Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Rio Tinto Alcan Pension Plan (U.S.)
South Jordan, Utah

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of the Rio Tinto Alcan Pension Plan (U.S.), formerly known as AlcanCorp Pension Plan (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2013 and 2012, the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974 (ERISA), the Plan Administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified or provided by State Street Bank and Trust Company, the trustee of the Plan, except for comparing this information with the related information included in the financial statements. We have been informed by the Plan Administrator that the trustee holds the Plan's assets and executes transactions. The Plan Administrator has obtained certifications from the trustee as of December 31, 2013 and 2012, and for the years then ended, that the information provided to the Plan Administrator by the trustee is correct and complete to the best of their knowledge and belief.

Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Emphasis of Matters

As further described in Note 1 to the financial statements, employees of certain companies covered under the Plan were terminated as a result of the sales of their business units or companies during 2013 and 2012. All benefits under the Plan were frozen effective June 30, 2013.

Also, as discussed in Note 1 to the financial statements, the Global Benefits Committee of Rio Tinto America resolved on December 20, 2013 to merge the Alcan Combined Pension Plan into the Plan as of December 31, 2013. All plan assets and accumulated plan benefits of the Alcan Combined Pension Plan were transferred and are under the legal control of the Plan as of December 31, 2013.

Our disclaimer of opinion has not been modified with respect to these matters.

Report on Form and Content in Compliance With the DOL's Rules and Regulations

The form and content of the information included in the financial statements, other than that derived from the information certified or provided by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the DOL's Rules and Regulations for Reporting and Disclosure under ERISA.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 1. Description of the Plan

The following description of the Plan provides only general information. Participants should refer to the plan agreement for a more complete description of the Plan's provisions.

General: The Plan changed its name from the AlcanCorp Pension Plan as of December 31, 2013. The Plan was established by Alcan Corporation (the Company or Employer). The Plan is a noncontributory defined benefit plan that includes certain groups of full-time employees, as defined in the plan document, provided they are no longer accruing benefits as participants of another retirement benefit plan maintained jointly or individually by the Company and/or a related company and/or a collective bargaining unit, unless such plan is specifically exempted by the Board of Directors. The Company is a subsidiary of Rio Tinto Alcan Inc., which is an indirect, wholly owned subsidiary of Rio Tinto plc (the Parent). The Plan is intended to be a qualified retirement plan under the Internal Revenue Code (IRC) and is subject to the provisions of ERISA. The Company has appointed State Street Bank and Trust Company (State Street) to be the trustee and invest and manage the assets of the Plan. The Plan is administered by the Rio Tinto America Benefit Governance Committee.

The Plan is part of the Rio Tinto America Master Retirement Trust (Master Trust), whose assets are held with State Street, which was created to hold the qualified defined benefit investment assets of the Plan and other plans sponsored by the Company and related companies.

Effective January 1, 2012, salaried employees at the Sebree, Kentucky, location of the Company and salaried employees of Ingot Sales, Specialty Aluminas and Management Services, Cleveland, Ohio, transitioned to a new benefit formula.

Effective January 1, 2012, employees of Pechiney Plastic Packaging, Inc. (PPPI) who were participants in the Alcan Combined Pension Plan (Combined Plan) as of December 31, 2011, and whose employment with PPPI continued after December 31, 2011, became participants in the Plan. All benefit accruals in the Combined Plan ceased as of December 31, 2011, and will be paid from the Plan, and benefit accruals will begin under this Plan for these participants based on the provisions in the Combined Plan, as if the Combined Plan continued under the Plan.

On September 4, 2012, Rio Tinto sold Alcan Cable, its wire and cable business, to General Cable Corporation. As a result of the sale, the employees who were covered under the Plan were terminated, and all impacted participants became fully vested upon the sale.

Effective October 1, 2012, salaried employees of Ingot Sales, Specialty Aluminas and Management Services, Cleveland, Ohio, began participation in the Rio Tinto America Inc. Retirement Plan (RTA Plan). Benefit accruals under the Plan for this group of employees ceased as of September 30, 2012. As a result of this amendment, accumulated plan benefits of approximately \$3,320,000 for long-term disability benefits related to these participants were assumed by the RTA Plan.

Effective June 30, 2013, the Plan was amended to freeze all participation and cease all benefit accruals.

The above freezes as of September 30, 2012, and June 30, 2013, had no impact on the accumulated plan benefits.

