NOTES TO FINANCIAL STATEMENTS

Eaton Corporation Pension Plan for Eaton Corporation Employees

1 Description of Plan

The following description of The Eaton Corporation Pension Plan for Eaton Corporation Employees (the Plan) provides only general information. Participants should refer to the Plan document and summary plan descriptions, which are available from the Company's Human Resources Department upon request, for a complete description of the Plan's provisions.

General:

The Plan is a defined benefit plan that covers substantially all current and former salaried and hourly employees of Eaton Corporation's (the Company or the Plan Sponsor) United States operations.

Effective January 1, 2002, the Company amended the Plan to provide that the majority of non-bargaining and non-Actuator & Sensor employees hired subsequent to that date would participate in the Eaton Personal Pension Account (EPPA) Cash Balance Plan.

In addition, participants who elected the cash balance plan as a one-time choice provided on January 1, 2003, also participate in the EPPA plan. The remainder of the participants remained covered by the same plan as of December 31, 2002 (an Hourly, Traditional, or A&S Plan).

The Plan has been amended to exclude from participation in the Plan certain employees who are classified on and after April 1, 2013 as new hires, rehires and/or certain transfers. Effective July 1, 2013, employees in the Beaver Salaried Employees Association collective bargaining unit shall remain Eligible Employees under the Plan, however new hires or rehires shall not participate unless they are rehired under a collective bargaining agreement with the Union.

In accordance with PPA 2006, if the funded status of the Plan falls below 80% but is above 60%, no more than 50% of a participant's pension benefit may be paid as a lump sum (including rollovers). The remaining 50% must be taken as an annuity. PPA requires that the funded status of the Plan be formally measured as of the first day of the Plan Year. As of January 1, 2009 the Plan's Adjusted Funding Target Attainment Percentage (AFTAP) was 70.00%. Therefore, the limitations on lump sum distributions were implemented for those who retired with a pension commencement date on or after April 1, 2009. For this Plan, benefit restrictions applied from January 1, 2013 based on a Presumed AFTAP of less than 80% until April 30, 2013, when the Plan's 2013 AFTAP of 90.46% was certified. Therefore, the limitations on lump sum distributions were lifted for those who retire with a pension commencement date on or after May 1, 2013.

1 Description of Plan, Continued

The Moving Ahead for Progress in the 21st Century Act (MAP-21) amended the Pension Protection Act of 2006 (PPA 2006). Under MAP-21, for 2012 and later Plan Years, the otherwise applicable Segment Rates for determining the Funding Target and Target Normal Cost for minimum contribution and benefit restriction purposes were constrained to a corridor around an average of Segment Rates for a 25-year period. The corridor was 90% to 110% for the 2012 Plan Year, increasing by 10% each year to an ultimate corridor of 70% to 130% for 2016 and later Plan Years. For the 2012 Plan Year, plan sponsors could elect to not reflect the MAP-21 provisions for either i) all purposes, or ii) for benefit restriction purposes only. The Company elected to not reflect the MAP-21 provisions for benefit restriction purposes only. The Highway and Transportation Funding Act of 2014 (HATFA) extended the 90% to 110% corridor through 2017, with the 10% adjustments beginning in 2018. The Company had the option to apply the new rates under HATFA for the minimum required contribution for the 2013 Plan Year and elected to do so.

Benefit multiplier increases to Appendices EU, CL, CO, FW and WR and increases to Appendices AJ, EU, CH, CL, FW and WR occurring during the 2013 and 2012 Plan Years, respectively, have been reflected.

Funding Policy:

The Company makes contributions in amounts sufficient to maintain the Plan on a sound actuarial basis. The Plan has met the ERISA minimum funding requirements. The Company may also elect to make voluntary contributions to the Plan. The Company has the right to amend and/or terminate the Plan subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Certain Plan participants may elect to make contributions to the Plan each year based on a percentage of their compensation. Participants' accumulated contributions (including interest earned on those contributions) at December 31, 2013 and 2012 were \$4,166,434 and \$4,051,483, respectively, with interest rates on accumulated contributions ranging from 1.04% to 5% at December 31, 2013 and 1.40% to 5% at December 31, 2012.

Pension Benefits:

Participants are vested in their benefits earned under various methods defined in the Plan. Normal retirement age is 65. Participants may be entitled to early retirement payments based on the Plan Document. Forms of payment include lump sum options, and various annuity options depending if they have a spouse and what type of joint survivor option the participant chooses.

2 Summary of Significant Accounting Policies

Basis of Accounting:

The Plan's transactions are reported on the accrual basis of accounting.

Investment Valuation:

The fair value of the Plan's interest in the Eaton Corporation Master Retirement Trust (Master Retirement Trust) is based on the beginning of the year value of the Plan's interest in the Master Retirement Trust plus actual contributions and allocated investment income (loss) less actual distributions and allocated administrative expenses. Within the Master Retirement Trust, marketable securities are stated at fair value. Securities traded on a national securities exchange are valued at the closing price on the last business day of the Plan Year.

The fair value of participation units owned by the Master Retirement Trust in the collective trust funds is based on the closing price, as reported by the fund administrator on the last business day of the Plan's fiscal year. Fixed income securities consist of publicly traded United States and non-United States fixed interest obligations (principally corporate and government bonds and debentures). The fair value of corporate and government debt securities is determined through models that consider various assumptions, including time value, yield curves, credit ratings and current market prices. United States treasuries are valued at the closing price of each security.

Real estate and equity securities are securities that consist of direct investments in the stock of publicly traded companies. Such investments are valued based on the closing price reported in an active market on which the individual securities are traded. Investments in limited partnerships are valued at the last quarterly valuation received by the trustee, adjusted for cash flows. Notes are valued in accordance with a formula based on their rating, maturity and coupon. Shares of registered investment companies are valued at the closing price on the last business day of the Plan Year. Swaps and over the counter option contracts are valued based on the closing price of futures contracts or indices as available on Bloomberg or similar service and, additionally for options, the implied volatility of similar exchange-traded options.

Use of Estimates:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

NOTES TO FINANCIAL STATEMENTS

Eaton Corporation Pension Plan for Eaton Corporation Employees

2 Summary of Significant Accounting Policies, Continued

Actuarial Present Value of Accumulated Plan Benefits:

Accumulated Plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated Plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits for hourly employees under the Plan are based on employees' years of credited service multiplied by a monthly factor. The benefits for salaried employees in traditional plans are based on final average pay multiplied by a predetermined percentage and the employees' years of credited service. The benefits for employees in cash balance plans are based on the current value of the account balance.

Benefits payable under all circumstances-retirement, death, disability, and termination of employment are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from Plan assets are excluded from accumulated Plan benefits.

Administrative Fees:

The Company elected to pay certain administrative costs during 2013 and 2012, on behalf of the Plan. The amount of administrative costs paid by the Plan are accounted for in setting the assumed rate of return on investments.

Payment of Benefits:

Benefit payments to participants are recorded upon distribution.

Plan Termination:

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. Benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC). In the event that the Plan terminates, the net assets of the Plan shall be allocated among the participants and beneficiaries in accordance with the priorities mandated by ERISA. Whether a particular participant's accumulated Plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty, while other benefits may not be provided for at all. A full description of the defined benefit Plan termination priorities is available in the Plan Document.

Risks and Uncertainties:

The Plan's investment includes investments in exchange traded funds and collective funds holding securities with varying degrees of risk, such as interest rate, credit and overall market volatility risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and such changes could materially affect the amounts reported in the statements of net assets available for Plan benefits.

Plan contributions are made and the actuarial present value of accumulated Plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Subsequent Events:

Management evaluates events occurring subsequent to the date of the financial statements in determining the accounting for and disclosure of transactions and events that affect the financial statements.

Subsequent events have been evaluated through October 3, 2014, which is the date the financial statements were available to be issued.

4 Tax Status

The Plan has received a determination letter from the Internal Revenue Service dated March 11, 2013, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and, therefore, the related trust is exempt from taxation. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The Plan Sponsor believes the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken uncertain tax positions that more-likely-than-not would not be sustained upon examination by applicable taxing authorities. The Plan administrator has analyzed tax positions taken by the Plan and has concluded that, as of December 31, 2013 there are no uncertain tax positions taken, or expected to be taken, that would require recognition of a liability or that would require disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions. However, currently no audits for any tax periods are in progress. The Plan administrator believes that the Plan is no longer subject to income tax examinations for years prior to December 31, 2010.

