(1) Description of the Plan

The following brief description of the Retirement Income Plan for Bargaining Unit Employees of Datex-Ohmeda, Inc. (the Plan) provides only general information. The complete terms of the Plan are provided in the plan document. Information concerning the Plan, including benefits and vesting provisions, is also included in the Summary Plan Description (SPD) and other material distributed to participants.

(a) General

The Plan is a noncontributory defined benefit pension plan covering substantially all employees who are covered under a collective bargaining agreement with Datex-Ohmeda, Inc. (the Company). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

(b) Pension Benefits and Vesting

Participants are entitled to annual pension benefits beginning at normal retirement age (65) equal to the participant's years of credited service multiplied by the applicable benefit amount as defined in the plan document. A participant is eligible to participate in the Plan after he or she provides 1,000 hours of service, and a participant gains one year of credited service for each year in which he or she provides 1,200 hours of service. If employees terminate before rendering five years of service, they forfeit the right to receive the portion of their accumulated plan benefits attributable to the Company's contributions.

Upon retirement, employees may elect to receive their pension benefits in the form of a joint and survivor annuity or a life annuity. The Plan permits early retirement at ages 55–64 with certain reductions of benefits as defined in the plan document.

As a result of collectively bargained changes in 2012, the Plan was closed to new participation effective June 15, 2012, and increased pension multipliers were put in place for individuals to continue to participate in the Plan. The annual rate of retirement income payable to a participant, commencing on or after his or her normal retirement date shall be equal to the participant's credited service multiplied by the Applicable Benefit Level as determined by the following schedule:

Date of retirement	Applicable Benefit Level
From June 15, 2007 to June 14, 2008	636
From June 15, 2008 to June 14, 2009	672
From June 15, 2009 to June 14, 2012	708
From June 15, 2012 to June 14, 2014	732
On or after June 15, 2014	744

Participants who commenced their normal, early, or disability pension benefits between June 15, 2012 and June 14, 2014 had their pension benefit recalculated prospectively on July 1, 2014 to reflect the increase in the Applicable Benefit Level amount from $732 to $744.

(c) Death and Disability Benefits

If a married, vested participant dies, the Plan provides a death benefit to the surviving spouse, so long as the participant was married to the surviving spouse for at least one year before his or her death. If the participant dies after attaining age 55, the surviving spouse's benefit is the benefit that would have been paid to the spouse if the participant had retired with the normal form of benefit (50% joint and survivor annuity) on the day before his or her death. If the participant dies before age 55, the surviving spouse's benefit is the benefit that would have been paid to the spouse had the participant terminated employment on the earlier of his or her actual separation from service or death, retired at the earliest retirement age with the normal form of benefit (50% joint and survivor annuity), and died the next day. Surviving spouse death benefits start on the later of (1) the first day of the month following the participant's death or (2) the first day of the month in which the participant would have turned age 55.

The Plan also provides a disability benefit for participants who meet certain criteria.

(d) Plan Amendment

An amendment to the Plan was adopted May 22, 2013, which updated the plan document language to incorporate the collectively bargained changes described in note (1)(b). An amendment to the Plan was adopted on December 13, 2013, which updated the plan document language to comply with Internal Revenue Code (IRC) section 436 regulations. An amendment to the Plan was adopted December 15, 2014, which updated the plan document language to reflect the Supreme Court's decision in U.S. v. Windsor, which struck down Section 3 of the Defense of Marriage Act (DOMA). These amendments are not expected to have a material impact of the net assets of the Plan based on the net assets as of December 31, 2014.

(2) Summary of Significant Accounting Policies

(a) Basis of Presentation

The accompanying financial statements have been prepared on the accrual basis of accounting.

(b) Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements and changes therein. Actual results could differ from those estimates.

(c) Investment Valuation and Income Recognition

Investment securities are recorded at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See note (3) for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

(d) Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, which are attributable to services rendered by employees through the valuation date under the Plan's provisions. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated participants or their beneficiaries, (b) beneficiaries of participants who have died, and (c) present participants or their beneficiaries. Benefits payable under all circumstances—retirement, death, disability, and termination of employment—are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits, as determined by the Plan's actuary, is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected dates of payments.

The significant actuarial assumptions used in the valuations as of December 31, 2014 and 2013 include the following:

	2014	2013
Retirement age	Varying up to age 65	Varying up to age 65
Discount rate	7.50%	7.25%
Mortality	RP-2014 Aggregate Mortality Table with Generationally Projected Improvements by a Modified Scale MP-2014	RP-2000 Combined Health Table with Generational Projection by Scale AA

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits. The computations of the actuarial present value of accumulated plan benefits were made as of January 1, 2015 and 2014. Had the valuations been performed as of December 31, there would have been no material differences.

(e) Administrative Expenses

All reasonable expenses of the Plan are paid by the Plan, unless paid by the Company at its sole discretion.

(f) Benefit Payments

Benefits paid to participants are recorded upon distribution.

(3) Fair Value Measurements

Accounting Standards Codification (ASC) Topic 820, *Fair Value Measurement*, establishes a framework for measuring fair value, which provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include the following:

- Quoted prices for similar assets or liabilities in active markets
- Quoted prices for identical or similar assets or liabilities in inactive markets
- Inputs other than quoted prices that are observable for the asset or liability
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2014 and 2013.

Common/collective trust fund – Valued at the net asset value (NAV) of the units of the collective trust. The NAV, as provided by the trustee, is used as a practical expedient to estimate fair value. The NAV is based on the fair value of the underlying investments held by the fund less its liabilities. The underlying investments include a money market fund, which is valued at amortized costs, which also represents fair value, and mutual funds, which are valued as discussed below. This practical expedient is not used when it is determined to be probable that the fund will sell the investment for an amount different from the reported NAV. Participant transactions (purchases and sales) may occur daily, and transactions are executed within one week of providing notice to the trustee. There are no unfunded commitments associated with the investment in the collective trust. Were the Plan to initiate a full redemption of the collective trust, the investment adviser would reserve the right to temporarily delay withdrawal from the trust in order to ensure that securities liquidations will be carried out in an orderly business manner.

Mutual funds – Valued at daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the U.S. Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2014:

	Investments at fair value as determined by quoted prices in active markets (Level 1)	Investments at estimated fair value: Valuation techniques based on observable market data (Level 2)	Investments at estimated fair value: Valuation techniques incorporating information other than observable market data (Level 3)	Total

Total investments	$ 44,346,856	26,542,130	—	70,888,986

(Continued)

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2013:

		Investments at estimated fair value			
	Investments at fair value as determined by quoted prices in active markets (Level 1)	Valuation techniques based on observable market data (Level 2)	Valuation techniques incorporating information other than observable market data (Level 3)	Total
Common/collective trust fund:				
Cash equivalent	$ —	100,005	—	100,005
U.S. small/mid cap equity	—	5,007,571	—	5,007,571

Total investments	$ 41,199,723	25,082,316	—	66,282,039

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period. The significance of transfers between levels is based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. For the years ended December 31, 2014 and 2013, there were no transfers into or out of Level 1, 2, or 3.

(4) Funding Policy

The Company's policy is to contribute to the Plan at least the minimum required contribution, per Internal Revenue Service regulations, as determined by the plan's actuary. Participants make no contributions under the Plan. During 2014 and 2013, the Company made no contributions and has met the minimum funding requirements of ERISA.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth by ERISA.

(Continued)

(5) Plan Termination

Should the Plan terminate at some future time, its net assets generally will not be available on a pro rata basis to provide participants' benefits. Whether a participant's accumulated plan benefit will be paid depends on both the priority of those benefits and the level of the benefits guaranteed by the Pension Benefit Guaranty Corporation (PBGC) at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guaranty while other benefits may not be provided for at all.

(6) Investments

The trustee of the Plan, Wells Fargo Bank, N.A., has provided the plan administrator certifications as to the completeness and accuracy of investment information and data in accordance with 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. The data certified includes all investment information reflected in the statements of net assets available for benefits at December 31, 2014 and 2013, and investment income reflected in the statements of changes in net assets available for benefits for the years then ended, as well as the investment information included in note 3 and this note and the accompanying schedules to these financial statements.

The following table presents investments that represent 5% or more of the Plan's net assets available for benefits as of December 31, 2014 and 2013:

	2014	2013
Vanguard Long-Term Investment Grade Fund	$ 28,503,385	26,083,284
Blackrock Equity Index Fund	21,086,570	19,974,740
Fidelity Diversified International	10,535,666	10,095,459
TimesSquare Mid-Cap Growth Fund	5,307,511	5,020,699
Russell 2000 Value Index Fund Class F	5,355,556	5,007,571

During 2014 and 2013, the Plan's investments (including realized gains and losses on investments bought and sold, as well as unrealized gains and losses on investments held during the year) appreciated in value as follows:

	2014	2013
Collective trust funds	$ 2,893,952	6,546,921
Mutual funds	3,191,236	975,113
Total	$ 6,085,188	7,522,034

(7) Related-Party Transactions

Under the terms of a trust agreement, certain plan investments are managed by an entity related to Wells Fargo Bank, N.A., the trustee of the Plan. Therefore, these transactions are party-in-interest transactions. Fees incurred by the Plan for the party-in-interest investment management services amounted to $13,926 and $10,961 for the years ended December 31, 2014 and 2013, respectively.

(Continued)

(8) Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated June 7, 2012 that the Plan and related trust are designed in accordance with applicable sections of the IRC. The Plan has been amended since receiving the determination letter. However, the plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC, and that the trust continues to be tax-exempt under IRC section 501(a).

Participants in the Plan are not subject to federal income taxes until they receive a distribution from the Plan.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that, as of December 31, 2014, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2010.

(9) Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

(10) Subsequent Events

The Plan evaluated subsequent events through September 4, 2015, the date the financial statements were issued. Effective March 2, 2015, the plan assets were transferred from Wells Fargo Bank N.A. to the GE Pension Trust, and the Plan was amended to made the General Electric Benefit Plan Investment Committee (BPIC) the investment fiduciary for the Plan and the trustees to the GE Pension Trust the trustees for the Plan.

The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value. A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

Early Retirement

Eligibility

Participants who terminate employment after age 55 with five years of vesting service.

Benefit

The monthly benefit payable at the early retirement date is equal to the normal retirement benefit, reduced to reflect early commencement.

For employees who have completed at least 10 years of continuous service the reduction is 1/2 for each month the early retirement date precedes age 62.

For employees that do not have 10 years of continuous service, the early retirement reduction is based on the table below:

Age at Benefit Commencement	Reduction
65	0.0%
64	6.0%
63	12.0%
62	18.0%
61	24.0%
60	30.0%
59	34.8%
58	39.3%
57	43.3%
56	47.0%
55	50.3%

For eligible participants retiring between June 15, 2009 and September 30, 2009 the early retirement reductions from age 62 to age 60 were reduced from 6% per year to 3% per year.

Deferred Vested Retirement Benefits

Eligibility

Five years of vesting service.

Termination Benefit

A participant is entitled to the vested normal retirement benefit determined as of the date of termination of employment. The participant may commence this benefit as early as age 55, however, the benefit will be reduced in accordance with the reduction factors that apply to a participant who retires with less than 10 years of continuous service.

Benefit multiplier is frozen at the date of transfer. Early retirement and vesting eligibility are same as for the active participants under this plan.

Automatic Preretirement Surviving Spouse Benefit

Benefit	Unreduced normal retirement benefit based on credited service to date of disability.
