Barnesville Hospital Association, Inc. Retirement Plan
Notes to Financial Statements
January 31, 2014 and 2013

1. Description of Plan

The following description of the Barnesville Hospital Association, Inc Retirement Plan (the Plan) is provided for general information purposes only. Participants should refer to the Plan document for more complete information.

On February 1, 2009 the Plan was frozen. Essentially, the freezing of the Plan prohibits additional benefits from accruing. Employees who were not active as of January 31, 2009 will not be permitted to enter the Plan and changes in compensation levels after December 31, 2009 will not be considered in determining the accrued benefit. Even though the Plan is frozen, the Plan sponsor must continue to fund the benefits already earned.

General

The Plan is a defined benefit plan covering substantially all employees of Barnesville Hospital Association, Inc. (the Hospital). It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended. The Principal Life Insurance Company (The Principal) is the trustee and custodian and accordingly holds the Plan's investment assets, executes investment transactions, makes distributions to beneficiaries, and pays Plan expenses.

Eligibility

Prior to the plan being frozen, employees were eligible to participate after completing one year of service as long as they had performed a minimum of 1,000 hours of service in a calendar year preceding the Plan year end, and were actively employed on December 31 of the calendar year preceding the Plan year end. Once a participant is eligible, there is no requirement to maintain 1,000 hours of service.

Funding Policy

ERISA requires defined benefit retirement plans to be funded at a certain rate. These standards require that the employer's annual contribution be large enough to pay the annual cost of future benefits and administrative expenses. For the years ended January 31, 2014 and 2013, this minimum funding requirement has been met. Contributions are determined by the actuary using the assumptions outlined in Note 6.

Pension Benefits

Benefit payments are made for retirement, disability, and termination. Employees with vested benefits are entitled to receive pension benefits at the later of normal retirement age 65 or 5 years after entry date. The benefit is equal to .625% of the 60 consecutive highest months of compensation in the last 10 years (prior to the Plan being frozen), multiplied by the number of years of service. The plan permits early retirement at age 55 if the employee has completed 10 years of service. If employees terminate before rendering 7 years of service, their regular retirement benefit is reduced according to the vesting schedule.

Notes to Financial Statements
January 31, 2014 and 2013

1. Description of Plan (Continued)

Pension Benefits (Continued)

Because the plan is frozen, no wage increases in place after February 1, 2009 are considered when calculating the pension benefit.

Most benefits are paid in the form of a monthly distribution, but occasionally participants or their beneficiaries will receive their final benefits in the form of a lump sum. The lump sum payments made are shown as termination benefits on the Statements of Changes in Net Assets Available for Benefits.

Death and Disability Benefits

If a participant who has a vested benefit dies before normal retirement age, a benefit will be paid to the qualified spouse. If a participant who has a vested benefit dies after normal retirement date, a benefit will be paid to the qualified spouse or the participant's beneficiary or contingent annuitant, determined according to certain elections made by the participant. If a participant becomes eligible for a disability benefit under social security before normal retirement age, after age 40, and after 10 years of vesting service, a reduced benefit will be paid.

Vesting Provisions

A vested interest is determined via the following schedule. This schedule was not affected by the amendment to freeze the Plan.

<u>Years of Service</u>	<u>Percent Vested</u>
Less than three	0%
Three	20%
Four	40%
Five	60%
Six	80%
Seven	100%

2. Summary of Accounting Policies

Basis of Accounting

The accompanying financial statements are presented on the accrual basis of accounting. Benefits are recorded when paid.

Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Notes to Financial Statements
January 31, 2014 and 2013

2. Summary of Accounting Policies (Continued)

Administrative Expenses

The Plan pays The Principal for administrative expenses as well as a fee for the fund selection service which The Principal provides. The Plan sponsor absorbs certain costs of the Plan including insurance and audit fees, and other clerical costs.

Investment Valuation

Investments are 100% non-participant directed, and are carried on the books at fair value (Note 5). Purchases and sales are recorded on a trade date basis. Net appreciation includes the Plan's realized and unrealized gains and losses on investments bought and sold, as well as held, during the year.

3. Investments

All the Plan assets are invested in Principal Pooled Separate Accounts. The Separate Accounts are "pooled" investments. Some of these investments are in equities. Others are in bonds or real estate. The "pooled" investments are similar to mutual funds, but they are only available to The Principal's group annuity contract holders.

The following presents investments which represent 5% or more of the Plan's net assets:

<u>Description</u>	<u>January 31, 2014</u>	<u>January 31, 2013</u>
Bond and Mortgage	\$ 738,084	\$ 777,237
Core Plus Bond I	\$ 1,173,149	\$ 1,039,720
High Yield I	\$ 245,624	\$ -
Stock	\$ 172,260	\$ -

Net Asset Value

The Principal uses a unit value system of recordkeeping to track its obligations regarding the separate accounts. The separate accounts offered by the Principal are categorized in one of three categories; (a) those that contain a *single mutual fund* as the underlying investment, (b) those that contain *multiple securities*, and (c) those that invest in accounts *balanced* at a predefined target allocation.

Single Mutual Fund

Some separate accounts invest in one mutual fund as the underlying investment. The net asset value of the separate account that invests in one mutual fund is the fair value of the mutual fund, less operating expenses, and is computed daily. The following chart summarizes the separate accounts that are comprised of a single mutual fund.

<u>Investment</u>	<u>Fair Value At 1/31/2014</u>	<u>Investment Strategy</u>	<u>Transfer Restrictions</u>
Large Cap Growth I	\$ 74,363	Seeks long term growth of capital by investing at least 80% in companies with large market capitalizations; concentrating in growth equity securities.	One transfer per 30 day period

3. Investments (Continued)

Balanced

A balanced separate account invests in other Principal separate accounts at a predefined target allocation. The net asset value of the balanced separate accounts is the total value of the units in the underlying separate accounts, less operating expenses and is computed daily. The following chart summarizes the separate accounts that are comprised of balanced funds:

Fund Investment Manager and Type	Fair Value At 1/31/2014	Investment Strategy	Transfer Restrictions
US Property Separate Acct	\$ 154,438	Invests the majority of assets in commercial real estate holding, focusing on properties that return both lease income and appreciation of the buildings marketable value. It concentrates its investments in securities in real estate and energy/natural resources industries.	One transfer per 30 day period

4. Benefit Index

The Plan's investments are divided into two segments, allocated and unallocated. The unallocated portion is the Net Assets Available for Benefits reflected on pages four and five of the accompanying financial statements.

The allocated segment represents the amounts needed to purchase an annuity contract for each retired participant. These amounts meet the definition of guaranteed, allocated annuity contracts and are excluded from the fair market value of the Plan investments shown on pages four and five of the accompanying financial statements. At January 31, 2014 and 2013, these amounts totaled \$5,199,560 and \$5,136,085 respectively. This allocated segment is called the Benefit Index.

Annuity payments are ultimately made from the Benefit Index to retirees as long as there are assets to support the payments. Under this arrangement, The Principal issues a certificate to each retiree that is an irrevocable commitment to pay all the benefits to which the individual is entitled. This certificate is a legally enforceable guarantee by The Principal to pay a specific dollar benefit at a future date, with no fluctuations in market value. As of January 31, 2014 and 2013, the amount actuarially calculated and owed to vested, retired participants was \$3,961,567 and \$3,898,830, respectively.

The amount available to pay these allocated benefits, the Benefit Index, includes a cushion, which is summarized below:

	January 31	
	2014	2013
Benefit Index	\$ 5,199,560	\$ 5,136,085
Owed to retirees	3,961,567	3,898,830
Cushion	\$ 1,237,993	\$ 1,237,255

4. Benefit Index (Continued)

The value of the Benefit Index may change daily due to many factors, including investment gains and losses. In the event the total investments of the Plan fall below the amount needed to support the Benefit Index, annuities may need to be purchased by the Plan Sponsor. During the years ended January 31, 2014 and 2013, the purchase of annuities was not necessary because the total investments of the Plan exceeded the January 31 value of the Benefit Index, as summarized below:

	January 31	
	2014	2013
Total investments of the Plan	\$ 8,430,164	\$ 7,868,106
Benefit Index	5,199,560	5,136,085
Investments available for benefits	<u>\$ 3,230,604</u>	<u>\$ 2,732,201</u>

Adjustment to reflect changes to Benefit Index

The Benefit Index changes regularly as the result of investment earnings, transfers in for benefit payments, mortality changes, and transfers out for the purchase price of annuities for new retirees. In addition, the Benefit Index has a present value component which fluctuates due to changes in current purchase rates of annuities and the current value of the Plan's investment in the various pooled separate funds. The changes in the Benefit Index are accounted for as an adjustment within the additions to net assets on the accompanying Statements of Changes in Net Assets Available for Benefits.

