The Plan is a defined benefit plan which covered all eligible U.S. employees of The Home Insurance Company (the "Home") and certain of its subsidiaries and Home Holdings Inc. The Plan was established in 1991 upon the sale of the Home by AmBase Corporation. The Risk Enterprise Management Limited Savings and Retirement Plans Administrative Committee was the Administrator of the Plan through September 30, 2003. Effective October 1, 2003, Zurich American Insurance Company (the "Plan Administrator" or the "Company") took over the role of plan administrator from Risk Enterprise Management.

The Plan had been sponsored by Home but as a result of certain transactions, sponsorship was relinquished effective July 24, 1998 and Zurich American Insurance Company (the "Sponsor") assumed sponsorship. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Benefits

The Plan was amended on December 11, 1995 to freeze participation in and future benefit accruals under the Plan, effective as of January 1, 1996, by: (1) ceasing participation in the Plan to newly eligible employees who, having completed the age and service requirements set forth in the Plan, would have entered the Plan on or after January 1, 1996; (2) ceasing the accrual of benefits for purposes of determining a participant's accrued benefit in the Plan as of January 1, 1996; and (3) ceasing consideration of earnings of a participant on and after January 1, 1996 for determining a participant's retirement income and/or accrued benefits. Employees become fully vested after five years of service, and are eligible for early retirement benefits after attaining the age of 55 with ten years of service.

Employees participating in the Plan prior to January 1, 1996 are eligible for retirement benefits when they reach their normal retirement date ("NRD"), defined as the first of the month coinciding with or next following the attainment of age 65. Such employees may be eligible for early retirement if they retire on or after attaining age 55 and completing ten years of service, but before NRD. The Plan also provides spousal death benefits for eligible employees.

Monthly retirement benefits are calculated as 1.6% of final average earnings times credited service up to 30 years plus 0.4% of final average earnings in excess of Social Security covered compensation times credited service up to 30 years, subject to minimum prior service benefits. Final average earnings are defined as the highest five years' earnings (base pay, bonus, overtime, and tips) in the ten-year period prior to January 1, 1996. Credited service is defined as all years of service earned after an employee becomes a participant in the Plan up to January 1, 1996.

Contributions

The Sponsor has agreed to make contributions sufficient to provide the Plan with assets with which to pay Plan benefits. Contribution levels, computed using the projected unit credit method, are designed to fund (i) normal cost plus interest, and (ii) amounts required for amortization of the unfunded actuarial accrued liability, or the amount required to meet minimum funding requirements under ERISA.

The minimum contribution requirement for the 2013 and 2012 Plan years have been met. During 2014, the Plan contributed \$17 million to the 2013 Plan year. During 2013, there were no contributions attributable to 2012 Plan year.

Years Ended December 31, 2013 and 2012

Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide benefits in the following order: benefits participants have been receiving for at least three years (or that participants eligible to retire for that three-year period would have been receiving), vested benefits of other participants and nonvested benefits. Under provisions of ERISA, if the Plan is terminated, the Sponsor and participating employers may be obligated to make payments to the Pension Benefit Guaranty Corporation ("PBGC") and participants may be eligible for benefits under insurance provided by the PBGC. Certain vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. The amount of benefit protection guaranteed by the PBGC is subject to certain limitations.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

2. Summary of Significant Accounting Policies

Basis of Accounting

The financial statements have been prepared on the accrual basis of accounting.

Use of Estimates

The preparation of the Plan's financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from those estimates and assumptions.

Investments Valuation and Income Recognition

Investments are stated at fair value. Investments traded on a national security exchange are valued at the last reported sales price on the last business day of the year; investments traded in the over-the-counter market and listed securities for which no sale was reported on the last day of the year, are valued at the average of the last reported bid and ask prices.

The Plan may enter into equity futures contracts as a means to replicate the performance of the broad stock market or to maintain allocations to equity securities at the appropriate target levels. Equity futures contracts are marked to market daily determined by prices quoted on the futures exchanges; realized gains and losses are recognized daily in net appreciation/depreciation in fair value of investments in the Statement of Changes in Net Assets Available for Benefits. Equity futures are exposed to investment risk that could result in a loss in the value of the futures contract. The futures contracts are executed on the futures exchange, which has strict margin requirements with daily cash collateral posting based on mark-to-market values of the futures contract, thereby mitigating credit risk associated with these contracts. The amount of gross realized gain and loss on equity futures contracts recognized in the net appreciation/depreciation in fair value of investments is \$572,464 and (\$2,489,493), respectively, for the year ended December 31, 2013, and \$1,454,918 and (\$764,954), respectively, for the year ended December 31, 2012. As of December 31, 2013 and December 31, 2012, the Plan held equity futures contracts with a fair value of \$0 for both years and a notional value of \$28,470,960 and \$15,980,032, respectively.

