The amount charged for administrative expenses totaled $6,826 and $5,072 for the years ended December 31, 2013 and 2012.

Estimates
The preparation of financial statements in conformity with generally accepted accounting principles requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

NOTE 3 PARTICIPANT NOTES RECEIVABLE:

The Company allows for loans to plan participants. The loans must be approved by the Plan Trustee. The MG Trust Company sets up a repayment plan which includes interest. The term of the payback is five years with payments being made weekly. The interest rate is fixed at the time of a loan to a rate of 4.25%. As of December 31, 2013 and 2012, all loans were current.

NOTE 4 RECONCILIATION TO 5500:

The Plan's Annual Return/Report of Employee Benefit Plan Form 5500 was prepared on the cash basis. The Plan's financial statements have been prepared on the accrual basis of accounting. Differences occurred between these two reports for receivables recorded at December 31, 2013 and 2012 of $8,868 and $13,552, respectively. The net effect is a difference of net increase (decrease) in assets of $(4,684) and $4,382 for years ending December 31, 2013 and 2012.

NOTE 5 INVESTMENTS:

Quoted market prices are used to value investments. The Plan's investments are all mutual funds traded in the open market.

FASB ASC 820, Fair Value Measurements and Disclosures, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

NOTE 5 INVESTMENTS (continued):

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in an active market. This level includes common stocks, corporate bonds or mutual funds based on the closing price reported in the active market where the securities are traded.

Level 2 – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in inactive markets, inputs other than quoted prices that are observable for the asset or liability, inputs that are derived principally from or corroborated by observable market data by correlation, or other means.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The fair values of all of the investments listed are based on unadjusted, quoted prices in active markets as of the measurement date (often referred to as Level 1 inputs).
