1. Description of the Plan

The following description of the Bosch Security Systems Retirement Savings Plan (the "Plan") provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions. Bosch Security Systems, Inc. (the "Company") is the Plan administrator. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

General

The Plan was adopted on October 28, 2002, as a profit-sharing plan covering all nonunion employees of the Company located at the Lancaster, Pennsylvania facility. A 401(k) component with employer matching contributions was later introduced to this Plan and employees of the Company located in Fairport, New York became eligible participants of this Plan. Eligible full-time employees of the Company are eligible to participate in the Plan on their date of hire if they are 21 years of age. Part-time employees are eligible to participate after one year of service with 1,000 hours of service, as defined in the Plan document. Participants are eligible for Company matching contributions after completing one year of employment. Employees of Telex Communications, Inc, a subsidiary of the Company, are also eligible to participate in the Plan, but are not eligible for profit sharing contributions.

Contributions

The Plan provides for participant contributions to be made on both a pre-tax and an after-tax basis. Each pay period in which participants receive wages, they may contribute between 1% and 85% of their eligible compensation, as defined in the Plan document, subject to maximum amounts established by the Internal Revenue Code (the "Code"), pursuant to Section 401(k) of the Code. Participants may also contribute amounts representing catch-up contributions (if age 50 or older), and distributions from other qualified defined-benefit or defined-contribution plans.

Eligible new associates are automatically enrolled in the Plan with a 5% pre-tax deferral after 30 days of employment with the Company unless the associate elects otherwise. Participants can also elect to withdraw from the Plan after the auto-enrollment.

The Company contributes 50% of the first 6% of eligible compensation contributed by the participant.

The Company also contributes a profit-sharing contribution on behalf of each eligible Lancaster and Fairport employee, based on their eligible compensation for the Plan year as follows:

(i) 3% of eligible compensation earned up to the fifth anniversary of the active participant's profit-sharing start date.

(ii) 4.5% of eligible compensation earned between the fifth anniversary and the tenth anniversary of the active participant's profit-sharing start date.

(iii) 6% of eligible compensation earned after the tenth anniversary of the active participant's profit-sharing start date.

For the Plan year in which the fifth or tenth anniversary of the participant's profit-sharing start date occurs, the contribution shall be prorated.

The profit-sharing start date for Fairport employees is defined as the later of their date of hire or January 1, 2004.

An adjustment may be made to the profit-sharing contribution, based on year-end Company financial performance, such that the adjusted profit-sharing contribution is equivalent to between 50% and 150% of the original base amounts described above. For 2013, the base profit-sharing amounts were adjusted by 75%. For 2012, the base profit-sharing amounts were adjusted by 90%.

Effective February 1, 2012, associates hired, rehired or transferred to the Lancaster or Fairport locations of the Company will not be eligible for profit sharing contributions under the Plan.

Vesting
Participants are immediately vested in their voluntary contributions and profit sharing contributions plus actual earnings thereon. After 3 years of service with the Company, a participant will become 100% vested in Company matching contributions on the date they are contributed. Forfeited balances of terminated participants' nonvested accounts are used to pay expenses of the Plan or to reduce Company contributions. Forfeited nonvested accounts totaled $26,928 and $9,200 at December 31, 2013 and 2012, respectively. Forfeitures of $0 and $102,135 for Plan year 2013 and 2012, respectively, were used to reduce employer matching contributions.

Participant Accounts
Each participant's account is credited with the participant's contributions and allocations of the Company's contributions, Plan earnings and administrative expenses. Allocations of Plan earnings are based on participant account balances in the respective investment options. The benefit to which a participant is entitled is equal to the vested balance that can be provided from the participant's account.

Investment Options
Participants may direct contributions in any of the investment options offered, which include mutual funds and collective trusts, as well as the Bosch Stable Value Fund, which holds a liquidity fund and several synthetic guaranteed investment contracts. Participants may also utilize a brokerage account, which permits the participant to invest in other securities. Changes in allocations of future contributions and transfers among funds of presently invested contributions are permitted pursuant to Plan provisions. The Plan's investments, other than the brokerage account, are held by Mercer Trust Company (the "Trustee"). Prior to March 12, 2012, the brokerage account was administered by Mercer Securities, an affiliate of the Trustee.

Effective March 12, 2012, the JPMorgan SmartRetirement 2050 Fund C Class was added to the investment lineup and TD Ameritrade Inc. replaced Mercer Securities as the Plan's self directed brokerage provider.

Notes Receivable from Participants
Participants may borrow from their Plan accounts a minimum of $1,000 up to a maximum of the lesser of $50,000 (subject to certain limitations as defined in the Plan document) or 50% of their vested account balance. All notes receivable from participants are amortized over a reasonable period of time, generally not to exceed five years. Upon termination, notes receivable are either payable immediately, or by making payments via monthly coupons administered by the recordkeeper. The loans are secured by the vested balance in the participant's account and bear interest at a rate commensurate with local prevailing rates at inception. Notes receivable from participants are measured at their unpaid principal balance plus any accrued but unpaid interest. Principal and interest are generally to be paid through payroll deductions.

Benefit Payments
In the event of retirement, termination of service, death, or disability, the participant may receive a lump sum or installment payments equal to the vested value of his or her account. Participants may also obtain withdrawals of any portion of their participant contributions after attaining the age of 59 - 1/2 or for certain financial hardship situations. Hardship withdrawals will be authorized only upon satisfaction of criteria as enumerated in the Plan document.

If the payment is for termination of service, the amount may be transferred directly to an Individual Retirement Account or another qualified plan. If the participant does not elect a direct plan-to-plan transfer, the Internal Revenue Service ("IRS") requires the Plan to withhold 20% of the final distribution for payment of federal income taxes.

Plan Termination
Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event the Plan is terminated, the accounts of all participants shall immediately be fully vested and distributed to the participants.

Administrative Expenses
An annual recordkeeping fee of $62.50 ($15.63 per quarter) is charged to participant accounts by the recordkeeper. This amount is reflected in administrative expenses in the accompanying financial statements. Administrative expenses also include audit fees.

2. Significant Accounting Policies

Basis of Accounting
The financial statements of the Plan have been prepared on the accrual basis of accounting and in conformity with accounting principles generally accepted in the United States of America ("GAAP").

Use of Estimates
The preparation of financial statements in conformity with GAAP requires the Plan administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Shares of mutual funds are valued at the net asset value of shares held by the Plan at year end. Units of collective trusts are valued at the net asset value of units held by the Plan at year-end, based on information reported by the investment advisor using the financial statements of the collective trusts. In addition to these investments, stocks within the Plan's self directed brokerage accounts are valued at the closing price at year-end reported on the active market on which the individual securities are traded.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The Plan invests in investment contracts within the Bosch Stable Value Fund option. The Statements of Net Assets Available for Benefits present the fair value as well as the adjustment from fair value to contract value relating to the investment contracts. The Statements of Changes in Net Assets Available for Benefits are prepared on a contract value basis.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. The Plan presents in the Statements of Changes in Net Assets Available for Benefits the net appreciation in the fair value of its investments which consists of the gains and losses on investments bought and sold as well as held during the year.

Synthetic Guaranteed Investment Contracts

The Plan holds synthetic guaranteed investment contracts ("GICs") as part of the Bosch Stable Value Fund. The synthetic GICs provide for a fixed return on principal over a specified time through fully benefit-responsive wrapper contracts issued by AIG Financial Products, Royal Bank of Canada, and State Street Bank. The assets underlying the synthetic GICs substantially consist of an intermediate bond collective trust fund.

The fair value of the synthetic GICs equals the total of the fair value of the underlying assets plus the fair value of the wrapper contracts. The fair value of the wrapper contracts is computed using a replacement cost approach that incorporates a comparison of the current fee rate on similar wrapper contracts to the fee being paid by the Plan. Using this approach, the fair value of the wrapper contracts was $0 and $5,758 at December 31, 2013 and 2012, respectively.

Fully benefit-responsive synthetic GICs are valued at contract value, rather than fair value, for determining the net assets available for benefits. Contract value represents contributions, plus earnings, less participant withdrawals and administrative expenses. The wrapper contracts used by the Plan are fully benefit-responsive because the wrapper contract issuers are contractually obligated to make up any shortfall in the event that the underlying asset portfolio has been liquidated and is inadequate to cover participant withdrawals and transfers at contract value. There are currently no reserves against contract values for credit risk of the contract issuers or any other risk.

The crediting interest rate, which is reset quarterly, based on a formula agreed upon with each wrapper contract issuer, can never fall below zero. The crediting rate formula smoothes the impact of interest rate changes on participant returns by amortizing any difference between market value and book value over a period of years equal to the duration of the portfolio benchmark. The average yield on the synthetic GICs based on annualized earnings was approximately 1.14% and 1.21% for the years ended December 31, 2013 and 2012, respectively. The average interest rate credited to participants on the synthetic GICs was approximately 1.57% and 1.97%, respectively, for the years ended December 31, 2013 and 2012. The credit ratings for AIG Financial Products were A+ and A- at December 31, 2013 and 2012, respectively, and the credit ratings for Royal Bank of Canada and State Street Bank were AA- at both December 31, 2013 and 2012.

Certain events limit the ability of the Plan to transact at contract value with the issuer. These events include restructurings, early retirement plans, divestitures, bankruptcies or as the result of legal, tax or regulatory changes. The Plan administrator believes that the occurrence of any such event is remote.

The providers of the wrapper contracts can only terminate at a value different than contract value under an event of default (that was not remedied) such as failure to follow the terms of the contract.

Benefit Payments
Benefits are recorded when paid.

Accounting Pronouncement – Fair Value Measurements
In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update ("ASU") 2011-11, "Disclosures about Offsetting Assets and Liabilities". This ASU establishes new disclosure requirements regarding the effect or potential effect of offsetting arrangements on a company's financial position. It is the result of a joint project with the IASB designed to enhance and provide converged disclosures about financial and derivative instruments that are either offset on the balance sheet, or are subject to an enforceable master netting arrangement (or other similar arrangement). The ASU is effective for fiscal years and interim periods beginning on or after January 1, 2013. Retrospective application of the disclosures is required for all periods presented within the financial statements.

In January 2013, the FASB issued ASU 2013-01, "Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities". The ASU limits the scope of the new balance sheet offsetting disclosures to derivatives, repurchase agreements, and securities lending transactions to the extent that they are (1) offset in the financial statements or (2) subject to an enforceable master netting arrangement or similar agreement. The disclosure requirements are effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods.

The adoption of this guidance had no effect on the Plan's financial statements.

4. Fair Value Measurements

The FASB established a framework to increase consistency and comparability in fair value measurements. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

For a description of the valuation methodologies used for assets measured at fair value, see Investment Valuation and Income Recognition under Note 2. In determining the reasonableness of the methodology, the Investment Committee evaluates a variety of factors including review of existing contracts, economic conditions, industry and market developments, and overall credit ratings. Certain unobservable inputs are assessed through review of contract terms (for example, duration or payout date) discussed with investment consultants and custodians using available market data (for example, swap curve rate).

These methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

For the years ended December 31, 2013 and 2012, there were no significant transfers in or out of levels 1, 2 or 3.

The following tables set forth by level, within the fair value hierarchy, the Plan's investment assets at fair value as of December 31, 2013 and 2012:

Common collective trusts consist of pools of investments used by institutional investors to obtain equity and fixed income market exposures by investing in funds which are intended to mirror market indices. They are valued on the basis of the relative interest of each participating investor in the fair value of the underlying assets of each of the respective common collective trusts. The funds are valued based on the NAV as provided by the investment account manager and are classified in Level 2 of the fair value hierarchy. Certain of these investments can only be traded within a certain window within each monthly period. Common collective trusts included in the Plan and their relative benchmarks include:

Common Collective Trust	Description	Benchmark	Trade Frequency Restriction

5. Tax Status

The Internal Revenue Service has determined and informed the Company in a letter dated August 22, 2011, that the Plan and related trust are designed in accordance with applicable sections of the Code. Although the Plan has been amended since receiving the determination letter, the plan administrator and the Plan's ERISA counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code and therefore believe that the Plan is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax asset or liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2013 and 2012, there are no uncertain positions taken or expected to be taken that would require recognition of an asset or liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes that the Plan is generally no longer subject to income tax examinations for plan years beginning prior to January 1, 2010.

6. Party-in-Interest Transactions

Notes receivable from participants qualify as exempt party-in-interest transactions.

7. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the Statement of Net Assets Available for Benefits.

8. Subsequent Events

Effective September 29, 2014, the Plan replaced the JPMorgan SmartRetirement Fund C Class Investment Funds according to the table below:

Investment in Current Line Up	Investment effective September 29, 2014
JPMorgan SmartRetirement 2015 Fund C Class	JPMorgan SmartRetirement 2015 Fund – Inst
JPMorgan SmartRetirement 2020 Fund C Class	JPMorgan SmartRetirement 2020 Fund – Inst

JPMorgan SmartRetirement 2040 Fund C Class	JPMorgan SmartRetirement 2040 Fund – Inst
JPMorgan SmartRetirement 2050 Fund C Class	JPMorgan SmartRetirement 2050 Fund - Inst

Effective October 1, 2014, the Plan replaced the JPMorgan SmartRetirement 2010 Fund C Class with the JPMorgan SmartRetirement Income Fund – Inst.

The Plan has evaluated the events and transactions that have occurred through October 10, 2014, the date the financial statements were available to be issued, and concluded there were no other subsequent events to recognize or disclose.