The Plan may also enter into interest rate swaps to effectively manage interest rate exposures. The interest rate swap structure consists of one counterparty agreeing to pay a sequence of floating rate payments while receiving a series of fixed rate payments (or vice versa) based off the notional amount of an underlying

Notes to Financial Statements

Years Ended December 31, 2013 and 2012

asset. As of December 31, 2013 and December 31, 2012, the Plan held interest rate swaps with a fair value of (\$10,858) and \$153,585, respectively, with underlying notional values of \$4.8 million and \$10.3 million, respectively. The amount of gross realized gain and loss on interest rate swap contracts recognized in the net appreciation/depreciation in fair value of investments is \$373,139 and (\$25,450), respectively, for the year ended December 31, 2013, and \$185,268 and (\$335,717), respectively, for the year ended December 31, 2012.

Corporate debt instruments and government securities are valued at fair value. Fair value of these securities are determined by the Trustee of the Plan, using information available from pricing sources. The pricing sources use proprietary models to arrive at an evaluated price for each security. These pricing models use matrix pricing to gather market information and derive a price based on similar securities. Standard inputs include, but are not limited to; spread benchmark curves (Treasury curves, LIBOR curves and swap curves), prepayment speeds, inputs to build interest rate curves/spreads to determine discount rates, and financial statements of the issuer. The inputs for the models are derived from the market, brokers, dealers, mutual funds, and other similar market participants. The evaluated price represents the bid side market value of an institutional size block of a security. Certain corporate bonds are evaluated on a nominal spread of risk free curves (swaps or government bonds). Issues with embedded options are priced using an option adjusted spread (OAS) model. Issues are generally benchmarked off of U.S. treasuries or LIBOR.

Investments in unaffiliated common stocks are stated at fair values.

Investments in registered investment companies are valued at net asset value based on either quoted market prices or on the basis of the last reported sales prices, or if no sales are reported, based on quotes obtained from pricing services. Some registered investment companies are privately held investment funds, which are valued based on the net asset value obtained from the fund's financial statements at year end.

Common collective trusts are valued based on the net asset value from the information reported by the investment trustee using financial statements of the collective trust at year-end.

As of December 31, 2013 and 2012, the Plan and the Master Trust both invest in the Northern Trust Company Collective Short-Term Investment Fund (the "STIF Fund"), a common collective trust, which is composed of high-grade money market instruments with short maturities. The STIF Fund's objective is to provide an investment vehicle for cash reserves while offering a competitive rate of return. Liquidity is emphasized to provide for redemption of units on any business day. Principal preservation is also a prime objective. High-quality securities are used in this fund. Within quality, maturity and sector diversification guidelines, investments are made in those securities with the most attractive yields. Admissions and withdrawals are daily in accordance with the terms of the Trust. Interest is accrued daily and distributed monthly. There are no unfunded commitments with respect to this investment, however, it may be subject to redemption restrictions, at the trustee's discretion, and to the extent that it is determined such actions would disrupt management of the fund.

As of December 31, 2013 and 2012, the Master Trust invested in an equity common collective trust fund named the Northern Trust Collective U.S. Market Cap Equity Index Fund (the "NT Equity Fund"). The NT Equity Fund seeks to provide investment results that approximate the risk and return characteristics of the Dow Jones U.S. Total Stock Market Index. The NT Equity Fund generally seeks to hold each index constituent in its proportional index weight. Dividends, if any, are declared and paid quarterly, capital gains, if any, are distributed at least annually, there are no unfunded commitments and there are no redemption restrictions.

The Plan presents in the Statements of Changes in Net Assets Available for Benefits, the net appreciation/depreciation in fair value of its investments which consists of the realized gains or losses and

The Home Insurance Company Retirement Plan

Notes to Financial Statements

Years Ended December 31, 2013 and 2012

the unrealized appreciation/depreciation of those investments. The net realized gain or loss on investments is the difference between the proceeds received and the cost of the investments sold, determined on an average cost basis. Unrealized appreciation/depreciation in fair value of investments is the difference between fair value and the cost of investments.

Purchases and sales of securities are recorded on a trade-date basis. Dividends are recorded on the ex-dividend date. Interest income is recorded on the accrual basis.

Accumulated Plan Benefits

Accumulated plan benefits (Note 3) are those estimated future payments, including lump-sum distributions, that are attributable under the Plan's provisions to services rendered by the employees to the date the Plan was frozen. Accumulated plan benefits include benefits expected to be paid to retired or terminated employees or their beneficiaries, beneficiaries of employees who have died, and present employees or their beneficiaries. Benefits for retired or terminated employees or their beneficiaries are based on Plan provisions at the time of retirement.

Accounting Pronouncement Issued and Adopted

In May 2011, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. generally accepted accounting principles ("GAAP") and International Financial Reporting Standards ("IFRS"), to converge U.S. GAAP and IFRS on fair value measurements and disclosures. The amended guidance changes several aspects of the fair value measurement guidance in FASB Accounting Standards Codification ("ASC") 820, Fair Value Measurement, including information about valuation techniques and unobservable inputs used in level 3 fair value measurements and a narrative description of the sensitivity of level 3 measurements to changes in unobservable inputs. The amended guidance must be applied prospectively and is effective beginning after December 15, 2011. The Plan adopted ASU 2011-04 as of December 31, 2012. There were no material changes to the Plan's financial statements as a result of the adoption.

