DIEBOLD, INCORPORATED RETIREMENT PLAN FOR SALARIED EMPLOYEES

Notes to Financial Statements

For Years Ended December 31, 2013 and 2012

NOTE 1: DESCRIPTION OF THE PLAN

The following brief description of the Diebold, Incorporated Retirement Plan for Salaried Employees (the "Plan") is provided for general information purposes only. Participants and users of the financial statements should refer to the Plan document for more complete information.

(a) **General**

The Plan is a defined benefit pension plan sponsored by Diebold, Incorporated (the "Company") that covers substantially all salaried employees hired prior to July 1, 2003. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA"). The Plan has been amended to either provide additional benefits or options, or to comply with changes in the law. The Plan was closed to new hires effective July 1, 2003. In July 2013, the Company's board of directors approved freezing the Plan benefits effective as of December 31, 2013 for U.S.-based employees who joined the Company prior to July 1, 2003.

(b) **Retirement Dates**

The normal retirement date of a participant is the later of the 65th anniversary of his or her date of birth or the 5th anniversary of the date the associate commenced participation in the Plan. A participant who has attained age 50 and whose combined age and years of credited service equals or exceeds a total of 70, or a participant who has completed 30 or more years of benefit service regardless of attained age, may retire at any time thereafter under early retirement. A participant who has completed 15 or more years of credited service and becomes incapacitated by total and permanent disability may retire and receive a disability retirement benefit. If, for any reason other than death, the services of a participant are terminated after completion of at least five years of vesting service with the Company but prior to normal or early retirement, such participant shall have a deferred vested benefit to commence distribution at the normal retirement date.

(c) **Credited Service**

Credited service is the total number of years of service accumulated by a participant prior to his or her retirement. A participant accumulates credited service based upon the total period of continuous service covered under the Plan. For each full year of continuous service, a participant receives credit for one year of credited service. The maximum number of years of credited service cannot exceed 30 years. No additional credited service accrues after December 31, 2013.

(d) **Trust Fund Management**

Under the terms of the trust agreement between The Bank of New York Mellon (the "Trustee") and the Plan, the Trustee manages the trust funds and executes transactions on behalf of the Plan. All investments and a portion of the investment income included in the financial statements have been reported to the Plan by the Trustee for the years ended December 31, 2013 and 2012 as having been determined through the use of fair values of all assets of the trust fund.

DIEBOLD, INCORPORATED RETIREMENT PLAN FOR SALARIED EMPLOYEES

Notes to Financial Statements

For Years Ended December 31, 2013 and 2012

(e) Vested Benefit

Vested benefit is the retirement benefit to which a participant, whose service terminated after his or her vesting date, is entitled. After five years of vesting service, such vested benefit is 100 percent of the participant's accrued benefit derived from the Company contributions. A participant earns vesting service based upon the total period of service covered under the Plan including service after the Plan freeze date of December 31, 2013.

(f) Normal Retirement Benefit

The normal monthly retirement benefit is equal to the greater of:

- Benefit calculated as 0.8 percent of final average monthly compensation, as defined, up to covered compensation, as defined, plus 1.25 percent of final average monthly compensation in excess of covered compensation, multiplied by credited service (maximum of 30 years);
- Sixteen dollars per month per year of credited service, plus 20 percent of the portion of final average monthly compensation which exceeds \$1,200 (reduced proportionately for credited service under 30 years); or
- Accrued benefit as of July 31, 1991 under the Plan prior to the Plan amendment, which became effective January 1, 1992.

In addition, all participants retiring after January 1, 1992, receive a monthly retiree medical supplement equal to \$4.20 times years of credited service up to a maximum of 30 years.

(g) Death Benefit

A surviving spouse of a vested participant who dies prior to retirement is entitled to a spouse's benefit. The spouse's benefit is a pension payable for the life of the spouse equal to the amount that would have been payable to the surviving spouse had the participant retired immediately preceding his or her death and elected a 50 percent joint and survivor option.

(h) Additional Benefit

The Company implemented a Voluntary Early Retirement Program ("VERP") in July 2013 which offered an enhanced benefit that included an additional two years of service and two years of age along with a lump sum form of payment not otherwise available in the Plan. Eligible individuals had to have age plus vesting service greater than or equal to 70 as of July 1, 2013 and they had to retire as of December 1, 2013 except for certain key employees that were contracted to remain beyond the retirement date.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of Accounting

The accompanying financial statements of the Plan are prepared on the accrual basis of accounting and are in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP").

DIEBOLD, INCORPORATED RETIREMENT PLAN FOR SALARIED EMPLOYEES

Notes to Financial Statements

For Years Ended December 31, 2013 and 2012

(b) Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Due to investments in partnerships within the Diebold, Incorporated Master Trust ("Master Trust") not being traded on an active market, the values as of any particular date are not necessarily indicative of amounts that may ultimately be realized as a result of future sales or other dispositions of investments held. The estimated values may differ significantly from the values that would have been used had an active market for the securities existed. Actual results could differ from those estimates.

(c) Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of accumulated plan benefits is determined by the Plan's actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment. Significant assumptions underlying the actuarial computations include:

- Assumed retirement based on a table of retirement rates beginning at age 50 through age 70 which result in an average retirement age of 62;
- Assumed valuation interest rates for 2013 and 2012 of 7.95 percent and 8.05 percent, respectively compounded annually;
- Assumed turnover and disability rates based on published statistical data and tables;
- Assumed mortality rates based upon the RP-2000 Combined Healthy Mortality Table ("RP-2000") with separate male and female rates, projected to the valuation date (January 1, 2014 and 2013) for December 31, 2013 and 2012 results.