Plan merger: Effective December 31, 2013, the Combined Plan merged into the Plan. The Combined Plan's net assets and accumulated plan benefits were transferred to and assumed by the Plan.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 1. Description of the Plan (Continued)

Pension benefits: Participants are entitled to annual pension benefits at normal retirement age (65 with five years of service). The annual normal retirement benefit is calculated by summing (a) 45 percent of the HAE up to Social Security-covered compensation, (b) 15 percent of HAE in excess of Social Security-covered compensation for participants with at least 35 years of benefit service and (c) 0.25 percent of HAE multiplied by the number of unused months as defined in the plan document. Benefits are prorated for service less than 35 years. The benefit computation is subject to minimum and maximum limits.

Effective January 1, 2012, salaried employees at the Sebree, Kentucky, location of the Company and salaried employees of Ingot Sales, Specialty Aluminas and Management Services, Cleveland, Ohio, transitioned to the following benefit formula: (a) the sum of (i) 1 percent of final average earnings (as defined in the Plan) up to the Breakpoint, plus (ii) 1½ percent of such final average earnings in excess of the Breakpoint, multiplied by (b) months and years of benefit service after December 31, 2011. Breakpoint is defined as the average of the Social Security tax bases in effect in each year that would be used to calculate the primary Social Security benefit for a participant retiring at his Social Security retirement age. For participants that retire early, a reduced retirement benefit will be received.

The Plan permits early retirement when the sum of the participant's age plus the participant's years of service equals 75 or more, or if the participant reaches age 55 with five years of service. The early retirement benefit is the product of the normal retirement benefit multiplied by a factor based on the number of years the participant's early retirement precedes the normal retirement date.

The Plan also provides for disability, termination and pre-retirement spousal benefits for participants meeting certain age and length of service requirements. There is also a provision for a postretirement spousal benefit that generally does not require a reduction in the participant's benefit. If the present value of the total benefit is greater than \$5,000, the form of payment depends on the participant's marital status and election at the time of retirement. If the present value of the total benefit is equal to or less than \$5,000, it will be distributed as a one-time lump-sum payment. Participants become fully vested on completion of five years of eligibility service.

Information regarding the vesting and benefit provisions of the Plan is contained in the Summary Plan Description. Copies of this booklet are available from the human resources department of the Company.

Termination of the Plan: Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- a. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under the plan provisions in effect at any time during the five years preceding plan termination.
- b. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations (discussed below).

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 1. Description of the Plan (Continued)

- c. All other vested benefits (that is, vested benefits not insured by the PBGC).
- d. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

Note 2. Summary of Significant Accounting Policies

Basis of accounting: The accompanying financial statements are prepared on the accrual basis of accounting.

Use of estimates: The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from the estimates.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates, and employee compensation and demographics, all of which are subject to change. Due to the uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near-term would be material to the financial statements.

Risks and uncertainties: The Master Trust invests in various investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near-term and that such changes could materially affect the amounts reported in the 2013 statement of net assets available for benefits.

The Master Trust invests in securities with contractual cash flows, such as credit default and interest rate swaps. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, delinquencies and/or defaults, and may be adversely affected by a shift in the market's perception of the issuers and changes in interest rates.

Investment valuation and income recognition: Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Rio Tinto America Inc. Pension Investment Committee determines the Plan's valuation policies, utilizing information provided by the investment advisors and trustee. See Note 7 for a discussion of fair value measurements.

Note 2. Summary of Significant Accounting Policies (Continued)

Interest income is recorded on the accrual basis, and dividends are recorded on the ex-dividend date. Purchases and sales of investments are recorded on a trade-date basis. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Valuation of investment in Master Trust: The Master Trust is a multiple-plan trust, ownership of which is divided among the plans based on allocated units of participation. Each participation unit has a value equal to the total fair value of the Master Trust's net assets divided by the total participation units outstanding. State Street is the trustee of the Master Trust.

The Plan has an undivided interest in the Master Trust's underlying investments. The Plan's interest in the Master Trust is stated at fair value. The Plan's interest in the Master Trust is based on the beginning-of-year value of the Plan's interest in the Master Trust, plus actual contributions and allocated investment income (loss), less actual distributions and actual and allocated administrative expenses. The net investment income (loss) and administrative expenses attributable to the Master Trust that are not plan-specific are allocated by the trustee to the Plan based on the Plan's pro rata share of each of the underlying assets of the Master Trust on a monthly basis. The Plan presents in the statements of changes in net assets available for benefits its interest in the net investment income or loss of the Master Trust, which consists of the realized gains or losses, unrealized appreciation or depreciation, interest, and dividends of the Master Trust's investments.

