## Maxwell Systems, Inc. 401(k) Plan

### Notes to Financial Statements

---

#### Note 1. Description of Plan

The following description of the Maxwell Systems, Inc. 401(k) Plan (the Plan) provides only general information. Participants should refer to the Plan documents for a more complete description of the Plan's provisions.

**General:** The Plan is a defined contribution 401(k) plan. Through February 29, 2012, the Plan covered substantially all employees of Maxwell Systems, Inc. (the Company) who were 21 years of age. Effective March 1, 2012, the Company amended the Plan to remove substantially all restrictions on eligibility for participation in the Plan. All employees, except excluded employees, as defined in the Plan, are now immediately eligible to participate upon employment and may participate on the first day of the first month following their date of hire. The Board of Trustees of the Plan is responsible for oversight of the Plan. The Investment Committee determines the appropriateness of the Plan's investment offerings, monitors investment performance and reports to the Plan's Board of Trustees. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

**Contributions:** Each year, participants may elect to contribute to the Plan an amount equal to from 1% to 80% of their compensation, subject to certain limitations as outlined in the Plan. Employees hired between August 1, 2007 and February 29, 2012 automatically deferred 3% of eligible compensation unless the employee elected otherwise. Effective March 1, 2012, the Company amended the Plan to remove the automatic deferral provision. Participants who have attained age 50 before the end of the Plan year are eligible to make catch-up contributions. Participants may also contribute amounts representing distributions from other qualified defined benefit or defined contribution plans (rollovers).

The Company may make a matching contribution to the Plan that is based upon a percentage of the participants' deferrals. There was no matching contribution made for the 2013 plan year or for the period January 1, 2014 through May 1, 2014. The Company may make a Qualified Non-Elective Contribution based upon a percentage of the participant's compensation in order to pass certain tests required by law. No such contribution was made for the 2013 plan year or for the period January 1, 2014 through May 1, 2014.

**Participant accounts:** Each participant's account is credited with the participant's elective and rollover contributions and an allocation of the Company's contribution and Plan investment earnings, and charged with withdrawals, distributions and a share of Plan investment losses and account administration fees. The allocation of the matching contributions is based on participant deferrals. The allocation of discretionary employer contributions is based on eligible participant compensation. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

**Participant investment options:** Participants direct their deferral contributions to selected investments as made available and determined by the Plan Administrator. Participants may change their investment options at any time during the year.

**Vesting:** Participants are vested immediately in their contributions plus actual earnings thereon. A participant is gradually vested in employer contributions after five years of credited service. Each participant is credited with a year of service upon the completion of 1,000 hours of service during the Plan year.

**Notes receivable from participants:** Participants may borrow from their accounts a minimum of \$1,000 up to a maximum equal to the lesser of \$50,000 or 50% of the value of the participant's vested interest in their account. Loan terms range from one to five years, except that longer terms are allowed for the purchase of a principal residence. A participant may have two loans outstanding at any one time. The loans are secured by the balance in the participant's account. The interest rate charged on the loan is the prime rate plus 1% (currently 4.25%). Principal and interest are paid ratably through payroll deductions.

#### Note 1. Description of Plan (Continued)

**Payment of benefits:** Upon the attainment of age 59 ½ or termination, a participant may elect to receive the value of their accumulated Plan benefits, in accordance with the provisions of the Plan, in a lump-sum distribution. Hardship withdrawals of elective contributions are also permitted. The Plan provides an early retirement option upon reaching age 55 and completing 10 years of service.

**Funding policy:** The Company generally remits employee deferral contributions to the Plan on a bi-weekly basis, concurrent with the frequency of payroll. Company matching contributions are remitted annually.

**Forfeitures:** Forfeitures may be used to pay Plan expenses and may be applied to future employer matching contributions. As of May 1, 2014, December 31, 2013 and December 31, 2012, forfeited non-vested accounts were \$0, \$9,426 and \$4,749, respectively.

**Plan amendments:** Effective February 11, 2014, the Company amended the Plan to change the employer name from Maxwell Systems, Inc. to Viewpoint II, LLC.

