Note 2. Summary of Significant Accounting Policies

Basis of accounting: The financial statements of the Plan are prepared on the accrual basis of accounting.

Use of estimates: The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities and the actuarial present value of accumulated plan benefits as disclosed in these financial statements. Actual results may differ from those estimates. The Plan uses an actuary to determine the actuarial present value of accumulated plan benefits. A change in the actuarial assumptions used could significantly change the amount of the actuarial present value of accumulated plan benefits reported in the accompanying financial statements.

Valuation of investments: Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Plan's investment committee determines the Plan's valuation policies utilizing information provided by its investment advisors and trustees. See Note 7 for a discussion of fair value measurements.

Note 2. Summary of Significant Accounting Policies (Continued)

Purchases and sales are recorded on a trade-date basis. Interest income is recorded on an accrual basis. Dividends are recorded on the ex-dividend basis. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of the investment securities will occur in the near-term and that such change could materially affect the amounts reported in the statements of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Actuarial present value of accumulated plan benefits: Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits payable under all circumstances - retirement, death, and termination of employment - are included, to the extent they are deemed attributable to employee service rendered as of the valuation date.

The actuarial present value of accumulated plan benefits is determined by an independent actuary and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, withdrawal, or retirement) between the valuation date and the expected date of payment.

The most recent valuation of the actuarial present value of accumulated plan benefits under the Plan as of December 31, 2014 was made by the independent actuary using actuarial data as of January 1, 2014. There is no significant difference between December 31, 2013 and January 1, 2014 that would affect the actuarial valuation. The significant actuarial assumptions used in the valuation as of January 1, 2014, were:

(a) Life expectancy of participants using the Society of Actuaries RP-2014 Mortality Tables;

(b) Participants are assumed to retire between the ages of 55-70;

(c) Assumed rate of return on investments: 7.75%.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Payments of benefits: Benefit payments to participants are recorded upon distribution.

Note 2. Summary of Significant Accounting Policies (Continued)

Administrative expenses: The Plan's expenses are paid either by the Plan or the Plan Sponsor, as provided by the Plan Document. Expenses that are paid directly by the Company are excluded from these financial statements. Certain expenses incurred in connection with the general administration of the Plan that are paid by the Plan are recorded as deductions in the accompanying statements of changes in net assets available for benefits. In addition, certain investment related expenses are included in net appreciation of fair value of investments presented in the accompanying statements of changes in net assets available for benefits.

Subsequent events: The Plan has evaluated subsequent events through September 15, 2015, the date the financial statements were available to be issued.

Note 3. Funding Policy

The Plan's funding policy is for the Company to contribute an amount which will meet or exceed the annual ERISA minimum funding requirement. The Company made contributions of $1,600,000 and $1,325,000 for the years ended December 31, 2014 and 2013, respectively. The Company's contributions for 2014 and 2013 exceeded the minimum funding requirements of ERISA.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth by ERISA.

Note 4. Plan Termination

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

(a) Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding the Plan termination.

(b) Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. government agency) up to the applicable limitations.

(c) All other vested benefits (that is, vested benefits not insured by the PBGC).

(d) All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

Note 5. Information Certified and Provided by Principal Trust Company

The following is a summary of the investment information as of December 31, 2014 and 2013, and for the years then ended, included throughout the Plan's financial statements and supplemental schedules that was prepared by and derived from information provided by Principal Trust Company, the trustee and furnished to the Plan Administrator. The Plan Administrator has obtained certifications from the trustee that the information provided to the Plan Administrator related to the following assets is complete and accurate. Accordingly, as permitted by 29 CFR 2520.103-8 of the United States Department of Labor's (DOL's) Rules and Regulations for Reporting and Disclosure under ERISA, the Plan Administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to information which appears throughout the financial statements and supplemental schedules related to the following investments certified by Principal Trust Company as of December 31:

	2014	2013
Mutual funds	$18,439,389	$16,057,551
Pooled separate accounts	10,290,969	13,253,161

Principal Trust Company also certified to the completeness and accuracy of $599,819 and $3,570,169 of net appreciation in fair value of investments and $622,780 and $467,794 of interest and dividends related to the aforementioned investments for the years ended December 31, 2014 and 2013, respectively.

Note 7. Fair Value Measurements

The framework for measuring fair value provided a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

The three levels of the fair value hierarchy under the guidance are described below:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets.
- Quoted prices for identical or similar assets or liabilities in inactive markets.
- Inputs other than quoted prices that are observable for the asset or liability.
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2014 and 2013.

Mutual funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Pooled separate accounts: Valued on a net unit value basis based on the net assets of the underlying pool of securities.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes it valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Note 7. Fair Value Measurements (Continued)

Note 7. Fair Value Measurements (Continued)

The following tables set forth by additional disclosures of the Plan's investments whose fair value is estimated using net asset value per share (or its equivalent) as of December 31, 2014 and 2013:

	As of December 31, 2014

(a) The typical mid-cap blend fund invests in stocks of various sizes and mixed characteristics, giving it a middle-of-the-road profile. Most shy away from high-priced growth stocks, but are not so price-conscious that they land in value territory.

(b) The value funds in this category focus on big companies that are less expensive or growing more slowly than other large-cap stocks. The value funds often feature investments in energy, financial, or manufacturing sectors. The growth funds invest in big companies that are projected to grow faster than other large-cap stocks. Most of the growth funds focus on companies in rapidly expanding industries. The blend funds have portfolios that are fairly representative of the overall stock market in both size, growth rates, and price. They tend to invest across the spectrum of U.S. industries and owing to their broad exposure, the blend fund's returns are often similar to those of the S&P 500 Index.

