Notes to Financial Statements

December 31, 2013 and 2012

Note 1: Description of the Plan

The following description of the United Bancorp, Inc. of Martins Ferry, Ohio Employees' Pension Plan and Trust (Plan) provides only general information. Additional information about the vesting and benefit provisions and the Pension Benefit Guaranty Corporation's (PBGC) benefit guarantee is contained in the Plan Document and *Summary Plan Description*, which are available from the plan administrator.

General

The Plan is a non-contributory defined benefit plan that covers substantially all employees of United Bancorp, Inc. (the Company) and provides for retirement, death and disability benefits. The Plan is subject to provisions of the *Employee Retirement Income Security Act of 1974* (ERISA). JPMorgan Chase Bank, N. A. is the trustee of the Plan.

Contributions

The Company has agreed to voluntarily contribute such amounts that are necessary to provide assets sufficient to meet the benefits to be paid to Plan members. The Company's present intention is to make contributions to fund the Plan in accordance with ERISA minimum funding standards. Additional contributions in excess of this amount may be made to cover the amount of benefits being earned during the year, if the Company is able to do so. The Plan has met the minimum funding requirements established by the federal government.

Pension Benefits

Benefits under the Plan are based on employees' five highest compensation years during their last ten years of credited service. Normal retirement age is either the fifth anniversary of the first day of the Plan year in which participation in the Plan commenced or age 65, whichever is later, but in no event later than age 70. Participants may elect to receive reduced benefits upon early retirement at age 55, provided that they have completed years of service with the Company such that the participant's age and years of service sum to at least 70. Accrued benefits are payable as an annuity over the participant's lifetime or as a qualified joint and one half-survivor annuity unless an election is made otherwise.

Death Benefits

The spouse of a participant will receive a 50% survivor annuity, as defined in the Plan, upon the death of the participant. The surviving spouse annuity is equal to 50% of the participant's monthly benefit. This benefit is immediately payable to the spouse if the participant was already receiving benefits. If the participant was not already receiving benefits, payments to the spouse may commence as of the earliest date the participant would have received benefits.

Vesting

Participants are fully vested after five years of service with no vesting prior to that time.

Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- a. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan.
- b. Other vested benefits insured by the PBGC up to the applicable limitations discussed below.
- c. Vested benefits not insured by the PBGC.
- d. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

Note 2: Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets and changes in net assets available for benefits, disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Valuation of Investments and Income Recognition

Marketable securities are stated at fair value.

Mutual funds and money market funds are valued at the net asset value (NAV) of shares held by the plan at year end. These funds are public investments valued using the NAV provided by the plan administrator of the fund. The NAV is based on the underlying assets owned by the fund, minus its liabilities and then divided by the number of shares outstanding. The NAV is a quoted price in an active market.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Administrative Expenses

Administrative expenses may be paid by the Company or the Plan, at the Company's discretion.

Accumulated Plan Benefits

Accumulated plan benefits (see Note 5) are those estimated future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to:

- a. Retired or terminated employees or their beneficiaries
- b. Present employees or their beneficiaries

Benefits under the Plan are based on employees' five highest compensation years during their last ten years of credited service. The accumulated plan benefits for active employees are based on their average compensation during the five years of highest compensation. Benefits payable under all circumstances — retirement, death, disability and termination of employment — are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from plan assets are excluded from accumulated plan benefits.

Plan Tax Status

The Plan utilizes a prototype Non-standardized Defined Benefit Plan that was developed Harbridge Consulting Group, LLC. This prototype plan document has been filed with the appropriate agency. The Plan has not obtained or requested a determination letter. However, the Plan Administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code and that the Plan was qualified and the related trust was tax exempt as of the financial statement date. With a few exceptions, the Plan is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for years before 2010.