Funding policy: The Company contributes to the Plan at such times and in such amounts as considered necessary so that contributions are sufficient to provide benefits as actuarially calculated under the terms of the Plan. The Company's current funding policy is to fund the Plan to a level of approximately 91 percent, taking into account the 25-year smoothing of interest rates introduced by the Moving Ahead for Progress in the 21st Century Act (MAP-21). Contributions to the Plan are designed to fund at least the minimum required contributions as specified by ERISA and determined under IRC section 430(a). The minimum contribution is determined as of the beginning of the plan year, and all contributions are discounted at the effective interest rate from the date funded to the beginning of the plan year. The Company may elect to use all or a portion of any funding standard carryover balance or prefunding balance to offset the minimum required contribution for a plan year if the Plan's eligibility ratio for the prior plan year is at least 80 percent. The Plan has currently met all minimum funding requirements as required. Under this method, the contributions required were approximately \$1,920,400 for 2013. No contributions were required or made for 2012.

Payment of benefits: Benefits are recorded when paid.

Administrative expenses: The Company pays a portion of the costs and expenses incurred in administering the Plan, with the Plan paying the remaining costs and expenses. The Company provides accounting and other services for the Plan at no cost to the Plan. Expenses that are paid directly by the Company are excluded from these financial statements, unless reimbursed by the Plan.

Tax status: The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated July 10, 2012, that the Plan and related trust are designed in accordance with applicable sections of the IRC. The plan document has been amended since receiving the determination letter. However, the Plan Administrator believes that the Plan is designed and is currently being operated in compliance with applicable requirements of the IRC.

Notes to Financial Statements

Note 2. Summary of Significant Accounting Policies (Continued)

The Plan Administrator has evaluated the Plan's tax positions and concluded that the Plan had taken no uncertain tax positions that would require adjustment to the financial statements. Therefore, no provision or liability for income taxes has been included in the financial statements. With few exceptions, the Plan is no longer subject to income tax examinations by the U.S. federal, state or local tax authorities for years before 2010.

Pension Protection Act: The Pension Protection Act of 2006 (PPA), as amended by the Worker, Retiree and Employer Recovery Act of 2008 (WRERA), imposes certain benefit restrictions for qualified defined benefit plans that do not meet certain funding thresholds. The "At-Risk" status is referred to as the Funding Target Attainment Percentage (FTAP). A plan's funded percentage is referred to as the Adjusted Funding Target Attainment Percentage (AFTAP). The 2013 AFTAP for the Plan is approximately 97 percent. Because the Plan's AFTAP equals or exceeds 80 percent, the Plan is not subject to any benefit restrictions.

Recent accounting pronouncements: In 2012, the Financial Accounting Standards Board (FASB) issued ASU 2012-04, *Technical Corrections and Improvements*, which includes technical corrections and improvements related to fair value measurements, which the Plan or Master Trust have not yet fully adopted, as the effective date is for fiscal periods beginning after December 15, 2013. The Plan Administrator does not anticipate that the adoption of ASU 2012-04 will have a material effect on the Plan's financial statements.

Subsequent events: The Plan Administrator has evaluated subsequent events and transactions through October 14, 2014, the date on which the financial statements were available to be issued.

Note 3. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees with vested rights or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. In calculating the accumulated benefits, only service and salary prior to the valuation date are considered. The accumulated benefit values do not anticipate any future service or future salary increases. Benefits payable under all circumstances—retirement, death, disability and termination of employment—are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits was calculated by consulting actuaries and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected future payment dates.

The actuarial valuation was done by using the beginning-of-the-year method. Therefore, the accumulated plan benefits as of December 31, 2012, are presented from information provided by the actuary as of January 1, 2013. There has been no significant change in the Plan's provisions or coverage from December 31, 2012, to January 1, 2013. Effective December 31, 2011, the Plan was amended to exclude any individuals who are hired or rehired as, or become, an employee of a participating company on or after January 1, 2012, according to the plan amendment, from participating in the Plan. All accrual of benefits ended as of December 31, 2011, except for grandfathered employees. All accrual of benefits ended as of June 30, 2013.