5. Fair Value

The framework for measuring fair value provides a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy under FASB ASC 820 are described below:

Level 1	Inputs to the valuation methodology are unadjusted quoted prices for identical assets in active markets that the Plan has the ability to access.
Level 2	<p>Inputs to the valuation methodology include:</p> <ul style="list-style-type: none"> • Quoted prices for similar assets in active markets • Quoted prices for identical or similar assets in inactive markets • Inputs other than quoted prices that are observable for the asset • Inputs that are derived principally from or corroborated by observable market data by correlation or other means <p>If the asset has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset.</p>
Level 3	Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

METHODOLOGIES

There have been no changes in the methodologies of the plan's investments. The following is a description of the valuation methodologies used by this Plan:

Pooled Separate Accounts – Pooled Separate Accounts are not publically traded. The value of these investments is based on other observable market inputs, primarily the prices in active markets for the underlying securities.

Principal U.S. Property Separate Account – This account invests in U.S. commercial real estate and mortgage loans which are backed by the associated properties. The fair value of the underlying real estate is estimated using discounted cash flow valuation models that utilize public real estate market data inputs such as transaction prices, market rents, vacancy levels, leasing absorption, market cap rates and discount rates. In addition, each property is appraised annually by an independent appraiser.

The following table presents the Plan's fair value hierarchy for those assets and liabilities measured at fair value on a recurring basis as of *January 31, 2014*:

	Level 1	Level 2	Level 3	Total
Pooled Separate Accounts	\$ -	\$ 3,076,175	\$ 154,438	\$ 3,230,604

The following table presents the Plan's fair value hierarchy for those assets and liabilities measured at fair value on a recurring basis as of *January 31, 2013*:

	Level 1	Level 2	Level 3	Total
Pooled Separate Accounts	\$ -	\$ 2,637,746	\$ 94,275	\$ 2,732,021

The Plan's investment in the Principal U.S. Property Separate Account qualifies as a Level 3 investment. The following tables present a roll-forward for 2014 and 2013 of the Plan's fair value measurement using significant unobservable inputs on Level 3 investments.

6. Accumulated Plan Benefits

General

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to the service employees have rendered. In addition to projected payments to retirees, accumulated plan benefits include benefits expected to be paid to (a) beneficiaries of employees who have died, and (b) present employees or their beneficiaries.

Actuarial Present Value

The actuarial present value of accumulated plan benefits is determined by an actuary from The Principal and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

Funding Calculation

Management uses the current market value of the assets in the calculation of the amounts needed to fund the Plan. The effect of this method is to recognize all gains and losses in the current year calculation. In times of economic growth, this method will reduce contributions required by the Plan Sponsor. In times of economic decline, this method will increase contributions required by the Plan Sponsor.

Summary of Actuarial Assumptions

The Principal uses assumptions regarding how much interest the funds will earn, how many employees will leave the plan, and how many employees will become disabled in order to estimate how much funding is required to pay for future benefits. Significant actuarial assumptions used in the valuation as of January 31, 2014 and 2013 are as follows:

- The valuation interest rate (long term rate of return) is summarized below:

	January 31	
	2014	2013
Years 0-5	4.43%	2.03%
Years 5-20	5.62%	5.20%
Years 20+	6.22%	6.30%
Effective Rate	5.81%	5.54%

- The current liability interest rate (discount rate) was 6.0% and 5.5% in 2014 and 2013, respectively.
- The mortality table being used in 2014 and 2013 is the IRS Prescribed Mortality-Optional Combined Table for Small Plans, male and female.
- Salary rates did not increase due to the Plan's frozen status.
- In 2014 and 2013, for withdrawal rates, the 2003 Society of Actuaries Small Plan Age Table was used multiplied by .75.

