Actuarial Cost Method

I. ACTUARIAL COST METHOD

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described in "Plan Assumptions" of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year for all Participants plus an estimate of the expenses to be paid from the plan assets during the plan year.

Target Liability and Funding Shortfall

As of January 1, 2010, a Target Liability is established which represents the present value of accrued benefits. This Target Liability is offset by adjusted assets, and the remainder (i.e. Funding Shortfall), if any, is amortized over seven years.

Subsequent changes in the Funding Shortfall due to asset experience, liability experience, plan amendments, and/or actuarial assumption changes will be amortized over a seven year period from their valuation dates.

Discount Rate

The plan sponsor has elected to use the Segment Rate approach for discount rate purposes, with an applicable month that is 4 months prior to the valuation date.

In addition, beginning with the 2012 plan year, solely for purposes of determining the minimum required contribution level, applicability of benefit restrictions, and for the at-risk determination, the adjusted 24-month average segment rates established by HATFA have been incorporated.

The adjusted 24-month average segment rates are generated by taking the unadjusted 24-month average segment rates for the sponsor-chosen lookback month and adjusting them so that each individual segment rate is not outside of the stipulated corridor around the corresponding 25-year average segment rate for the given plan year. For the 2013 plan year, the stipulated corridor is 90% - 110% of these 25-year average segment rates.

II. ASSET VALUATION METHOD

Assets have been valued in accordance with generally accepted procedures as described below.

All funds invested are valued in the following manner:

Definitions

i(t)	assumed growth rate, set equal to the lesser of the expected return on assets or the applicable 3 rd segment rate for Plan Year t.
C(t)	sum of contributions and other additions to the fund from all sources other than investment transactions in Plan Year t
W(t)	sum of all withdrawals and other decreases to the fund from all sources other than investment transactions in Plan Year t
AV(t)	Actuarial Value of Assets as of Plan Year t
MV(t)	Market Value of Assets as of Plan Year t
EV(t)	Expected Value of Assets as of Plan Year t
G/L(t)	Gain or Loss for Plan Year t

Actuarial Cost Method

Method

A description of the method used to determine the current year's Actuarial Value of Assets {AV(t)} is below.

For the preceding 2 years, G/L(t) is determined as follows:

$$EV(t) = MV(t-1) * (1 + i(t-1)) + [C(t-1) - W(t-1)] * (1 + i(t-1) * m)$$

Where m represents a proportionate yield consistent with the portion of the year for which C and W are invested

$$G/L(t-1) = EV(t) - MV(t)$$

For the current year, AV(t) is determined as follows:

$$AV(t) = MV(t) + 2/3 * G/L(t-1) + 1/3 * G/L(t-2)$$

Corridor Limits

The Actuarial Value of Assets may not be less than 90% or more than 110% of the current market value of plan assets as of the applicable valuation date [as required by IRC Section 430(g)(3)(B)(iii)]

Please note, as highlighted above, the assumed asset growth rate for each year is limited to the applicable 3rd segment rate by law. As a result, if the plan's expected rate of return is greater than this applicable rate, this method is expected to produce an actuarial value of assets that can be expected to be slightly less than the market value of assets, on average.

The market value of the Guaranteed Deposit Account is an estimate only and not the result of the precise calculation which would be done at contract discontinuance or to measure the impact of excess withdrawals in any calendar year. It does not constitute an offer by Prudential or a final experience adjustment. Please be sure that anyone to whom you quote this value receives this explanation.

Actuarial Assumptions

Actuarial Assumptions

Assumptions have been chosen to anticipate the long range experience of the Plan. Consistency among assumptions is important as each interacts with the others; equally important is the recognition of inflationary trends in the economy.

The actuarial assumptions used to compute Plan costs are:

Investment Return:

For ASC #960 purposes:

7.40% per annum, compounded annually, net of investment and contract fees.

For minimum required contribution level, applicability of benefit restrictions, and At-Risk determination only:

Segment Rates with a 4 month lookback, as adjusted by the 90%-110% corridor around the 25-year average segment rates (5.23%, 6.51%, and 7.16% for the 2013 plan year)

For all other purposes:

Segment Rates with a 4 month lookback, unadjusted (1.75%, 4.62%, and 5.72% for the 2013 plan year)

Mortality:

IRS 2013 Static Mortality Table for funding and ASC #960.

