Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Independent Auditors' Report

To the Participants and Plan Administrator of the
Schlumberger Pension Plan for U.S. Taxpayers Employed Abroad
Houston, Texas

We have audited the accompanying financial statements of the Schlumberger Pension Plan for U.S. Taxpayers Employed Abroad (the "Plan") which comprise the statements of net assets available for benefits as of December 31, 2013 and 2012, and the related statements of changes in net assets available for benefits for the years then ended and the statement of accumulated plan benefits as of January 1, 2013, and the related statement of changes in accumulated plan benefits for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2013 and 2012, and the changes in net assets available for benefits for the years then ended and its financial status as of January 1, 2013, in accordance with accounting principles generally accepted in the United States of America.

SCHLUMBERGER PENSION PLAN FOR U.S. TAXPAYERS EMPLOYED ABROAD

NOTES TO FINANCIAL STATEMENTS

1. Description of the Plan

The following brief description of the Schlumberger Pension Plan for U.S. Taxpayers Employed Abroad (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

General

The Plan is a defined benefit pension plan established on January 1, 2009 covering employees (U.S. citizens and/or U.S. taxpayers employed abroad) of Schlumberger Limited (the "Company") who have met certain requirements, including length of service. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). The Plan has an allocable interest in the net assets of the Schlumberger Master Pension Trust (the "Pension Trust"), which serves as the investing medium for the Plan and certain other plans of Schlumberger Limited and its affiliates.

The Plan is administered by an Administrative Committee, which is appointed by the Board of Directors of the Company in accordance with certain provisions of the plan document and is a named fiduciary under the provisions of Section (3)(21) of ERISA. The Administrative Committee, which normally consists of at least three persons, is responsible for general administration of the Plan.

The Finance Committee is appointed by the Board of Directors of the Company in accordance with certain provisions of the Pension Trust agreement and is a named fiduciary under the provisions of Section (3)(21) of ERISA. The Finance Committee communicates to The Northern Trust Company (the "Trustee") the funding policies and methods which have been established to carry out the objectives of the Plan.

Eligibility

Each employee who (a) is designated as an International Mobile employee, an International Commuter employee, a Europe Mobile employee or a GeoMobile employee who was a participant in the Schlumberger International Staff Pension Plan immediately prior to January 1, 2009, (b) is a U.S. taxpayer working outside of the U.S., and (c) has completed one year of continuous active employment shall be eligible to commence participation in the Plan on the first day of the next following month. An employee who was a participant in the Schlumberger International Staff Pension Plan prior to January 1, 2009, and who completes one hour of service on or after such date, shall be eligible to participate in the Plan as of January 1, 2009. Employees hired after January 1, 2009 are eligible to participate in the Plan as of the date the employee completes one year of active service, as defined in the Plan document. Notwithstanding the foregoing, in order to be eligible to become a participant, each employee must agree to make participant contributions in accordance with the written procedures of the Plan.

Vesting

A participant is 100% vested after five years of active service or attainment of age 50, whichever occurs first. A participant is 100% vested in his accrued benefits attributable to his contribution.

SCHLUMBERGER PENSION PLAN FOR U.S. TAXPAYERS EMPLOYED ABROAD

NOTES TO FINANCIAL STATEMENTS

1. Description of the Plan (cont'd)

Retirement age

Normal retirement age is 65. Early retirement is permitted at age 55 for benefits accrued in 2009 and age 60 for benefits accrued after 2009. Special early retirement is permitted at age 55 for benefits accrued after 2009, and age 50 for benefits accrued in 2009, provided the participant has completed at least 20 years of active service.

Funding policy

Employer contributions are determined by an independent actuary, Sibson Consulting, and represent the annual amount required by ERISA to meet the minimum funding standards. These contributions are funded on or before required dates as set forth by ERISA. The Plan met the ERISA minimum funding requirement for 2013 and 2012. The Company at its option can contribute more than the minimum required. Active participants are required to contribute 4% of their admissible compensation, as defined in the Plan document, for each calendar year or portion thereof by automatic payroll deduction. Effective January 1, 2010, the required active participant contribution is 6% of their admissible compensation. Upon termination of employment prior to becoming vested, participant contributions, together with appropriate accumulated interest at a 6% rate, are refunded.

Benefits

Participants who are vested and whose benefits commence at or after normal, early or special early retirement age are entitled to receive pension benefits for their lifetime in annual amounts equal to the sum of their annual retirement credits as of their retirement date reduced for early commencement, as defined in the Plan document.

Participants accrue an annual retirement credit for each year (or portion thereof) of participation in the Plan equal to 3.2% of their admissible compensation for the plan year 2009. For each year of service after December 31, 2009, a participant shall accrue an annual retirement credit equal to 3.5% of admissible compensation.

The maximum annual benefit payable to a participant shall not exceed the lesser of \$205,000 and \$200,000 in 2013 and 2012, respectively, or 100% of the participant's average annual compensation for the three consecutive calendar years with the greatest aggregate compensation. The maximum admissible compensation shall not exceed \$255,000 and \$250,000 in 2013 and 2012, respectively. In addition, survivor benefits may be paid to a deceased participant's surviving spouse or to a designated beneficiary under certain retirement options.

Alternative benefit options are available, as outlined in the Plan document.

NOTES TO FINANCIAL STATEMENTS

1. Description of the Plan (cont'd)

Plan expenses

Expenses required to maintain the Plan are absorbed by the Plan, unless otherwise paid by the Company.

2. Summary of significant accounting policies

Basis of accounting

The accompanying financial statements of the Plan are prepared under the accrual basis of accounting.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Accordingly, actual results could differ from those estimates.

Valuation of investments and income recognition

The Plan's interest in the Pension Trust is stated at fair value, as determined by the Trustee, and consists of an allocation of the Pension Trust's net assets that is based upon cumulative employer and participant contributions, net of benefits paid to terminated and retired participants, and allocations of the Pension Trust's investment income and administrative expenses.