Notes to Financial Statements

Note 3. Actuarial Present Value of Accumulated Plan Benefits (Continued)

The more significant assumptions underlying the actuarial computations as of December 31, 2012, are as follows:

Investment return	6.90% per annum
Mortality table used	UP94 with generational mortality projected by Scale AA, with specific weighting between males and females for salaried and hourly participants
Retirement rate and average retirement age	Terminated vested participants: 62 for Castplate, otherwise 63; 100% at December 31, 2012, for active PPPI participants; rates increasing from 3% to 100% between ages 55 and 65

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits as of December 31, 2012, is summarized as follows:

Actuarial present value of accumulated plan benefits:

Vested benefits:

Participants currently receiving benefits	\$ 539,753,594
Other participants	189,178,546
	<u>728,932,140</u>

Nonvested benefits

	717,030
Total actuarial present value of accumulated plan benefits, at December 31, 2012	<u>\$ 729,649,170</u>

Below is a summary of significant changes in the actuarial present value of accumulated plan benefits for the year ended December 31, 2012:

Actuarial present value of accumulated plan benefits, at beginning of year	<u>\$ 837,720,853</u>
Increase (decrease) during the year attributable to:	
Benefits paid	(58,933,825)
Interest accumulation	45,284,698
Plan amendments	(3,320,395)
Change in actuarial assumptions*	(98,540,458)
Benefits accumulated and experience gains and losses	7,438,297
Net decrease	<u>(108,071,683)</u>
Actuarial present value of accumulated plan benefits, at end of year	<u>\$ 729,649,170</u>

*The most significant change in actuarial assumptions was the increase in investment return from 5.60 percent in 2011 to 6.90 percent in 2012, which resulted in a large decrease in the actuarial present value of accumulated plan benefits.

The present value of accrued and vested benefits is calculated on an ongoing plan basis and does not represent the amount required in the event of plan termination.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 3. Actuarial Present Value of Accumulated Plan Benefits (Continued)

The estimated present value of accumulated plan benefits of the Combined Plan assumed by the Plan was approximately \$125,653,000 as of December 31, 2013. The assumption of the accumulated plan benefits from the Combined Plan related to the merger is not reflected in the accumulated plan benefits as of December 31, 2012.

Note 4. Information Certified or Provided by State Street

The following is a summary of the Plan's asset information as of December 31, 2013 and 2012, and for the years then ended, included throughout the Plan's financial statements, which were prepared by or derived from information provided by the trustee and furnished to the Plan Administrator. The Plan Administrator has obtained certifications from the trustee that the information provided to the Plan Administrator by the trustee related to the following assets is correct and complete to the best of their knowledge and belief. Accordingly, as permitted by 29 CFR 2520.103-8 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA, the Plan Administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to information that appears throughout the financial statements related to the following assets:

	December 31	
	2013	2012
Investments:		
Plan's interest in Rio Tinto America Master Retirement Trust	\$ 957,588,817	\$ 794,763,748

State Street also certified to the best of their knowledge and belief the correctness and completeness of investment results of the Plan's interest in the Master Trust for the years ended December 31, 2013 and 2012, as follows:

	Years Ended December 31	
	2013	2012
Investment results:		
Rio Tinto America Master Retirement Trust	\$ 90,048,128	\$ 115,211,066

The Plan's interest in and the investment results of the Rio Tinto America Master Retirement Trust as presented above do not reflect an increase in the value of the partnerships/joint ventures investment or income attributable to an adjustment made subsequent to the dates of certifications by State Street.

Note 5. Interest in Master Trust

The Plan participates in the Master Trust as permitted by the plan agreement. The Plan has an undivided interest of 54.8 percent and 43.8 percent in the net assets of the Master Trust as of December 31, 2013 and 2012, respectively.

The Master Trust financial information disclosed below and in Notes 6 and 7 represents 100 percent of the Master Trust net assets and the related changes in net assets in which the Plan has an undivided interest as of and for the years ended December 31, 2013 and 2012.

Note 7. Fair Value Measurements

Accounting guidance provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include quoted market prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets within the Master Trust measured at fair value. There have been no significant changes in the methodologies used at December 31, 2013 and 2012.

Fixed-income securities: Fixed-income securities consist of U.S. and foreign government securities and corporate and other obligations. These securities are valued based on pricing matrices or models from pricing vendors used by the trustee. Commingled funds are valued based on the net asset value (NAV) of units held at year-end as provided by the fund administrator.

Common collective trusts: The common collective trusts are valued based on the NAV of units held at year-end as provided by the fund administrator. Generally, under ordinary market conditions, all common collective trust positions provide daily market liquidity to the Master Trust. Certain Master Trust-directed withdrawals may be subject to market value adjustments calculated in accordance with the provisions of the investment contracts.

Common and preferred stocks: Common and preferred stocks are valued based on the last sales price on the primary exchange.

Partnerships/joint ventures: Partnerships/joint ventures are valued based on the estimated fair value of the participation owned by the Master Trust as determined by the general partner or investment manager of the respective partnership. The NAV of the partnerships/joint ventures is based on the fair value of the underlying investments. The valuation inputs are derived primarily from audited financial statements and other financial data. Partnerships/joint ventures include 13 private equity fund of funds limited partnerships that invest in private equity, both domestically and internationally. These investments are considered illiquid and are meant to be held for the life of the funds but, if necessary, sales can be arranged through the secondary market. Distributions are received through the liquidation of the underlying assets of the funds. It is estimated that the underlying assets will be liquidated over the next eight years. Unfunded commitments of the Master Trust approximate \$93.3 million for these 13 funds.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 7. Fair Value Measurements (Continued)

Partnerships/joint ventures also include six investments in domestic and international real estate fund limited partnerships. The fair value of these investments is estimated using the NAV of the Master Trust's ownership interest in partners' capital. The valuation inputs of these investments are derived from third-party appraisals. These investments are considered illiquid, but sales can be arranged on the secondary market. Distributions from each fund are received as income is generated through the investments and as the underlying assets of the funds are liquidated over the next eight years. Unfunded commitments of the Master Trust approximate \$43.2 million for these six investments.

Interest-bearing cash and cash equivalents: Interest-bearing cash and cash equivalents are valued based on cost, including the effects of foreign currency, which approximates fair value.

Registered investment companies: Registered investment companies are valued based on the last sales price on the primary exchange.

Loans secured by mortgages: Loans secured by mortgages are valued on the basis of their principal and interest payments discounted at prevailing interest rates for similar investments.

Credit default and interest rate swaps: Credit default and interest rate swaps are valued based on pricing matrices or models from pricing vendors used by the trustee. The net position is included with fixed-income securities-corporate bonds for purposes of the fair value measurement disclosures. See Note 9 for additional disclosures.

The following tables set forth by level within the fair value hierarchy the Master Trust's fair value measurements as of December 31, 2013 and 2012:

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 7. Fair Value Measurements (Continued)

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or valuation techniques may require the transfer of investments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. The Master Trust evaluates the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets. For the years ended December 31, 2013 and 2012, there were no transfers in or out of Level 3.

The Master Trust follows guidance on how entities should estimate fair value of certain alternative investments. The fair value of investments within the scope of the guidance can be determined using NAV per share as a practical expedient, when fair value is not readily determinable, unless it is probable the investment will be sold at something other than NAV. All investments of the Master Trust classified in Level 3 utilize NAV per share as a practical expedient to estimating fair value.

The following tables include categories of investments within the Master Trust where NAV is available as a practical expedient as of December 31, 2013 and 2012:

- (c) Real estate—The objective of these investments is to achieve capital appreciation and current income principally by means of investing in real estate.
- (d) Private equity—The objective of these investments is to achieve long-term capital appreciation primarily by investing in private equity funds.
- (e) Commingled funds—The objective of these investments is to seek current income and total return by investing in a diversified portfolio of fixed-income investments of varying maturities.

Note 8. Party-in-Interest Transactions

The Master Trust invests in the following investments managed by the trustee or affiliated companies that qualify as party-in-interest transactions:

	December 31	
	2013	2012
State Street Global Advisors Russell 1000 Index Fund	\$ 145,226,181	\$ 136,050,016
Russell 1000 Growth Fund	-	85,115,887

AXA Capital Europe	8,979,771	7,620,594
AXA Capital America LP	5,878,743	5,541,067
AXA Private Equity Fund II	1,569,630	2,064,374
AXA Early Secondary Fund V	1,007,616	-

These transactions are not, however, considered prohibited transactions under Section 408(b) of the ERISA regulations.

Fees paid by the Master Trust for administrative expenses to the trustee and affiliated companies amounted to approximately \$568,000 and \$810,000 for the years ended December 31, 2013 and 2012, respectively. Certain administrative functions are performed by officers or employees of the Company, for which no compensation is received from the Plan.

Note 9. Derivative Financial Instruments

As of December 31, 2013, a fixed-income manager of the Master Trust utilizes derivative financial instruments consisting of credit default and interest rate swaps. This manager uses these financial instruments to manage exposure to interest rate and credit risks and to achieve the overall desired duration under the Master Trust's fixed-income mandate.

Credit default swap agreements involve one party (referred to as the buyer of protection) making a stream of payments to another party (the seller of protection) in exchange for the right to receive a specified return in the event of a default or other credit event for the referenced entity, obligation or index. As a seller of protection on credit default swap agreements, the Master Trust will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap, provided that there is no credit event.

Rio Tinto Alcan Pension Plan (U.S.)

Notes to Financial Statements

Note 9. Derivative Financial Instruments (Continued)

If a credit event occurs, as defined under the terms of that particular swap agreement, the Master Trust will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligation or underlying securities comprising the referenced index or (ii) pay a net settlement in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

The maximum potential amount of future payments (undiscounted) that the Master Trust as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. Notional amounts of all credit default swap agreements outstanding as of December 31, 2013 and 2012, for which the Master Trust is a seller of protection, are disclosed below. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, up-front payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Master Trust for the same referenced entity or entities.

Interest rate swap agreements involve the exchange by the Master Trust with a counterparty of their respective commitments to pay or receive interest, e.g., an exchange of floating-rate payments for fixed-rate payments, with respect to the notional amount of principal. These swaps are used to adjust interest rate and yield curve exposure and substitute for physical securities. Long swap positions ("received fixed") increase exposure to long-term interest rates; short positions ("pay fixed") decrease exposure. Notional amounts of all interest rate swap agreements outstanding as of December 31, 2013 and 2012, are disclosed below.

The notional values summarized below provide an indication of the extent of the Plan's involvement in such instruments. Notional amounts of derivative financial instruments do not necessarily represent amounts exchanged by parties and, therefore, are not a direct measure of the Plan's exposure from its use of derivatives. The net liability position of approximately \$189,000 and net asset position of approximately \$684,000 as of December 31, 2013 and 2012, respectively, is included in fixed income-corporate bonds for purposes of the fair value measurement disclosures in Note 7.

Schedule SB, line 24—Change in Actuarial Assumptions

The funding valuation reflects the following non-prescribed assumption changes:

- A change in the retirement and termination rates to reflect RTA assumptions for Kennecott Salaried employees for frozen ACP participants accruing in the RTA Plan.
- A change in the funding asset return assumption from 6.50% to 5.60%.

These changes were made to better reflect anticipated plan experience. The non-prescribed assumption changes did not reduce the funding shortfall by more than \$5 million; as such, approval of the Commissioner is not required.

Schedule SB, Part V—Summary of Plan Provisions
Plan History

Following is a description of significant events that have occurred within the past ten years.

Effective December 31, 2006, the following plans merged into the AlcanCorp Pension Plan:

- Alcan Pension Plan for Cleveland Hourly Employees,
- Alcan Pension Plan for Mt. Vernon Hourly Employees,
- Alcan Global Pharmaceutical Packaging Consolidated Service Retirement Plan,
- Alcan Global Pharmaceutical Packaging Salaried Employees Pension Plan, and;
- Pechiney Cast Plate Pension Plan for Union Employees.

Any benefits transferred from the merged plans into the AlcanCorp Pension Plan shall be determined under the terms of the respective plans as of December 31, 2006. As of January 1, 2011, all participants from the merged plans are inactive.

Effective December 31, 2011, all benefit accruals are frozen for certain Cable unit employees. Benefit Service and Social Security Covered Compensation are frozen as of December 31, 2011. Highest Average Earnings shall not include earnings during 2011 or any subsequent years. Members who are affected are "Non-Grandfathered Cable Unit Members" and include participating employees that do not meet the following criteria:

- age 45 and ten years of Benefit Service, or;
- age 55 and nine years of Benefit Service or ten years of Eligibility Service.

