1. Description of the Plan

The Retirement Income Plan for Employees of Trinity East – Non-Union Employees (the Plan) is a noncontributory, defined benefit plan that covers certain employees of Trinity East who were formerly members of a collective bargaining unit and new non-union employees of Trinity East as they become eligible, as well as those non-union employees of Trinity Health System and Tri-State Health Services, Inc. and provides for retirement benefits.

Trinity East (Plan Sponsor) has agreed to voluntarily contribute such additional amounts as are necessary to provide assets sufficient to meet the benefits to be paid to plan members. The Plan has met the Employee Retirement Income Security Act of 1974 (ERISA) minimum funding requirements for the years ended May 31, 2014 and 2013.

Should the Plan terminate at some future time, its net assets will generally not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on both the priority of those benefits and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Effective May 31, 2014, the Plan was frozen; thus there will be no new participants after that date and benefit accruals were frozen at that date.

The above description of the Plan provides general information about the Plan's provisions. A more complete description of information about the plan agreement, the vesting and benefit provisions, and the PBGC's benefit guarantee is contained in the Plan Document and Summary Plan Description available from the Plan Sponsor.

2. Significant Accounting Policies

Basis of Accounting

The accompanying financial statements have been prepared on the accrual basis of accounting.

Payment of Benefits

Benefits are recorded when paid.

2. Significant Accounting Policies (continued)

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes and supplemental schedules. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). See Note 4 for further discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded as earned. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (see Note 3) represent the actuarial present value of estimated future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits are based on employees' compensation and years of credited service. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included, to the extent they are deemed attributable to employee services rendered to the valuation date.

3. Accumulated Plan Benefits

An independent actuary estimated the actuarial present value of accumulated plan benefits which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The accumulated plan benefit information is determined by the Plan's actuary as of the beginning of the plan year. The actuarial present value of accumulated plan benefits as of the end of the previous plan year is as follows:

	May 31, 2013
Actuarial present value of accumulated plan benefits:	
Vested benefits:	
Participants and beneficiaries currently receiving benefits	$ 7,109,707
Other participants	11,791,087
Total vested benefits	18,900,794
Nonvested benefits	74,620
Total actuarial present value of accumulated plan benefits	$ 18,975,414

The change in the actuarial present value of accumulated plan benefits is as follows:

Actuarial present value of accumulated plan benefits at June 1, 2012	$ 16,848,511
Increase (decrease) during the year attributed to:	
Benefits accumulated and (gains)/losses	500,573
Benefits paid	(768,678)
Change in actuarial assumptions	1,162,597
Increase for interest due to decrease in discount period	1,232,411
Net increase	2,126,903
Actuarial present value of accumulated plan benefits at May 31, 2013	$ 18,975,414

The Plan experienced an increase of $184,035 in the actuarial present value of accumulated plan benefits due to the change in the assumed rate of return on investments from 7.50% to 7.40%.

3. Accumulated Plan Benefits (continued)

Significant assumptions and method underlying the actuarial computations are as follows:

Assumed rate of return on investments	7.40% per annum
Mortality basis	Base pre-retirement: RP-2014 generational no collar nonannuitant sex distinct tables with MP-2014 projection scale backed out to 2007 Base post-retirement: MILES (Mercer Industry Longevity Experience Study) no collar sex distinct tables for the Healthcare & Hospitals (HH) industry Improvement Scale, for both pre- and post-retirement: Scale MSS-2007, which is based on actual and projected mortality rates used for the intermediate projection in the Social Security 2014 Trustees Report
Retirement age	Rates of retirement were based on a scale of 25% of the participants at an attained age of 62 to 100% of the participants at an attained age of 65

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The actuary estimated the accumulated plan benefits as of June 1, 2013. There were no significant changes to the Plan that would have changed the valuation had it been performed as of May 31, 2013.

4. Fair Value Measurements

Fair value is defined under Accounting Standards Codification (ASC) 820 as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., an exit price). To measure fair value, a hierarchy has been established that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs. As such, the hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy in ASC 820 are described below:

4. Fair Value Measurements (continued)

- Level 1 – Unadjusted quoted prices in active markets that are accessible to the reporting entity at the measurement date for identical assets and liabilities.

