NOTE A - DESCRIPTION OF THE PLAN

The following description of Portage Health 401(k) Retirement Plan provides only general information. Participants should refer to the Plan agreement for a more complete description of the Plan's provisions.

General

The Plan is a defined contribution plan covering all eligible employees of Portage Health, Inc. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Eligibility

All employees who are not considered temporary, field staff employees, or are not a part of a collective bargaining agreement between the Employer or the Michigan Nurses Association become eligible participants in the Plan upon completion of one year of service during which they completed 1,000 hours of service and where the participant has attained the age of 21.

Contributions

Eligible employees may contribute to the 401(k) Plan an amount equal to 1% up to 100% of their compensation, not to exceed \$17,500 (\$23,000 for employees age 50 or older), the maximum amount allowed by the IRS. The Company will make a matching contribution equal to \$.50 for every \$1 that participants contribute up to a maximum of 2% of annual compensation. The Company may also make additional discretionary contributions at the option of the Company's board of directors for all eligible participants. For the Plan years ended December 31, 2013 and 2012, the Company made discretionary contributions of 5% of compensation.

All employer contributions will stop in the event of retirement, death, disability, termination, or attainment of age 70.

Vesting

Participants are immediately vested 100% in the contributions which Portage Health, Inc. has made for each year.

Participant Accounts

Each participant's account is credited with the participant's contributions and allocations of the Company's contribution and Plan earnings, and charged an allocation of administrative expenses. Allocations are based on the participant's earnings or account balances. The benefit to which a participant is entitled is the benefit that can be provided from the participants vested account.

NOTE E - FAIR VALUE MEASUREMENTS

FASB Statement NO. 157, *Fair Value Measurements*, establishes a framework for measuring fair value. The framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB Statement No. 157 are described as follows:

NOTES TO FINANCIAL STATEMENTS
December 31, 2013 and 2012

NOTE E - FAIR VALUE MEASUREMENTS (Continued)

- Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan can access at the measurement date.
- Level 2 Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 Unobservable inputs for the assets or liabilities.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2013 and 2012.

Common stocks, corporate bonds, and U.S. government securities: Valued at the closing price reported on the active market on which the individual securities are traded.

Mutual funds: Valued at the net asset value (NAV) of shares held by the Plan at year-end.

Guaranteed investment contract: or Common trust funds: Valued at fair value by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the creditworthiness of the issuer.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2013 and 2012.