#### Note 2. Summary of Significant Accounting Policies

**Basis of accounting:** The accompanying financial statements are prepared on the accrual basis of accounting. Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The Plan invests in an insurance company general account. At December 31, 2013 and December 31, 2012, the contract value of the general account approximates its fair value. This determination is based on Great-West Life & Annuity Insurance Company's (Great West) credit rating and the yield of its general account, which resets quarterly, being comparable to a ten-year treasury bond.

**Use of estimates:** The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires the Plan's management to make estimates and assumptions that affect the reported amounts of net assets available for benefits and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

**Payment of benefits:** Benefits are recorded when paid.

**Investment valuation and income recognition:** Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's Investment Committee determines the Plan's valuation policies utilizing information provided by the investment custodians and insurance company. See Note 5 for discussion of fair value measurements.

#### Note 2. Summary of Significant Accounting Policies (Continued)

Great-West Life & Annuity Insurance Company, the custodian, maintains certain contributions in an unallocated general account. Contributions are deposited into the general account if selected by the participant. The general account is credited with contributions and investment earnings on the underlying investments and charged for Plan withdrawals and investment earnings or losses on the underlying investments. As transfers are made into the general account, participants are assigned units of the fund with a value equivalent to their deposit amounts. Periodically, the custodian assigns fair values to the units of the general account which reflect their earnings and the fair value of the underlying assets.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

**Net appreciation and depreciation in fair value of investments:** The Plan presents in the statement of changes in net assets available for benefits the net appreciation and depreciation in the fair value of its investments which consists of the net of the Plan's realized gains or losses and unrealized appreciation or depreciation on its investments.

**Notes receivable from participants:** Notes receivable from participants are measured at their unpaid principal balances plus any accrued but unpaid interest. Delinquent notes receivable from participants are treated as distributions based upon the terms of the plan document.

**Contributions:** Contributions from Plan participants are recorded in the year in which the participant contributions are withheld from amounts paid. Contributions from the Company are recorded in the year for which a contribution is declared by the Board of Directors. All participant and employer contributions are participant-directed.

**Administrative expenses:** Plan administrative expenses are paid by the Plan. Administrative expenses consist of investment management fees and other administrative fees. Loan origination fees are charged to the borrower/participant.

**Subsequent events:** The Plan Administrator has evaluated subsequent events (events occurring after May 1, 2014) through February 5, 2014, the date the financial statements were available to be issued.

**Income taxes:** GAAP require Plan management to evaluate tax positions taken by the Plan, and recognize a tax liability (or asset) if the Plan has taken any uncertain tax positions that more likely than not would not be sustained upon examination by a tax authority. Management evaluated the Plan's tax positions and concluded that the Plan had maintained its tax-exempt status and had taken no uncertain tax positions that require adjustment to the financial statements. Therefore, no provision or liability for income taxes has been included in the financial statements. With few exceptions, the Plan is no longer subject to income tax examinations by the U.S. federal, state, or local tax authorities for years before 2010.

**Accounting pronouncements adopted:** In October 2012, the Financial Accounting Standards Board (FASB) issued ASU 2012-04, *Technical Corrections and Improvements*. The amendments in this update cover a wide range of topics in the Accounting Standards Codification, including plan accounting. These amendments include technical corrections and improvements to the Accounting Standards Codification and conforming amendments related to fair value measurements. The adoption of ASU 2012-04 was not significant to the financial statements.

#### Note 6. Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

An asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

#### Note 6. Fair Value Measurements (Continued)

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at May 1, 2014, December 31, 2013 and December 31, 2012.

Mutual funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Unallocated contracts: Investments in unallocated contracts are valued at fair value by the insurance company by discounting the related cash flows based on current yields of similar instruments with comparable durations considering the credit-worthiness of the issuer. As the participants transact at contract value, fair value is determined annually for financial reporting purposes only. In determining the reasonableness of the methodology, the Plan's Investment Committee evaluates a variety of factors including review of existing contracts, economic conditions, industry and market developments, and overall credit ratings. Certain unobservable inputs are assessed through review of contract terms (for example, duration or payout date) while others are substantiated utilizing available market data (for example, swap curve rate).

