A. PLAN DESCRIPTION:

On July 1, 2005, Crompton Corporation and Great Lakes Chemical Corporation combined their businesses by merging a wholly-owned subsidiary of Crompton with and into Great Lakes. The Company changed its name to Chemtura Corporation (the "Company").

The investments of the Retirement Plan for Hourly Paid Bargaining Unit Employees of Witco Corporation (Perth Amboy, NJ Plant) (the "Plan") were combined with and managed in conjunction with the assets of various other retirement plans of Chemtura Corporation and participating subsidiaries in the Witco Corporation Retirement Plan Trust (the "Witco Master Trust").

On November 1, 2005, the assets of the Witco Master Trust were combined with the assets of the Chemtura Corporation Defined Benefit Master Trust (the "Master Trust") and were maintained at State Street Corporation. Investment income/(loss) and certain expenses are allocated to the Plan based upon the percentage of the Plan's assets to the total assets of the Master Trust. Benefit payments and other non-allocated expenses are specifically identified and charged to each plan participating in the Master Trust.

On January 1, 2007 the assets of the Master Trust were transferred from State Street Corporation to Northern Trust Company.

In February of 2012 the Plan's interest in the Master Trust was transferred out of the Master Trust and into a separate trust with SEI Private Trust Company ("SEI").

The following description of the plan provides only general information. Further information about the Plan is included in the Plan document, which is available from the Chemtura Corporation Human Resources Department.

General

The Plan is a non-contributory defined benefit pension plan. It is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). The Plan sponsor is Chemtura Corporation.

The Plan covers certain hourly paid bargaining unit employees of the Company employed at the plant located in Perth Amboy, New Jersey who have reached the age of 21 and who have at least one year of service. Employees are credited for all years of membership service. A minimum of five years of vesting service or attainment of age 55 is required to receive benefits.

Pension Benefits

The pension formula for all participants is either the sum of the past service benefit and the future service benefit or the minimum retirement income, as defined in the Plan. The pension formula is equal to the sum of the past service benefit and 1.1% of the participant's yearly earnings between $600 and $3,000 plus 1.65% of participant's earnings in excess of $3,000. The minimum annual amount of pension benefit is $168 times the years of credited service while an employee is a Plan participant.

Effective October 31, 2006 plan benefit accruals were frozen for active participants who were under age 50 and had under 20 years of service or who elected to have their benefit frozen to join a defined contribution plan.

Normal retirement is age 65. Early retirement is available to employees who are at least age 55 with benefits reduced for each month prior to age 65.

If an employee terminates with five years of vesting service or attains age 55, a vested pension based upon the above formula is payable at age 65, or age 55, reduced as in early retirement.

Death and Disability Benefits

A participant may elect to receive a reduced amount of retirement income which would continue after the participant's lifetime in accordance with various options provided in the Plan.

In the case of death of an active participant with at least five years of vesting service prior to retirement or attainment of age 55, there is a benefit payable to the surviving spouse equal to 50% of the benefit the participant had accrued prior to the date of death, payable at early retirement under the Qualified Joint and Survivor Annuity Option.

Disability retirement income benefits equal to the participant's accrued benefit are payable at age 50 to participants disabled with at least fifteen years of vesting service.

Plan Administration

The Plan is administered by the Chemtura Corporation Employee Benefits Committee.

Funding Policy

The contribution to provide benefits under the Plan is made by the Company based upon an amount determined by Towers Watson, the consulting actuary. It is the Company's policy to comply with the minimum funding requirements of ERISA, and such policy has been complied with for the years ended December 31, 2013 and 2012.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting.

Benefits

Benefit payments are recorded when paid.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. See Note D for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Use of Estimates

The preparation of the Plan's financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan Administrator to make significant estimates and assumptions that affect the reported amounts of net assets available for plan benefits at the date of the financial statements and the actuarial present value of accumulated plan benefits as of the benefit information date, the changes in net assets available for plan benefits during the reporting period and, when applicable, the disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Plan Expenses

All administrative expenses of the Plan are paid by the Plan to the extent they are not paid by the Company.

Risks and Uncertainties

Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements.

The Plan and the Master Trust invest in a combination of stocks, bonds, fixed income securities, and other investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the value of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for plan benefits. A decline in the fair value of the Plan's investments negatively impacts the funding status of the Plan.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of deceased employees, and (c) present employees or their beneficiaries.

