THE EVENFLO RETIREMENT ACCOUNT PLAN ("ERA")

NOTES TO FINANCIAL STATEMENTS

December 31, 2013 and 2012

NOTE A – DESCRIPTION OF THE PLAN

The following description of The Evenflo Retirement Account Plan ("ERA") (the "Plan") provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

1. General

The Plan is a defined benefit pension plan funded solely by employer contributions. It was established as of August 21, 1998, as a result of the split of Spalding Holdings Corporation and Evenflo Company, Inc. (the "Company"). On that date, assets were transferred from the Spalding Holdings Corporation and Evenflo Company, Inc. Retirement Account Plan to the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). The Plan became frozen as of August 1, 2002. All accrued benefits became vested as of August 1, 2002, and the accrual of benefits was ceased as of that date.

2. Retirement/Death Benefits

Upon a participant's retirement, death, or other interruption of continuous service, the Plan trustee may distribute the participant's vested benefits in a lump-sum cash payment or an annuity, based upon the participant's election.

3. Payments

Payments to participants are based upon their vested benefits. Normal retirement is at age 65. Early retirement at age 55 is available provided the participant meets certain conditions.

4. Vesting

Before August 1, 2002, a participant became vested after completing five years of service. On August 1, 2002, the effective Plan "frozen" date, participants became vested immediately.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. Basis of Accounting

The accompanying financial statements have been prepared using the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America ("US GAAP").

2. Use of Estimates

The preparation of the accompanying financial statements requires Plan management to make estimates and assumptions that affect the reported amounts of net assets available for benefits, disclosure of contingent assets and liabilities, the actuarial present value of accumulated plan benefits at the date of the financial statements, and reported increases and decreases to the Plan's net assets available for benefits during the reporting period. Actual results could differ from those estimates.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3. Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

4. Risks and Uncertainties

The Plan utilizes various investment instruments. Investment securities, in general, are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with certain investment securities, it is reasonably possible that changes in the values of investment securities will occur in the near term and such changes could materially affect the amounts reported in the statements of net assets available for benefits.

5. Payment of Benefits

Benefit payments are recorded when paid.

6. Administrative Expenses

All administrative expenses are paid by the Plan.

NOTE C – ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service that employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Before August 1, 2002, the effective "frozen" date, benefit credits were earned under the Plan based on the employee's age multiplied by a range of 2% to 9% of annual earnings. After August 1, 2002, benefit credits are no longer earned. Benefit credits are accumulated in each participant's individual account. Participants also receive interest-equivalent credits equal to the average yield on 30-year treasuries as published in the Federal Reserve Statistical Releases. The cash balance interest assumption used within the December 31, 2012 actuarial valuation was 2.88%. Benefits payable under all circumstances — retirement, death, disability, and termination of employment — are included to the extent they are deemed attributable to employee service rendered to the valuation date.

THE EVENFLO RETIREMENT ACCOUNT PLAN ("ERA")

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

December 31, 2013 and 2012

NOTE C – ACCUMULATED PLAN BENEFITS (continued)

The actuarial present value of accumulated plan benefits as of December 31, 2012 was determined by the Plan's actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payments (by means of decrements, such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation were (a) life expectancy of participants based on the RP-2000 Mortality Tables projected to 2015, (b) normal retirement age of 65, and (c) investment return at an average rate of 6.0%. The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of vested benefits (benefits to which participants are entitled, regardless of future service with the Company) and nonvested benefits under the Plan was calculated by actuaries. The actuarial present value of accumulated plan benefits as of December 31, 2012, is represented as follows:

Actuarial present value of accumulated plan benefits - vested benefits:	
Participants currently receiving payments	\$ 6,780,618
Other participants	5,897,783
Total actuarial present value of accumulated plan benefits	<u>\$ 12,678,401</u>

The actuarial present value of accumulated plan benefits as of December 31, 2012 was determined based on the Plan being frozen, effective August 1, 2002.

The Plan provisions and actuarial method used within the December 31, 2012 valuation were consistent with the December 31, 2011 valuation. All actuarial assumptions were consistent between valuation dates with the exception of the discount rate decrease from 6.5% to 6.0%.

The change in the actuarial present value of the Plan's accumulated plan benefits for the year ended December 31, 2012 is as follows:

Actuarial present value of accumulated plan benefits - beginning of year	\$ 12,714,589
Changes during the year attributable to:	
Actuarial gains	(156,392)
Increase for interest due to decrease in the discount period	785,103
Actual benefits paid	(1,074,686)
Assumption changes	<u>409,787</u>
Net decrease	<u>(36,188)</u>
Actuarial present value of accumulated benefits - end of year	<u>\$ 12,678,401</u>

NOTE D – FUNDING POLICY

Contributions to provide benefits under the Plan are made solely by the Company. The Company's funding policy is to make cash contributions to the Plan in amounts as determined by the Plan's independent actuary. The Company met the minimum funding requirements of ERISA for the years ended December 31, 2013 and 2012.

NOTE E – FAIR VALUE MEASUREMENTS

ASC 820 provides a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value, as follows: Level 1, which refers to securities valued using unadjusted quoted prices from active markets for identical assets; Level 2, which refers to securities not traded on an active market but for which observable market inputs are readily available; and Level 3, which refers to securities valued based on significant unobservable inputs. Assets are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Plan's policy is to recognize significant transfers between levels at the end of the reporting period.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2013 and 2012.

Common stocks, registered investment companies and partnerships – Valued at the closing price reported on the active market on which the individual securities are traded.

