THE THOMAS & BETTS PENSION PLAN

Notes to Financial Statements

November 30, 2014 and 2013

(1) Plan Description and Benefits

The following summary discussion of The Thomas & Betts Pension Plan (Plan) is provided for informational purposes only. Participants should refer to the Plan document for information regarding eligibility, vesting and the determination of Plan benefits.

The Plan is a defined benefit pension plan sponsored by Thomas & Betts Corporation (the Corporation). Participants in this Plan include substantially all U.S. employees of the Corporation hired before January 2008 and not covered by a collective bargaining agreement. It is the responsibility of the Plan administrator to maintain records of Plan participants, authorize benefit payments and determine employee eligibility and benefit amounts.

The Corporation was acquired by ABB, Ltd. on May 16, 2012. The Northern Trust Company (Northern Trust) acted as trustee and held the Plan's investment assets and executed investment transactions in the Thomas & Betts Corporation Master Retirement Trust through February 2, 2014. Effective February 3, 2014, the Plan's investment assets were transferred to the ABB Master Trust with Bank of New York Mellon (BNY Mellon) as trustee. Northern Trust continues to make benefit payments.

The Plan is divided into seven parts (Parts A through G). Part A of the Plan covers active employees hired before 2008. Part B (Elastimold division hourly), Part C (Amerace Corporation), Part D (Augat Inc.) and Parts E, F and G (LMS) represent merged plans. There are no active participants in Parts B, C, D, F and G. Part E was closed to new entrants effective January 1, 2003.

The Plan was amended effective December 31, 2010 to preclude the future accrual of benefits for any participant in the Plan after December 31, 2010.

(2) Summary of Significant Accounting Policies

The following are the significant accounting policies followed by the Plan. Thomas & Betts Corporation is the Plan Sponsor. The Board of Directors of the Corporation has delegated responsibility for the administration of the Plan to the Corporation's Retirement Plans Committee.

(a) Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis of accounting in conformity with U.S. generally accepted accounting principles (U.S. GAAP). The Plan is subject to the requirements of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

(b) Use of Estimates in Preparation of Financial Statements

The preparation of financial statements in conformity with U.S. GAAP requires the Plan administrator to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of changes in net assets during the reporting period. Actual results could differ from those estimates.

The Master Trust, as defined below, invests in various types of investment securities and in various companies and/or funds within various markets. The Plan's interest in the Master Trust is exposed to various risks, such as interest rate, market and credit. Due to the level of risk associated with certain

THE THOMAS & BETTS PENSION PLAN

Notes to Financial Statements

November 30, 2014 and 2013

investments and the level of uncertainty related to changes in the value of investments in the Master Trust, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for pension benefits.

The actuarial present value of accumulated plan benefits is reported based on certain assumptions including interest rates and employee demographics, which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

(c) Trust Fund

BNY Mellon, and prior thereto Northern Trust, serves as custodial trustee of a trust fund (the Master Trust) on behalf of the Plan. At November 30, 2014, the assets of the ABB Master Trust consisted principally of investments in fixed income investments, collective trust funds, and equity securities. At November 30, 2013, the assets of the Thomas & Betts Master Retirement Trust consisted principally of investments in collective trust funds, fixed income investments, equity securities and a hedge fund.

Investment managers have been granted discretionary authority concerning all purchases and sales of investments in the Master Trust within the investment guidelines established by the Corporation's Retirement Plans Committee. The Plan's interest in the Master Trust and the interest in the net investment income of the Master Trust has been reported to the Plan administrator by BNY Mellon for the period from February 3, 2014 to November 30, 2014 and by Northern Trust for the year ended November 30, 2013 and the period from December 1, 2013 to February 2, 2014. Fair values of investments are determined by the trustee and allocated to the participating plans based upon each plan's proportionate interest in the Master Trust.

(d) Cash and Cash Equivalents

Cash equivalents held in the Master Trust consist of high-quality money market investments and other investments with maturities at the date of purchase of less than 90 days that have a low risk of change in value.

(e) Interest in Master Trust

The Plan's interest in the Master Trust is stated at fair value as described in note 5. Purchases and sales of securities by the Master Trust are recorded on a trade date basis. Dividend income is recorded on the ex-dividend date.

(f) Investment Income

Investment income of the Master Trust is retained by the trustee for reinvestment purposes. Investment income is recorded when earned.

(g) Funding Policy

The Corporation generally contributes such amounts as are necessary on an actuarial basis to provide the Plan with assets sufficient to meet the minimum funding requirements of ERISA.

(h) Payment of Pension Benefits

Benefit payments to participants are recorded upon distribution.

(3) Financial Information Certified by Trustees

The Plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, as permitted under such election, the Plan administrator has obtained certifications from BNY Mellon and Northern Trust that all information relating to the Plan's investments and related investment income (loss) as of and for the years ended November 30, 2013 and 2014 is complete and accurate. Information as to the value of the interest in the Master Trust, the Plan's interest in the net investment income of the Master Trust, and all information in the supplemental schedule is presented in reliance solely upon this certification.

(4) Interest in the Master Trust

The Plan's investment assets were held in the ABB Master Trust for the period from February 3, 2014 to November 30, 2014 and in the Thomas & Betts Corporation Master Retirement Trust for the period from December 1, 2012 to February 2, 2014. These Master Trusts were established for the investment of the assets of the Plan and other retirement plans sponsored by ABB, and prior thereto Thomas & Betts Corporation. Each participating plan has an undivided interest in the Master Trust. The Master Trust assets are allocated among the participating plans by assigning to each plan those transactions (primarily contributions, benefit payments, and plan-specific expenses) that can be specifically identified and by allocating among all plans, in proportion to each plan's beneficial interest in the Master Trust, income and expenses resulting from the collective investment of the assets of the Master Trust.

At November 30, 2014, the Plan had a 24.5% interest in the net assets of the ABB Master Trust, and at November 30, 2013, the Plan had a 90.6% interest in the Thomas & Betts Master Trust.

(5) Fair Value Measurements

Investments held by the Master Trust are stated at fair value. Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures*, requires enhanced disclosures about investments that are measured and reported at fair value. ASC 820 clarifies the

THE THOMAS & BETTS PENSION PLAN

Notes to Financial Statements

November 30, 2014 and 2013

definition of fair value for financial reporting, establishes a framework for measuring fair value and requires additional disclosures about the use of fair value measurements.

The hierarchy established under ASC 820 gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). As required by ASC 820, the Master Trust investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The three levels of the fair value hierarchy under ASC 820, and its applicability to the Master Trust's investments, are described below:

- Level 1** Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2** Quoted prices for similar assets or liabilities, or inputs that are observable, either directly or indirectly, for substantially the full term through corroboration with observable market data. Level 2 includes investments valued at quoted prices adjusted for legal and contractual restrictions specific to the security.
- Level 3** Pricing inputs are unobservable for the asset or liability, that is, inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Level 3 includes private investments that are supported by little or no market activity.

The determination of where an asset falls in the hierarchy requires significant judgment. The Plan evaluates its hierarchy disclosures each year and changes in economic conditions or valuation techniques may require the transfer of financial instruments from one fair value level to another. However, the Plan expects changes in classifications between levels will be rare. In such instances, the transfer is reported at the beginning of the reporting period.

The methods used to measure the fair value calculation may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Following is a description of the valuation methodologies used for assets and liabilities measured at fair value. There have been no changes in the methodologies used at November 30, 2014 and 2013.

- U.S. fixed income securities consisting primarily of U.S. corporate bonds, U.S. government securities, and short term investments, are valued at the closing price reported on the active market on which the individual securities are traded.
- International fixed income securities consisting primarily of international corporate bonds and international government securities are valued at the net asset value, based on quoted market prices in international markets.
- U.S. equities consisting primarily of U.S. corporate stocks are valued at the closing price reported on the active market on which the individual securities are traded.

THE THOMAS & BETTS PENSION PLAN

Notes to Financial Statements

November 30, 2014 and 2013

- International equities and foreign exchange contracts are valued at the net asset value, based on quoted market prices in international markets.
- The various asset classes listed above may be in either pooled or separate accounts. Pooled account investors receive their prorated share of gains and losses, as well as any interest earned. Separate accounts receive all gains and losses as well as interest earned within the portfolio.
- Mutual funds and registered investment companies are valued at the net asset value, based on quoted market prices in active markets, of shares held by the Plan at year end.
- Collective trusts are valued at net asset value as determined by the Trustee.
- Alternative investments are valued at net asset value as reported by the respective fund manager.