The Plan follows the provisions of Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 820, "Fair Value Measurement." Under FASB ASC Topic 820, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the exit price) in an orderly transaction between market participants at the measurement date.

FASB ASC Topic 820 establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC Topic 820 are as described as follows:

- Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

SCHLUMBERGER PENSION PLAN FOR U.S. TAXPAYERS EMPLOYED ABROAD

NOTES TO FINANCIAL STATEMENTS

2. Summary of significant accounting policies (cont'd)

Valuation of investments (cont'd)

Level 2 Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability;
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of relevant observable inputs and minimize the use of unobservable inputs. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Plan. Unobservable inputs are inputs that reflect the Plan's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. Changes in economic conditions or valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. Plan management evaluated the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. For the years ended December 31, 2013 and 2012, there were no significant transfers in or out of levels 1, 2 or 3. See Notes 6 and 7 for the disclosures required by FASB ASC Topic 820 with regard to Plan investments.

A fair value measurement is for a particular asset or liability. The unit of account determines what is being measured by reference to the level at which the asset or liability is aggregated (or disaggregated) for purposes of applying other accounting pronouncements. Accordingly, because the Plan does not hold shares of the Pension Trust, the disclosures required by FASB ASC Topic 820 are required for the individual assets and liabilities under the Pension Trust and are not required for the Plan's total interest in the Pension Trust. Similarly, since the Pension Trust does not hold shares of the Schlumberger Group Trust (the "Group Trust"), the disclosures required by FASB ASC Topic 820 are required for the individual assets and liabilities under the Group Trust and are not required for the Pension Trust's total interest in the Group Trust. Likewise, since the Group Trust does not own shares of the different investment pools which are disclosed in Note 7, the disclosures required by FASB ASC Topic 820 are required for the individual assets and liabilities under each investment pool and are not required for the Group Trust's total interest in each of the investment pools.

SCHLUMBERGER PENSION PLAN FOR U.S. TAXPAYERS EMPLOYED ABROAD

NOTES TO FINANCIAL STATEMENTS

2. Summary of significant accounting policies (cont'd)

Valuation of investments (cont'd)

In determining the fair value of assets and liabilities underlying the Pension Trust, Group Trust and the investment pools owned by the Group Trust, the Pension Trust and Group Trust use various inputs and valuation methodologies which are described in Notes 6 and 7. There have been no significant changes in the inputs or valuation methodologies used at December 31, 2013 and 2012.

Investment income relating to the Pension Trust is allocated to the Plan based upon the average monthly balance invested by the Plan.

Benefit payments

Benefit payments are recorded when paid.

Administrative expenses

The Plan's expenses are paid either by the Plan or the Company, as provided by the plan document. Expenses that are paid directly by the Company are excluded from these financial statements. Expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying statements of changes in net assets available for benefits. Certain administrative expenses relating to the Pension Trust are allocated to the Plan based upon the average monthly balance invested by the Plan. Other administrative expenses are allocated to the Plan based on the specific services provided to the Plan.

Relevant accounting developments

In December 2011, the FASB issued Accounting Standards Update ("ASU") No. 2011-11, "Disclosures about Offsetting Assets and Liabilities." ASU No. 2011-11 contains guidance enhancing disclosure requirements about the nature of an entity's right to offset and related arrangements associated with its financial instruments and derivative instruments. The new guidance requires the disclosure of the gross amounts subject to rights of set-off, amounts offset in accordance with the accounting standards followed, and the related net exposure. The adoption of the provisions of ASU No. 2011-11, effective January 1, 2013, did not have an impact on the Plan's financial statements other than the newly required disclosures in Note 7.

In January 2013, the FASB issued ASU No. 2013-01, "Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities." ASU No. 2013-01 was issued to address implementation issues about the scope of ASU 2011-11. The amendments clarify that the scope of ASU No. 2011-11 applies to derivatives accounted for in accordance with ASC Topic 815, "Derivatives and Hedging," including bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with ASC Section 210-20-45 or Section 815-10-45 or subject to an enforceable master netting arrangement or similar agreement. The adoption of the provisions of ASU No. 2013-01, effective January 1, 2013, did not have a material impact on the Plan's financial statements.

SCHLUMBERGER PENSION PLAN FOR U.S. TAXPAYERS EMPLOYED ABROAD

NOTES TO FINANCIAL STATEMENTS

3. Risks and uncertainties

Due to various risks (i.e., interest rate, market and credit risk) associated with certain investments of the Pension Trust and Group Trust, and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that changes in the values of the investments of the Pension Trust and Group Trust will occur in the near term, and this could materially affect the value of the Plan interest in the Pension Trust and the corresponding investment income reported in the statements of net assets available for benefits and the statements of changes in net assets available for benefits, respectively.

The Pension Trust and Group Trust invest in securities with contractual cash flows, such as asset-backed securities, collateralized mortgage obligations and commercial mortgage-backed securities. The value, liquidity and related income of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported in the financial statements.

4. Actuarial present value of accumulated plan benefits

Accumulated plan benefits are those future periodic benefit payments, including lump-sum distributions, which are attributable under the Plan's provisions to the service employees have rendered to the benefit information date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries.

Benefits under the plan are accumulated based on employees' compensation during each year of credited service. The accumulated plan benefits for active employees will equal the accumulation, with interest, of the annual benefit accruals as of the benefit information date. Benefits payable under all circumstances—retirement, death, disability, and termination of employment—are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from plan assets are excluded from accumulated plan benefits.

The actuarial present value of accumulated plan benefits, which is determined by an independent actuary, is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as death, withdrawal or retirement) between the benefit information date and the expected date of payment.