Preferred stocks – Preferred stocks are valued based on various inputs such as reported trades and broker/dealer quotes.

Corporate debt instruments – Certain corporate debt instruments are valued at the closing price reported in the active market in which the instrument is traded. Other corporate debt investments are valued based on yields currently available on comparable securities of issuers with similar credit ratings.

Money market funds - Valued at amortized cost, which approximates fair value.

The valuation methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

NOTE F – PLAN TERMINATION

Although it has not expressed any intention to do so, the Company has the right under the Plan, in certain circumstances, to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of Plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations thereunder, and the Plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation ("PBGC") if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination, subject to a statutory ceiling on the amount of an individual's monthly benefit.

Whether all participants receive their benefits should the Plan be terminated at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits, the priority of those benefits to be paid, and the level and type of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all.

NOTE G – INFORMATION CERTIFIED BY PLAN TRUSTEE

The Plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, PNC Bank N.A., the trustee of the Plan, has certified that the following information included in the accompanying financial statements and supplemental schedules is complete and accurate:

- Investments and interest and dividends receivable, as shown in the statements of net assets available for benefits as of December 31, 2013 and 2012.
- Investment income and other income, as shown in the statements of changes in net assets available for benefits for the years ended December 31, 2013 and 2012.
- Form 5500, Schedule H, Part IV, Line 4i – Schedule of Assets (Held at End of Year) as of December 31, 2013.
- Form 5500, Schedule H, Part IV, Line 4j – Schedule of Reportable Transactions for the year ended December 31, 2013.

The Plan's independent certified public accountants did not perform auditing procedures with respect to this information, except for comparing such information to the related information included in the financial statements and supplemental schedules.

NOTE H – FEDERAL INCOME TAX STATUS

The Internal Revenue Service ("IRS") has determined and informed the Company by a letter dated May 5, 2014, that the Plan and related trust were designed in accordance with the applicable regulations of the Internal Revenue Code ("IRC"). The previous letter was dated May 28, 2009. The Company and Plan management believe that the Plan is currently designed and operated in compliance with the applicable requirements of the IRC, and the Plan and related trust continue to be tax-exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

US GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Department of Labor ("DOL"). The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2013 and 2012, there are no uncertain positions taken or expected to be taken that would require recognition of a liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2010.

NOTE I – INVESTMENTS

NOTE K – SUBSEQUENT EVENTS

The Plan administrator has evaluated subsequent events through October 13, 2014, the date the financial statements were available to be issued. Other than the following, the Plan administrator is not aware of any subsequent events that would require recognition or disclosure in the Plan financial statements.

On July 21, 2014, the Company was acquired by Goodbaby International Holdings Limited ("Goodbaby"). Goodbaby is principally engaged in the design, research and development, manufacturing, marketing and sale of durable juvenile products. No employees, including those that are active participants in the Plan, were terminated as a result of the acquisition. The Plan is not being terminated as a result of the acquisition and will continue to be sponsored by the Company.

Employees

It was assumed there will be no new or rehired employees.

Plan compensation

Not applicable, plan is frozen.

Cash balance interest assumption

Current Year: 2.88% (September, 2012 rate)

Assumed for plan years after 2013: 3.67%

The interest assumption equals the 5-year moving average of January 1, 30-year T-Bill rates (including the current valuation date). The average 3.67% equals $(3.08 + 3.03 + 4.52 + 4.60 + 3.13)/5$.

At-risk assumptions

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Valuation date

First day of plan year.

Funding target

Present value of accrued benefits.

Target normal cost

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings of 6.50% (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2012 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions with Evenflo Company, Inc. and, based on that review, is not aware of any significant benefits required to be valued that were not.

Participant data

Employee data was supplied electronically as of the valuation date.

Benefits not included in valuation

We believe all significant Plan provisions are reflected in this valuation.

Changes in assumptions and methods since last actuarial valuation

In addition to the prescribed changes in the discount rate and mortality, the following changes in assumptions and methods were made as part of this valuation:

- The cash balance account interest credit assumption changed from 3.92% to 3.67%.
- The segment rates used to determine minimum funding requirements and benefit restrictions were revised by applying the corridors of MAP-21, but, as required by MAP-21, such rates have not been reflected in Section 2.5: Calculation of estimated maximum deductible contribution.

Plan compensation

Not applicable, plan is frozen.

Cash balance interest assumption

Current Year: 2.88% (September, 2012 rate)

Assumed for plan years after 2013: 3.67%

The interest assumption equals the 5-year moving average of January 1, 30-year T-Bill rates (including the current valuation date). The average 3.67% equals $(3.08 + 3.03 + 4.52 + 4.60 + 3.13)/5$.

At-risk assumptions

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month and lump sum payments are payable on date of decrement.

Valuation date

First day of plan year.

Funding target

Present value of accrued benefits.

Target normal cost

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings of 6.50% (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the 2012 plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions with Evenflo Company, Inc. and, based on that review, is not aware of any significant benefits required to be valued that were not.

Participant data

Employee data was supplied electronically as of the valuation date.

Benefits not included in valuation

We believe all significant Plan provisions are reflected in this valuation.

Changes in assumptions and methods since last actuarial valuation

In addition to the prescribed changes in the discount rate and mortality, the following changes in assumptions and methods were made as part of this valuation:

- The cash balance account interest credit assumption changed from 3.92% to 3.67%.
- The segment rates used to determine minimum funding requirements and benefit restrictions were revised by applying the corridors of MAP-21, but, as required by MAP-21, such rates have not been reflected in Section 2.5: Calculation of estimated maximum deductible contribution.
