Anheuser-Busch Companies Pension Plan

Report on the financial statements

We have audited the accompanying financial statements of the Anheuser-Busch Companies Pension Plan (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2013 and 2012, and the related statements of changes in net assets for the years then ended, and the related notes to the financial statements.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2013, and changes therein for the year then ended, and its financial status as of December 31, 2012, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

NOTES TO FINANCIAL STATEMENTS

December 31, 2013 And 2012

(Dollars in thousands, unless otherwise stated)

1. Description Of The Plan

The following brief description of the Anheuser-Busch Companies Pension Plan (the Plan) is intended to give a general summary of its principal provisions. Participants should refer to the Plan Document for more complete information.

General

The Plan is a defined benefit plan that provides normal retirement, early retirement, disability and death benefits to all covered employees of participating and former employers who have met certain service and age requirements, as defined in the supplemental provisions of the Plan Document. The Plan was established by Anheuser-Busch Companies, LLC (the Company). Employees do not contribute to the Plan. The Plan is subject to the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

Plan Administration

The Plan Administrator is the Company. The Plan's custodian and trustee is The Bank of New York Mellon (Mellon). Mellon, as sole trustee of the Plan, holds all Plan assets and is responsible for benefit payments from the Anheuser-Busch Companies, LLC Master Defined Benefit Trust (Master Trust) according to information submitted by the Plan Administrator.

Plan Benefits

Plan benefits are determined in accordance with the provisions of each supplement to the Plan Document.

Vesting service is used in determining eligibility for early retirement and disability benefits, as defined in each supplement to the Plan Document.

The Plan is subject to certain restrictions relating to the payment of accelerated benefit payments. In addition, the Plan is prohibited from executing amendments that would increase benefits without additional funding. These restrictions resulted from the Plan falling below certain funding levels as required by the Pension Protection Act of 2006.

ANHEUSER-BUSCH COMPANIES PENSION PLAN

Notes To Financial Statements *(Continued)*

Expenses Of The Plan

Under the Master Trust Agreement with the Trustee, the Company may pay all expenses incurred in the administration of the Plan, including trustee fees, but is not obligated to do so. Trustee expenses not paid by the Company are paid by the Master Trust and proportionately allocated to participating plans. All other direct expenses are paid by the Plan.

Plan Termination

The Company anticipates the Plan will continue without interruption but reserves the right to discontinue its participation in the Plan. In the event that such discontinuance results in termination of the Plan, the Plan provides that the net assets will be allocated among the participants and beneficiaries of the Plan in the order of preference and in the manner outlined in the Plan Document. To the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation (PBGC) to participants, up to specified limitations. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

2. Summary Of Significant Accounting Policies

Basis Of Accounting

The Plan's financial statements are prepared on the accrual basis of accounting.

Use Of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from those estimates.

Investment Valuation And Income Recognition

Investments are reported at fair market value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for a discussion of fair value measurements.

ANHEUSER-BUSCH COMPANIES PENSION PLAN

Notes To Financial Statements *(Continued)*

Purchases and sales of securities held by the Master Trust are recorded on a trade-date basis. Investment income from the Master Trust includes rental income from real estate properties and net appreciation in fair value of investments. Rental income is recorded on the accrual basis. Net appreciation in fair value of investments includes the gains and losses on investments bought and sold as well as held during the year.

Allocation Of Assets In Master Trust

The Master Trust was established for the investment of the Plan's assets and certain other Company sponsored retirement plans.

The interest of each participating plan is represented in units. Each unit represents an undivided interest in the Master Trust. The value of each plan's interest in the Master Trust is based on the beginning of year value of the plan's interest in the trust plus actual contributions and allocated investment income, net of investment expenses, less actual distributions and allocated administrative expenses. The allocation of investment income and administrative expenses is based on each plan's ownership of Master Trust units at the end of each month.

Payment Of Benefits

Benefit payments are recorded when paid.

3. Funding Policy

Pension contributions are funded by the Company. Annually, an independent actuary performs a valuation of the Plan and related trust fund to determine the status of the fund and the normal cost and contribution limits prescribed by ERISA. The methods of valuation employed by the actuary were the Traditional Unit Credit Method for liabilities and a smoothed value for assets. The Plan met the minimum funding requirements of ERISA, as determined by the independent actuary for the Plan years ended December 31, 2013 and 2012.

