CAIRO UNION PENSION PLAN

Notes to Financial Statements Years Ended December 31, 2013 and 2012

Note 1 – Description of Plan

The following description of the Cairo Union Pension Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan agreement for a complete description of the Plan's provisions.

General

The Plan, as amended and restated effective January 1, 2010, except as otherwise provided in the Plan, is a defined benefit plan which covers substantially all eligible union employees of Burkart Foam, Inc., a subsidiary of Ohio Decorative Products, Inc., and provides for retirement, death, and disability benefits. In 2001, the Plan was amended, with consideration of the plant closure on October 10, 2001 to vest participants with less than five years of service. After this plant closed, Ohio Decorative Products, Inc. (Plan Sponsor and Administrator) became responsible for the Plan's funding.

Contributions

Participants are not permitted to make contributions to the Plan. The Plan Sponsor has agreed to voluntarily contribute such amounts as are necessary to provide assets sufficient to meet the benefits to be paid to plan participants. The Plan Sponsor's present intention is to make contributions in amounts sufficient to fund the Plan's current year's service cost and to fund the prior service costs plus interest thereon over periods of time as specified by the Employee Retirement Income Security Act of 1974 (ERISA). The Plan has met the ERISA minimum funding requirements.

Benefits and Vesting

Retirement benefits are earned by participants at a standard rate times their years of credited service, based on hire date, during each Plan year.

Plan Termination

Should the Plan terminate at some future time, its net assets will generally not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Note 1 – Description of Plan (continued)

Administrative Expenses

Fees for services rendered by parties in interest are paid by the Plan for trust and other administrative services and by the Plan Sponsor for legal and accounting fees, as provided by the Plan.

Note 2 – Significant Accounting Policies

Basis of Accounting

The accompanying financial statements of the Plan have been prepared using the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America. Benefit payments to participants are recorded when paid.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. There have been no changes in the valuation methods used. The Plan's investments are held by Aetna Life Insurance Company and ING Investment Trust Company, the Trustees of the Plan.

The assets at Aetna are invested in an Immediate Participation Guarantee Contract (the Contract), which consists of the fixed income account and the disbursement payment account. The fixed income account is backed by the general account of the issuer. The Plan deposits a lump sum with the issuer and receives a guaranteed interest rate for a specified time. Interest is accrued on either a simple interest or fully compounded basis and paid either periodically or at the end of the contract term. The fixed income account is valued at withdrawal value as defined by Aetna, which represents the amount available for withdrawal in a lump sum on the period end date (before assessment of any outstanding service fees). Benefit payments to participants or their beneficiaries are made directly by Aetna from funds accumulated in the disbursement payment account. The disbursement payment account is a pooled separate account. The value of the units held in pooled separate accounts are based on quoted market prices of the underlying investments and are based on the net asset value of the shares held by the Plan at year end.

The assets at ING are invested in collective trust funds. Collective trust funds represent investments with various investment managers. Units held in collective trust funds are valued at the unit value as reported by the investment managers, on a discounted cash flow basis, or utilizing quoted market prices, as applicable. Collective trust funds are not available in an exchange and active market; however, the fair value is determined based on the underlying investments as traded in an exchange and active market.

CAIRO UNION PENSION PLAN

Notes to Financial Statements Years Ended December 31, 2013 and 2012

Note 2 – Significant Accounting Policies (continued)

Investment Valuation and Income Recognition (continued)

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement.

Purchases and sales of the investments within the Plan are reflected on a trade-date basis. Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year. Interest was earned on the Plan's deposits in the fixed income account at an effective average interest rate of approximately 4.87% and 5.29% in 2013 and 2012, respectively.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Most significantly, estimates are used in determining the actuarial present value of accumulated plan benefits. Actual results could differ from those estimates.

Note 3 – Investments

All investment information disclosed in the accompanying financial statements and supplemental schedules, including investments held at December 31, 2013 and 2012, and net appreciation (depreciation) in fair value of investments in collective trust funds and guaranteed interest account, and interest for the years then ended, were obtained or derived from information supplied to the Plan Administrator and certified as complete and accurate by the Trustees.

Note 3 – Investments (continued)

Note 4 – Fair Value Measurement

The various inputs that may be used to determine the value of the Plan's investments are summarized in three broad levels within the fair value hierarchy. The three levels are described below:

- Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
- Level 2: Quoted prices in markets that are not considered to be active or financial instruments for which all significant inputs are observable, either directly or indirectly;
- Level 3: Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

Note 4 – Fair Value Measurement (continued)

A financial asset's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following table sets forth by level within the fair value hierarchy the Plan's investments at fair value, as of December 31, 2013 and 2012. Assets are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Note 5 – Restrictions on Net Assets

The following table sets forth a summary of the Plan's investments with redemption restrictions for December 31, 2013 and 2012:

	Type of Withdrawal	Redemption Frequency	Redemption Notice Period
Fixed Income (a)	Participant withdrawals	Daily	None
	Terminated participation in the fund	Not applicable to minimum balance required; for amounts in excess of minimum balance, daily within 10 days following date of notification	For amounts in excess of minimum balance, minimum of 10 days
Disbursement Payment Account (b)	Participant withdrawals	Daily	None
	Terminated participation in the fund	Daily, within 60 days following date of notification	Minimum of 60 days

(a) The Plan is required to maintain a minimum balance in this account to fund the annuities paid from the account. The account balance is approximately \$14,000 as of both December 31, 2013 and 2012. If the Plan were to terminate the contract, the minimum balance would be used to fund the related annuities outside of the Plan assets.

(b) The Plan is required to maintain a balance in this account sufficient to fund two months of disbursements scheduled to be paid from the account. The account balance is approximately \$27,000 and \$25,000 as of December 31, 2013 and 2012, respectively. If the Plan were to terminate the contract, the balance in this account (after funding current disbursements) would be forwarded to the succeeding custodian.

CAIRO UNION PENSION PLAN

Notes to Financial Statements Years Ended December 31, 2013 and 2012

Note 6 – Accumulated Plan Benefits

Accumulated plan benefits are those estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to a) retired or terminated employees or their beneficiaries, and b) present employees or their beneficiaries. Benefits for retired or terminated employees or their beneficiaries are based on years of credited service to the valuation date. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – for active employees are attributable to employee service rendered to the valuation date.

The Plan's actuary estimated the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefit information as of December 31, the latest available date, is as follows:

	2013	2012
Actuarial Present Value of Accumulated Plan Benefits		
Vested benefits		
Participants currently receiving payments	\$ 1,179,652	\$ 1,155,270
Other participants	99,206	158,279
	<u>\$ 1,278,858</u>	<u>\$ 1,313,549</u>

Changes in the actuarial present value of accumulated plan benefits are summarized as follows:

Actuarial Present Value of Accumulated Plan Benefits at Beginning of Year	\$ 1,313,549
Increase (Decrease) Attributable to	
Benefits paid	(177,283)
Change in actuarial assumptions	91,143
Accumulated interest	85,848
Additional benefits accumulated	(34,399)
Net Increase (Decrease)	<u>(34,691)</u>
Actuarial Present Value of Accumulated Plan Benefits at End of Year	<u>\$ 1,278,858</u>

CAIRO UNION PENSION PLAN

Notes to Financial Statements Years Ended December 31, 2013 and 2012

Note 6 – Accumulated Plan Benefits (continued)

Significant assumptions underlying actuarial computations are:

Assumed Rate of Return	6.00% in 2013 and 7.00% in 2012
Retirement Age	65 years in 2013 and 2012
Mortality Basis in 2013	2014 RP-2000 non-annuitant and annuitant tables
Mortality Basis in 2012	2013 RP-2000 non-annuitant and annuitant tables

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Note 7 – Income Tax Status

The Plan has received a determination letter from the Internal Revenue Service dated February 4, 2011, stating that the Plan is designed in accordance with the applicable sections of the Internal Revenue Code (the Code) and, therefore, the related trust is exempt from taxation. Subsequent to the issuance of this determination letter, the Plan was amended. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The Plan Administrator believes the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan, as amended, is qualified and the related trust is tax exempt.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan Administrator believes it is no longer subject to income tax examinations for years prior to 2010.

Note 8 – Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

CAIRO UNION PENSION PLAN

Notes to Financial Statements Years Ended December 31, 2013 and 2012

Note 8 – Risks and Uncertainties (continued)

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

Note 9 – Subsequent Events

On March 31, 2014, certain operations of the Plan Sponsor were sold. This sale resulted in the transfer of most, but not all, employees to the operations of the successor company. However, the Plan has been retained under the sponsor's new name, Ohio Decorative Products, LLC.

On April 7, 2014, ING US, Inc., the parent company of the trustee ING Investment Trust Company was rebranded and is now named Voya Financial, Inc. All investments sponsored by the trustee were renamed as a result of this event.

Management has evaluated subsequent events through October 13, 2014, the date the financial statements were available to be issued, and determined that no events, other than as noted above, have occurred that require additional disclosure.

Plan Name: Cairo Union Pension Plan EIN: 46-5219408

Plan Sponsor Name: Ohio Decorative Products, LLC PN: 007

Expenses:

The assumption for expenses was changed to one which will more closely track the actual expenses being paid from the plan's assets. As actual expenses change, the revised assumption will reflect that change in the following year.

Asset Rate of Return:

The assumed rate of return on assets was determined based upon past investment experience and the expectation for future experience. It is expected that a diversified asset portfolio (approximately 67% in a diversified asset portfolio and 33% insurance company general account and money markets), will earn 6.00% per year over long term investment periods.
