of vesting service
Preretirement death benefit	Death while eligible for normal, early, postponed, or deferred vested retirement benefits, with a surviving spouse on or after completing three years of vesting service

Benefits Paid Upon the Following Events

Normal retirement (NRD)	Accrued benefit (greater of Pension Equity Benefit and Grandfathered Benefit) payable immediately.
Early retirement	Accrued benefit determined as of early retirement date is equal to the greater of (a) and (b) below: (a) The Grandfathered Benefit reduced according to the prior plan provision. (b) Actuarial equivalent of the Adjusted Lump Sum Benefit.
Postponed retirement	Accrued benefit (greater of Pension Equity Benefit and Grandfathered Benefit) payable immediately.
Vested termination	Accrued benefit determined as of termination date, actuarially reduced for commencement of payments prior to NRD
Disablement	Accrued benefit determined as of disability retirement date, reduced by certain other benefits provided by or at the expense of the company.
Preretirement death	100% of the lump sum balance as of time of death or an actuarially equivalent annuity. For grandfathered participants, spouse will receive a survivor benefit equal to the greater of the survivor benefit determined under the PEP formula or the prior plan formula.

Other Plan Provisions

Forms of payment

Normal form	Life annuity
Optional forms	100%, 75%, or 50% contingent annuitant; five, ten or fifteen year certain and life; level income; lump sum
Pension increases	None
Plan participants' contributions	None
Maximum on benefits and pay	All benefits and pay for any calendar year may not exceed the maximum limitations for that year as defined in the Internal Revenue Code. The plan provides for increasing the dollar limits automatically as such changes become effective. Increases in the dollar limits are assumed for determining pension cost but not for determining contributions.

Optional Form Conversion Factors¹

Optional form conversion factors are the actuarial equivalent factors determined using the following assumptions.

	Mortality Assumption	Interest Assumption
▶ Single Sum distributions (from Grandfathered Benefit)	Section 417 mortality	Section 417 interest rates
▶ Annuity forms of payment (from Pension Equity Benefit)	GATT Mortality Table frozen as of earlier of DOT and 12/31/2004 ²	GATT Interest Rate (yield on 30-year Treasury Bonds) from November of previous year frozen as of earlier of DOT and 12/31/2004 ²
▶ All others	1983 Group Annuity Mortality Table ³	8.5%

Notes

- Information shown applies to the majority of participants covered under this plan; some small groups of grandfathered participants (CWT, Indianapolis Hourly, Novartis Consumer Health and Ciba Salaried) have optional forms provided on a separate basis. See plan document for more information.
- Plan Year 2000 – 6.15% and 1983 GAM Table (blended 50% male/50% female)

Covered pay

Average of prior three years' pensionable earnings, increased with one year's salary increase assumption.

Administrative expenses	0.25% of beginning-of-year fair market value of assets for the Nestlé Pension Plan and Nestlé Hourly Retirement Plan, 0.75% for the Nestlé Infant Nutrition Pension Plan, and 1.00% for the Gerber Life Insurance Company Retirement Plan.
At-risk assumptions	For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year. In addition, these participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit.
Timing of benefit payments	Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during the year
Actuarial value of assets	Market value of assets, including contributions receivable
Funding policy	Nestlé USA's general funding policy is to make contributions for each plan year in an amount not less than the minimum required contribution under ERISA and to target 100% funded status on a Pension Protection Act (PPA) basis. This will not exceed the maximum tax-deductible contribution. Nestlé may vary its contribution level, if appropriate to its tax and cash position and the funded status.
Benefits not valued	All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions with Nestlé and is not aware of any significant benefits required to be valued that were not. Small benefits with present values up to \$5,000 may be paid in a single lump sum payment. Such lump sums are not explicitly valued as such; rather, such participants' benefits are valued using the benefit choice assumptions described above.
Change in assumptions and methods since prior valuation	The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements. The ASC 960 discount rate was changed from 8.50% to 7.00% to reflect Nestlé's long-term expected rate of return on plan assets.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