There were no material accounting pronouncements issued and adopted during 2013.

Risks and Uncertainties

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Administrative Expenses

Investment manager fees to unaffiliated managers, trustee fees, administrative expenses and the Plan's actuarial fees are paid by the Plan and are recorded in administrative expenses within the Statements of Changes in Net Assets Available for Benefits.

Plan Amendments

During 2012, the Sponsor amended the Plan provisions to provide a temporary window for terminated vested participants to cash out of the Plan by receiving a one-time lump sum payment equal to the present

The Home Insurance Company Retirement Plan

Notes to Financial Statements

Years Ended December 31, 2013 and 2012

value of their benefits under the Plan. Once the terminated vested participants receive their lump sum payments under the limited time plan amendment, the Plan would legally not be required to accrue any future benefits to the terminated vested employees nor would be required to pay additional benefits. As such, the Sponsor offered 1,659 terminated vested employees an opportunity to elect a lump sum payment option that was previously not available to them. Of those offered, 550 participants, or 33.2% chose to exercise the option and withdrew approximately \$21 million in lump sum payments from the plan during November and December of 2012.

There were no material Plan amendments during 2013.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Reclassification

Certain 2012 balances have been reclassified to conform to the 2013 presentation.

3. Actuarial Present Value of Accumulated Plan Benefits

The Plan's independent consulting actuary estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits was calculated by consulting actuaries as of December 31, 2012 and 2011. The more significant actuarial assumptions are as follows:

Interest rate	4.0% for 2012 and 4.1% for 2011
Mortality basis	IRS Proposed Generational Mortality for 2012 and 2011
Assumed retirement age	Age 55 to 65 for 2012 and 2011

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Interest in Zurich American Insurance Company Master Retirement Trust

In addition to the Plan, the Sponsor also sponsors Zurich American Insurance Company Retirement Account Plan (the "Zurich Plan"). During 2008, the Sponsor established a master retirement trust (the "Master Trust") with two sub-accounts for its retirement plans. The two retirement plans have an undivided interest in each of the two sub-accounts, one sub-account comprised of equity securities and the other comprised of cash and short term investments. The value of the Plan's interest in each of the two sub-accounts is based on the value of the assets in the Master Trust at the beginning of the year, plus actual contributions to the Plan and allocated investment income less actual distributions and allocated administrative expenses. The assets of the Master Trust are held by The Northern Trust Company (Trustee). At December 31, 2013, the Plan's interest in the net assets of the equity securities sub-account was approximately 16%, while the Plan's interest in the net assets of the non-equity sub-account was approximately 51.3%. At December 31, 2012, the Plan's interest in the net assets of the equity securities sub-account was approximately 15.1%, while the Plan's interest in the net assets of the non-equity sub-account was approximately 83.3%.

6. Federal Income Tax Status

The Internal Revenue Service (IRS) determined and informed the Company by a letter dated September 19, 2012, that the Plan and related trust were designed in accordance with applicable sections of the Internal Revenue Code (IRC). Although the Plan has been amended since receiving the determination, the Plan administrator and the Plan's internal tax advisor are unaware of any reason that the Plan is not as currently designed and operated in compliance with the applicable requirements of the IRC. Therefore, the Plan administrator believes that the Plan is qualified and the related trust is tax-exempt.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that on a more likely than not basis would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2013 and December 31, 2012, there are no uncertain tax positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by the IRS, and in December 2013 the IRS began an examination of the Plan's taxable year ending December 31, 2011, which is scheduled to be completed by the end of January 2015. No material issues have been identified as of the date these financial statements were available to be issued. The Plan administrator believes the Plan is no longer subject to any IRS tax examinations for years prior to 2010.

7. Transactions with Parties-in-Interest

The Plan and the Master Trust invest in a short-term investment fund managed by The Northern Trust Company, the trustee of the Plan. These transactions qualify as party-in-interest transactions.

8. Fair Value Measurements

The FASB (ASC) 820, Fair Value Measurement, defines fair value as the price that would be received upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. The Plan's financial assets carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by FASB ASC 820, which prioritizes the inputs to valuation techniques used to measure fair value. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The three levels of the fair value hierarchy are summarized below:

- Level 1 – Quoted market prices in active markets that the Plan or Trust has the ability to access for identical assets
- Level 2 – Quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuations in which all significant inputs are observable in the market; and

The Home Insurance Company Retirement Plan
Notes to Financial Statements
Years Ended December 31, 2013 and 2012

- Level 3 – Valuations using significant inputs that are unobservable in the market and include the use of judgment by the Plan or Trust's management about the assumptions market participants would use in pricing the assets.

There have been no changes in the methodologies used at December 31, 2013 and 2012. The methods described in Note 2 and above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

During 2013 and 2012, there were no material transfers between level 1 and level 2 of the fair value hierarchy. The Plan's policy to recognize transfers between levels of the fair value hierarchy is as of the actual date of change of circumstances that caused the transfer, there were no material transfers between levels of the fair value hierarchy during 2013 or 2012. The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2013 and 2012:
