Note 1. Plan Description

The following description of the Jasmine Vineyards, Inc. Profit Sharing Plan (the Plan) provides only general information. Participants should refer to the Summary Plan Description for a more complete description of the Plan's provisions.

General:

The Plan is a profit sharing plan covering the employees of Jasmine Vineyards, Inc. (the Company) who have completed 1,000 hours of service within a twelve month period and reached the age of 18. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions:

The Company makes an annual discretionary contribution of up to 25% of eligible compensation pursuant to IRC limits. The contributions are calculated using cross-testing methods, testing contributions on an equivalent benefit basis. The contribution formula for the Plan separates participants into two groups: non-owners and owners. For the years ended June 30, 2014 and 2013, the contribution percentages for non-owners and owners were 5% and 20%, respectively. Contributions are funded annually.

Forfeitures result from nonvested benefit payments remaining in the Plan for all terminated employees. These accounts are used to reduce employer contributions. At June 30, 2014 and 2013, forfeited nonvested accounts totaled $4,058 and $3,179, respectively, and the employer contribution receivable at June 30, 2014 and 2013, respectively, was reduced from this account.

Participant accounts:

Each participant's account is credited with the allocation of the Company's contribution, allocation of Plan earnings or losses, and Plan expenses. The allocation of earnings or losses is based on beginning account balance less distributions. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting:

A participant is 100% vested after five years in employer contributions, based on a graded vesting schedule.

Participants automatically become 100% vested upon death or termination due to disability.

Benefit payments and withdrawals:

Upon termination of service due to death, disability or retirement, a participant, with a vested account balance in excess of $5,000, may elect to receive an amount equal to the value of the participant's vested interest in his or her account in a lump-sum payment, installment payments, or a combination of lump-sum and installment payments. If the participant's vested account balance is less than $5,000, a lump-sum distribution will be made.

Amounts allocated to accounts of persons who, at June 30, 2014, have elected to withdraw from the Plan but have not been paid are $-0-.

Note 2. Significant Accounting Policies

Basis of accounting:

The Plan uses the accrual basis of accounting.

Use of estimates:

The preparation of financial statements in conformity with U. S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Investment valuation and income recognition:

Investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 3 for discussion of fair value measurements. Purchases and sales of investments are recorded on a trade-date basis. Interest income is accrued when earned. Dividend income is recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan fees:

During the years ended June 30, 2014 and 2013, the Plan sponsor paid the Plan's other expenses.

Tax status:

The Plan and related trust are designed and operating in accordance with Section 401(a) of the Internal Revenue Code. During 2002, the Plan was restated to a Volume Submitter Plan Document, sponsored by Sungard Corbel, Inc. The Sungard Corbel, Inc. Volume Submitter Plan document and related Profit Sharing Plan Adoption Agreement have received a favorable opinion letter from the Internal Revenue Service dated January 16, 2002. The Plan has been amended since receiving the determination letter. However, the Plan trustees believe that the Plan is currently designed and being operated in compliance with the applicable requirements of the Internal Revenue Code. Therefore, no provisions for income taxes have been included in the Plan's financial statements.

The Plan trustees believe the Plan is no longer subject to income tax examinations for years prior to 2010.

Note 3. Fair Value Disclosure

The Financial Accounting Standards Board (FASB) provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB are described as follows: Level 1 - inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access; Level 2 - inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation or other means; Level 3 - inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at June 30, 2014 and 2013:

Registered investment companies (mutual funds) and unit investment trusts: Valued at the net asset value (NAV) of shares held by the Plan at year-end.

Common stocks and preferred/fixed rate cap securities: Valued at the closing price reported on the active market on which the individual securities are traded.

The preceding methods described may produce a fair value calculation that may not be indicative of net realized value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of June 30, 2014 and 2013:
