NOTE 1 - DESCRIPTION OF PLAN

The following description of the Roll Coater, Inc. Pension Plan for Bargaining Unit Associates (the Plan) is provided for general information purposes only. Participants should refer to the plan document for more complete information.

General: The Plan is a defined benefit plan adopted November 24, 2004 covering any hourly employee of the Precoat Metals Corp, formerly Roll Coater Inc. (the Company), who is covered by a collective bargaining agreement providing his or her participation in the Plan. Such employees working in Kingsbury, Indiana are covered under Part A of the Plan, those working in Hawesville, Kentucky are covered under Part B of the Plan, and those working in Greenfield, Indiana are covered under Part C of the Plan.

Individuals who had been participating in the prior (Arvin Meritor) plan became participants as of November 24, 2004. Any other covered employee would become a participant as of the October 1 coincident with or next following his or her date of employment if employed in a position in which it is anticipated that at least 1,000 hours of service will be completed each year (otherwise, the October 1 nearest the date on which 1,000 hours of service are completed during a Plan year). No individual shall be eligible to become a participant under Part A after January 24, 2005, Part B after May 31, 2005 and Part C after June 24, 2006. No employee will accrue any additional benefits under Part A after March 18, 2005, Part B after July 15, 2005 and Part C after August 10, 2006. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). Reliance Trust Company is the trustee of the Plan.

In October 2011, the Company was sold to Sequa Corporation and was then merged with Precoat Metals Corp., a subsidiary of Sequa.

Pension Benefits: Participants are fully vested after five years of continuous service, as defined by the Plan, and are entitled to pension benefits upon retirement. A monthly benefit is payable upon termination equal to a monthly dollar multiplier defined in the plan document, times the number of years of credited service, reduced by any benefit under the Arvin Meritor, Inc. Retirement Plan. A participant must reach the age of 65 to be eligible for a normal retirement pension. A participant is eligible for early retirement after ten years of continuous service and attainment of the age of 60. If benefits commence prior to normal retirement, the accrued benefit is reduced as defined in the Pension Agreement. The Pension Agreement also provides for certain disability and surviving benefits to eligible participants as defined in the Pension Agreement.

Death and Disability Benefits: If an active employee dies at age 55 or older, a death benefit equal to the value of the employee's accumulated pension benefits is paid to the employee's beneficiary. Active employees who become totally disabled receive annual disability benefits that are equal to the normal retirement benefits they have accumulated as of the time they become disabled. Disability benefits are paid until normal retirement age at which time disabled participants begin receiving normal retirement benefits computed as though they had been employed to normal retirement age.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting: The accompanying financial statements have been prepared on the accrual basis of accounting.

Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures, and actual results may differ from those estimates. It is at least reasonably possible that a significant change may occur in the near term for the estimates of the actuarial present value of accumulated plan benefits.

Investment Valuation and Income Recognition: The Plan's investments are stated at fair value. Purchases and sales of securities are recorded on a trade-date basis.

Risks and Uncertainties: Investments are exposed to various risks such as interest rate, market, liquidity, and credit risks. Due to the level of risk associated with certain investment securities, securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Benefit Payments: Benefits are recorded when paid.

Administrative and Investment Management Expenses: Investment management fees are charged to the Plan as a reduction of investment return and included in the investment income (loss) reported by the Plan. The Plan's trustee fees are paid by the Plan and are reflected in the financial statements as administrative expenses of the Plan. All other expenses of the Plan are paid by the Company.

NOTE 3 - FAIR VALUE MEASUREMENTS

Fair value is the price that would be received by the Plan for an asset or paid by the Plan to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date in the Plan's principal or most advantageous market for the asset or liability. The effect of a change in valuation technique or its application on a fair value estimate is accounted for prospectively as a change in accounting estimate. When evaluating indications of fair value resulting from the use of multiple valuation techniques, the Plan is to select the point within the resulting range of reasonable estimates of fair value that is most representative of fair value under current market conditions. Fair value measurements are determined by maximizing the use of observable inputs and minimizing the use of unobservable inputs. The hierarchy places the highest priority on unadjusted quoted market prices in active markets for identical assets or liabilities (Level 1 measurements) and gives the lowest priority to unobservable inputs (Level 3 measurements). The three levels of inputs within the fair value hierarchy are defined as follows:

(Continued)

ROLL COATER, INC.
PENSION PLAN FOR BARGAINING UNIT ASSOCIATES
NOTES TO FINANCIAL STATEMENTS
September 30, 2014 and 2013

NOTE 3 - FAIR VALUE MEASUREMENTS (Continued)

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the Plan has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect the Plan's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

In some cases, a valuation technique used to measure fair value includes inputs from multiple levels of the fair value hierarchy. The lowest level of significant input determines the placement of the entire fair value measurement in the hierarchy.

