The Cleveland Museum of Art Pension Plan

Notes to Financial Statements December 31, 2013 and 2012

Note 1 - Plan Description

The following description of The Cleveland Museum of Art Pension Plan (the "Plan") provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General - The Plan is a defined benefit plan covering all employees of The Cleveland Museum of Art (the "Museum") who have completed 1,000 hours of service and are age 21 or older. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Pension Benefits - Participants shall accrue yearly benefit payments in an amount equal to 1 percent of the career average compensation multiplied by the number of years of service credited. As of December 31, 2010, employees who had not attained age 45 with at least five years of service under the Plan, and whose age plus years of service under the Plan did not total at least 60 with at least five years of service under the Plan, ceased to accrue additional benefits. Those employees who had attained the above qualifications were able to make a one-time irrevocable election to continue to accrue additional benefits under the Plan. The Plan permits early retirement from ages 55 to 65. Employees may elect to receive their pension benefits in the form of a joint and survivor annuity. If employees terminate before rendering five years of service, they forfeit the right to receive a benefit. Employees may elect to receive the value of their accumulated plan benefits as a lump-sum distribution upon retirement or termination or they may elect to receive their benefits as a life annuity payable monthly from retirement.

Death Benefits - If an active or terminated married employee who has a vested interest in the Plan dies prior to his or her benefit commencement, a death benefit equal to the benefit the employee would have received under the qualified joint and survivor annuity form, had he or she retired on the day immediately preceding the date of his or her death, will be paid to the surviving spouse. A beneficiary of both married and single employees will at least receive a cash payment equal to the employee's contribution accumulation.

Funding - Contributions are made by the Museum in actuarially determined amounts. The Museum's policy is to make contributions necessary to satisfy ERISA funding standards. Annual contributions meet the minimum funding requirements of ERISA.

Funding Policy - The Plan no longer allows participant contributions.

The accumulated contributions of nonretired participants are \$3,345,171 and \$3,364,224 as of December 31, 2013 and 2012, respectively, including the related share of the Plan's investment income. Interest on amounts contributed to the Plan subsequent to January 1, 1988 is determined based on 120 percent of the federal mid-term rate in effect as of the first month of the plan year (1.04 and 1.40 percent as of January 1, 2013 and 2012, respectively).

The Cleveland Museum of Art Pension Plan

Notes to Financial Statements December 31, 2013 and 2012

Note 1 - Plan Description (Continued)

Vesting - A participant is fully vested in his or her employer pension benefit after five years of credited service. Participants are immediately vested in their employee contributions and any income thereon.

Administration - The Museum is the sponsor of the Plan. The pension committee, as provided in the plan agreement, is the plan administrator and has responsibility for the administration of the Plan. John Hancock Life Insurance Company (U.S.A) functions as trustee and investment manager. Investment management fees and trustee fees are paid by the Plan in accordance with the plan agreement.

Party-in-interest Transactions - The Plan invests in a group annuity contract managed by John Hancock Life Insurance Company (U.S.A) or its affiliates. John Hancock Life Insurance Company (U.S.A) is the trustee of the Plan; therefore, these transactions qualify as party-in-interest transactions as defined under ERISA guidelines.

Note 2 - Summary of Significant Accounting Policies

Investment Valuation - The Plan's investments are stated at fair value. The fair value of the unallocated contract is based on contract value adjusted for certain contractual provisions. Contract value represents investments at cost plus accrued interest income less amounts withdrawn to pay benefits.

See Note 6 for additional information.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Benefit Payments - Benefits are recorded when paid.

Administrative Expenses - Various administrative costs are paid by the Museum.

The Cleveland Museum of Art Pension Plan

Notes to Financial Statements December 31, 2013 and 2012

Note 2 - Summary of Significant Accounting Policies (Continued)

Actuarial Present Value of Accumulated Plan Benefits - Accumulated plan benefits are those estimated future periodic payments that are attributable under the Plan's provisions to the services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to:

- a. Retired or terminated employees or their beneficiaries
- b. Present employees or their beneficiaries

Benefits payable under all circumstances (retirement, death, disability, and termination of employment) are included to the extent they are deemed attributable to employee services rendered to the valuation date.

Actuarial Assumptions - The actuarial present value of accumulated plan benefits is determined by an actuary from Findley Davies as of the beginning of each plan year and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and probability of payment between the valuation date and the expected date of payment.

The significant actuarial assumptions used in the valuation of the Plan at December 31, 2012 and 2011 are summarized as follows:

Actuarial cost method	- Entry age normal actuarial cost method
Assumed rate of return	- 7.25 percent per annum
Mortality basis	- RP-2000 static, nongenerational Mortality Table as described in Regulation I.430(h)(3) projected by scale AA, male and female, with different rates for annuitants and nonannuitants
Retirement	- Age 59 through 65

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The Cleveland Museum of Art Pension Plan

Notes to Financial Statements December 31, 2013 and 2012

Note 2 - Summary of Significant Accounting Policies (Continued)

Risks and Uncertainties - Contributions to the Plan and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, employee compensation, and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and due to the uncertainties inherent in setting assumptions, the effect of such changes could be material to the financial statements. Investment securities are exposed to various risks such as interest rate, market, and credit risks. It is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the statement of net assets available for benefits.

Subsequent Events - The financial statements and related disclosures include evaluation of events up through and including September 23, 2014, which is the date the financial statements were available to be issued.

Note 3 - Unaudited Investment Information

John Hancock Life Insurance Company (U.S.A) (the "Trustee") holds the Plan's investments and executes all investment transactions. The investment balances and related investment results included in the accompanying financial statements and supplemental schedule of assets held at end of year are based solely on information provided by the Trustee.

Note 4 - Benefits

The actuarial present value of accumulated plan benefits is determined by consulting actuaries from Findley Davies as of the beginning of each plan year. The calculation of the estimated present value of accumulated plan benefits attributable to participants in the Plan, which were made as of and for the year ended December 31, 2012, are as follows:

Actuarial Present Value of Accumulated Plan Benefits

Vested benefits:

Participants currently receiving benefit payments	\$ 10,650,393
Other vested participants	<u>12,475,776</u>
Total vested benefits	23,126,169

Note 4 - Benefits (Continued)

Actuarial Present Value of Accumulated Plan Benefits -	
Beginning of year	\$ 22,840,572
Increase (decrease) during the year attributable to:	
Benefits accumulated	289,033
Interest due to the decrease in the discount period	1,602,710
Benefits paid	<u>(1,355,497)</u>
Net increase	<u>536,246</u>
Actuarial Present Value of Accumulated Plan Benefits - End of	
year	<u>\$ 23,376,818</u>

Note 5 - Group Annuity Contract

The Plan invests in an unallocated immediate participation guarantee group annuity contract with John Hancock Life Insurance Company (U.S.A). The insurer credits the Plan's deposits that are intended to provide future benefits to present employees to an account that is invested with other assets of the insurer. The account is credited with its share of the insurer's actual investment income. When a participant retires, benefit payments are made directly from the account. The balance of the account must be maintained at the amount required, according to a premium schedule in the contract, to provide for the remaining pension benefits for all current retirees. This portion of the account is referred to as the retired life fund.

In addition to the contract recorded in the accompanying statement of net assets available for benefits, there is a contingency account with a fair value of \$707,958 and \$745,218 at December 31, 2013 and 2012, respectively, that is not an asset of the Plan and therefore is not included in the financial statements. This contingency account, however, is a contractual asset of the insurer and is considered an asset for actuarial reporting purposes. The income earned on the account may only be used to reduce future employer contributions. During both 2013 and 2012, the contract received income of approximately \$33,000 and \$38,000, respectively, (included in interest income) from the contingency account.

Note 6 - Fair Value Measurements

Accounting standards require certain assets and liabilities be reported at fair value in the financial statements and provide a framework for establishing that fair value. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

The following tables present information about the Plan's assets measured at fair value on a recurring basis at December 31, 2013 and 2012.

The Cleveland Museum of Art Pension Plan

Notes to Financial Statements December 31, 2013 and 2012

Note 6 - Fair Value Measurements (Continued)

Level 1 - Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Plan has the ability to access.

Level 2 - Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets and other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 - Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset. These Level 3 fair value measurements are based primarily on management's own estimates using pricing models, discounted cash flow methodologies, or similar techniques taking into account the characteristics of the asset.

In instances whereby inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Plan's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset.

Assets Measured at Fair Value on a Recurring Basis at December 31, 2013

	Level 1	Level 2	Level 3	Balance at December 31, 2013
Group annuity contract	\$ -	\$ 25,904,875	\$ -	\$ 25,904,875

Assets Measured at Fair Value on a Recurring Basis at December 31, 2012

	Level 1	Level 2	Level 3	Balance at December 31, 2012
Group annuity contract	\$ -	\$ 26,698,818	\$ -	\$ 26,698,818

The Plan's policy is to recognize transfers between levels of the fair value hierarchy as of the actual date of the event of change in circumstances that caused the transfer. There were no significant transfers between levels of the fair value hierarchy during 2013 and 2012.

The Cleveland Museum of Art Pension Plan

Notes to Financial Statements December 31, 2013 and 2012

Note 7 - Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro-rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee while other benefits may not be provided for at all.

Note 8 - Tax Status

The Plan has received a determination letter from the Internal Revenue Service indicating that the Plan, as designed, is qualified for tax-exempt treatment under the applicable section of the Internal Revenue Code. Accordingly, no provision for income taxes has been made in the accompanying statements.

In accordance with guidance on accounting for uncertainty in income taxes, management evaluated the Plan's tax position and does not believe the Plan has any uncertain tax positions that require disclosure or adjustment to the financial statements. The plan administrator believes the Plan is no longer subject to tax examinations for years prior to 2010.

Asset Method

Funding: Market Value of Assets plus interest adjusted accrued but unpaid contributions as of the valuation date plus an adjustment to defer full recognition of investment losses and gains over a two-year period. The investment (gain)/loss for every year equals the market value at the beginning of the year projected to the end of the year using the interest rate above, but no greater than the third segment rate for the plan year, minus the end of the year actual market value. The actuarial value of assets will be no less than 90% and no more than 110% of the market value (including interest-adjusted accrued but unpaid contributions). Note that due to the regulatory constraint on the interest rate, a characteristic of this asset valuation method is that, over time, it may be more likely to produce an actuarial value of assets that is less than the market value of assets.

CHANGE IN ACTUARIAL ASSUMPTIONS

Changes in Assumptions and Methods since the Last Actuarial Valuation

The interest rate used for developing expected value of assets was 7.25%.

Justification for Changes in Actuarial Assumptions and Methods

Assumption changes, other than those relating to mandated Funding Target Liability interest rates and mortality tables, if any, did not decrease the Funding Target Liability. Therefore, the plan did not need IRS approval to change assumptions.