SCHLUMBERGER PENSION PLAN FOR U.S. TAXPAYERS EMPLOYED ABROAD

NOTES TO FINANCIAL STATEMENTS

4. Actuarial present value of accumulated plan benefits (cont'd)

The calculation of the actuarial present value of accumulated plan benefits as of January 1, 2013 has been based on the following significant actuarial assumptions:

- a) Expected rate of return on investments (net of expenses): 7.5% (including a reduction of 0.5% to reflect anticipated administrative expenses associated with providing benefits)
- b) Mortality: RP2000 separate annuitant and non-annuitant healthy mortality tables (sex-specific) with static projection through the valuation date plus another 7 years for annuitants, and through the valuation date plus another 15 years for non-annuitants
- c) Retirement rates:

<u>Age</u>	<u>Rate</u>
50-54	0%
55-59	25%
60-64	40%
65	100%

- d) Retirement from terminated vested status: Age 60, with appropriate reduction

- e) Turnover rates:

<u>Age</u>	<u>Rate</u>
25	12.60%
30	10.30%
35	8.80%
40	8.25%
45	8.40%
50	11.37%
54	13.20%
55 and older	0.00%

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

SCHLUMBERGER PENSION PLAN FOR U.S. TAXPAYERS EMPLOYED ABROAD

NOTES TO FINANCIAL STATEMENTS

4. Actuarial present value of accumulated plan benefits (cont'd)

The actuarial cost method used is the Unit Credit for both funding and the calculation of the actuarial present value of accumulated plan benefits.

The Plan is not considered an "at-risk-plan" for the 2013 Plan year.

5. Plan termination

The Board of Directors reserves the right to terminate the Plan entirely or partially at any time. In the event of the termination or partial termination of the Plan, the right of each affected participant to benefits accrued to the date of such total or partial termination, to the extent then funded, shall become fully vested and non-forfeitable, and upon a complete termination all previously unallocated net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide benefits in accordance with the following priorities:

- a) Benefits to each participant representing that portion of each participant's accrued retirement benefit which is derived from the participant's contributions.
- b) In the case of benefits payable as an annuity:
 - (i) In the case of the benefit of a participant or beneficiary which was in pay status as of the beginning of the three-year period ending on the termination date of the Plan, to each such benefit, based on the provisions of the Plan (as in effect during the five-year period ending on such date) under which such benefit would be the least; and
 - (ii) In the case of a participant's or beneficiary's benefit (other than a benefit described in subparagraph (b) (i) above) which would have been in pay status as of the beginning of such three-year period if the participant had returned prior to the beginning of the three-year period and if his benefits had commenced (in the normal form of annuity under the Plan) as of the beginning of such period, to each such benefit based on the provisions of the Plan (as in effect during the five-year period ending on such date) under which such benefit would be the least.
- c) Benefits to each participant under the Plan guaranteed under Title IV of ERISA.
- d) Benefits to each participant representing other non-forfeitable benefits.
- e) All other benefits under the Plan.
- f) Benefits to the Company.

SCHLUMBERGER PENSION PLAN FOR U.S. TAXPAYERS EMPLOYED ABROAD

NOTES TO FINANCIAL STATEMENTS

5. Plan termination (cont'd)

Generally, the Pension Benefit Guaranty Corporation (the "PBGC") guarantees the payment of most vested normal retirement benefits, early retirement benefits, and certain disability and survivor benefits and survivor pensions, subject to certain limitations. Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the PBGC at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided for at all. Participants should consult the Plan document for more complete information related to guarantees of benefits.

The PBGC guarantees vested benefits at the level in effect on the date of Plan termination. However, if benefits have been increased within the 5 years before Plan termination, the whole amount of the Plan's vested benefits or the benefit increase may not be guaranteed. In addition, there is a ceiling on the amount of monthly benefits that PBGC guarantees, which is adjusted periodically.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations, and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

In the event of the Plan's withdrawal from the Pension Trust, the Trustee shall set apart that portion or equitable share of the Pension Trust allocated to the Plan pursuant to a valuation and allocation of the Pension Trust by the Trustee, subject to approval by the Finance Committee.

6. Interest in the Schlumberger Master Pension Trust

The Plan's investments are 100% in the Pension Trust. The Pension Trust was established for the investment of assets of the Plan and other qualified pension plans sponsored by Schlumberger Limited and its affiliates (collectively, the "Pension Plans"). Each participating plan has an allocable interest in the Pension Trust. The assets of the Pension Trust are held by the Trustee. At December 31, 2013 and 2012, the Plan's interest in the net assets of the Pension Trust was approximately 3.25% (\$116.5 million) and 2.38% (\$74.0 million), respectively. Investment income and certain administrative expenses relating to the Pension Trust are allocated to the individual plans based upon average monthly balances invested by each plan. Other administrative expenses are allocated to each plan based on the specific services provided to them. The plans' balances reflect transfers to and from the individual plans as well as the plans' share of investment income. In addition, any commitments of the Pension Trust are shared by the individual plans based on the participating plan's allocable interest.

6. Interest in the Schlumberger Master Pension Trust (cont'd)

Valuation of investments and financial liabilities

The Pension Trust interest in the Group Trust is stated at fair value, as determined by the Trustee, which consists of an allocation of the Group Trust's net assets that is based on amounts contributed by the Pension Trust and a certain other trust and plan of Schlumberger Limited and its affiliates, net of distributions, that are invested by the Group Trust, and a respective allocation of investment income and administrative expenses.

Short-term investment funds are stated using a constant price (or amortized cost) of \$1 per unit of participation, which approximates fair value.

Investments in real estate are made principally through pooled separate accounts and real estate investment trusts ("REIT"), which are stated at fair value represented by the net asset value of the pooled separate account or REIT at year-end, as determined by the investment manager based on the fair value of the underlying real estate investments. The fair value of the underlying real estate investments are valued by independent appraisers on an annual basis. However, because of the inherent uncertainty of the valuation, the valuation presented does not necessarily represent the amount that might ultimately be realized from the investment held. The investments in real estate were purchased for the sole benefit of the Pension Plans.