- d. This category includes investments in mutual funds and diversified pooled, collective trusts and separate accounts that invest in international common stocks. A currency overlay strategy is also employed to add value and reduce currency risk.
- e. This category includes investments in private equity, distressed debt and fund of funds. The alternative investments include varying redemption restrictions that are dependent upon related market conditions which may dictate timing and redemption amount.
- f. This category includes equities and fixed income securities out on loan supported by cash collateral with value in excess of the value of the securities loaned out.

The following table sets forth by level, within the fair value hierarchy, the Thomas & Betts Corporation Master Retirement Trust's financial instruments at fair value as of November 30, 2013:

	Investments at fair value			Total

Total investments at fair value	\$ 80,535	351,786	3,679	436,000

The following is a description of the valuation methodologies used for investments measured at fair value at November 30, 2013.

Collective trust funds: Collective trust funds are comprised of units in commingled funds that are not publicly traded. The underlying assets in these funds (58% domestic equity securities, 21% foreign equity securities and 21% fixed income securities) are publicly traded on national securities exchanges and price quotes for the assets held by these funds are readily available. The investment strategies of these funds are to invest in specific sectors or securities consistent with the overall investment policy of the Master Trust. A significant portion of the underlying assets in these funds are invested in domestic large-cap, mid-cap and small-cap equity securities. The collective trust funds are valued at the net asset value per unit as determined by the collective trusts as of the valuation date. The Plan has elected as a practical expedient to reflect the collective trust fund balances on the basis of net asset value. Collective trust funds have been classified as a Level 2 investment.

THE THOMAS & BETTS PENSION PLAN

Notes to Financial Statements

November 30, 2014 and 2013

Fixed income securities: Fixed income securities include an open-ended bond mutual fund comprised principally of U.S. government bonds. Fixed income securities also reflect directly held domestic and foreign government bonds and corporate bonds. Such investments are measured using quoted market prices which are readily available. These fixed income securities have been classified as a Level 1 investment. Fixed income securities also include asset and mortgage backed securities. The fair value of these investments is estimated using pricing models, quoted prices of securities with similar characteristics or discounted cash flows. These fixed income securities have been classified as a Level 2 investment.

Equity securities: Equity securities represent directly held domestic and foreign common stocks. Such securities are publicly traded on national securities exchanges and price quotes for these assets are readily available. Equity securities have been classified as a Level 1 investment.

Hedge fund: The Northern Trust Alpha Strategies Fund (Fund) operates as a “fund of funds” investing in a group of funds or other pooled investment vehicles (sub-funds) and the Fund’s investment objective is to seek attractive risk-adjusted rates of return through investment in a diversified portfolio of assets. The Fund is valued based on net asset values (NAV) determined by the sub-fund managers, as well as other considerations of the Fund manager. This information is generally not publicly available. The fund allows redemption at the net asset value as of the last business day of each calendar quarter. Due to the Fund having a redemption period of 90 days or less, the Plan has elected as a practical expedient to reflect the Fund fair value on the basis of NAV and has classified it as a Level 2 investment.

Other alternative investments: Other alternative investments include a private equity partnership fund and a real estate partnership fund. The valuation of the private equity and real estate partnership funds require significant judgment due to the absence of quoted market prices, the inherent lack of liquidity and the long-term nature of such assets. These assets are initially valued by Plan management at cost, which approximates fair value, and the carrying values of these assets are reviewed and adjusted as needed periodically utilizing available and relevant market data. These investments are classified as a Level 3 investment. The valuation of Level 3 investments requires significant judgment due to the absence of quoted market prices, the inherent lack of liquidity, and the long-term nature of such assets. Certain Level 3 investments are valued based upon recommendations of the Company’s investment managers incorporating factors such as contributions and distributions, market transactions, market comparables, and performance multiples. As the Company relies on fair values as determined by its investment managers for these Level 3 investments, significant unobservable inputs, including valuation techniques and other key inputs, for these items may not be reasonably available. The Company has not provided quantitative information about the significant unobservable inputs as these inputs are not developed by the Company when measuring fair value.

The Thomas & Betts Corporation Master Retirement Trust has elected to use a practical expedient to estimate the fair value of the investments in fixed income securities and alternative investments. The net asset value (NAV), including member units or an ownership interest in partners' capital to which a proportionate share of net assets is attributed, is used for each investment as of the reporting date.

In determining the reasonableness of the valuation methodology for the investments in fixed income securities and alternative investments, the Company obtains audited financial statements at the respective year end for each investment manager to support the reported NAV. In addition, the Company, upon consultation with an external investment advisor, regularly evaluates a variety of factors to determine the reasonableness of the valuation methodology, including review of the underlying investments of each fund, comparison of expected performance to actual results, review of the fund manager's investment strategy, and the current economic and capital market environment.

(6) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those periodic payments, including lump sum distributions, that are expected to be made in the future pursuant to the Plan's provisions for the years of service employees have rendered through the valuation date.

Towers Watson & Company is responsible for the administrative, consulting and actuarial functions for the Plan. The actuarial present value of the accumulated plan benefits as determined by Towers Watson & Company is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuations for the plan years beginning December 1, 2013 and December 1, 2012 were: (a) mortality rate based on the Combined Collar RP-2014 Mortality Tables with Scale MP-2014 generational projection; (b) moderate rate of employee withdrawal; (c) assumed rate of return on investments (funding interest rate) of 6.0% in 2014 and 7.0% in 2013; and (d) a weighted average assumed retirement age at 60 in 2013 and 2012. Assumption changes totaling \$60.9 million, which were primarily the result of changes in the discount rate used to determine the present value of accumulated benefits, increased the actuarial value of accumulated plan benefits as of December 1, 2013. The foregoing actuarial assumptions were based on the presumption that the Plan will continue. If the Plan is terminated, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present values of accumulated plan benefits as of the beginning of the Plan year, which is the Plan's measurement date, are presented below.

Notes to Financial Statements

Accumulated plan benefits changed during the Plan year ended November 30, 2013 as a result of the following:

	Year ended November 30, 2013

Actuarial value of accumulated plan benefits as of end of year	<u>\$ 411,267</u>

(7) Plan Termination

Although the Corporation has not expressed any intent to terminate the Plan, it may do so at any time, subject to the provisions set forth in ERISA. Upon termination of the Plan, each affected participant's accrued benefit as of the date of termination becomes fully vested to the extent funded. Under provisions of ERISA, if the Plan is terminated, the Corporation may be obligated to make termination payments to the Plan, and participants may be eligible for continuation of benefits under insurance provided by the Pension Benefit Guaranty Corporation (PBGC).

Refer to the Plan document for a detailed description of the order of allocation of Plan net assets among participants and beneficiaries of the Plan in the event of the termination of the Plan.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor pensions. However, the PBGC does not guarantee all types of benefits and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling on the amount of an individual's monthly benefit that the PBGC guarantees that is adjusted periodically. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or Plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide those benefits and may also depend on the level of benefits guaranteed by the PBGC.

(8) Federal Income Taxes

The Internal Revenue Service has issued a determination letter dated February 25, 2014, stating that the Plan is a qualified plan in accordance with applicable sections of the Internal Revenue Code (IRC), contingent upon the adoption of certain amendments. The Plan has been amended since receipt of the determination letter as was instructed. The Plan administrator believes the Plan is being operated in compliance with the applicable requirements of the IRC. The Plan administrator and the Plan's outside tax counsel believe that the Plan is properly designed to be in compliance with the applicable requirements of the Internal Revenue Code. The Commonwealth of Puerto Rico has issued a determination letter dated May 31, 2005, stating that the Plan is a qualified plan in accordance with applicable sections of the Puerto Rico Internal Revenue Code, contingent upon the adoption of certain amendments.

U.S. GAAP requires plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the Internal Revenue Service. As of November 30, 2014 and 2013, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan believes it is no longer subject to income tax examinations for plan years prior to and including the year ended November 30, 2011.

(9) Party-in-Interest Transactions

Certain of the Plan's assets are invested in funds managed by the trustee of the Plan. These transactions qualify as party-in-interest transactions; however, they are exempt from the prohibited transactions rules under ERISA.

(10) Subsequent Events

Plan management evaluated subsequent events through September 15, 2015, which is the date the Plan financial statements were available to be issued, and has concluded that other than the items discussed above, there were no significant subsequent events requiring recognition or disclosure in these financial statements.