The following descriptions of the valuation methods and assumptions used by the Plan to estimate the fair values of investments apply to investments held directly by the Plan.

Pooled separate accounts: The fair values of participation units held in pooled separate accounts are based on their net asset values, as reported by the managers of the pooled separate accounts and as supported by the unit prices of actual purchase and sale transactions occurring as of or close to the financial statement date (Level 2 inputs). The investment objective of the majority of the pooled separate accounts is to seek long-term growth of capital through investment in domestic equities, international equities, and debt securities. The investment objective of the real estate fund is to seek high total return through growth of capital and current income. Each pooled separate account provides for daily redemption prices that are determined by the fund's net asset value.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

NOTE 3 - FAIR VALUE MEASUREMENTS (Continued)

Investments measured at fair value on a recurring basis are summarized below:

	<u>Fair Value Measurements at September 30, 2014 Using Significant Other Observable Inputs (Level 2)</u>
Pooled separate accounts, categorized by nature of underlying investments:	
Bond mutual funds	\$ 262,360
Equity mutual funds	236,125
Real estate mutual funds	26,236
	<u>Fair Value Measurements at September 30, 2013 Using Significant Other Observable Inputs (Level 2)</u>
Pooled separate accounts, categorized by nature of underlying investments:	
Bond mutual funds	\$ 259,838
Equity mutual funds	233,854
Real estate mutual funds	25,984

NOTE 4 - FUNDING POLICY

Employer contributions to the Plan are made in amounts approved by the Company's Board of Directors. Such contribution amounts must adhere to or exceed the minimum funding requirements under ERISA, as determined by the Plan's actuary. For the Plan years ended September 30, 2014 and 2013, the Plan has met the minimum funding standards of ERISA. Participant contributions are not permitted under the Plan.

NOTE 5 - PLAN TERMINATION

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA and its related regulations. In the event the Plan terminates, the net assets of the Plan will be allocated among the participants and beneficiaries of the Plan in the order provided by ERISA.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations.

(Continued)

PENSION PLAN FOR BARGAINING UNIT ASSOCIATES
NOTES TO FINANCIAL STATEMENTS
September 30, 2014 and 2013

NOTE 5 - PLAN TERMINATION (Continued)

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

NOTE 6 - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to service rendered by employees as of the valuation date. Accumulated plan benefits include benefits expected to be paid to (1) retired or terminated employees or their beneficiaries; (2) beneficiaries of employees who have died; and (3) present employees or their beneficiaries. Benefits under the Plan are based on the employee's years of credited services with the Company. The actuarial present value of accumulated plan benefits is determined by an independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment. The Plan has adopted a beginning of period valuation date for purposes of reporting the present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits at September 30, 2013 and 2012 is as follows:

	<u>2013</u>	<u>2012</u>
Actuarial present value of accumulated Plan benefits:		
Vested benefits of participants currently receiving payments	\$ 95,885	\$ 93,783
Other vested benefits	<u>315,803</u>	<u>291,401</u>
	<u>\$ 411,688</u>	<u>\$ 385,184</u>

Changes in accumulated plan benefits for the Plan year ended September 30, 2013 are as follows:

Actuarial present value of accumulated plan benefits – beginning of year	\$ 385,184
Increase (decrease) during the year attributable to:	
Increase for interest due to the decrease in the discount period	30,044
Change in actuarial assumptions	12,012
Benefit payments	(16,515)
Actuarial gains (losses)	<u>963</u>
Actuarial present value of accumulated plan benefits – end of year	<u>\$ 411,688</u>

NOTE 6 - ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS (Continued)

The significant assumptions underlying the actuarial computations at September 30, 2013 and 2012 are as follows:

Rate of return:	7.8%
Mortality basis (2013):	Blue-collar RP-2014 mortality table with MP-2014 mortality projection
Mortality basis (2012):	IRS 2013 static mortality table for Males and Females
Retirement age:	65

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan was to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

NOTE 7 - INVESTMENTS - UNAUDITED INFORMATION

Reliance Trust Company, trustee of the Plan, holds investment assets and executes transactions therein, and substantially all information pertaining to investments included in the financial statements has been certified as complete and accurate by Great-West Life & Annuity Insurance Company, as Agent for the trustee of the Plan, as of September 30, 2014 and 2013. This information has not been audited by independent accountants.