All other Cable unit employees are "Grandfathered Cable Unit Members" and continue to accrue benefits. This includes any Cable unit employee on long-term disability or severance.

Effective December 31, 2011, all benefit accruals under the AlcanCorp Plan formula are frozen for Salaried Sebree and Cleveland employees. These participants start to accrue benefits under the Rio Tinto America Plan formula for service after December 31, 2011. The December 31, 2011 frozen benefit is increased by the percentage increase of the Final Average Earnings (as defined under the Rio Tinto America formula), over the participant's Highest Average Earnings (as defined under the AlcanCorp formula) at December 31, 2011.

Effective December 31, 2011, any PPPI employee who was a participant of the Alcan Combined Pension Plan as of December 31, 2011 shall become a participant of the AlcanCorp Pension Plan as of January 1, 2012. For these participants, the benefit payable from the AlcanCorp Pension Plan is equal to the benefit accrued under the Alcan Combined formula using all years of service and pay prior to termination, and offset by the benefit accrued under the Alcan Combined formula as of December 31, 2011.

The Specialty Aluminas business unit was sold in August 2012 and the Cable business unit was sold on September 4, 2012. For participants with ongoing accruals, any accruals in the plan have ceased as of the date of sale. Any participants that were terminated as a result of the sales with less than five years of service have been vested in their benefit. Participants that were on LTD at the time of the sale will continue to earn future service accruals from the AlcanCorp Pension Plan.

As of September 30, 2012, accruals for Cleveland participants were frozen in the AlcanCorp Pension Plan. These participants transferred to the Rio Tinto America Plan on October 1, 2012. The Rio Tinto America Plan provides future accruals and pay growth on the past service frozen benefit from the AlcanCorp Plan.

Any remaining Cable, PPPI and LTD participants in the AlcanCorp Pension Plan as of December 31, 2012 have transferred to the Rio Tinto America Plan. Accruals in the AlcanCorp Pension Plan have ceased as of December 31, 2012 for these participants. The Rio Tinto America Plan provides future accruals and pay growth on the past service benefit from the AlcanCorp Plan, as applicable.

Plan Provisions – Legacy AlcanCorp Pension Plan

Effective Date July 31, 1964

Effective Date of Most Recent Amendment July 1, 2013; see Plan History section for summary

Participants Accruing Under Formula As of January 1, 2012: Active Cable, Sebree Salaried and Cleveland Salaried employees that were AlcanCorp Pension Plan Participants before 2012. Plan provisions below are for the pre-2012 accrued benefit for this group.

As of September 4, 2012: The Specialty Aluminas and Cable business units were sold. Accruals for this group are frozen in the AlcanCorp Pension Plan.

As of September 30, 2012: Cleveland Salaried employees transferred to the Rio Tinto America Plan. Accruals for this group are frozen in the AlcanCorp Pension Plan.

As of December 31, 2012: Accruals for any remaining PPPI, Cable and LTD participants cease. These participants accrue in the Rio Tinto America Plan for post-2012 service.

Inactive AlcanCorp Pension Plan participants that were former Cleveland Hourly, Mt. Vernon Hourly, Pharma Hourly, Pharma Salaried or Pechiney Cast Plate Salaried and Hourly employees have accrued benefits under the terms of the respective legacy plan.

As of July 1, 2013: Accruals are frozen for all remaining ACPP participants.

Participation

All regular full time employees who are not represented by a collective bargaining agreement

Other employees are eligible after completing a 12-month period of employment in which the employee has 1,000 hours of service or more

Participation is closed to new hires as of January 1, 2012

Freeze Dates

Benefit accruals are frozen for non-grandfathered Cable participants effective December 31, 2011

Benefit accruals under the AlcanCorp formula are frozen for Sebree and Cleveland Salaried participants effective December 31, 2011, but are increased by the percentage increase of the Final Average Earnings (as defined under the Rio Tinto America formula), over the participant's Highest Average Earnings at December 31, 2011 (as defined under the AlcanCorp formula). These participants accrue under the Rio Tinto America Plan formula for post-2011 benefit service.

All benefit accruals from the AlcanCorp Pension Plan are frozen for Cleveland participants effective September 30, 2012.

Benefit accruals for all remaining AlcanCorp Pension Plan participants are frozen effective July 1, 2013.

Date of Participation

First of month following date of hire for regular full time employees

Normal Retirement
Eligibility

Age 65 and five years of Eligibility Service

Total Benefit

A monthly benefit equal to (a) plus (b) plus (c) below:

- (a) 45% of Highest Average Earnings
- (b) 15% of Highest Average Earnings in excess of the Social Security Covered Compensation
- (c) 0.25% of Highest Average Earnings times the number of Unused Months

If the participant has fewer than 35 years of Benefit Service, then the monthly benefit amount will be multiplied by the participant's Benefit Service and divided by 35

Accrued Benefit "Ratchet"

In no event will the total benefit amount above be less than the total benefit calculated as of any prior March 1

Schedule SB Attachment (Form 5500)—2013 Plan Year

 EIN: 41-2098316 PN: 001

Frozen Sebree and Cleveland Benefit

The benefit under the AlcanCorp formula for Sebree and Cleveland participants is determined as the greater of (a) and (b) below:

(a) Accrued benefit as of December 31, 2011 using Benefit Service and Highest Average Earnings as of December 31, 2011 (*based on Earnings through December 31, 2010*), plus the Highest Average Earnings make-up (Part (c) above), increased by the percentage increase of the Final Average Earnings under the Rio Tinto formula at termination over the Highest Average Earnings at December 31, 2011, if any.

(b) Accrued benefit as of December 31, 2011 using Benefit Service and Highest Average Earnings as of December 31, 2011 (*based on Earnings through December 31, 2011*), increased by the percentage increase of the Final Average Earnings under the Rio Tinto formula at termination over the Highest Average Earnings at December 31, 2011, if any.

Prior Plan Offsets

If Benefit Service includes service from other company sources and the prior plan benefit is not payable from the AlcanCorp Trust, the total benefit amount above is offset by any such benefit. The offset amount cannot exceed the benefit amount that would be accrued had only Benefit Service giving rise to the offset were used in determining the total benefit.

Early Retirement
Eligibility

Age 55 and five years of Eligibility Service, or when age plus Eligibility Service is at least 75

Total Benefit

The accrued normal retirement benefit multiplied by the appropriate age-based factor below:

Age	Factor
65	1.00
64	0.99
63	0.97
62	0.94
61	0.90
Below 60	In steps of .04

Optional Forms of Payment

A retiring participant may also elect other optional forms of payment on an actuarially equivalent basis. The options include:

- Full Benefit Joint and Survivor Annuity: Payable for life of participant with an amount less than 50% payable to the spouse upon the participant's death. Only available if spouse is more than 10 years younger. The participant's benefit is not reduced for payment form.
- Continuing Income Joint and Survivor Annuity: Payable for life of participant with a chosen percent (1-100%) payable to the beneficiary upon the participant's death.
- A level income option for retirement prior to commencement of Social Security benefits.
- Lump sum if monthly retirement benefit is less than \$100.
- Participants with accrued benefits from prior plans may have different optional forms

Most optional forms are based on the 1951 Group Annuity Table projected to 1966 with a 5 year setback for beneficiaries, and 6.00% interest. Certain prior plans use different actuarial equivalence for benefits accrued in those plans.

Benefit Limits

Effective January 1, 2002, EGTRRA increased the Internal Revenue Code section 415 limit to \$160,000 and the limit on compensation to \$200,000. The \$200,000 pay limit was applied retroactively for participants who were active as of January 1, 2002.

Plan Provisions – Alcan Combined Pension Plan Formula

Participants Accruing Under Formula PPPI participants that are active as of January 1, 2012

Benefit payable from the AlcanCorp Pension Plan is equal to the benefit accrued under the Alcan Combined formula using all years of service and pay prior to termination, and offset by the benefit accrued under the Alcan Combined Pension Plan as of December 31, 2011.

PPPI participants transferred to the Rio Tinto America Plan on January 1, 2012

ANCG Offset for PPPI Employees
Transferring from ANC

Benefits payable from the Plan will be equal to the Total Benefit payable to a participant minus the portion of the benefit that will be paid by former ANC Plan #020.

The ANCG portion of the benefit will be based on service with ANCG and the Highest Average Salary upon termination from PPPI. Highest Average Salary for the ANCG portion of the benefit is limited to an average of 5% increases from the ANCG Highest Average Salary at the time of participant transfer. Eligibility for benefits is based on combined service with PPPI and ANCG.