(c) The funds in this category seek a long-term total return in excess of inflation. The fund allocates its assets among the following general investment categories: inflation-indexed bonds, real estate investment trusts (REITs), commodity index-linked notes, fixed-income securities, securities of natural resource companies, and master limited partnerships (MLPs). It concentrates its investments in securities in the real estate and energy/natural resources industries.

Note 8. Related Party Transactions

The reasonable expenses of administering the Plan, as determined by the Plan Administrator, shall be payable from the trust fund for the Plan, except to the extent that the Company, in its discretion, pays the expenses directly. For the years ended December 31, 2014 and 2013, the administrative expenses were paid by the Plan.

Certain Plan investments are invested in funds managed by Principal Trust Company, the Trustee. These transactions qualify as party-in-interest transactions.

Note 9. Tax Status

The Internal Revenue Service has determined and informed the Plan by a letter dated February 3, 2014, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan Administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the internal revenue service. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2014, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan Administrator believes it is no longer subject to income tax examinations for years prior to 2011.

Note 10. Recently Issued Accounting Pronouncements

In May 2015, the Financial Accounting Standards Board (FASB) issued *Accounting Standards Update (ASU) No. 2015-07, Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*. The amendments in this update remove the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. However, sufficient information must be provided to permit reconciliation of the fair value of assets categorized within the fair value hierarchy to the amounts presented in the statement of financial position. The amendments also remove the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the net asset value per share practical expedient. The amendments in this update are effective for public business entities for fiscal years beginning after December 15, 2015. For all other entities, the amendments in this update are effective for fiscal years beginning after December 15, 2016. Early adoption is permitted. Upon adoption, the amendments shall be applied retrospectively to all periods presented. Plan management is currently evaluating the impact this update will have on the Plan’s financial statements.

Note 10. Recently Issued Accounting Pronouncements (Continued)

In July 2015, the FASB issued ASU No. 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): (Part I) Fully Benefit-Responsive Investment Contracts, (Part II) Plan Investment Disclosures, (Part III) Measurement Date Practical Expedient.* The amendments in Part I of this ASU designate contract value as the only required measure for fully benefit-responsive investment contracts. This amendment maintains the relevant information while reducing the cost and complexity of reporting for fully benefit-responsive investment contracts (for example, an adjustment to reconcile contract value to fair value). The objective of Part II of this Update is to simplify and make more effective the investment disclosure requirements under Topic 820 and under Topics 960, 962, and 965 for employee benefit plans. This update makes several changes to the disclosure requirements for Defined Benefit Pension Plans. The amendments in Part III of this update provide a practical expedient to permit plans to measure investments and investment-related accounts (for example, a liability for a pending trade with a broker) as of a month-end date that is closest to the plan's fiscal year-end, when the fiscal period does not coincide with a month-end. The amendments simplify the measurement of investments and investment-related accounts while not significantly reducing the relevance of the information to users. Furthermore, the disclosures increase the transparency of the measurement date used and events that occur between the measurement date and the plan's fiscal yearend. The amendments in all three parts of this update are effective for fiscal years beginning after December 15, 2015. Earlier application is permitted. An entity should apply the amendments in Parts I and II retrospectively for all financial statements presented. An entity should apply the amendments on Part III prospectively. Plan management is currently evaluating the impact this update will have on the Plan’s financial statements.

Form of Benefit

Participants are assumed to receive their benefits on the normal form at the assumed retirement age.

Methods Prescribed by Law

Liability Measure

Funding target is the present value of the benefits accrued on the valuation date. Target Normal Cost is based on benefits expected to accrue during the current plan year and includes an estimate of plan expenses for the year.

Methods Selected by Plan Sponsor	
Asset Method	The asset valuation method is prescribed by law for plans that elect to use a value other than market value. For each of the preceding two years, an expected value of assets at the end of the year is compared to the end of year market value. The resulting gain or loss is recognized evenly over three plan years. The expected value includes contributions, distributions, any deducted administrative expenses, and expected earnings (based on the lesser of the assumed interest rate or the Maximum Allowable Rate). The deferred gains and losses are added to the current market value and then restricted to no more than 110% and no less than 90% of that market value. When actual returns exceed the assumed return, the actuarial value of assets will lag below market value. The lag and the smoothing effect are limited since the value must be within 10% of market value.
Segment Rates	24 month average with no weighting to prior law basis. Use rates where December is the last month included in the average.
PBGC Premium Basis	Variable Rate Premiums are calculated using census, market value of assets and the funding segment rates used for the plan year without the MAP-21 interest rate corridor defined in IRC §430(h)(2)(C)(iv). You elected this Alternative interest method for the 01/01/2010 plan year and the method must be used for five years before a change can be made.

Methods Elected by Actuary	
Retirees	Assets and liabilities for current and future retirees are included.
HCE Benefit Payment Restrictions	A ratio of the market value of assets and funding target is used to determine if restrictions apply. Assets and Funding Target are as of the valuation date and are reduced by: • any retiree benefit index or floor • amounts for HCEs who were previously restricted • an amount for the retiring HCE The Funding Target is not based on the MAP-21 interest rate corridor defined in IRC §430(h)(2)(C)(iv). Other assumptions or methods may be used.
Vested Benefits	A benefit is included in vested benefits when the participant will meet age and service eligibility requirements at the valuation date. The benefit is multiplied by the participant's vesting percentage applicable to each benefit on the valuation date. The following ancillary benefits are always treated as nonvested: disability benefits payable to retirement age unless in pay status, and pre-retirement death benefits in excess of the Survivor Annuity Death Benefit except as noted in the Plan Provisions.
Assumptions and Methods Elected by Actuary Plan Accounting (ASC 960)	
With the exceptions below, all assumptions and methods are the same as those used in determining your plan's regular Funding Target and Target Normal Cost.	
Interest Rate Used to Value Liabilities	7.75%
