Hourly Employees' Pension Plan

Notes to Financial Statements

December 31, 2013 and 2012

1. Description of the Plan

The following description of the Gilmour Hose Company Hourly Employees' Pension Plan (the "Plan") provides only general information. Participants should refer to the Plan document for a more complete description. The Plan is subject to the requirements of the Employee Retirement Income Security Act of 1974 ("ERISA").

The assets of the Plan are invested in the Robert Bosch LLC Master Retirement Trust ("Master Trust").

General

The Plan is a noncontributory, defined-benefit pension plan which covers substantially all of the hourly union employees of Gilmour Hose Company (the "Company"), a subsidiary of Robert Bosch Tool Corporation. A full-time hourly employee becomes a participant in the Plan after completing one hour of service. A part-time employee becomes a participant in the Plan on January 1 or July 1 following one year of service in which he completes 1,000 hours of service.

Contributions

The Company has agreed to voluntarily contribute such amounts as are necessary to provide assets sufficient to meet the funding requirements of ERISA. The Plan has met the ERISA minimum funding requirements for 2013 and 2012.

Benefit Payments

A participant becomes fully vested in the Plan after five years of service. Participants who terminate prior to completing five years of service forfeit the right to receive their accumulated plan benefits. Upon retirement, employees are entitled to monthly pension benefits without reduction beginning at normal retirement age (first of the month coincident with or next following attainment of age 65) in an amount equal to the applicable benefit rate multiplied by the number of years of credited service. The Plan permits early retirement, with reduced benefits at ages 55 to 64, after attaining ten or more years of service.

Employees may elect to receive normal retirement benefits, early retirement benefits until death, or they may elect to receive their pension benefits in the form of a surviving spouse option.

The Plan provides for certain death and disability pension benefits to eligible employees in accordance with the Plan document.

Plan Termination

Although it has not expressed any intent to do so, the Company has the right to terminate the Plan subject to the provisions of ERISA and as described in the Plan document. Should the Plan terminate at some future time, its net assets will generally not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on the priority of those benefits, the financial condition of the Company, and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Administrative Expenses

Substantially all allowable administrative expenses are paid by the Plan.

2. Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan have been prepared on the accrual basis of accounting and in conformity with accounting principles generally accepted in the United States of America ("GAAP").

Payment of Benefits

Benefits are recorded when paid.

Investment Valuation and Income Recognition

The Master Trust's investments are stated at fair value. The fair value of the participation units in the common collective trusts is based on the net asset value of units held on the last business day of the Plan year. Securities such as common stock, preferred stock, registered investment companies, and real estate investment trusts, traded on a national securities exchange are valued at the last reported sales price on the last business day of the Plan year; investments traded in the over-the-counter market and listed securities for which no sale was reported on that date are valued at the average of the last reported bid and ask prices. Fixed income securities such as corporate debt instruments and U.S. government securities are valued based on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available, the bond is valued using matrix pricing or models from reputable pricing vendors. Partnerships/JV interest funds are valued based on the Master Trust's interest in the net asset value of the funds' underlying assets using statements provided by the fund manager.

Investment transactions of the Master Trust are recorded on the trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (Note 3) are those estimated future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to: (a) retired or terminated employees or their beneficiaries; and (b) present employees or their beneficiaries. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

3. Accumulated Plan Benefits

An independent actuary estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits at December 31, 2012 was as follows:

Vested benefits	
Participants currently receiving payments	\$ 921,012
Other participants	1,060,772
Total vested benefits	1,981,784
Nonvested benefits	283,357
Total actuarial present value of accumulated plan benefits	<u>\$ 2,265,141</u>

The following summarizes the significant components of the change in the present value of accumulated plan benefits from December 31, 2011 to 2012:

Actuarial present value of accumulated plan benefits as of December 31, 2011	\$ 2,083,796
Increase (decrease) during the year attributable to	
Benefits accumulated and actuarial experience gain/loss	127,317
Interest	129,244
Benefits paid to participants	(98,441)
Assumption changes	23,225
Actuarial present value of accumulated plan benefits as of December 31, 2012	<u>\$ 2,265,141</u>

Significant assumptions underlying the actuarial computations are as follows:

Interest rate	6.35%
Retirement rate	5% by age 55; 10% by age 60; 30% by age 62; 100% by age 65.
Mortality	RP - 2000, Combined Health, projected with AA on a static basis for 7 - 15 years past the valuation date and RP-2000 Combined Health, projected with AA to 2015 with no collar adjustment as of December 31, 2012 and 2011, respectively

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Certification of Investment Information

All investment information disclosed in the accompanying financial statements, including plan interest in Robert Bosch LLC Master Retirement Trust at December 31, 2013 and 2012, plan interest in net investment income of Robert Bosch LLC Master Retirement Trust for the years then ended, and the investments and investment income information of the Master Trust presented in Note 5, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by The Northern Trust Company ("Trustee"), except as noted below.

The Master Trust's investment in Partnership/JV interest as of December 31, 2013 and 2012 of \$44,329,148 and \$41,324,293, respectively, and the Plan's proportionate share of that investment of \$75,360 and \$66,119, respectively, were not certified. Accordingly, the net appreciation in the fair value of the Master Trust's investment in Partnership/JV interest for the years ended December 31, 2013 and 2012 of \$3,004,855 and \$1,324,293, respectively, and the Plan's proportionate share of that net appreciation of \$5,108 and \$2,119, respectively, also were not certified.

5. Investment in Master Trust

The Plan's investments are in the Master Trust, which was established for the investment of assets of the Plan, and several other retirement plans sponsored by Robert Bosch LLC. Each participating retirement plan has an undivided interest in the Master Trust. At December 31, 2013 and 2012, the Plan's interest in the net assets of the Master Trust was approximately 0.17% and 0.16%, respectively. The value of the Plan's interest is determined on the basis of cumulative funds specifically contributed on behalf of the Plan, net of funds withdrawn for benefit payments and expenses specific to the Plan and adjusted for an allocation of investment income and investment expenses. Investment income and expenses are allocated monthly to the Plan based upon its pro rata share in the net assets of the Master Trust.

The following table presents the fair value of investments for the Master Trust at December 31:

6. Fair Value Measurements

The FASB established a framework to increase consistency and comparability in fair value measurements. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Master Trust has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

For a description of the valuation methodologies used for assets measured at fair value see Investment Valuation and Income Recognition under Note 2. These methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

For the years ended December 31, 2013 and 2012, there were no significant transfers in or out of levels 1, 2 or 3.

Common collective trusts and the Partnership/JV interest consist of pools of investments used by institutional investors to obtain equity and fixed income market exposures by investing in funds which are intended to mirror market indices. They are valued on the basis of the relative interest of each participating investor in the fair value of the underlying assets of each of the respective common collective trusts and Partnership/JV. The funds are valued based on the NAV as provided by the investment account manager and are classified in Level 2 of the fair value hierarchy. Common collective trust investments can be traded daily with a time delay for international trades, while the Partnership/JV interest can be redeemed after a 30 day notice period. As of December 31, 2013 and 2012, the Master Trust is not holding any unfunded commitments. Common collective trusts and the partnership/JV interest included in the Master Trust and their relative benchmarks include:

7. Risks and Uncertainties

The Master Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

8. Tax Status

The Internal Revenue Service ("IRS") has determined and informed the Company in a letter dated June 14, 2012, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (the "Code"). Although the Plan has been amended since receiving the determination letter, the plan administrator and the Plan's ERISA counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code and therefore believe that the Plan is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax asset or liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2013 and 2012, there are no uncertain positions taken or expected to be taken that would require recognition of an asset or liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to income tax examinations for years beginning prior to January 1, 2010.

9. Party-in-Interest Transactions

The Master Trust invests in common collective trusts managed by the Trustee or its affiliates. These transactions qualify as exempt party-in-interest transactions. Fees paid to the Trustee by the Master Trust for 2013 and 2012 were \$790,261 and \$742,194, respectively.

10. Subsequent Events

During September 2014, Fiskars Corporation signed an agreement to purchase the Company. The impact to the Plan, if any, has not yet been determined.

The Plan has evaluated the events and transactions that have occurred through October 10, 2014, the date the financial statements were available to be issued, and noted no items requiring adjustment to the financial statements or additional disclosure.