Investments in limited partnerships are stated at fair value represented by the net asset value of the partnership interests owned by the Pension Trust at year-end, as determined by the respective general partners of the limited partnerships based on the fair value of the underlying investments of the limited partnerships. In establishing the fair value of partnership investments, general partners take into consideration information from the financial statements of the companies in which they invest, as well as the currency in which the investment is denominated. Because of the inherent uncertainty of the valuation, the valuation presented does not necessarily represent the amount that might ultimately be realized from the investment held. The investments in limited partnerships were purchased for the sole benefit of the Pension Plans.

The GIC is stated at fair value, which approximates contract value. Contract value as determined by the insurance company, represents contributions and investment income less distributions and administrative expenses. The GIC was purchased for the sole benefit of the Schlumberger Technology Corporation Pension Plan.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Pension Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Valuation of investments and financial liabilities (cont'd)

The following table sets forth a summary of the Level 3 investments held by the Pension Trust reported at net asset value as of December 31, 2013 and 2012:

(dollars in thousands)

	Fair Value Estimated Using Net Asset Value per Share			Redemption	Redemption
	Fair Value		Unfunded	Frequency (If	Notice
	2013	2012	Commitments at	Currently	Period
			December 31, 2013	Eligible)	
Real estate funds (1)	\$ 62,448	\$ 56,835	\$ -	quarterly	45-90 days
Limited partnerships (2)	203,899	185,152	93,520	N/A	N/A
Total	<u>\$ 266,347</u>	<u>\$ 241,987</u>	<u>\$ 93,520</u>		

(1) Real estate funds primarily include investments in pooled separate accounts and real estate investment trusts, concentrated in U.S. commercial real estate. Redemptions are subject to management's and/or board of director's approval.

(2) Limited partnerships include investments in several fund of funds limited partnerships that invest primarily in U.S. and foreign companies. These investments can never be redeemed with the funds. Instead, the nature of the investments is that distributions are received through the liquidation of the underlying assets of the funds. If these investments were held, it is estimated that the underlying assets of the funds would be liquidated over 10-15 years.

Commitments

The Pension Trust invests in certain real estate and limited partnerships investments whereby the Pension Trust commits to providing certain funds primarily on an "as needed" basis. During the year ended December 31, 2013, the Pension Trust reduced commitments totaling approximately \$8.6 million and contributed approximately \$19.4 million. At December 31, 2013, the Pension Trust was committed to funding approximately \$93.5 million for such investments over a period not exceeding six years.

Investment transactions and investment income

Net appreciation or depreciation in fair value of investments includes realized gains or losses on investments sold and unrealized gains or losses on investments held. Unrealized gains or losses on investments represent the change in the difference between the cost and fair value of investments at the end of the year and at the beginning of the year.

Investment transactions and investment income (cont'd)

Purchases and sales of securities are recorded on a trade-date basis. Realized gains and losses on securities transactions are recorded as the difference between proceeds received and cost, with cost determined on the moving average basis. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

7. Interest in the Schlumberger Group Trust

A portion of the Pension Trust's investments are in the Group Trust. The Group Trust serves as the investing medium for the Pension Trust and a certain other trust and plan of Schlumberger Limited and its affiliates. Each participating trust and plan has an allocable interest in the Group Trust. The assets of the Group Trust are held by the Trustee. At December 31, 2013 and 2012, the Pension Trust's interest in the net assets of the Group Trust was approximately 40.36% (\$3.295 billion) and 47.91% (\$2.846 billion), respectively. Investment income and certain administrative expenses relating to the Group Trust are allocated to the individual trusts and plan based upon average monthly balances invested by each trust and plan in the underlying pooled investments of the Group Trust. Other administrative expenses are allocated to each trust and plan based on the specific services provided to them. The trusts' and plan's balances reflect transfers to and from the individual trusts and plan as well as the trusts' and plan's share of investment income.

At December 31, 2013 and 2012, the Pension Trust's interest in the Group Trust investments was approximately as follows:

	<u>2013</u>	<u>2012</u>
U.S. Equities and Equity Index	35.45%	44.17%
Non-U.S. Equities	44.07%	53.90%
Fixed Income - Short Term	8.26%	7.24%

Total	\$9,648	\$15,862			

In estimating fair value of the investments in Level 3, the Group Trust may use third-party pricing sources. In substantiating the reasonableness of the pricing data provided by third parties, plan management evaluates a variety of factors including review of methods and assumptions used by external sources, recently executed transactions, price movements of comparable securities, existing contracts, economic conditions, industry and market developments, and overall credit ratings.

- (1) The Fund is an open-end interval management investment company that offers its shareholders the opportunity to purchase and redeem shares on a periodic basis. The Fund seeks long-term growth of capital and invests primarily in common stock and other equity securities of issuers in developing countries. The Fund redeems its shares at monthly intervals and accepts redemption requests at any time. The Fund has adopted, as a fundamental policy, liquidity procedures designed to more easily provide for redemptions, although there can be no guarantees of that result. The Fund's liquidity policy requires that the Fund maintain a portfolio of securities such that as of each day on which the Fund's assets are valued for purposes of calculating its net asset value, at least 85% of the Fund's net assets will either (i) mature by the next redemption payment date; or (ii) be capable of being sold between the redemption request deadline and the redemption payment date at approximately the price used in computing the Fund's net asset value.
- (2) The primary objective of the S&P 500 Index Fund, a collective fund for qualified plans, is to approximate the risk and return characterized by the S&P 500 Index. This Index is commonly used to represent the large cap segment of the U.S. equity market. To achieve its objective, the Fund employs a replication technique, which generally seeks to hold each index constituent in its proportional index weight. - (3) The primary objective of the Daily S&P 500 Equity Index Fund - DC - Non Lending, a collective fund for qualified plans, is to approximate the risk and return characterized by the S&P 500 Index. This Index is commonly used to represent the large cap segment of the U.S. equity market. To achieve its objective, the Fund employs a replication technique, which generally seeks to hold each index constituent in its proportional index weight. The fund may hold units of the NTGI-QM Collective Daily S&P 500 Equity Index Fund - Non Lending. The Fund may make limited use of futures and/or options for the purpose of maintaining equity exposure. This Fund does not participate in securities lending. The S&P 500 Fund is valued daily and has a trade notification deadline of trade date minus one business day (T-1) at 9:30 Central.
- (4) The investment objective of the Pyramis Small Company Commingled Pool (Portfolio) is to achieve long-term growth of capital, principally by investing in the equity securities of smaller, growing companies. The Portfolio's management is based on the selection of equity securities of companies which have relatively small market capitalizations, the potential for above average earnings-per-share growth and whose equity valuations are close to or below the average valuation level of established, larger companies' shares. The Portfolio has daily liquidity and the only restrictions to cash flow activity in the pool pertain to anti-dilution measures, wherein any flow in to or out of the pool that exceeds 2% of the total net assets of the pool must use a transition account, so as not to adversely affect other investors in the pool.
- (5) The investment objective of the Funds is to approximate as closely as practicable, before expenses, the performance of the Russell 1000 Index over the long term. The Funds attempt to achieve their investment objective by investing in other collective investment funds (each an "Underlying Fund"), managed by the Trustee, which have characteristics consistent with the Funds' overall investment objective. The net asset value per unit of the Funds is determined each business day and thus issuances and redemptions of Funds' units may be made on such days based upon the transaction price per unit of the Funds. Redemption from the Funds may be subject to certain withdrawal safeguards.

Valuation of investments and financial liabilities

Cash and cash equivalents are stated at fair value. Foreign currency included in cash is translated using closing spot rates of exchange. Cash equivalents include repurchase agreements, U.S. Treasury bills and other highly liquid investments that are within three months of maturity when acquired, and short-term investment funds. Repurchase agreements are valued at amortized cost, which approximates fair value. U.S. government securities and government agency obligations included in cash equivalents are stated at fair value based on a bid evaluation. Short-term investment funds are stated using a constant price (or amortized cost) of \$1 per unit of participation, which approximates fair value. Other cash equivalents are valued on the basis of a bid evaluation or at amortized cost, which approximates fair value.

Equity securities include U.S. and international equity securities. U.S. equities include companies that are well diversified by industry sector and equity style (i.e., growth and value strategies). Active and passive management strategies are employed. Investments are primarily in large capitalization stocks and, to a lesser extent, mid-and small-cap stocks. International equities are invested in companies that are traded on exchanges outside the U.S. and are well diversified by industry sector, country and equity style. Active and passive strategies are employed. The vast majority of the investments are made in companies in developed markets with a small percentage in emerging markets.

Common stocks and most of other equities are stated at fair value as determined by closing quoted market prices in active markets in which the securities are traded. Certain other equity investments are valued at fair value based on bid or mid prices (i.e., the average of the bid and ask prices).

Mutual funds and other registered investment companies are stated at fair value. Mutual funds are valued at quoted market prices (available to institutions and retail clients) which represent the net asset value of shares owned by the Group Trust at year-end. Certain other registered investment companies are valued based on the net asset value of the units owned by the Group Trust at year-end as determined by the investment manager of the other registered investment companies based on the fair value of the underlying investments of the other registered investment companies. Exchange traded funds, also considered to be other registered investment companies, are valued at quoted market prices, which may not represent the net asset value of the units owned by the Group Trust at year-end. Other registered investment companies include an open-end interval management investment fund that offers its shareholders the opportunity to purchase and redeem shares on a periodic basis. The mutual funds and other registered investment companies held by the Group Trust are deemed to be actively traded.

Collective and other trusts are stated at fair value, represented by the net asset value of the units of participation owned by the Group Trust at year end as determined by the trustees of the collective and other trusts based on the fair value of the underlying investments of the collective and other trusts.

Corporate bonds and other fixed income obligations consist primarily of investment grade bonds from diversified industries. Corporate bonds and other fixed income obligations are stated at fair value. Certain corporate bonds and other fixed income obligations are valued based on a bid evaluation while others are valued based on mid and bid prices (i.e., a bid price represents a price a dealer is ready to pay for a security). Oftentimes, bid evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Government and other related bonds are comprised primarily of inflation protected U.S. treasuries, and to a lesser extent, other government-related securities (e.g., government agency obligations, and municipal and provincial bonds). Government and other related bonds are stated at fair value. Government and other related bonds, other than for those which have quoted market prices available, are valued based on a bid evaluation (i.e., an estimated price at which a dealer would pay for a security). Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Government mortgage-backed securities and other collateralized obligations are debt obligations that represent claims to the cash flows from pools of credit cards, auto loans and mortgage loans which are purchased from banks, mortgage companies, and other originators and then assembled into pools by governmental, quasi-governmental and private entities. Government mortgage-backed securities and other collateralized obligations are stated at fair value. Government mortgage-backed securities and other collateralized obligations are valued based on a bid evaluation. Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

The GIC is stated at fair value, represented by the net asset value, as determined by the insurance company, of the underlying investments in the separate account. The GIC's fair value approximates its contract value. The GIC is 100% allocable to the Schlumberger Master Profit Sharing Trust.

Asset derivatives include options, rights, warrants, swaps, swaptions and pending foreign exchange purchases. Derivatives are stated at fair value. Exchange traded options and rights are valued based on a settlement price which is the price set by the exchange at the end of each day's trading. Pending foreign exchange purchases are marked-to-market based upon year-end forward exchange rates. Other derivatives are valued based on a bid price or a mid evaluation (i.e., the average of the estimated prices at which a dealer would pay for and sell a security). Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks.

Short-term securities under security lending agreement represent short-term investments purchased with proceeds from cash collateral received from borrowers of the Group Trust's securities. Short-term securities under the security lending agreement are valued at cost, which approximates fair value.

Other short-term securities are valued based on a bid evaluation or at amortized cost, which approximates fair value.

Liability derivatives (which include options, swaps, and pending foreign exchange sales) and other liabilities are stated at fair value. Exchange traded options are valued based on a settlement price which is the price set by the exchange at the end of each day's trading. Pending foreign exchange sales are marked-to-market based upon year-end forward exchange rates. Other derivatives are valued on the basis of a mid evaluation. Oftentimes, these evaluations use proprietary models under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks. Other liabilities are valued at cost, which approximates fair value.

The obligation under security lending agreement represents amounts due to borrowers of the Group Trust's securities for the cash collateral received from them. The amount due approximates fair value.

The preceding methods described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Group Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The disclosures required by FASB ASC Topic 820 are not required for due from brokers for securities sold, due to brokers for securities purchased, accrued income, other assets and other liabilities.

Investment transactions and investment income

Net appreciation or depreciation in fair value of investments includes realized gains or losses on investments sold and unrealized gains or losses on investments held. Unrealized gains or losses on investments represent the change in the difference between the cost and fair value of investments at the end of the year and at the beginning of the year.

Purchases and sales of securities are recorded on a trade-date basis. Realized gains or losses on securities transactions are recorded as the difference between proceeds received and cost, with cost determined on the moving average basis. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

Derivative financial instruments

The Group Trust enters into various derivative financial instruments in carrying out its investment strategy, principally to: (1) hedge a portion of the Group Trust's portfolio to limit or minimize exposure to certain risks such as foreign exchange risk, interest rate risk, credit risk, and equity risk, (2) gain an exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or by capturing value disparities between financial instruments.

Forward foreign exchange contracts are used to protect the Group Trust against the exchange risk associated with the Group Trust's investment in common stock and fixed income obligations denominated in foreign currency because the Group Trust is able to secure an exchange rate in the present for settlement at a future date. The terms of these contracts generally do not exceed one year. Risks in forward foreign exchange contracts arise from the possible inability of counterparties to meet the contract's terms and from movements in currency values.

The Group Trust reflects the fair value of all forward contracts as an asset (forward contracts to purchase foreign currency) or liability (forward contracts to sell foreign currency) in the Group Trust's statement of net assets. The change in value of these forward exchange contracts is included as unrealized gains or losses in the changes in Group Trust net assets. When the forward exchange contract is closed, the Group Trust transfers the unrealized appreciation or depreciation to a realized gain or loss equal to the change in the value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Unrealized and realized gains and losses are included in net appreciation (depreciation) in the Group Trust's statement of changes in net assets.

Interest rate contracts such as fixed income futures, interest rate swaps, and option premiums are used to manage the interest rate risk.

The Group Trust enters into fixed-income futures contracts in the normal course of its investment activities to reduce the interest rate risk associated with its fixed-income investments, to replicate government bond positions, and as a duration management tool to enhance portfolio returns.

Upon entering into a fixed-income futures contract, the Group Trust is required to pledge to the broker an amount of cash and/or liquid securities equal to the minimum "initial margin" requirements of the exchange. Pursuant to the futures contract, the Group Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin" which is settled daily and is included in net appreciation (depreciation) in the changes in Group Trust net assets. The Group Trust records a variation margin receivable or payable in the Group Trust's statement of net assets for valuation margins which have not been received or paid at the end of the year. Fixed-income futures contracts are not included in the Group Trust's statement of net assets as cash settlements are made daily.

The risk of counterparty non-performance associated with the use of fixed-income futures is considered to be modest as performance is assured by the futures exchanges, which provide multiple layers of protection, such as the collection of variation margin on a daily basis and the use of standardized contracts to facilitate liquidity.

Interest rate swaps are used to adjust interest rate and yield curve exposures and as a substitute for physical securities. Swap agreements involve the exchange by the Group Trust with a counterparty of the respective commitments to pay or receive interest with respect to a notional amount of principal. Market risk of loss is limited to changes in the fair value from December 31 of each year presented through the applicable expiration date. Long swap positions increase exposure to long-term interest rates while short positions decrease exposure. The Group Trust is subject to the risk of the counterparty to an interest rate swap agreement being unable or unwilling to make timely interest payments, or to otherwise honor its obligations.

The Group Trust reflects the fair value of all interest rate swaps as an asset or liability in the Group Trust's statement of net assets. Gains or losses on interest rate swaps are accounted in net appreciation (depreciation) in the Group Trust's statement of changes in net assets.

The Group Trust may buy or write put and call options through listed exchanges and in the over-the-counter ("OTC") market. When the Group Trust buys or writes an option, an amount equal to the premium paid or received by the Group Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option purchased or written. The premiums paid or received from buying or writing options are recorded as realized gains or losses upon the expiration of the options. The difference between the premium and the amount paid or received on effecting a closing purchase or sale transaction also is treated as a realized gain or loss. If an option is exercised, the premium paid or received is recorded as a realized gain or loss if sold or an adjustment to cost if acquired. The Group Trust, as a writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and as a result bears the market risk of an unfavorable change in the price of the security underlying the written option. Options to purchase and sell fixed income securities and swaptions are used to manage interest rate and volatility exposure, while credit spreads are used to manage credit risk. Options will become worthless at expiration if the underlying instrument does not reach the strike price of the option.

The Group Trust may use derivatives including stock rights and warrants as a substitute for investment in equity and fixed-income securities or to reduce the effect of fluctuating foreign currencies on foreign currency denominated investments.

Rights are the right, but not the obligation, to purchase newly issued equity shares, often in proportion to the number of shares currently owned, in a specified company, at a pre-established price on or within a pre-determined date. Rights are privately transacted in OTC markets. Rights are subject to general market risk and liquidity risk.

A warrant provides the holder the right, but not the obligation, to purchase securities from the issuing entity at a specific price and within a certain time period. Warrants are privately transacted in OTC markets. The Group Trust may purchase or receive warrants from its investment in the debt or equity of a company. The warrants provide the Group Trust with exposure and potential gains upon equity appreciation of the company's share price.

The value of a warrant has two components: time value and intrinsic value. A warrant has a limited life and expires on a certain date. As the expiration date of a warrant approaches, the time value of a warrant will decline. In addition, if the stock underlying the warrant declines in price, the intrinsic value of an "in the money" warrant will decline. Further, if the price of the stock underlying the warrant does not exceed the strike price of the warrant on the expiration date, the warrant will expire worthless. As a result, there is the potential for the Group Trust to lose its entire investment in a warrant.

Credit default swaps ("CDS") are used to manage credit exposure without buying or selling securities outright. Written CDS increase credit exposure ("selling protection"), obligating the portfolio to buy bonds from counterparties in the event of a default. Purchased CDS decrease exposure ("buying protection"), providing the right to "put" bonds to the counterparty in the event of a default. CDS agreements involve one party making a stream of payments (referred to as the buyer of protection) to another party (the seller of protection) in exchange for the right to receive a specified return in the event of a default or other credit event for the referenced entity, obligation or index. As a seller of protection on credit default swap agreements, the Group Trust will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. Typical credit events include bankruptcy dissolution or insolvency of the referenced entity, failure to pay and restructuring of the obligations of the referenced entity. As the seller, the Group Trust would effectively add leverage to its portfolio because, in addition to its total net assets, the Group Trust would be subject to investment exposure on the notional amount of the swap.

If the Group Trust is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Group Trust will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. If the Group Trust is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Group Trust will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

The Group Trust may use credit default swaps on corporate issues, sovereign issues of an emerging country or U.S. municipal issues to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where the Group Trust owns or has exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood of a particular issuer's default. The Group Trust also may use credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds, which is less expensive than it would be to buy many credit

default swaps to achieve a similar effect. Credit default swaps on indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality. At December 31, 2013 and 2012, the Group Trust did not hold credit default swaps where the Group Trust was a seller of protection.

The maximum potential amount of future payments (undiscounted) that the Group Trust as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Group Trust for the same referenced entity or entities. Securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate, sovereign, U.S. municipal or U.S. Treasury obligation issues as of period end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

The Group Trust reflects the fair value of all CDS as an asset or liability in the Group Trust's statement of net assets. Gains or losses on CDS are accounted in net appreciation (depreciation) in the Group Trust's statement of changes in net assets.

The Group Trust enters into equity futures contracts to manage the risk that the fair value or future cash flows of an equity financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument, or its issuer, or factors affecting all similar financial instruments traded in the market.

The objective of the S&P 500 Index futures contracts is to lock in the return of the S&P 500 Index and then use fixed income assets to add excess return over the benchmark. The risks involved with owning S&P 500 Index futures contracts are related to the volatility of the S&P 500 Index and that the performance of the Index and the futures may differ slightly. Changes in the contract values are settled daily and gains and losses are included in net appreciation (depreciation) in the fair value of investments in the Group Trust's statement of changes in net assets. S&P 500 Index futures contracts are not included in the Group Trust's statement of net assets as cash settlements are made daily.

U.S. Treasury Bills, U.S. Treasury Bonds, short-term investments, and cash with a fair value of \$713,000 and \$689,991 at December 31, 2013 and 2012, respectively, were posted by brokers and held by the Group Trust as collateral for derivative transactions. The notional amount of this collateral at December 31, 2013 and 2012 was \$713,000 and \$690,000, respectively.

Assets owned and included in the Group Trust's statement of net assets, with a fair value of \$18,838,318 and \$25,019,315 at December 31, 2013 and 2012, respectively, were held by the Group Trust's brokers as collateral for derivative transactions. The notional amount of this collateral at December 31, 2013 and 2012 was \$19,769,000 and \$23,926,000, respectively.

Certain of the Group Trust's derivative documents contain provisions, in addition to standard events of default, which if violated could cause a counterparty to declare a termination event and terminate the relevant agreement(s) with the Group Trust, which would result in a determination of the net amount due to or due from the counterparty and require immediate payment in accordance therewith. The aggregate fair value of all derivative instruments with credit-risk-related contingency features that are in a net liability position on December 31, 2013 and 2012 was \$7,656,356 and \$2,927,896, respectively. If the credit-risk-related contingency features underlying these agreements were triggered on December 31, 2013 and 2012 with respect to one or more counterparties and any of such counterparties declared a termination event, as of the effective date of termination all derivative positions would be valued in accordance with the valuation procedures set forth in the derivatives documentation and the net amount due to or due from the counterparty would be payable by or payable to the Group Trust, respectively.

The Group Trust is subject to various Master Agreements, which govern the terms of certain transactions with select counterparties. These Master Agreements reduce the counterparty risk associated with relevant transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Since different types of forward and OTC financial derivative transactions have different mechanics and are sometimes traded out of different legal entities of a particular counterparty organization, each type of transaction may be covered by a different Master Agreement, resulting in the need for multiple agreements with a single counterparty. As the Master Agreements are specific to unique operations of different asset types, they allow the Group Trust to close out and net its total exposure to a counterparty in the event of a default with respect to all the transactions governed under a single agreement with that counterparty.

Master Agreements can also help limit counterparty risk by specifying collateral posting arrangements at pre-arranged exposure levels. Under the Master Agreements, collateral is routinely transferred if the total net exposure to certain transactions (net of existing collateral already in place) governed under the relevant master agreement with a counterparty in a given account exceeds a specified threshold, which typically ranges from zero to \$250,000 depending on the counterparty and the type of Master Agreement. United States Treasury Bills and U.S. dollar cash are generally the preferred forms of collateral, although other forms of AAA rated paper may be used. The Group Trust's overall exposure to counterparty risk can change substantially within a short period, as it is affected by each transaction subject to the relevant Master Agreement.

NOTES TO FINANCIAL STATEMENTS

7. Interest in the Schlumberger Group Trust (cont'd)

Security lending

Pursuant to the investment objectives of the Group Trust, stock loan transactions are permitted with the objective of adding investment income to the Group Trust. The Group Trust may lend securities held to unaffiliated broker-dealers registered under the Securities Exchange Act of 1934, or banks organized in the United States of America through the Group Trust's participation in the Trustee's securities lending program. At all times, the borrower must maintain cash or equivalent collateral equal in value to at least 100 percent of the value of the securities loaned. The cash collateral generally is invested in short-term securities which generate income that is allocated between the security lending agent and the Group Trust at predetermined contractual rates. The primary risk in lending securities is that a third-party borrower may default during a sharp rise in the price of the security that was borrowed, resulting in a deficiency in the collateral posted by the third-party borrower. The Group Trust seeks to minimize this risk by requiring that the market value of the loaned securities is recomputed each day and that additional collateral is furnished daily, if necessary. The Group Trust records cash collateral received from the third-party borrower as an asset and also records a corresponding liability for the return of the cash collateral. The Group Trust bears the risk of loss with respect to the unfavorable change in fair value of the invested cash collateral. The fair value of the securities loaned in the Group Trust securities lending program amounted to \$448,589,043 and \$470,506,350 at December 31, 2013 and 2012, respectively, and is included in Investments in the Group Trust. The fair value of non-cash collateral received for securities on loan at December 31, 2013 and 2012 amounted to \$0 and \$883,481, respectively. The Group Trust recorded gross earnings from lending securities of \$1,442,884 and \$1,553,145 in 2013 and 2012, respectively, and net income of \$1,148,541 and \$950,812 in 2013 and 2012, respectively. Participating brokers paid \$197,571 and received \$195,099 for rebates in 2013 and 2012, respectively, and the Trustee received \$491,913 and \$407,234 in 2013 and 2012, respectively, for fees relating to security lending activity.

8. Tax status

The Plan obtained its latest determination letter on August 2, 2012 in which the Internal Revenue Service stated that the Plan was in compliance with the applicable requirements of the Internal Revenue Code ("IRC"). The Plan is required to operate in conformity with the IRC to maintain the tax-exempt status. Plan management and tax counsel believe that the Plan currently is designed and being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. Plan management has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2013 there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2010.

Actuarial Assumptions and Methodologies (Funding)

Interest:	<p>The interest rates used for the 2013 plan year are the 24-month average corporate bond segment rates for January 2013 subject to funding stabilization. Under stabilization, the interest rates used for funding purposes are calculated in the usual manner but are then constrained to be within a corridor around a 25-year average of corporate bond rates. For 2013, the stabilization corridor is 15%. The rates are as follows:</p> <table><tr><th></th><th>Payments in the First 5 Years</th><th>Payments in Years 6 – 20</th><th>Payments Thereafter</th><th>Effective Interest Rate</th></tr><tr><td>Current Year, reflecting stabilization</td><td>4.94%</td><td>6.15%</td><td>6.76%</td><td>6.51%</td></tr><tr><td>Current Year, without stabilization</td><td>1.62%</td><td>4.40%</td><td>5.45%</td><td>5.08%</td></tr><tr><td>Prior Year, reflecting stabilization</td><td>5.54%</td><td>6.85%</td><td>7.52%</td><td>7.23%</td></tr><tr><td>Prior Year, without stabilization</td><td>1.98%</td><td>5.07%</td><td>6.19%</td><td>5.76%</td></tr></table> <p>The segment rates used to determine the PBGC variable rate premium are the same as those used for funding, without reflecting funding stabilization.</p>		Payments in the First 5 Years	Payments in Years 6 – 20	Payments Thereafter	Effective Interest Rate	Current Year, reflecting stabilization	4.94%	6.15%	6.76%	6.51%	Current Year, without stabilization	1.62%	4.40%	5.45%	5.08%	Prior Year, reflecting stabilization	5.54%	6.85%	7.52%	7.23%	Prior Year, without stabilization	1.98%	5.07%	6.19%	5.76%

Mortality rates:	RP2000 separate annuitant and non-annuitant healthy mortality tables (sex-specific) with static projection using Scale AA and no collar-adjustment. Mortality is projected through the valuation date plus another 7 years for annuitants, and through the valuation date plus another 15 years for non-annuitants. This assumption is one of the choices allowed by the regulations.																									
Salary Increases:	5.00%.

Retirement (from active and inactive status) rates:		
	Age	Rates
	50-54	0.00%
	55-59	25.00
	60-64	40.00
	65	100.00
Description of Weighted Average Retirement Age:	Age 58, determined as follows: The weighted average retirement age is calculated as the sum of the product of each potential past or future retirement age times the probability of surviving to that age and then retiring at that age, assuming no other decrements.	
Retirement from terminated vested status:	Age 60, with appropriate reduction	
Percent married:	80% for males, 60% for females	
Age difference:	Husbands are three years older than their wives.	
Administrative expenses:	An expense assumption is required under the funding rules. Plan-related expenses of \$166,408 (based on the actual amount paid during the prior year) are expected to be paid by the plan during the year.	
Asset method:	As selected by the plan sponsor, assets are determined by averaging the market value as of the valuation date and the adjusted market values as of the preceding two years. The resulting value is limited to between 90% to 110% of market value of assets. The adjusted market values reflect cash flow and expected earnings to the valuation date. The expected earnings are based on an assumed rate of return of 7.50%, not to exceed the applicable third segment rate of 6.46% in 2011 and 7.52% in 2012.	
Funding method:	Funding method is unit credit actuarial cost method, as prescribed by law. The liability is measured on an accrual-to-date basis using mandated mortality tables and interest rates with no salary projection past the end of the year.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
