STEWART TUBULAR PRODUCTS, INC. 401(K) PLAN
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2014 AND 2013

NOTE 1: Description of Plan

General

The Stewart Tubular Products, Inc. (the "Company") Employee 401(k) Plan (the "Plan") is a defined contribution plan that covers all employees who have three months of service. A year of eligibility is accomplished after completing one thousand hours of service during the first twelve months of employment. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

The following provides a general description of the Plan. Participants should refer to the plan agreement for more complete information. The employer absorbs significant costs incurred in the administration of the Plan.

Contributions

The Plan permits annual contributions of 96% of the participants' salary not to exceed annual dollar limits set by Section 402 (g) ($17,500 and $17,500 in 2014 and 2013, respectively) of the Internal Revenue Code ("IRC"). Participants direct the investment of their contributions into various investment options offered by the Plan. The Company makes "Safe Harbor" matching contributions equal to the first 3% of the employees' compensation, and 50% of the employees' contributions between 3% and 5% of the employees' compensation. The matching contribution is invested based on the same percentages as the participant contributions. Additional elective matching contributions may be contributed at the option of the Company. Contributions are subject to certain limitations.

Participant accounts

Each participant's account is credited with their salary deferral contribution, the employer matching contribution, and an allocation of administrative expenses. Allocations are made in relation to a participant's account balance to the total of all participant account balances.

Vesting

Participants are immediately and fully vested in their salary deferral contributions, matching contributions, and the earnings allocated thereon.

Payment of benefits

Upon termination of service due to death, disability, or retirement, a participant is entitled to receive their vested account balance as either a lump-sum distribution or periodic installments. For termination of service due to other reasons, a participant may receive their vested account balance as a lump-sum distribution.

Plan termination

Although the Company has expressed no intent to do so, it may terminate the Plan at any time subject to the provisions of ERISA. In the event the Plan terminates, participants will become 100% vested in their accounts.

NOTE 2: Summary of accounting policies

Basis of accounting

The financial statements of the Plan are prepared using the accrual method of accounting.

Investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The Statement of Net Assets Available for Benefits presents the fair value of the investment contracts as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The Statement of Changes in Net Assets Available for Benefits is prepared on a contract value basis.

The contract value listed on the Annual Employer Plan Statement is the fair value. Most PSA's are invested in a singular mutual fund investment, and the many other collective trusts & sub advised funds are invested in stocks and mutual funds as well. A small portion of these sub-advised funds invest in GIC or bond investments. All of Transamerica's PSA choices are valued daily using publicly available quoted market prices, and participants bear the investment risks. Those PSAs investing in mutual funds or domestic equity securities are measured using quoted prices in active markets for identical assets ("Level 1" input under ASC 820). Those PSAs directly investing in fixed maturity securities are measured based on the pricing data provided by outside valuation service providers who in turn generally use the mean of bid and ask prices but may also use alternative observable pricing inputs for certain securities ("Level 2" input under ASC 820).

Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Administration

The Plan is administered by the Company. The Company served as the Trustee for the years ended December 31, 2014 and 2013.

NOTE 3: Fair value measurements

The Plan's investments are reported at fair value in the accompanying statement of net assets available for benefits. The methods used to measure fair value may produce an amount that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to measure the fair value of certain financial instruments could result in a different fair value at the reporting date.

NOTE 3: Fair value measurements (continued)

Accounting guidance has established a three tier hierarchy of inputs to establish a classification of fair value measurements and disclosure. The three tier hierarchy of inputs is summarized below:

- Level 1 – quoted prices in active markets for identical securities
- Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 – significant unobservable inputs (including the Fund's own assumption in determining the fair value of investments)

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

Following is a description of the valuation methodologies used for assets measured at fair value.

Pooled separate accounts: Valued at the market value of the separate account less the management fee divided by the number of units. Assets allocated to separate accounts can include, but are not limited to, stocks, bonds, mortgages, real estate, mutual funds, and cash and cash equivalents as specified in the separate accounts investment policy.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2014:

	Assets at Fair Value as of December 31, 2014			
	Level 1	Level 2	Level 3	Total

NOTE 5: Investments

NOTE 6: Tax status

The Internal Revenue Service has determined and informed the Company by a letter dated March 31, 2008, that the Plan is designed in accordance with the applicable sections of the Internal Revenue Code (IRC). Therefore, no provision for income taxes has been included in the Plan's financial statements.

NOTE 7: Risks and uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

NOTE 8: Subsequent events

The Company has evaluated subsequent events through the issuance of the financial statements, which occurred on September 8, 2015.