Estimated Expenses:

\$100,000

Spouse Assumptions:

All participants are assumed to be married at death. Husbands are assumed to be 3 years older than their wives.

Termination:

The probabilities that Participants at the ages indicated will terminate before reaching the assumed retirement age are based on years of service:

<u>Age</u>	<u><5 Years</u>	<u>>5 Years</u>
20	11.3%	0.0%

Actuarial Cost Method

I. ACTUARIAL COST METHOD

Costs have been computed in accordance with the Unit Credit Actuarial Cost Method and reflect the actuarial assumptions described in “Plan Assumptions” of this report as provided under the applicable regulations of the Pension Protection Act of 2006.

Target Normal Cost

The Target Normal Cost is the present value of benefits expected to accrue during the plan year for all Participants plus an estimate of the expenses to be paid from the plan assets during the plan year.

Target Liability and Funding Shortfall

As of January 1, 2010, a Target Liability is established which represents the present value of accrued benefits. This Target Liability is offset by adjusted assets, and the remainder (i.e. Funding Shortfall), if any, is amortized over seven years.

Subsequent changes in the Funding Shortfall due to asset experience, liability experience, plan amendments, and/or actuarial assumption changes will be amortized over a seven year period from their valuation dates.

Discount Rate

The plan sponsor has elected to use the Segment Rate approach for discount rate purposes, with an applicable month that is 4 months prior to the valuation date.

In addition, beginning with the 2012 plan year, solely for purposes of determining the minimum required contribution level, applicability of benefit restrictions, and for the at-risk determination, the adjusted 24-month average segment rates established by HATFA have been incorporated.

The adjusted 24-month average segment rates are generated by taking the unadjusted 24-month average segment rates for the sponsor-chosen lookback month and adjusting them so that each individual segment rate is not outside of the stipulated corridor around the corresponding 25-year average segment rate for the given plan year. For the 2013 plan year, the stipulated corridor is 90% - 110% of these 25-year average segment rates.

II. ASSET VALUATION METHOD

Assets have been valued in accordance with generally accepted procedures as described below.

All funds invested are valued in the following manner:

Definitions

i(t)	assumed growth rate, set equal to the lesser of the expected return on assets or the applicable 3 rd segment rate for Plan Year t.
C(t)	sum of contributions and other additions to the fund from all sources other than investment transactions in Plan Year t
W(t)	sum of all withdrawals and other decreases to the fund from all sources other than investment transactions in Plan Year t
AV(t)	Actuarial Value of Assets as of Plan Year t
MV(t)	Market Value of Assets as of Plan Year t
EV(t)	Expected Value of Assets as of Plan Year t
G/L(t)	Gain or Loss for Plan Year t

Actuarial Cost Method

Method

A description of the method used to determine the current year's Actuarial Value of Assets {AV(t)} is below.

For the preceding 2 years, G/L(t) is determined as follows:

$$EV(t) = MV(t-1) * (1 + i(t-1)) + [C(t-1) - W(t-1)] * (1 + i(t-1) * m)$$

Where m represents a proportionate yield consistent with the portion of the year for which C and W are invested

$$G/L(t-1) = EV(t) - MV(t)$$

For the current year, AV(t) is determined as follows:

$$AV(t) = MV(t) + 2/3 * G/L(t-1) + 1/3 * G/L(t-2)$$

Corridor Limits

The Actuarial Value of Assets may not be less than 90% or more than 110% of the current market value of plan assets as of the applicable valuation date [as required by IRC Section 430(g)(3)(B)(iii)]

Please note, as highlighted above, the assumed asset growth rate for each year is limited to the applicable 3rd segment rate by law. As a result, if the plan's expected rate of return is greater than this applicable rate, this method is expected to produce an actuarial value of assets that can be expected to be slightly less than the market value of assets, on average.

The market value of the Guaranteed Deposit Account is an estimate only and not the result of the precise calculation which would be done at contract discontinuance or to measure the impact of excess withdrawals in any calendar year. It does not constitute an offer by Prudential or a final experience adjustment. Please be sure that anyone to whom you quote this value receives this explanation.

Actuarial Assumptions

Actuarial Assumptions

Assumptions have been chosen to anticipate the long range experience of the Plan. Consistency among assumptions is important as each interacts with the others; equally important is the recognition of inflationary trends in the economy.

