Notes to Financial Statements
August 31, 2014 and 2013

Note A - Description of Plan

The following description of the Taylor Metal Products Company ("Company", "Employer") Profit Sharing & 401(k) Plan ("Plan") provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a defined contribution 401(k) Profit Sharing Plan available to all employees who have completed three months of service. To be eligible for an employer contribution, the participant must be employed on the last day of the Plan year and have completed 1,000 hours of service. The Plan entry is automatic after meeting the three month service requirement. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions

Participants may elect to defer up to 75% of their compensation each year instead of receiving that amount in cash. Participants direct the investment of their contribution into various investment options offered by the Plan. Total deferrals may not exceed \$17,500 and \$17,000 for 2014 and 2013, respectively. The Plan includes a discretionary employer match and a discretionary profit sharing feature. The employer, at the employer's discretion, will match employee contributions up to 5% of the employee's compensation. For the years ended August 31, 2014 and 2013, the employer matched 2.50% of the employee's compensation for the employer match contribution and contributed 5.16% and 4.70% of the employee's compensation for the profit sharing contribution, respectively.

Investment Options

Upon enrollment in the Plan, a participant may direct employee contributions in one percent increments into various mutual fund options. The Plan currently offers 15 mutual funds as investment options for participants. Company discretionary profit sharing contributions and discretionary employer matching contributions are allocated to participant selected options. For the years ended August 31, 2014 and 2013, all employee and employer contributions were invested in Vanguard mutual funds or institutional money market and savings accounts. Investment allocations can be changed at any time.

Participant Accounts

Each participant's account is credited with the participant's contributions and Company matching contributions, as well as allocations of the Company's profit sharing contribution and Plan earnings. Participant accounts are charged with an allocation of administrative expenses that are paid by the Plan. Allocations are based on participant earnings, account balances, or specific participant transactions, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Funding Policy

The Company's funding policy is to remit participant deferrals to the Plan on a weekly basis. The Company's discretionary matching and discretionary profit sharing contributions are remitted annually.

Note A - Description of Plan (continued)

Vesting

Participants are immediately 100% vested in their voluntary contributions plus actual earnings thereon. Vesting in the remainder of their accounts is based on years of continuous service as follows:

<u>Years of Service</u>	
Less than One	0%
1	10%
2	20%
3	40%
4	60%
5	80%
6	100%

Payment of Benefits

On termination of service, due to death, disability, retirement or other reasons, a participant will receive a lump-sum distribution equal to the value of the participant's vested account balance. Benefits provided by the Plan are not insured by The Pension Benefit Guarantee Corporation. Benefits are recorded when paid.

Withdrawals

Withdrawals are not permitted before age 59½ except in the event of death, disability or termination of employment.

Forfeited Accounts

Forfeited accounts are eligible to reduce future employer contributions and to pay for plan expenses.

Administration Costs

Any significant costs to administer the Plan are paid by the Plan Sponsor. However, investment fees and commission expenses are borne by the participants.

Note B - Summary of Accounting Policies

Date of Management's Review

Subsequent events were evaluated through June 11, 2015, which is the date the financial statements were available to be issued.

Basis of Accounting

The financial statements of the Plan are prepared under the accrual method of accounting.

Valuation of Investments and Income Recognition

Investments are stated at fair value. Shares of mutual funds are valued at quoted market prices which represent the net asset value of shares held by the Plan at year end. Interest and dividend income is recorded when earned by the Plan.

Note B - Summary of Accounting Policies (continued)

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein, and disclosure of contingent assets and liabilities. Accordingly, actual results could differ from those estimates.

Cash

The Plan considers cash, as the plan checking account, to facilitate transfers into the Plan. The cash balance represents temporarily uninvested amounts.

Note C - Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs. Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in methodologies used at August 31, 2013 and 2012.

Mutual funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the SEC. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Money market and Savings accounts: Valued at par value, with no fluctuation in market price.

All of the Plan's assets are valued using Level 1 inputs.

The Plan obtained its latest determination letter on August 7, 2001, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan Administrator believes that the Plan is currently designed and being operated in conformity with the applicable requirements of the Internal Revenue Code. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Note J - Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits.