4. Actuarial Present Value Of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation and credited service. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered up to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Plan's independent actuary by applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected date of payment.

Significant actuarial assumptions used in the valuation as of January 1, 2013 and 2012 are as follows:

Mortality:

2013 RP-2000 Mortality Tables for males and females, with white-collar adjustment, projected to 2017 using Scale AA with a one year set-forward age adjustment

2012 RP-2000 Mortality Tables for males and females, with white-collar adjustment, projected to 2016 using Scale AA with a one year set-forward age adjustment

Discount Rate:

2013 6.8%

2012 7.2%

Retirement:

2013 According to a graded retirement schedule based on years of service and age
Years of service - less than 30 years or 30 years or more
Age - ranges from age 55 to age 68

2012 According to a graded retirement schedule based on years of service and age
Years of service - less than 30 years or 30 years or more
Age - ranges from age 55 to age 68

Actuarial Cost Method:

2013 Traditional unit credit

2012 Traditional unit credit

Direct Financing Lease

The Company has contributed real estate properties to the Master Trust, which are leased back to the Company through a direct financing lease. Revenue from the direct financing lease is recognized over the lease term on the interest method, which results in a level rate of return on the net investment in the lease.

The components of the Master Trust's direct financing lease at December 31, 2013 and 2012 are as follows:

	<u>2013</u>	<u>2012</u>
Future minimum rentals receivable	\$ 243,445	\$ 260,538
Unearned income to be recognized in future years	<u>(117,870)</u>	<u>(131,129)</u>

Cumulative rental income received	<u>3,050</u>	<u>1,916</u>
Fair value of real estate properties	<u>\$ 159,680</u>	<u>\$ 152,650</u>

Future minimum rentals receivable under the direct financing lease at December 31, 2013 are as follows:

<u>Year</u>	<u>Amount</u>
2014	\$ 11,935
2015	12,233
2016	12,539
2017	12,852
2018	13,173
Thereafter	<u>180,713</u>
	<u>\$ 243,445</u>

Fair Value Measurements

The Master Trust follows current accounting standards, which provide a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Master Trust has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

ANHEUSER-BUSCH COMPANIES PENSION PLAN

Notes To Financial Statements *(Continued)*

Following is a description of the valuation methodologies used for assets measured at fair value:

Collective Trusts

Valued at the net asset value (NAV) of units in the collective trust funds. The NAV, as provided by the collective trust funds, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different than the reported NAV.

Real Estate Properties

The fair value of the real estate properties held by the Plan is valued on the basis of its market value based upon independent appraisals of each property conducted by an independent, MAI-certified appraiser. The appraisals were based upon a combination of the sales comparison and income capitalization approaches, consistent with prior year. The appraiser takes into account historical and projected cash flow, the terms of the lease on the property and comparable sales, and as a result, the investment is classified as a Level 3 asset in the fair value hierarchy.

The valuation process involves the Plan's independent fiduciary's selection of an independent, MAI-certified appraiser. The independent fiduciary and representatives of the tenants accumulate the data concerning the properties for the appraiser. The appraiser prepares draft reports for each property which the Plan's independent fiduciary reviews in detail and discusses with the appraiser. The final report for each property is approved by the independent fiduciary and delivered to the Plan's Trustee. Management reviews the results of the certified appraisals and believes the results are fairly stated.

Short-Term Investments

Short-term investments are considered to be cash equivalents due to their short maturities and are valued at cost, which approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

6. Transactions With Parties-In-Interest

The Master Trust holds investments in collective trust funds managed by the Trustee. Therefore, these transactions are allowable party-in-interest transactions under ERISA.

The Master Trust also holds operating properties that are leased to the Company. The fair value of the properties at December 31, 2013 and 2012 was \$159,680 and \$152,650, respectively. The Master Trust received rental payments for the years ended December 31, 2013 and 2012 of \$11,712 and \$11,467, respectively. These transactions are allowable party-in-interest transactions under ERISA.

7. Income Tax Status

The IRS has determined and informed the Company by a letter dated August 20, 2002 that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (the Code). Therefore, the underlying trust of such a plan is exempt from federal income taxes under Section 501 of the Code. The Plan has been amended since receiving the latest determination letter, however, the Plan Administrator and the Plan's tax counsel believe that the Plan is designed and being operated in compliance with the applicable requirements of the Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

The Company has applied for a new determination letter, but has not received the new letter as of the date of the financial statements.

GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS or other applicable taxing authorities. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan Administrator believes it is no longer subject to income tax examinations for Plan years prior to 2010.

8. Risks And Uncertainties

Investment securities are exposed to various risks such as significant world events, interest rate, credit and overall market volatility risk. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is reasonably possible that changes in the values of investments will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

9. Subsequent Events

Management has evaluated subsequent events through October 10, 2014, the date which the financial statements were available to be issued.

Expected 2013 expenses as provided by Anheuser-Busch (net of PBGC flat and variable rate premiums) plus the expected 2013 PBGC flat and variable rate premiums. The amount included this year for plan-related expenses is \$9,275,000.

Mortality

For non-disabled participants, the prescribed mortality assumption under Section 430(h)(3)(A) of the Internal Revenue Code using static tables with separate mortality rates for annuitants and non-annuitants.

Disabled Mortality

For disabled participants: mortality in accordance with Revenue Ruling 96-7.

Retirement Probabilities

For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), the retirement probabilities for active participants are shown below. Involuntarily terminated vested participants are assumed to commence benefits at age 55 while other terminated vested participants are assumed to commence benefits at age 60.

Disability Probabilities

No specific disability probabilities were assumed as the benefit payable due to disability is the actuarial equivalent of the accrued benefit.

Compensation Increases

Not applicable.

Future Increases in Social Security

Not applicable.

Future Increases in Maximum Benefits and Plan Compensation Limitations

Accrued benefits projected to be paid in future years are limited to the maximum presently allowed under IRC Section 415. Plan compensation is limited to the maximum presently allowed under IRC Section 401(a)(17). No provision is made for future increases in the maximum annual benefit or compensation limit.

Form of Payment

Participants are assumed to elect options based on the percentages in the following table:

<u>Terminated Vested Participants, Future Voluntary Terminated Participants and Retirees</u>	
One Sum	80%
Normal Form (Life Annuity with 10 Years Certain)	5%
Single Life Annuity	5%
Joint and 75% Survivor Annuity	10%
<u>Future Involuntary Terminated Participants</u>	
One Sum	80%
Normal Form (Life Annuity with 10 Years Certain)	20%

Lump sums were valued using the substitution of annuity form under IRS Proposed Regulation §1.430(d)-1(f)(4) and the 2013 unisex PPA combined optional mortality table.

Marriage

100% of eligible participants are assumed to be married and male spouses are assumed to be 3 years older than female spouses.

Employees

Employee data was supplied electronically by Anheuser-Busch as of the valuation date. Data on persons receiving benefits was supplied electronically by Anheuser-Busch. It was assumed that there will be no new or rehired employees.

At-Risk Calculations

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is a single life annuity.

Methods

Valuation Date

First day of the plan year

Funding Target

Present value of accrued benefits

Target Normal Cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year

Asset Method

Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (7.2% in 2012, with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2012 plan year).

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits Not Included in Valuation

- Portability benefits are not valued due to the lack of available data. However, all service with Anheuser-Busch Companies, LLC, and its wholly owned subsidiaries is considered for eligibility for early retirement subsidies.
- Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.
- Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under this plan.
- The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

In addition, the stabilization corridors of the Highway and Transportation Funding Act of 2014 were updated for minimum funding purposes only.
- The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.
- The assumed plan-related expenses added to the target normal cost were changed from \$10,050,000 to \$9,275,000.
- The assumed expected earnings used in the development of the actuarial value of assets (prior to the limits described in IRS Notice 2009-22) was changed from 7.5% to 7.2%.
- The compensation increase and future increases in Social Security assumptions are not applicable because benefits under this supplement were frozen effective January 1, 2012. The assumptions used last year were 2.50% and 3.00%, respectively.

**SCHEDULE SB ATTACHMENTS – PART V – STATEMENT OF ACTUARIAL
ASSUMPTIONS AND METHODS
SCHEDULE SB, LINE 24 – CHANGE IN ACTUARIAL ASSUMPTIONS**

Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (7.2% in 2012, with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2012 plan year).

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not included in valuation

- Portability benefits are not valued due to the lack of available data.
- The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

Changes in Assumptions and Methods Since Last Actuarial Valuation

- The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2011 to September 2012. In addition, the stabilization corridors of the Highway and Transportation Funding Act of 2014 were updated for minimum funding purposes only.
- The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.
- The assumed plan-related expenses added to the target normal cost were changed from \$10,050,000 to \$9,275,000.
- The assumed expected earnings used in the development of the actuarial value of assets (prior to the limits described in IRS Notice 2009-22) was changed from 7.5% to 7.2%.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Reconciliation of differences between valuation results and amounts used to calculate AFTAP

The AFTAP reported on line 15 reflects adjustments pertaining to the plan year subsequent to the valuation.

Date of AFTAP certification/ recertification	AFTAP	Description and the amount of each adjustment to the funding target, AVA, carryover balance, prefunding balance
September 27, 2013	72.98%	The AVA used for the certification included an additional interest adjusted contribution of \$74,796 related to the January 16, 2013 contribution to allow the increase in the defined benefit maximum under IRC Section 415. The funding target used for the certification is \$1,511,064,000, which reflects the decision by the plan sponsor to elect out of HATFA for purposes of IRC Section 436. Please see the attachment to Schedule SB, Line 24 for the interest rate assumptions used for the certification.

Normal Retirement Benefit

Normal Retirement Date: The first of the month coincident with or next following age 65.

Normal Form of Benefit: Life with 10 years certain.

Optional Forms of Benefit: Life only, life with 5 years certain, installment refund, 2/3 joint and survivor, one sum, and fixed installments (5, 10, and 15 years).

Normal Retirement Benefit: The annual benefit payable is equal to the sum of 1 3/8% of the Final Average Annual Earnings up to 25% of the Social Security Taxable Wage Base for the year in which Credited Service ends plus 1 3/4% of the Final Average Annual Earnings in excess of 25% of the Social Security Taxable Wage Base for the year in which Credited Service ends, times Credited Service not to exceed 30 years. There is a minimum monthly benefit payable at age 65 of \$90 per month per year of credited service payable on a life only basis.

Early Retirement Benefit

Eligibility: Age 55 and 10 years of vesting service (adjusted for applicable acquisition dates).

Monthly Benefit: Accrued benefit as of early retirement date reduced by 1/4% for each month that early retirement precedes the normal retirement date. If Participant is at least age 55 with 30 years of vesting service, the 1/4% reduction is from age 58.

Enhanced Retirement Program

Salaried employees who were 55 or older as of December 21, 2008 were offered an early retirement window (Enhanced Retirement Program) where they could elect to retire before January 1, 2009 and receive three years of additional service and age.

attainment of age 55, with benefits actuarially reduced based on UP-1984 mortality and 6.50% interest.

Death Benefits for Participants in Active Service

Eligibility: Must be an active participant or a vested terminated participant who dies on or before the date benefit payments commence.

Monthly Benefit: Beneficiary receives death benefit equal to the actuarial equivalent based on UP-1984 mortality and 6.50% interest of the Accrued Benefit reduced for early commencement. Normal method of payment of the death benefit is a monthly benefit to the beneficiary under the normal form of payment. However, the beneficiary may elect the one sum or fixed installments option.

Portability Benefits

Upon early, normal, late, or disability retirement or death on or after January 1, 1993, a Participant who has transferred into employment covered by this Plan and has a vested benefit accrued under another defined benefit pension plan within the Anheuser-Busch Controlled Group of corporations shall receive an additional benefit. This benefit shall be based on the credited service and current provisions under the other plan, less the actual benefit payable from the other plan. This benefit shall not be greater than the benefit under this Plan based on service under both plans, less the actual benefit from the other plan.

Change in Control Benefits

The accrued benefit of each participant who is actively employed as of the date of a Change in Control shall be fully vested. The benefit of a participant whose employment is involuntarily terminated within three years after the Change in Control shall be determined by taking into account an additional five years of credited and vesting service and, for purposes of determining early retirement benefits, an additional five years of age. The benefit shall in any event be at least fifteen percent larger than the participant's benefits as calculated without regard to the Change in Control.

Normal Retirement Benefit

Normal Retirement Date:	The first of the month coincident with or next following age 65.
Normal Form of Benefit:	Life only.
Optional Forms of Benefit:	Life with 10 years certain, 2/3 joint and survivor, and one sum.
Normal Retirement Benefit:	The monthly benefit payable is equal to the sum of 2 3/4% of the Final Average Monthly Earnings up to the Integration Level and 3 1/3% of the Final Average Monthly Earnings in excess of the Integration Level times Credited Service not to exceed 15 years. The Integration Level is equal to the average, as of 1989, of the Social Security Wage Bases during the 35 year period ending with the Participant's Social Security Retirement Age.

Early Retirement Benefit

Eligibility:	Age 55 and completion of 5 years of vesting service.
Monthly Benefit:	Accrued benefit as of Early Retirement Date reduced by 1/180th for each of the first 60 months that Early Retirement Date precedes the Normal Retirement Date and 1/360th for each month thereafter.

Enhanced Retirement Program

Salaried employees who were 55 or older as of December 21, 2008 were offered an early retirement window (Enhanced Retirement Program) where they could elect to retire before January 1, 2009 and receive three years of additional service and age.

Disability Benefit

Eligibility:	Participant must be totally and permanently disabled and have 5 years of vesting service.
Monthly Benefit:	The actuarial equivalent of the accrued benefit.

Vested Benefits Upon Termination of Service

A participant is 100% vested upon completion of 5 years of vesting service. However, all participants become 100% vested upon reaching their Normal Retirement Date.

Death Benefits for Participants in Active Service

Eligibility: Must be an active participant or a vested terminated participant.

Monthly Benefit: The beneficiary receives a payment equal to the actuarial equivalent of the participant's accrued benefit. The normal method of payment of the death benefit is a monthly benefit to the beneficiary under the normal method of payment, unless an optional method is elected.

Portability Benefits

Upon early, normal, late, or disability retirement or death on or after June 1, 1995, a Participant who has transferred into employment covered by this supplement and has a vested benefit accrued under another supplement included in The Anheuser-Busch Companies Pension Plan shall receive an additional benefit. This benefit shall be based on the credited service and current provisions under the other supplement, less the actual benefit payable from the other supplement. This benefit shall not be greater than the benefit under this supplement based on service under both supplements, less the actual benefit from the other supplement.

Change in Control Benefits

The accrued benefit of each participant who is actively employed as of the date of a Change in Control shall be fully vested. The benefit of a participant whose employment is involuntarily terminated within three years after the Change in Control shall be determined by taking into account an additional five years of credited and vesting service and, for purposes of determining early retirement benefits, an additional five years of age. The benefit shall in any event be at least fifteen percent larger than the participant's benefits as calculated without regard to the Change in Control.

Normal Retirement Benefit

Normal Retirement Date: The first of the month coincident with or next following age 65.

Normal Form of Benefit: Life only.

Optional Forms of Benefit: Life with 10 years certain; 50%, 75%, and 100% joint and survivor; and Social Security Leveling.

1. Normal Retirement Benefit: The monthly benefit payable is equal to the December 31, 1988 benefit, adjusted for increase in Final Average Monthly Earnings, plus the sum of (1.5% of the Final Average Monthly Earnings and .44% of the Final Average Monthly Earnings in excess of the Integration Level) times Credited Service earned after December 31, 1988. For the calculation using earnings in excess of the Integration Level, Credited Service earned after December 31, 1988 is limited by the excess of 35 over the number of years of Credited Service earned prior to December 31, 1988. The Integration Level is equal to 50% of the Social Security Taxable Wage Base in effect on the first day of the Plan Year but not more than 150% of Covered Compensation applicable to an individual attaining Social Security Retirement Age in such Plan Year. Covered Compensation is determined in accordance with applicable Treasury Regulations.