5 Accumulated Plan Benefits

The Plan's actuary estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated Plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The accumulated Plan benefit information as of the beginning of the Plan Year is as follows:

	<u>January 1, 2013</u>
Actuarial present value of accumulated Plan benefits:	
Vested benefits:	
Participants currently receiving payments	\$ 699,457,954
Other participants	<u>1,265,930,808</u>
	1,965,388,762
Non-vested benefits	<u>45,241,635</u>
Total	<u>\$ 2,010,630,397</u>

The changes in actuarial present value of accumulated Plan benefits are as follows:

Balance as of January 1, 2012	\$ 1,907,372,484
Benefits accumulated	79,234,929
Interest	157,045,845
Benefits paid	(122,037,211)

Change in Actuarial Assumptions	(11,739,768)
Employee contributions	<u>317,755</u>
Balance as of January 1, 2013	<u>\$ 2,010,630,397</u>

NOTES TO FINANCIAL STATEMENTS

Eaton Corporation Pension Plan for Eaton Corporation Employees

5 Accumulated Plan Benefits, Continued

Significant assumptions underlying the actuarial computations are:

Actuarial cost method	Projected unit credit
Assumed rate of return on investments	8.50%
Salary Increase	3.00%

In addition, the following change assumptions were made since the last valuation:

Retirement and Employee Turnover	Assumed retirement and termination rates were updated as of January 1, 2013 based on an experience study performed in 2010 and a subsequent update during 2012.
Mortality basis	The mortality table has been changed from the IRS 2012 Static Mortality Table to the IRS 2013 Static Mortality Table.
Cash Balance interest crediting rate	The interest crediting assumptions changed from 4.00% for EPPA and 3.50% for A&S in 2012 to 2.90% for EPPA and 2.40% for A&S in 2013.
Lump Sums	The interest rate used to calculate lump sums decreased from 5.30% in 2012 to 4.60% in 2013.

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

6 Party-in-Interest Transactions

During 2013 and 2012, internal costs attributed to certain accounting and legal services and external fees for certain professional services were paid by the Company on behalf of the Plan, while the Plan paid fees for PBGC premiums, trustee, actuarial, investment management and other professional services.

7 Fair Value Measurements

ASC 820, which applies to financial assets and liabilities, establishes a framework for measuring fair value, establishes a fair value hierarchy based on inputs used to measure fair value, and expands disclosure about fair value measurements. Adopting this statement has not had an effect on the Plan's net assets available for benefits or changes in those net assets.

In accordance with ASC 820, the Plan categorized our financial instruments, based on the degree of subjectivity inherent in the valuation technique, into a fair value hierarchy of three levels, as follows:

- Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 - inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2013 and 2012.

Common Collective Trusts: Valued at the net unit value of units held by the trust at year end. The unit value is determined by the total value of fund assets divided by the total number of units of the fund owned. The equity investments in collective trusts are predominantly in index funds for which the underlying securities are actively traded in public markets with readily measurable prices. There are no unfunded commitments in the fund. There are no restrictions on purchases and sales, however, the non-US equity index funds do not have daily liquidity and are open for trading on previously announced days each month.

US Treasuries: Valued at the closing price of each security.

Partnership/Joint Ventures: Money made available for investment in innovative enterprises or research, especially in high technology, in which both the risk of loss and the potential for profit may be considerable. These securities are valued using outside valuations of the underlying assets.

Cash Equivalent: Primarily certificates of deposit, commercial paper and repurchase agreements.

NOTES TO FINANCIAL STATEMENTS

Eaton Corporation Pension Plan for Eaton Corporation Employees

7 Fair Value Measurements, Continued

Fixed Income Securities: These securities consist of publicly traded United States and non-United States fixed interest obligations (principally corporate and government bonds and debentures). The fair value of corporate and government debt securities is determined through models that consider various assumptions, including time value, yield curves, credit ratings and current market prices.

Real Estate and Equity Securities: These securities consist of direct investments in the stock of publicly traded companies. Such investments are valued based on the closing price reported in an active market on which the individual securities are traded. As such, the direct investments are classified as Level 1.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2013 (*Represents 100% interest in Master Retirement Trust*):

Schedule SB, Part V – Actuarial Assumptions and Methods and Plan Provisions

Future actuarial measurements may differ significantly from the current measurement presented in this report due to such factors as: plan experience different from that anticipated by the economic and demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements; and changes in plan provisions or applicable law. Due to the limited scope of this report, an analysis of the potential range of such future measurements has not been performed.