The following table presents the fair values of investments that represent 5% or more of the Plan's net assets available for benefits.

	<u>2014</u>	<u>2013</u>

NOTE 8 - PARTY-IN-INTEREST TRANSACTIONS

Parties-in-interest are defined under Department of Labor regulations as any fiduciary of the Plan, any party rendering service to the Plan, the employer, and certain others. Administrative fees paid to Great-West Life & Annuity Insurance Company (Great-West) qualify as party-in-interest transactions. All of the Plan's investments as of September 30, 2014 and 2013, are shares of pooled separate accounts issued by Great-West.

NOTE 9 - TAX STATUS

The Internal Revenue Service has determined and informed the Company by a letter, dated March 1, 2006, that the Plan and related trust were designed in accordance with the applicable regulations of the Internal Revenue Code. The Plan has been amended since the Plan received the determination letter. However, the Company and the plan administrator believe that the Plan is currently designed and operated in compliance with the applicable requirements of the Internal Revenue Code and the Plan. Accordingly, no provision for income taxes has been included in the Plan's financial statements.

NOTE 10 - SUBSEQUENT EVENTS

Plan management has evaluated subsequent events for recognition and disclosure through July 2, 2015, which is the date the financial statements were available to be issued.

Actuarial Cost Method

An Actuarial Cost Method is an allocation of the expected cost of a pension plan on a year-by-year basis. The primary objective of an Actuarial Cost Method is to accumulate enough assets prior to each participant's retirement to provide the promised pension benefits. The amount of assets that must be accumulated is the same under all Actuarial Cost Methods. It is the rate at which the assets are accumulated that distinguishes one Actuarial Cost Method from another.

Under all Actuarial Cost methods, the Actuarial Present Value of future contributions equals the Actuarial Present Value of future benefits and expenses minus the Actuarial Value of the Assets. The Actuarial Cost Method may divide the Actuarial Present Value of future contributions into two amounts:

1. The Actuarial Present Value of Future Normal Costs, to be funded by Normal Cost payments
2. The Unfunded Actuarial Accrued Liability, to be funded by amortization payments

In some cases Ancillary Benefits are funded through One-Year Term Costs. These One-Year Term Costs are included in the Normal Cost.

Each Actuarial Cost Method involves a way to reflect differences between the plan's expected past experience (based on the Actuarial Assumptions used) and the plan's actual experience as measured in the valuation process. This difference is the plan's Experience Gain or Loss. Some Actuarial Cost Methods fund the Experience Gain or Loss through amortization payments, and others include the Experience Gains or Losses in the Actuarial Present Value of Future Normal Costs, funding the Experience Gains or Losses through the Normal Cost.

The Plan Sponsor or Plan Administrator is responsible for the selection of the Actuarial Cost Method, which must meet the requirements of the IRS regulations concerning Reasonable Funding Methods. Once established, the Actuarial Cost Method cannot be changed without the approval of the IRS.

The Unit Credit Actuarial Cost Method

The Actuarial Cost Method used in completing this Actuarial Valuation is known as the *Unit Credit Actuarial Cost Method*. Under this method, the accrued benefit is determined as the benefit earned up to the beginning of the current plan year. The Funding Target is equal to the Actuarial Present Value of all accrued benefits (measured as of the Valuation Date). The Target Normal Cost is the Actuarial Present Value, as of the Valuation Date, of the expected increase in accrued benefits attributable to service expected to be completed during the Plan Year and/or changes in average compensation between the beginning of the plan year and the end of the plan year.

Actuarial Assumptions

Central to the valuation of a pension plan is a determination of the Actuarial Present Value of the accrued or projected benefits under the plan. In order to make this determination, it is necessary to make assumptions concerning the incidence and magnitude of various future events can have an impact on the actual cost of the pension plan.