6. Accumulated Plan Benefits (Continued)

Summary of Actuarial Assumptions (Continued)

- The retirement age assumption follows the following chart:

<u>Year of Birth</u>	<u>Retirement Age</u>
Before 1938	65
1938-1954	66
After 1954	67

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

7. Plan Termination

The Employer expects to continue the Plan indefinitely but reserves the right to terminate the Plan in whole or in part at any time upon giving written notice to all parties concerned.

In order to terminate the Plan, a funding percentage of at least 100% is necessary. The funding percentage is the actuarial value of the assets divided by the funding target and is extremely volatile because both components are based on market value. As of January 31, 2014 and 2013, the funding percentage of the Plan was less than 100%.

Should the plan become 100% funded and the Trustees decide to terminate at some future time, its net assets that are available to provide benefits shall be allocated and applied as of the effective date of termination of the Plan according to the classifications and order of precedence provided under Title IV of ERISA and under any rules, regulations, interpretations or opinions implementing Title IV. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then existing assets and the PBGC guaranty while other benefits may not be provided at all.

No part of the Plan assets shall be paid to the Employer, except that, after the satisfaction of all liabilities under the Plan, any assets remaining will be paid to the Employer. The payment may not be made if it would contravene any provision of law.

8. Transactions with Parties-In-Interest

Parties-in-interest is defined by IRS Section 4975(e)(2) and ERISA section 3(14)(c) to include, among others, any entity who provides service to the Plan. As detailed in Note 3, the investments included in the Plan assets are issued and managed by The Principal, who is also the trustee and custodian of the Investments. As such, all the Plan's investments and the administrative expenses reflected in the accompanying financial statements represent parties-in-interest transactions.

9. Tax Status

The Plan document was restated on February 2, 2012 and has not been amended after receiving the determination letter. The Internal Revenue Service has determined and informed the Plan by a letter dated June 19, 2013, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code.

It is the intention of the Plan to maintain the Plan as qualified and exempt from taxation under the appropriate provisions of the Internal Revenue Code and the Rules and Regulations issued there under. No provision for federal income tax is reflected in the accompanying financial statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the organization has taken an uncertain position that more likely than not would not be sustained upon examinations by the Department of Labor. The Plan is subject to routine audits by federal authorities; however, there are currently no audits for any tax periods in progress. The plan annually files Form 5500, *Annual Report/Report of Employee Benefit Plan*. The current year return, as well as the prior three years (2011 - 2013), are subject to examination for generally up to three years after they are filed.

10. Information Certified by the Plan's Trustee and Custodian

The Plan administrator has elected the method of annual reporting compliance permitted by 29 CFR 2520.103-8 of the Department of Labor Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the trustee and custodian have certified that the following data included in the accompanying financial statements and supplemental information is complete and accurate:

- Investments, as shown in the Statements of Net Assets Available for Benefits as of January 31, 2014 and 2013
- Investment income, as shown in the Statements of Changes in Net Assets Available for Benefits for the years ended January 31, 2014 and 2013.
- Adjustment to reflect changes to the Benefit Index, as shown in the Statements of Changes in Net Assets Available for Benefits for the years ended January 2014 and 2013.
- Actuarial information, as shown in the Statements of Accumulated Plan Benefits as of January 31, 2014 and 2013.
- Actuarial activity, as shown in the Statements of Changes in Accumulated Plan Benefits as of January 31, 2014 and 2013.
- Investment detail, as shown in the supplemental information as of January 31, 2014.

11. Investment Risk

Investments of the Plan are not insured by the FDIC; are not deposits or other obligations of, or guaranteed by any bank or affiliates; and are subject to investment risks, including possible loss of the principal amount invested.

The Plan invests in various Pooled Separate Accounts. Pooled Separate Accounts are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain Pooled Separate Accounts, it is at least reasonably possible that changes in values of the Pooled Separate Accounts will occur in the near term and such changes could affect the amounts reported in the Statements of Net Assets Available for Benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

12. Subsequent Event

Management has evaluated subsequent events through the date the financial statements were issued, November 11, 2014, and determined that no events occurred that required disclosure. No subsequent events occurring after this date have been evaluated for inclusion in these financial statements.