The actuarial cost method used by the actuary is the unit credit cost method. This is a method under which an accrued benefit is calculated as of the beginning of the year and as of the end of the year for each benefit that may be payable in the future. The accrued benefit is based on the Plan's accrual formula and upon service as of the beginning or end of the year. For benefits where the Plan's accrual formula is not relevant, benefits are assumed to accrue on a straight-line basis over the period during which the employee earns credited service.

The December 31, 2013 calculation of the actuarial present value of accumulated benefits contains a \$3,481,750 change in actuarial assumption due to a 0.10 percent decrease in the interest discount rate and a change in the mortality table from RP-2000 projected to the valuation date (January 1, 2013) to RP-2000 projected to the valuation date (January 1, 2014).

DIEBOLD, INCORPORATED RETIREMENT PLAN FOR SALARIED EMPLOYEES

Notes to Financial Statements

For Years Ended December 31, 2013 and 2012

The December 31, 2012 calculation of the actuarial present value of accumulated benefits contains a \$7,598,229 change in actuarial assumptions due to a 0.20 percent decrease in the interest discount rate and a change in the mortality table from RP-2000 projected to the valuation date (January 1, 2012) to RP-2000 projected to the valuation date (January 1, 2013).

NOTE 3: FUNDING POLICY

Company contributions of \$5,000,000 were made during 2014 to the Plan for the year ended December 31, 2013. The Company met the minimum funding requirements of ERISA for 2013 and 2012.

NOTE 4: PLAN TERMINATION

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA.

In the event of permanent termination of the Plan, the assets then remaining in the trust fund, subject to provision for expenses incident to such termination, are allocated in the following priority: first, to retirees who began receiving benefits at least three years before termination, including benefits to individuals who would have received benefits for at least three years had they retired that long ago; second, to all other individuals guaranteed under the termination insurance provisions of ERISA; third, among all other non-forfeitable benefits; and fourth, among all other benefits under the Plan. In the event the Plan assets are not sufficient to accomplish the above method of termination, the assets are distributed pro rata to participants based on the present value at termination date of their individual benefits.

In addition, certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC") if the Plan terminates. Generally the PBGC guarantees most vested normal retirement age benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling on the amount of an individual's monthly benefit that the PBGC guarantees.

NOTE 5: INVESTMENTS

The Company has adopted a pension investment policy designed to achieve an adequate funding status based on expected benefit payouts and to establish an asset allocation that will meet or exceed the return assumption while maintaining a prudent level of risk. The Company utilizes the services of an outside consultant in performing asset / liability modeling, setting appropriate asset allocation targets along with selecting and monitoring professional investment managers.

DIEBOLD, INCORPORATED RETIREMENT PLAN FOR SALARIED EMPLOYEES**Notes to Financial Statements****For Years Ended December 31, 2013 and 2012**

The Company has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's ("DOL") Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, all investment information is certified complete and accurate or derived from information certified complete and accurate by the Trustee as of and for the years ended December 31, 2013 and December 31, 2012, with the exception of certain partnership/joint venture interests within the Master Trust. The fair value of these investments within the Master Trust was \$24,259,176 and \$24,988,446 as of December 31, 2013 and 2012, respectively, with related appreciation of \$3,818,426 and \$2,970,734, respectively

Assets of the Plan are maintained on a commingled basis with assets of one other pension plan of the Company in a Master Trust for investment purposes, with the allocation of assets, earnings, and expenses among the funds maintained by the Trustee for the years ended December 31, 2013 and 2012. The Plan's equitable share of the Master Trust's assets was approximately 96.1 percent and 96.9 percent at December 31, 2013 and 2012, respectively.

The assets of the Master Trust as reported by the Trustee at December 31, 2013 and 2012 were:

NOTE 6: FAIR VALUE MEASUREMENTS

The fair value framework described in Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 820, *Fair Value Measurements*, requires the categorization of assets and liabilities into three levels based upon the assumptions (inputs) used to value the assets or liabilities. Level 1 provides the most reliable measure of fair value, whereas Level 3 generally requires significant management judgment.

DIEBOLD, INCORPORATED RETIREMENT PLAN FOR SALARIED EMPLOYEES

Notes to Financial Statements

For Years Ended December 31, 2013 and 2012

The three levels are defined as follows:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2: Unadjusted quoted prices in active markets for similar assets or liabilities, unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active or inputs, other than quoted prices in active markets that are observable either directly or indirectly.

Level 3: Unobservable inputs for which there is little or no market data.

Valuation methodologies used by the Master Trust are as follows:

Level 1 - Fair value of investments categorized as Level 1 are determined based on period end closing prices in active markets on which the individual securities are traded.

Level 2 - Fair value of investments categorized as Level 2 are determined based on the latest available ask price or latest trade price if listed. The fair value of unlisted securities is established by fund managers using the latest reported information for comparable securities and financial analysis. If the manager believes the fund is not capable of immediately realizing the fair value otherwise determined, the manager has the discretion to determine an appropriate value. Common collective trusts are valued at their net asset value ("NAV") which is used for expedience purposes, on the last day of the period.

Level 3 - Fair value of investments categorized as Level 3 represent the Plan's interest in private equity, hedge and property funds. The fair value for these assets is determined based on the NAV, which is used for expedience purposes, as reported by the underlying investment managers.