Prescribed Funding Assumptions and Methods

Funding interest rates

Current Year:	Segment Rates with four month lookback:	
	First Segment Rate	1.75%
	Second Segment Rate	4.62%
	Third Segment Rate	5.72%

In accordance with MAP-21, the first, second and third Segment Rates are constrained to a 85%-115% Corridor around the average Segment Rates for the 25-year period ending September 30, 2012, or **4.94%**, **6.15%** and **6.76%**, respectively, for minimum funding and benefit restrictions but not maximum tax-deductible purposes.

Effective Interest Rate	6.27%
(Based on MAP-21 rates)	

Prior Year:	Segment Rates with four month lookback:	
	First Segment Rate	2.06%
	Second Segment Rate	5.25%
	Third Segment Rate	6.32%

In accordance with MAP-21, the first, second and third Segment Rates were constrained to a 90%-110% Corridor around the average Segment Rates for the 25-year period ending September 30, 2011, or **5.54%**, **6.85%** and **7.52%**, respectively, for minimum funding but not benefit restrictions or maximum contribution purposes.

Effective Interest Rate	6.96%
(Based on MAP-21 rates)	

Mortality

Mortality tables mandated by PPA as specified in IRS Regulation 1.430(h)(3)-1, applied on a projected 7 years from the valuation date for annuitants and 15 years for non-annuitants.

Actuarial cost method

Unit Credit Method. The Funding Target is the present value of accrued benefits and based on compensation and service to date. The Target Normal Cost is the present value of benefits expected to be accrued during the current plan year, reflecting the effect of expected compensation increases during the year and including expected plan related expenses to be paid from plan assets during the year.

Non-Prescribed Funding Assumptions and Methods

Salary increase assumption

Wages and salaries are assumed to increase by 3.00% per annum.

Inflation

Annual inflation increase: 3.00%

Social Security

Annual increase in maximum wage base: 3.50%

Cash Balance interest crediting rate

The interest crediting rate for Appendix CB is assumed to be equal to the 30-Year Treasury Constant Maturity effective at the end of January for the valuation year as published in the U.S. Department of the Treasury Resource Center. The interest crediting rate for Appendix ASD is assumed to be 0.5% less than the interest crediting rate for Appendix CB, which reflects the assumed 0.5% spread between 30-Year and 5-Year Treasury Constant Maturities. For the 2013 valuation, the rates for Appendix CB and ASD were 3.17% and 2.67% per annum, respectively.

Cash balance index credits

Opening account balances subject to indexing are assumed to increase 3.00% per annum (in addition to interest credits) during active employment.

Cost of Living Adjustment:

Cost of living increase is assumed to be 3.00%, when applicable.

Marital percentage

It was assumed that 82.5% of the male salaried employees and 61.5% of the female salaried employees would be married at the time of retirement. For all other employees, 85% of the male and 65% of the female are assumed to be married. In each case the husband was assumed to be 3 years older than his wife.

Asset valuation method

The Actuarial Value of Assets is determined using a method that spreads asset gains/(losses) over 24 months. The gain/(loss) for each period is determined as the actual return during the period less the expected return based on an assumed earnings rate chosen by the actuary but required by PPA to be not greater than the applicable third segment rate. The resulting value is constrained to be within a corridor of 90% to 110% of market value. The discounted value of accrued contributions, if any, is included in the Actuarial Value of Assets.

The expected return on plan assets is 8.50% per annum, limited by PPA to the applicable Third Segment Rate as follows:

2012 measurement periods:	7.52%
2011 measurement periods:	6.57%

Non-Prescribed Funding Assumptions and Methods (continued)

Frequency of optional payment forms and assumed commencement ages

80% of cash balance participants are assumed to elect the lump sum option while 20% are assumed to take their annuity option. Of others who are eligible, 60% are assumed to elect the lump sum form of benefit payment. Other optional forms of payment were assumed based on the experience of each appendix over the last several years. Optional form elections are summarized in the tables below for actives and deferred vested participants.

Deferred vested participants are assumed to commence benefits at age 62, if they are eligible for unreduced retirement. Otherwise the assumed commencement age is 65. Assumed commencement ages for active participants vary based on the provisions of the applicable appendix. Active commencement ages are summarized in the chart below.

For purposes of determining the At-Risk Funding Target and Funding Target Normal Cost, the most valuable optional form of payment is assumed to be elected at retirement. This was determined on an age-by-age basis for both male and female participants based on their specific benefit structure and therefore the most valuable form may vary for an individual based on their assumed retirement age and gender.