Accumulated plan benefits for active employees are based on their final average compensation, when applicable, preceding the valuation date. Benefits payable under all circumstances – retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an actuary from Towers Watson and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits consists of the following as of January 1:

	2013	2012
Actuarial present value of accumulated plan benefits:		
Vested benefits:		
Participants currently receiving payments	$ 4,660,335	$ 4,397,885
Other participants	6,168,554	5,639,855
Total	10,828,889	10,037,740
Nonvested benefits	16,348	3,484
Total actuarial present value of accumulated plan benefits	$ 10,845,237	$ 10,041,224

The net increase in actuarial present value of accumulated plan benefits can be attributed to the following for the year ended January 1, 2013:

Actuarial present value of accumulated plan benefits at beginning of year	$ 10,041,224
Increase (decrease) during the year attributable to:	
Benefits accumulated	160,247
Decrease in discount period	450,465
Benefits paid	(502,665)
Actuarial (gains)/losses	(268,404)
Assumption changes	964,370
Net increase	804,013
Actuarial present value of accumulated plan benefits at end of year	$ 10,845,237

The significant actuarial assumptions underlying the January 1, 2013 and 2012 valuations are:

Discount rate	3.8% and 4.6%, respectively
Mortality	RP-2000 mortality, updated annually
	RP-2000 used for current liabilities

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan terminates, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

D. FAIR VALUE MEASUREMENTS:

Accounting standards establish a framework for measuring fair value. That framework sets forth a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are described below.

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs to the valuation methodology that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; or other inputs that are observable or can be corroborated by observable market data for substantially the full terms of the assets or liabilities.

Level 3 - Inputs to the valuation methodology that are unobservable and supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Master Trust Investments

Following is a description of the valuation methodologies used by the Master Trust. There have been no changes in the methodologies used at December 31, 2012.

Short term investments - Valued at quoted market prices, which represent the net asset value of shares held by the Plan at year-end.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set for by level and by investment class, within the fair value hierarchy, the Master Trust's investments at fair value as of December 31, 2012:

Description	Total	Level 1	Level 2	Level 3
Short term investments	$ 2,006	$ 2,006	$ -	$ -
Total investment of Master Trust	$ 2,006	$ 2,006	$ -	$ -

Plan Investments

Following is a description of the valuation methodologies used by the Plan. There have been no changes in the methodologies used at December 31, 2013 and 2012.

Mutual funds - Valued at quoted market prices, which represent the net asset value of shares held by the Plan at year-end.

Government securities - Valued as determined by pricing vendors using observable inputs.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set for by level and by investment class, within the fair value hierarchy, the Plan's assets at fair value as of December 31. The following table does not include the Plan's interest in the Master Trust because that information is presented in a separate table as of December 31, 2012:

E. TAX STATUS:

The Company obtained its latest determination letter for the Plan on August 28, 2012 in which the Internal Revenue Service ("IRS") stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code. Chemtura Corporation and its tax counsel believe that the Plan is currently designed and is being operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting standards require recording uncertain income tax positions that exist in the Plan's financial statements. Plan management has determined there are no uncertain tax positions and believes there is no adjustment or disclosure required in the Plan's financial statements. The Plan did not recognize any interest and penalty expense for the years ended December 31, 2013 and 2012. The Form 5500 remains subject to examination by the IRS for the years ended December 31, 2010 through December 31, 2013.

F. COMPLIANCE AND ERISA:

The Plan Administrator has elected the method of compliance permitted under 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Accordingly, no auditing procedures with respect to information certified by SEI Private Trust Company, a trustee of the Plan and Northern Trust Company, a trustee of the Plan prior to 2013, were performed by the independent auditors except for comparing the information to the financial statements and supplemental schedules. The trustees have certified as to the completeness and accuracy of the investments held at December 31, 2013 and 2012, investment earnings and other investment-related transactions of the Plan for the years then ended, and the information contained in the Schedule of Assets (Held at End of Year) and Schedule of Reportable Transactions.

G. PLAN TERMINATION:

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

a. Benefits attributable to employee contributions, if any, taking into account those paid out before termination.

b. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.

c. Other vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC") (a U.S. government agency) up to the applicable limitations (discussed below).

d. All other vested benefits (that is, vested benefits not insured by the PBGC).

e. All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or

plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

H. PARTIES-IN-INTEREST:

Section 3(14) of ERISA defines a party-in-interest to include, among others, fiduciaries or employees of the Plan, any person who provides services to the Plan or an employer whose employees are covered by the Plan. Accordingly, the management of investments held by the trustees are considered party-in-interest transactions.

I. SUBSEQUENT EVENTS:

The Company has evaluated subsequent events through October 10, 2014, the date these financial statements were available for issuance.

Actuarial value of assets	Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings of 7.5% (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2012 plan year). The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
Change in assumptions and methods since prior valuation	The salary increase was changed from 4.00% to 3.00% to reflect anticipated experience.
