Benefit and Compensation Limits

Projected benefits and compensation are limited by the current IRC section 415 maximum benefit of \$210,000 and the IRC section 401(a)(17) compensation limit of \$260,000.

Valuation of Plan Assets

Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

Service

Service shall equal total years of service with the Employer. A year of service is credited for each Plan Year in which an employee works 1,000 Hours or for each Plan Year during which the participant is receiving Disability Benefits.

A break in service occurs at the start of any Plan Year in which the employee works 500 Hours or less for the Employer in such year. Service will not be interrupted by:

- (2) A period of service in the Armed Forces of the United States under which employment rights are granted.
- (3) Transfer of employment from one participating Employer to another.
- (4) Maternity/paternity leave.

An employee will be given credit for his pre-break service if either of the following occurs:

Compensation

The total amount paid to an employee, including base wage or salary, overtime, bonuses, incentive compensation, holiday pay, vacation pay, sick pay and salary deferrals excludable from gross income, but not including commissions or amounts in excess of the maximum annual compensation limit of IRC Section 401(a)(17).

Average Compensation

Average compensation over the highest five consecutive plan years during the entire period of employment.

Accrued Benefit

The amount of monthly benefit to be paid for life commencing at the Normal Retirement Date calculated as the Normal Retirement Benefit, multiplied by a fraction, not greater than 1, with the numerator equal to the current number of years of Pension Credited Service and the denominator equal to the number of years of Pension Credited Service projected to the Normal Retirement Date, for both the portion of the benefit earned prior to April 1, 2005 and after April 1, 2005.

Early Retirement Benefit

Upon the attainment of age 55 and the completion of 20 years of service a participant may elect to retire. He may receive a monthly benefit for life beginning at his Normal Retirement Date equal to the benefit accrued at the early retirement date. Alternatively, payments may begin immediately or on the first day of any month thereafter prior to his Normal Retirement Date, with the benefit reduced 0.5% for each month that the Early Retirement Date precedes the Normal Retirement Date.

Disability Retirement Benefit

In the event of an active participant's disability after attaining age 55 and completing 15 years of Pension Credited Service, the participant's monthly disability benefit shall commence on first day of the month coincident or next following the completion of six months in an amount equal to the participant's Accrued Benefit. This benefit shall continue to the earlier of: (1) the participant's Normal Retirement Date (at which time the same monthly benefit shall continue as the retirement benefit) or (2) the date the participant is determined by the Employer to no longer be disabled.

Death Benefit

In the event of an active participant's death after becoming vested, his surviving spouse shall receive a benefit calculated as if the participant had terminated on the day before his death and elected to receive benefits in the form of a joint and 50% survivor annuity beginning on the date that would have been the participant's Normal Retirement Date. However, if the participant had completed 20 or more years of service, the spouse may elect a reduced pension on the first day of any month on or after the date that would have been the participant's earliest Early Retirement Date.

Benefit and Compensation Limits

Projected benefits and compensation are limited by the current IRC section 415 maximum benefit of \$210,000 and the IRC section 401(a)(17) compensation limit of \$260,000.

Valuation of Plan Assets

Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).