The actuarial assumptions used to compute Plan costs are:

Investment Return:

For ASC #960 purposes:

7.40% per annum, compounded annually, net of investment and contract fees.

For minimum required contribution level, applicability of benefit restrictions, and At-Risk determination only:

Segment Rates with a 4 month lookback, as adjusted by the 90%-110% corridor around the 25-year average segment rates (5.23%, 6.51%, and 7.16% for the 2013 plan year)

For all other purposes:

Segment Rates with a 4 month lookback, unadjusted (1.75%, 4.62%, and 5.72% for the 2013 plan year)

Mortality:

IRS 2013 Static Mortality Table for funding and ASC #960.

Estimated Expenses:

\$100,000

All participants are assumed to be married at death. Husbands are assumed to be 3 years older than their wives.

Notes to Financial Statements

Note 1 - Description of the Plan and Significant Accounting Policies

The following description of The Kemmerer Coal Company Elkol Sorensen Mine Pension Plan (the "Plan") provides only general information. Participants and all others should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit plan covering all eligible employees of Kemmerer Coal Company who are represented by the International Union, United Mine Workers of America and who are or will become entitled to benefits under this Plan. This Plan does not provide benefits to any person who last worked for the employer before December 6, 1977, unless such person is subsequently reemployed by the employer after December 6, 1977 or unless such person's name is indicated in an appendix of the Plan document. The Plan was established on December 6, 1977 and was last amended and restated effective January 1, 2008. Effective January 1, 2008, the terms of the Plan as so amended and restated shall apply only to participants who complete one hour of service on or after January 1, 2008. Westmoreland Kemmerer Inc. (the "Company" or "Plan sponsor") acquired The Kemmerer Coal Company Elkol Sorensen Mine Pension Plan effective February 1, 2012, as a result of an acquisition transaction with Chevron Mining Inc. Effective February 1, 2012, the Company amended the Plan to reflect the Company as the Plan sponsor and to change the Plan name to Westmoreland Kemmerer, Inc. Elkol Sorensen Mine Pension Plan.

The Westmoreland Coal Company Pension Committee administers the Plan and manages the Plan assets. Prudential Retirement Insurance and Annuity Company ("Prudential Retirement") is the Plan's custodian and maintains the Plan's records. Effective May 1, 2012, no new participants will enter the Plan.

Benefits are recorded when paid.

The Plan has different benefits and eligibility requirements for these types of pension payments: normal retirement pension, age 55 retirement pension, disability pension, minimum disability retirement pension, deferred vested retirement pension, survivor benefit for death in service after retirement, special permanent layoff pension, preretirement survivor annuity, and joint and survivor annuity, as defined by the Plan.

Participation

Any person who was an employee of the employer on December 6, 1977 and was eligible to participate in the 1974 pension plan became a participant as of December 6, 1977. Any person who was not eligible to participate on December 6, 1977 becomes a participant after the completion of one year of vesting service or a 12-month period in which he or she completes 1,000 hours of service.

THE KEMMERER COAL COMPANY ELKOL SORENSEN MINE PENSION PLAN

Notes to Financial Statements

Note 1 - Description of the Plan and Significant Accounting Policies (continued)

Vesting

Vesting service is credited as follows:

May 19, 1946 - December 31, 1977	One year of vesting service for each year of service performed in a Classified Job with an Employer who, at the time such service was performed, was signatory to a Wage Agreement defined by the Plan.
January 1, 1978 and after	1/4 of a year of vesting service for every 250 hours of service.
Reciprocal service	Vesting service shall be credited for all reciprocal service earned with another signatory employer within a Union bargaining unit covered by a Western Coal Wage Agreement as defined by the Plan.

In no event will more than one year of vesting service be credited for any calendar year.

Funding Policy

The Plan is non-contributory; all funding is provided by the Company. The Company has voluntarily agreed to make contributions to the Plan sufficient to provide the Plan with assets with which to pay pension benefits to Plan participants. For the Plan years ended December 31, 2013 and 2012, minimum funding requirements of the Employee Retirement Income Security Act of 1974 ("ERISA") and the Internal Revenue Code (the "Code") were \$1,853,401 and \$861,166, respectively. The funding requirements were met through prefunding actuarial credit provided by the actuary.

Administrative Expenses

During the years ended December 31, 2013 and 2012, the Company paid certain administrative expenses of the Plan.

Valuation of Investments and Income Recognition

The Plan's investments are recorded at fair value as reported to the Plan by the custodian. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 2 for a discussion of fair value measurements.

THE KEMMERER COAL COMPANY ELKOL SORENSEN MINE PENSION PLAN

Notes to Financial Statements

Note 1 - Description of the Plan and Significant Accounting Policies (continued)

Valuation of Investments and Income Recognition (continued)

The net realized and unrealized investment gain or loss (net appreciation or depreciation in fair value of investments) is reflected in the accompanying statements of changes in net assets available for benefits and is determined as the difference between fair value at the beginning of the year (or date purchased if during the year) and selling price (if sold during the year) or year-end fair value. Purchases and sales of investments are recorded on a trade-date basis. Interest income is recognized on the accrual basis. Dividends are recognized on the ex-dividend date.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Risks and Uncertainties

The Plan provides for various investments that, in general, are exposed to various risks, such as interest rate, credit, and overall market volatility risks. Due to the level of risk associated with certain investments, it is reasonably possible that changes in the value of investments will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits.

Additionally, some investments held by the Plan are invested in the securities of foreign companies, which involve special risks and considerations not typically associated with investing in U.S. companies. These risks include devaluation of currencies, less reliable information about issuers, different securities transaction clearance and settlement practices, and possible adverse political and economic developments. Moreover, securities of many foreign companies and their markets may be less liquid and their prices more volatile than those of securities of comparable U.S. companies.

Plan contributions are made and the actuarial value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would have a material impact on Plan contributions and the financial statements.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered prior to the valuation date.

THE KEMMERER COAL COMPANY ELKOL SORENSEN MINE PENSION PLAN

Notes to Financial Statements

Note 1 - Description of the Plan and Significant Accounting Policies (continued)

Actuarial Present Value of Accumulated Plan Benefits (continued)

The actuarial present value of accumulated plan benefits is determined by the Plan's independent actuary and is the amount that results from applying actuarial assumptions to the accumulated plan benefits to reflect the time value of money (through discounts and for interest) and the probability of the payment (by means of decrements such as death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. Actuarial assumptions for the Plan are made as of the beginning of the Plan year. The statement of accumulated plan benefits and the statement of changes in accumulated plan benefits were prepared as of January 1, 2013 and for the year then ended. Had the reports been prepared as of and for the year ended December 31, 2012, no material change would have been necessary. The significant actuarial assumptions used in the valuations as of January 1, 2013 are as follows:

- Life expectancy of participants was obtained from the IRS 2013 Static Mortality Table;
- Funding was based on IRS 2013 Static Mortality Table & Accounting Standards Codification ("ASC") Topic 960;
- The assumed long-term investment return was 7.40% for ASC Topic 960 purposes, 5.95% for minimum required contribution level, applicability of benefit restrictions, and at-risk determination only, and 4.03% for all other purposes;
- Estimated administrative expenses expected to be paid from Plan assets are \$100,000;
- All participants are married at death and husbands are three years older than their wives;
- Normal retirement pension;
- Optional payment forms: 100% of married active participants take a 75% Joint & Survivor annuity upon first eligibility after termination of employment, 100% of married deferred vested participants take either a 50% Joint & Survivor annuity or, if eligible, 75% of the participant's monthly pension upon attaining age 62.
- The probabilities that participants at the ages indicated will terminate before reaching the assumed retirement age are based on years of service:

<u>Age</u>	<u>< 5 Years</u>	<u>> 5 Years</u>
20	11.3%	0.0%
25	9.3%	0.0%
30	7.8%	3.8%
35	6.5%	2.5%
40	5.6%	3.5%
45	5.2%	5.0%
50	5.0%	4.5%
55	4.8%	0.7%
60	4.7%	0.4%
64	0.0%	0.0%

THE KEMMERER COAL COMPANY ELKOL SORENSEN MINE PENSION PLAN

Notes to Financial Statements

Note 1 - Description of the Plan and Significant Accounting Policies (continued)

Actuarial Present Value of Accumulated Plan Benefits (continued)

- The probabilities that participants at the ages indicated will retire are:

<u>Age</u>	<u>% Retiring</u>
55	20%
56	10%
57	10%
58	10%
59	10%
60	10%
61	10%
62	50%
63	10%
64	20%
65	40%
66	100%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The following change in actuarial assumptions was made from the January 1, 2012 valuation to the January 1, 2013 valuation:

- The mortality assumption for funding purposes was updated from the IRS 2012 Static Mortality Table to the IRS 2013 Static Mortality Table.

The following changes in pension plan provisions were made from the January 1, 2012 valuation to the January 1, 2013 valuation:

The May 1, 2012 union negotiations were reflected in this valuation, which included the following changes:

- The Plan was frozen to new participants effective May 1, 2012;
- The benefit multiplier applicable to service earned after December 31, 2012 was increased by \$2 for those who terminate after May 1, 2014 and by an additional \$2 for those who terminate after May 1, 2016; and
- The supplemental benefit paid to receiving participants was extended for the life of the new contract.

THE KEMMERER COAL COMPANY ELKOL SORENSEN MINE PENSION PLAN

Notes to Financial Statements

Note 2 - Fair Value Accounting

Generally accepted accounting principles require disclosure about how fair value is determined and establish a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

- Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.
- Level 2: Inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in methodologies used at December 31, 2013 and 2012.

Registered investment companies: Valued at the net asset value of shares held by the Plan at year-end based on the quoted price in an active market.

Pooled separate accounts: Valued at the net asset value of units held by the Plan at year-end based on the quoted market prices of the securities underlying the investments.

Guaranteed deposit fund: Valued using a method that approximates the market value of underlying investments by discounting expected future investment cash flow from both investment income and repayment of principal for each investment purchased.

The preceding methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Note 2 - Fair Value Accounting (continued)

Reported Net Asset Values

The investments in pooled separate accounts as of December 31, 2013 and 2012 are \$40,414,835 and \$37,327,570, respectively, as valued based on the net asset value as a practical expedient. There are no unfunded commitments, and the units may be redeemed on a daily basis.

Note 3 - Investments

Prudential Retirement has certified in writing to the Plan administrator that the stated amounts for investments at fair value as of December 31, 2013 and 2012 and the income earned or losses incurred on the investments for the years ended December 31, 2013 and 2012, as reflected in the accompanying financial statements and the supplemental schedule of assets (held at end of year), are complete and accurate.

The Plan administrator has elected the method of compliance as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the Plan administrator instructed the Plan's auditors not to perform any auditing procedures with respect to the investment information certified by the custodian, except for comparing the information contained therein to information included in the financial statements and the supplemental schedule of assets (held at end of year).

The fair value of investments greater than 5% of net assets available for benefits was the following:

Note 4 - Income Taxes

The Plan has received a tax determination letter dated June 4, 2008 from the IRS covering changes made to comply with ERISA and indicating that the Plan qualifies under the provisions of Section 401(a) of the Code and is exempt from federal income taxes. The Plan sponsor is in the process of renewal as of the date of the financial statements.

The Plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code. Therefore, no provision for income taxes has been included in the accompanying financial statements.

Generally accepted accounting principles require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan and has concluded that, as of December 31, 2013 and 2012, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2010.

Note 5 - Administration of the Plan

The Company provides, at no cost to the Plan, certain administrative, accounting, and legal services to the Plan and also pays the cost of certain outside services for the Plan.

Note 6 - Party-in-Interest Transactions

Plan investments include pooled separate accounts and a guaranteed deposit fund managed by Prudential Retirement. Prudential Retirement is the custodian, as defined by the Plan; therefore, these transactions qualify as party-in-interest. These transactions are exempt from prohibited transaction regulations.

Note 7 - Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to terminate the Plan subject to the provisions of ERISA. If the Plan is terminated for any reason, the net assets of the Plan would be allocated, as prescribed by ERISA and its regulations, generally to provide the following benefits in the order indicated:

- Annuity benefits that former employees or their beneficiaries have been receiving for at least three years or that employees eligible to retire for the three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination;
- Other vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC"), a U.S. government agency, up to the applicable limitations (discussed below);
- All other vested benefits not insured by the PBGC; or
- All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

Note 8 - Subsequent Events

The Company has evaluated subsequent events related to the Plan through the auditors' report date, which is the date the financial statements were available for issuance, and determined that there were no subsequent events requiring disclosure.
