Notes to Financial Statements

market participants at the measurement date. See Note 7 for discussion of fair value measurements.

Purchases and sales of securities are recorded on trade-date basis. Interest income is recorded on the accrual basis and dividends are recorded on the ex-dividend date. Capital gains distributions are included in dividend income. Net appreciation (depreciation) in the fair value of investments includes the Plan's gains and losses on investments bought and sold as well as held during the period.

(g) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump sum distributions, which are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' compensation during their last five years ending on the date as of which the benefit information is presented (the valuation date). Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee service rendered to the valuation date. Benefits to be provided via annuity contracts excluded from plan assets are excluded from accumulated plan benefits.

The actuarial present value of accumulated plan benefits is determined by the Company's consulting actuaries and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. A valuation was done at the plan's inception to assist in determine minimum funding requirements, but since the plan does not provide for prior service, there were no accumulated plan benefits as of March 2, 2013 (the plan's inception date).

(3) Funding Policy

Annual contributions are made by the Company in amounts determined with the assistance of the actuary to fund benefits to be paid to Plan participants. The Company intends to contribute to the Plan no less than the minimum amount required to satisfy the minimum funding standards of the Internal Revenue Code. The Company's minimum required contribution at December 31, 2013 is \$137,576.

Notes to Financial Statements

(4) Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- a. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
- b. Other vested benefits insured by the Pension Benefit Guarantee Corporation (PBGC), a U.S. Government Agency, up to the applicable limitations discussed below.
- c. All other vested benefits not insured by the PBGC.
- d. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling on the amount of an individual's monthly benefit that the PBGC guarantees. The ceiling is periodically adjusted by the PBGC and was \$4,790 per month for plan terminations occurring in 2013.

That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination, whichever comes later. For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulate benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

Notes to Financial Statements

(5) Certification of Financial Information

The following financial data included in the accompanying financial statements and supplemental schedule has been certified as complete and accurate by the Vanguard Fiduciary Trust Company, the trustee, and has not been audited by the independent auditors for the Plan: investments at fair value, interest and dividends income and net appreciation/depreciation in fair value of investments.

(6) Investments (Unaudited, Certified by Trustee)

At December 31, 2013 plan assets consisting of \$18,713 (all amounts other than employer receivables) are invested in one mutual fund – Vanguard Long-Term Inv-Grade Admiral Fund.

During the period ended December 31, 2013, the plan's investments in mutual funds (including gains and losses on investments bought and sold, as well as held during the year) depreciated \$5,814 in 2013.

(7) Fair Value Measurements

The Plan's investments are reported at fair value in the accompanying statement of net assets available for benefits. The methods used to measure fair value may produce an amount that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The fair value measurements authoritative literature establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy consists of three broad levels: Level 1 inputs consist of unadjusted quoted prices in active markets for identical assets and have the highest priority, Level 2 inputs consist of observable inputs other than quoted prices for identical assets, and Level 3 inputs are unobservable and have the lowest priority. The Plan uses appropriate valuation techniques based on the available inputs to measure the fair value of its investments.

When available, the Plan measures fair value using Level 1 inputs because they generally provide the most reliable evidence of fair value. Level 3 inputs were used only when Level 1 or Level 2 inputs were not available.

At December 31, 2013 the plan's assets consisted of fixed income mutual funds which were all considered Level 1 assets.

Notes to Financial Statements

(8) Related Party Transactions

Certain Plan investments are shares of mutual funds managed by and sold through affiliates of Vanguard Fiduciary Trust Company (Vanguard). Vanguard is the Trustee as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions. Certain administrative expenses, including functions performed by officers or employees of the Company, are incurred by the Company at no charge to the Plan.

(9) Tax Status

The Company has not yet requested the Internal Revenue Service make a formal determination as to the Plan's design in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan administrator believes the Plan is operating in compliance with the IRC and is currently evaluating the costs and benefits of continuing operation of the Plan which is now frozen as discussed in Note 1.

(10) Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible changes in the value of investment securities will occur in the near term and such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.