Early Retirement Benefit

Eligibility: Age 55.

Monthly Benefit: Accrued benefit as of the Early Retirement Date reduced by 1/4% for each of the first 36 months that the Early Retirement Date precedes the Normal Retirement Date, 5/12% for the next 48 months, and 7/12% for each month thereafter.

Disability Benefit

There is no provision for disability benefits under this plan.

Form of Payment

Participants are assumed to elect options based on the percentages in the following table:

<u>Terminated Vested Participants, Future Voluntary Terminated Participants and Retirees</u>	
One Sum	80%
Normal Form (Life Annuity with 10 Years Certain)	5%
Single Life Annuity	5%
Joint and 75% Survivor Annuity	10%
<u>Future Involuntary Terminated Participants</u>	
One Sum	80%
Normal Form (Life Annuity with 10 Years Certain)	20%

Lump sums were valued using the substitution of annuity form under IRS Proposed Regulation §1.430(d)-1(f)(4) and the 2013 unisex PPA combined optional mortality table.

Marriage

100% of eligible participants are assumed to be married and male spouses are assumed to be 3 years older than female spouses.

Employees

Employee data was supplied electronically by Anheuser-Busch as of the valuation date. Data on persons receiving benefits was supplied electronically by Anheuser-Busch. It was assumed that there will be no new or rehired employees.

At-Risk Calculations

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is a single life annuity.

Methods

Valuation Date

First day of the plan year

Funding Target

Present value of accrued benefits

Target Normal Cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year

Asset Method

Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (7.2% in 2012, with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2012 plan year).

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits Not Included in Valuation

- Portability benefits are not valued due to the lack of available data. However, all service with Anheuser-Busch Companies, LLC, and its wholly owned subsidiaries is considered for eligibility for early retirement subsidies.
- Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.
- Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under this plan.
- The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

In addition, the stabilization corridors of the Highway and Transportation Funding Act of 2014 were updated for minimum funding purposes only.
- The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.
- The assumed plan-related expenses added to the target normal cost were changed from \$10,050,000 to \$9,275,000.
- The assumed expected earnings used in the development of the actuarial value of assets (prior to the limits described in IRS Notice 2009-22) was changed from 7.5% to 7.2%.
- The compensation increase and future increases in Social Security assumptions are not applicable because benefits under this supplement were frozen effective January 1, 2012. The assumptions used last year were 2.50% and 3.00%, respectively.

For disabled participants: mortality in accordance with Revenue Ruling 96-7.

Form of Payment

50% of participants are assumed to elect the normal form of payment (life only annuity); 50% of participants are assumed to elect a joint and 75% survivor annuity. Terminated vested participants are assumed to commence payments at their normal retirement age.

Marriage

90% of eligible participants are assumed to be married and male spouses are assumed to be 3 years older than female spouses.

Employees

It was assumed that there will be no new or rehired employees. Employee data was supplied electronically by Anheuser-Busch as of the valuation date. Data on persons receiving benefits was supplied electronically by Anheuser-Busch.

At-Risk Calculations

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is a single life annuity.

Asset Method

Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (7.2% in 2012, with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2012 plan year).

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits Not Included in Valuation

- Portability benefits are not valued due to the lack of available data.
- Actuarial increases for terminated vesteds who deferred commencement past their normal retirement date due to the small number of affected participants.
- Participants who transferred out of a covered location who are currently not vested in their benefits are assumed to immediately terminate employment and not be entitled to a benefit under this plan.
- The plan pays small benefits (with a present value up to \$5,000) in a single lump sum payment. Such lump sums are not explicitly valued as such; rather such participants' benefits are valued using the benefit choice assumptions described above.

Changes in Assumptions and Methods Since Last Actuarial Valuation

- The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2011 to September 2012. In addition, the stabilization corridors of the Highway and Transportation Funding Act of 2014 were updated for minimum funding purposes only.
- The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.
- The assumed plan-related expenses added to the target normal cost were changed from \$10,050,000 to \$9,275,000.
- The assumed expected earnings used in the development of the actuarial value of assets (prior to the limits described in IRS Notice 2009-22) was changed from 7.5% to 7.2%.