Note 4: Disclosures About Fair Value of Plan Assets

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements must maximize the use of observable inputs and minimize the use of unobservable inputs. There is a hierarchy of three levels of inputs that may be used to measure fair value:

- Level 1** Quoted prices in active markets for identical assets or liabilities
- Level 2** Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities
- Level 3** Unobservable inputs supported by little or no market activity and are significant to the fair value of the assets or liabilities

Recurring Measurements

The following tables present the fair value measurements of assets recognized in the accompanying statements of net assets available for benefits measured at fair value on a recurring basis and the level within the fair value hierarchy in which the fair value measurements fall at December 31, 2013 and 2012:

Following is a description of the valuation methodologies and inputs used for assets measured at fair value on a recurring basis and recognized in the accompanying statements of net assets available for benefits, as well as the general classification of such assets pursuant to the valuation hierarchy. There have been no significant changes in the valuation techniques during the year ended December 31, 2013. The Plan had no liabilities measured at fair value on a recurring basis. In addition, the Plan had no assets or liabilities measured at fair value on a nonrecurring basis.

Investments

Where quoted market prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy.

Note 5: Accumulated Plan Benefits

An actuary from Harbridge Consulting Group, LLC determines the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

Notes to Financial Statements

December 31, 2013 and 2012

The accumulated plan benefit information as of the most recent valuation dates for which complete data is available was as follows:

	January 1, 2013	January 1, 2012
Actuarial present value of accumulated plan benefits		
Vested benefits		
Participants currently receiving payments	\$ 359,489	\$ 201,858
Other participants	<u>1,702,822</u>	<u>1,709,228</u>
	<u>2,062,311</u>	<u>1,911,086</u>
Nonvested benefits	<u>109,769</u>	<u>116,676</u>
Total actuarial present value of accumulated plan benefits	<u><u>\$ 2,172,080</u></u>	<u><u>\$ 2,027,762</u></u>

Changes in the actuarial present value of accumulated plan benefits were as follows:

	January 1, 2013	January 1, 2012
Actuarial present value of accumulated plan benefits, beginning of year	<u>\$ 2,027,762</u>	<u>\$ 2,005,618</u>
Increase (decrease) during the year attributable to		
Change in actuarial assumptions	4,265	95,678
Benefits accumulated	219,187	180,324
Increase for interest due to the decrease in the discount period	152,938	144,516
Benefits paid	<u>(232,072)</u>	<u>(398,374)</u>
Net increase	<u>144,318</u>	<u>22,144</u>
Actuarial present value of accumulated plan benefits, end of year	<u><u>\$ 2,172,080</u></u>	<u><u>\$ 2,027,762</u></u>

Significant assumptions underlying the actuarial computations are:

- Assumed rate of return on investments: 8%
- Mortality basis: RP-2000 Mortality Tables
- Retirement: At normal retirement age (65)
- Asset valuation: Market

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

December 31, 2013 and 2012

Note 6: Party-in-Interest Transactions

Party-in-interest transactions include those with fiduciaries or employees of the Plan, any person who provides services to the Plan, an employer whose employees are covered by the Plan, an employee organization whose members are covered by the Plan, a person who owns 50 percent or more of such an employer or employee association, or relatives of such persons.

The Plan invests in certain funds of the Plan trustee and pays a portion of the actuarial fees. Total administrative expenses paid by the Plan were \$30,173 for 2013 and \$1,665 for 2012. The Company provides certain administrative services at no cost to the Plan.

Note 7: Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Note 8: Subsequent Events

Subsequent events have been evaluated through the date of the Independent Auditor's Report, which is the date the financial statements were available to be issued.

Effective January 1, 2014, the Company amended the plan so that benefits earned under the Final Average Earnings plan design are frozen and all employees will earn future benefits under the Career Average Earnings plan design.

The valuation of a defined benefit pension plan involves estimates and assumptions about the probability of events occurring far into the future. Examples include assumptions about future employment, mortality, and retirement. Below is a description of the actuarial assumptions used in the valuation.

Funding Target Liability

Valuation Date: January 1, 2013

Demographic Information: The demographic information was provided as of January 1, 2013 by United Bancorp, Inc. Although we did not audit the data, we did review the data for reasonableness.

Actuarial Cost Method: As required by PPA, the Traditional Unit Credit Cost Method was used. In addition, as required under PPA, annuity substitution was utilized in the valuation of the Funding Target Liability applicable to the benefits that were assumed to be paid in the form of a lump sum, as determined under 417(e). Specifically, the mortality table used for these benefits, for the post benefit commencement period, was the Commissioner's Standard Mortality Table for 2013.

Actuarial Value of Assets: The actuarial value of assets is determined by averaging the fair market value of assets as of the valuation date and the adjusted fair market values as of the preceding two valuation dates. This methodology is consistent with that provided in IRS Notice 2009-22.

Expected Return on Assets: 8.00%

Interest Rates: The funding segment rates for plan years beginning in 2013 were utilized as prescribed by MAP-21 for minimum funding purposes.

Segment	Interest Rate
Segment 1	4.94%
Segment 2	6.15%
Segment 3	6.76%

Effective Interest Rate
6.27%

The September 2012 funding segment rates for 2013 plan years, without application of the interest rate stabilization provisions of MAP-21, are outlined below.

Segment	Interest Rate
Segment 1	1.75%
Segment 2	4.62%
Segment 3	5.72%

Effective Interest Rate
4.84%

Segment 1 is applied to benefit payments expected to be made in the first 5 years, segment 2 is applied to benefit payments expected to be made in the next 15 years and segment 3 is applied thereafter.

Rate of Compensation Increase: Salaries are assumed to increase at 3.00% per year.

Social Security Wage Base Increase: The Social Security Wage Base is assumed to increase at 3.50% per year.

Mortality: The RP-2000 Mortality Table for annuitants and non-annuitants with projected mortality improvements using Scale AA; specifically as outlined in IRC Regulation 1.430(h)(3)-1 for 2013 valuations. The static mortality tables are projected from the base table for the year 2000 through 2013 with further projection to reflect the approximate expected duration of liabilities, namely 7 years for annuitants and 15 years for non-annuitants.

Retirement Incidence: Employees were assumed to retire at normal retirement age or current age, if later.

Turnover: rates were assumed in the valuation. Illustrative rates are shown below:

Age	Percentage
25	7.72%
30	7.22%
35	6.28%
40	5.15%
45	3.98%
50	2.56%
55	0.94%
60	0.09%

Disability: Rates of disability were not assumed.

Mortality (To Convert Monthly Annuity Benefit To Lump Sum): The prevailing commissioners' standard mortality table (described in Internal Revenue Code Section 807(d)(5)(a)). This table is currently a 50/50 blend of the sex distinct combined annuitant/non-annuitant mortality tables prescribed by the Internal Revenue Service for determining the "Funding Target Liability" for 2013.

Interest Rate (To Convert Monthly Annuity Benefit To Lump Sum): The funding segment rates prescribed by MAP-21 for 2013 plan years.

Administrative Expenses: Actual plan expenses paid out of the trust during the previous plan year, rounded to the nearest thousand.

Spouse Assumptions: 100% of participants not currently collecting benefits are assumed to be married, with male spouses assumed to be three years older and female spouses assumed to be three years younger than the participant.

Form of Benefit: Active participants are assumed to receive a lump sum. Terminated vested participants are assumed to receive a monthly annuity.

Actuarial Present Value of Accumulated Plan Benefits (ASC 960)

Interest Rate: 8.00%

Mortality:

Prior to January 1, 2013:

The static mortality tables are projected from the base table for the year 2000 through 2012 with further projection to reflect the approximate expected duration of liabilities, namely 7 years for annuitants and 15 years for non-annuitants.

As of January 1, 2013:

The RP-2000 Mortality Table for annuitants and non-annuitants with projected mortality improvements using Scale AA; specifically as outlined in IRC Regulation 1.430(h)(3)-1 for 2013 valuations. The static mortality tables are projected from the base table for the year 2000 through 2013 with further projection to reflect the approximate expected duration of liabilities, namely 7 years for annuitants and 15 years for non-annuitants.

Mortality (To Convert Monthly Annuity Benefit To Lump Sum):

Prior to January 1, 2013:

The prevailing commissioners' standard mortality table (described in Internal Revenue Code Section 807(d)(5)(a)). This table is currently a 50/50 blend of the sex distinct combined annuitant/non-annuitant mortality tables prescribed by the Internal Revenue Service for determining the "Funding Target Liability" for 2012.

As of January 1, 2013:

This table is currently a 50/50 blend of the sex distinct combined annuitant/non-annuitant mortality tables prescribed by the Internal Revenue Service for determining the "Funding Target Liability" for 2013.

Interest Rate (To Convert Monthly Annuity Benefit To Lump Sum): 5.00%, per annum

Unless specifically mentioned, all remaining assumptions for the Actuarial Present Value of Accumulated Plan Benefits remain the same as described for the Funding Target Liability above.