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of, December 31, 2013 and December 31, 2012:

|                       | Assets at Fair Value at December 31, 2013 |             |                     |                     |

To assess the appropriate classification of investments within the fair value hierarchy, the availability of market data is monitored. Changes in economic conditions or valuation techniques may require the transfer of investments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

The Plan evaluates the significance of transfers between levels based upon the nature of the investment and size of the transfer relative to total net assets available for benefits. There were no significant transfers in or out of Levels 1, 2, or 3 for the period January 1, 2014 through May 1, 2014 or for the year ended December 31, 2013.

The table below sets forth a summary of changes in the fair value of the Plan's Level 3 assets for the period January 1, 2014 through May 1, 2014 and for the year ended December 31, 2013:

|                       |             |                               | Duration                          | 36 - 84 months                    |

In estimating the fair value of the investments in Level 3, the Plan's Investment Committee may use third-party pricing sources or appraisers. In substantiating the reasonableness of the pricing data used by third parties, the Investment Committee would evaluate a variety of factors including review of methods and assumptions used by external sources, recently executed transactions, existing contracts, economic conditions, industry and market developments, and overall credit ratings.

**Note 7. Insurance Contracts**

The Plan has a benefit-responsive guaranteed investment contract with Great-West Life & Annuity Insurance Company, the custodian. The custodian maintains the contributions to the investment contract in an unallocated general account. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The guaranteed investment contract issuer is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the Plan.

Because the guaranteed investment contract is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the guaranteed investment contract. Contract value, as reported to the Plan by Great-West Life & Annuity Insurance Company, represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value. No adjustment from fair value to contract value is necessary as Great-West and the Plan estimate that contract value approximates fair value.

#### Note 7. Insurance Contracts (Continued)

There are no reserves against contract value for credit risk of the contract issuer or otherwise. The fair value of the investment contract at May 1, 2014, December 31, 2013 and December 31, 2012 was \$0, \$2,277,381 and \$2,537,877, respectively.

The methodology for calculating the interest crediting rate is based on the earnings of the underlying assets in the entire medium-long term new portfolio compared to the minimum interest crediting rate, as stated in the contract, and prevailing market conditions. Interest crediting rate is reset quarterly. The average interest rate yield earned and credited to participants is as follows:

|                                                 | 2014  | 2013  | 2012  |
|-------------------------------------------------|-------|-------|-------|
| Average yields                                  |       |       |       |
| Based on actual earnings                        | 1.41% | 1.26% | 1.45% |
| Based on interest rate credited to participants | 1.41% | 1.26% | 1.45% |

Certain events may limit the ability of the Plan to transact at contract value with the issuer. Such events may include the following: (1) amendments to the plan documents (including complete or partial plan termination or merger with another plan), (2) bankruptcy of the plan sponsor or other plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that cause a significant withdrawal from the plan, or (3) the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under ERISA. The Plan Administrator does not believe that the occurrence of any such event, which would limit the Plan's ability to transact at contract value with participants are probable of occurring.

This contract does not permit the insurance company to terminate the agreement prior to the scheduled maturity date.

#### Note 8. Risks and Uncertainties

The Plan invests in various investment instruments. Investment securities are exposed to various risks, such as credit, interest rate, and market risks.

Credit risk arises from the potential for an issuer or other counterparty to default on its contractual obligations to the Plan. Investments are recorded at fair value. This represents the maximum credit risk exposure of the Plan.

Interest rate risk refers to the impact of interest rate changes on the Plan's financial position. Interest rate changes directly impact the fair value of fixed income securities held in the Plan. Interest rate changes will also have an indirect impact on the other investments held by the Plan.

Market risk is the risk that the market value of an investment will fluctuate as a result of changes in market price. For the unallocated contract, in subsequent periods if market conditions change, such as the insurance company credit rating or interest rate environment, the difference between contract value and fair value could become significant.

Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participant account balances and the amounts reported in the statements of net assets available for benefits.