- Level 2 – Inputs other than quoted prices in active markets for identical assets and liabilities that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:

  - Quoted prices for similar assets and liabilities in active markets

  - Quoted prices for identical or similar assets or liabilities in markets that are not active

  - Observable inputs other than quoted prices that are used in the valuation of the asset or liabilities (e.g., interest rate and yield curve quotes at commonly quoted intervals)

  - Inputs that are derived principally from or corroborated by observable market data by correlation or other means

- Level 3 – Unobservable inputs for the asset or liability (i.e., supported by little or no market activity). Level 3 inputs include management's own assumption about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk).

The level in the fair value hierarchy within which the fair value measurement is classified is determined based on the lowest level input that is significant to the fair value measure in its entirety.

4. Fair Value Measurements (continued)

Following is a description of the valuation techniques and inputs used for each major class of assets measured at fair value.

Cash equivalents: valued at amortized cost, which represents market value.

Government, government agency, corporate, municipal and foreign obligations, and certificates of deposit: valued based on bid-side quotations or evaluated bids based on the internal models used by the independent pricing service.

Mutual funds and money market fund: valued based on quoted market prices, which represent the net asset value (NAV) of shares held by the Plan at year-end. The NAV is a quoted price in an active market.

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value as of May 31, 2014 and 2013:

	Assets at Fair Value as of May 31, 2014

6. Income Tax Status

The Plan has received a determination letter from the Internal Revenue Service (IRS) dated December 5, 2013, stating that the Plan is qualified under Section 401(a) of the Internal Revenue Code (the Code) and therefore the related trust is tax-exempt. Subsequent to the determination by the IRS, the Plan was amended. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualified status. The plan administrator has indicated that it will take the necessary steps, if any, to bring the Plan's operations into compliance with the Code.

6. Income Tax Status (continued)

Accounting principles generally accepted in the United States require plan management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits, to be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of May 31, 2014, there are no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to income tax examinations for years prior to 2011.

7. Administrative Expenses

For the years ended May 31, 2014 and 2013, the Plan Sponsor paid certain administrative expenses of the Plan.

8. Related-Party Transactions

Certain of the Plan's assets are invested in funds managed by the trustees of the Plan. These transactions qualify as party-in-interest transactions; however, they are exempt from the prohibited transactions rules under ERISA.

9. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market volatility, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumption processes, it is at least reasonably possible that changes in these estimates and assumptions in the near term could materially affect the amounts reported and disclosed in the financial statements.

10. Subsequent Events

Management evaluated subsequent events for the Plan through July 9, 2015, the date the financial statements were available to be issued.

Actuarial Methods

Asset Methods

The asset valuation method is an average of the adjusted market value as of the valuation date and six months preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.

- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.

- **Insurance contracts**: The plan does not have any insurance contracts.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Schedule SB, Part V — Summary of Plan Provisions

Normal retirement	
• Eligibility	Age 65
• Benefit	The monthly normal retirement benefit is equal to the prior year's accrued benefit plus 1/12th of the sum of the following annual additions: (a) 1.75% of earnings up to $10,000 multiplied by Credited Service for the year, plus (b) 2.00% of earnings in excess of $10,000 multiplied by Credited Service for the year. The monthly normal retirement benefit may never be less than $4.80 for each year of Credited Service up to and including 25 years. Effective February 1, 1997 through January 31, 1998, a voluntary early retirement program for those employees who were at least age 55 with 10 or more years of service was implemented. Benefits Included or Excluded

Unless noted below, all benefits provided by the plan, as restated and amended are included in this valuation.

- **Most recent plan amendments included:** Amendments through June 1, 2008 are included because it was adopted by the valuation date and is effective by the end of the plan year.

- **Plan amendments excluded:** None.

- **Late retirement increases:**
  - *Active participants:* The plan provides benefit suspension notices to participants who work beyond normal retirement; therefore, late retirement actuarial increases only apply to participants who defer retirement beyond age 70½. This valuation includes increases for current participants over age 70.
  - *Deferred vested participants:* Not applicable.

- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.

- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

- **IRC Section 436 benefit restrictions:**
  - *Unpredictable contingent event benefits*: This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
  - *Plan amendments:* See above.
  - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
  - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.

Schedule SB, Part V — Summary of Plan Provisions

- **Scheduled benefit increases:** Scheduled benefit increases effective after the end of the current plan year are excluded from minimum funding requirements.

- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits
