Independent Auditor's Report

To the Administrator of Raytheon Company Pension Plan for Hourly Employees

We have audited the accompanying financial statements of Raytheon Company Pension Plan for Hourly Employees (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2014 and December 31, 2013, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2014 and changes therein for the year then ended and its financial status as of December 31, 2013, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Actuarial Methods for Funding****Asset methods**

The asset valuation method is an average of the adjusted market value for each year during the last 24 months preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110 percent and no less than 90 percent of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** Xerox HR Solutions, LLP provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:**
 - No actuarial liability is included for nonvested participants who terminated prior to the valuation date.
 - In addition, for retirees who have elected a contingent annuitant form of payment, 30% of future beneficiaries are assumed to de cease prior to receiving benefits.
- **Transferred participants:** Participants who have transferred to another plan are valued as active employees no longer accruing benefits.
- **Insurance contracts:** The plan does not have any insurance contracts.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods**Minimum funding methods**

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Schedule SB, line 24 — Change in Actuarial Assumptions

- The expense component of normal cost increased from \$3,443,003 to \$3,879,289 to reflect our best estimate of the current plan year's expenses.
- Mortality and interest rates were updated from 2013 to 2014 in accordance with PPA. Reflects interest rates in accordance to the Highway and Transportation Funding Act of 2014.

Schedule SB, Part V — Summary of Plan Provisions**Early retirement**

- | | |
|---------------|--|
| • Eligibility | Age 60 or age 55 and 10 years of vesting service. |
| • Benefit | Normal, payable for life, is computed as for normal retirement, but reduced for early commencement of payments as follows: |

Age at Date of Commencement	Percent Reduced
55	25%
56	20%
57	15%
58	10%
59	5%
60 or later	0%

Special early retirement

- | | |
|---------------|---|
| • Eligibility | Age 58, 10 years of vesting service as of April 13, 1987 and retirement between June 1 and September 1, 1987. |
| • Benefit | Minimum annuity of \$16.00 multiplied by the number of years of benefit service. In addition the following supplemental amounts will be paid:
A \$300 per month supplement starting at 60 and ending at the first day of the month in which (i) he reaches age 62, (ii) he begins receiving reduced Social Security benefits or (iii) he dies; or
If the Participant is at least age 62, a lump sum equal to \$3,000. |

Level income supplemental allowance (LISA)

- | | |
|---------------|---|
| • Eligibility | Age 60 and 20 years of vesting service. |
| • Benefit | If an employee terminates and requests commencement prior to age 62, he is eligible for LISA in addition to his early pension if he restricts his post-retirement earnings.

For each month up to the employee's age 62, the LISA benefit payable is \$300 per month. |

Schedule SB, Part V — Summary of Plan Provisions**Deferred vested**

- | | |
|---------------|---|
| • Eligibility | 5 years of vesting service |
| • Benefit | Monthly annuity, commencing at age 65 if the employee is then living, is computed by multiplying his benefit service by the pension rate in effect at termination. A pension may commence after age 55, but is reduced for early commencement as follows: |

Age at Retirement	Percent of Normal Retirement Benefit Payable
65	100.0
64	92.8
63	85.6
62	78.4
61	71.2
60	66.4

56	50.8
55	47.2

Disability

- | | |
|---------------|---|
| • Eligibility | Participants who become totally and permanently disabled with 10 years of vesting service |
| • Benefit | Monthly annuity will commence after temporary disability benefits under group insurance cease and will be payable for life or until disability ceases. If the employee qualifies for disability Social Security benefits, his monthly pension will be computed as for normal retirement, considering service to disablement. For any month in which the employee does not qualify for disability or unreduced old age Social Security, his benefit will be \$120. |

Schedule SB, Part V — Summary of Plan Provisions**Death Benefits**

• Transition Survivor Income	Payable upon the death of an active employee (or the death of an employee dying within 31 days following layoff or termination) or an employee on disability retirement prior to his normal retirement date. The monthly benefit commencing immediately is \$300 payable for 24 months or until the death of all eligible survivors, if earlier. Eligible survivors are the spouse, dependent children, and dependent parents.
• Automatic Survivor Income	<p>Upon the death of an active employee at least age 55 with 10 years of vesting service, a benefit is payable for life to the surviving spouse. The monthly pension is computed as if the employee had retired on the date of his death and elected a 55% Joint and survivor pension, and then died. The pension commences the first day of the month following the employee's death, but is reduced by the amount of any transition or bridge benefit paid.</p> <p>Upon the death of an active participant with at least 5 years of vesting service who has not attained age 55, a benefit is payable for life to the surviving spouse. The monthly benefit is computed as if the employee had terminated employment on the date of his death under the Deferred Vested Pension provisions, and had requested the 50% Joint and Survivor option of payment. The monthly death benefit is 50% of such payment commencing on the earliest date upon which the employee would have been eligible to commence payments, but is reduced by the amount of any transition or bridge benefit paid.</p>
• Death Benefits After Retirement	Upon the death of a retiree who commenced from active status after he was age 55 or a disability retiree, a death benefit is payable in the amount of \$4,000.
Unpredictable contingent event benefits	N/A

Form of benefits	
• Automatic form for unmarried participants	Single life annuity
• Automatic form for married participants	55% Joint & Survivor Annuity
• Optional forms	75% Joint & Survivor Annuity 55% Joint & Survivor Annuity Last to Survive
• Optional form conversion factors	For purposes of the 55% Joint and Survivor annuity, the benefit payable is 95% of his accrued benefit and, upon his death, 55% of such pension will be paid to the spouse. The 95% conversion factor is reduced ½% for each year that the spouse's age is more than five years less than the participant's age, and is increased ½%, to a maximum of 10%, for each year that the spouse's age exceeds the participant's age by more than five years. Other optional forms of payment are computed on an Actuarial Equivalent basis using a 7% interest rate and 1971 Group Annuity Mortality Table, Projected by Scale D to 1975 using a unisex rate that is 50% male and 50% female.
Miscellaneous	
• Maximum benefits	Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2014, the limit is \$210,000.

Schedule SB, Part V — Summary of Plan Provisions

Early retirement	
• Eligibility	Age 55 and 10 years of vesting service.
• Benefit	Normal retirement benefit, is reduced 5% per year for each year that payments commence prior to age 60.
Level Income Supplemental Allowance (LISA)	
• Eligibility	Age 60 and 20 years of vesting service
• Benefit	If an employee terminates and agrees to restrict his/her post-retirement earnings, he/she is eligible for LISA in addition to his/her early pension. The supplemental benefit, payable to age 62, is \$450 per month.
Deferred vested	
• Eligibility	5 years of service
• Benefit	Monthly annuity, commencing at age 65 if the employee is then living, is computed by multiplying his benefit service by the pension rate in effect at termination. An actuarially reduced pension may commence after age 55.
Disability	
• Eligibility	Participants who become totally and permanently disabled with 10 years of vesting service
• Benefit	Monthly annuity will commence one year after the disability occurred and will be payable for life or until disability ceases. If the employee qualifies for disability Social Security benefits, his/her monthly pension will be computed as for normal retirement, considering service to disablement. For any month in which the employee does not qualify for disability or unreduced old age Social Security, his/her benefit will be two times the amount computed above.
Benefit Increases for Retirees and Survivors	Participants and survivors receiving benefits on January 1, 1975 shall receive an increase of \$1.00 times benefit service. Effective July 1, 1978, participants and survivors receiving benefits on June 30, 1978 shall receive an increase of \$1.00 times benefit service. Effective April 1, 1981, participants and survivors receiving benefits as of March 1, 1981 shall receive a five percent benefit increase. Effective April 1, 1984, participants and survivors receiving benefits as of March 1, 1984 shall receive a four percent benefit increase. Participants who retire April 1, 1984 and after shall receive a monthly amount equal to the monthly rate in effect as of the due date of each payment multiplied by the number of years of benefit service. Effective March 1, 1987, participants and survivors receiving benefits as of February 28, 1987 shall receive a four percent benefit increase. Effective March 1, 1990, participants and survivors receiving benefits as of February 28, 1990 shall receive a five percent increase. Effective March 1, 1993, the participants and survivors receiving benefits as of February 28, 1993 shall be increased by 5%.

Note: Schedules 1 and 3 no longer apply. However, we continue to identify the Schedules as 2 and 4 to be consistent with Raytheon's records.			
Miscellaneous			
• Maximum benefits	Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2014, the limit is \$210,000.		

Schedule SB, Part V — Summary of Plan Provisions***Benefits Included or Excluded***

Unless noted below, all benefits provided by the plan, as restated November 30, 2010 and last amended effective December 18, 2012 are included in this valuation.

- **Most recent plan amendments included:** December 18, 2012.
- **Plan amendments excluded:** The amendment on March 13, 2014 to increase the minimum benefit from \$49 to \$53 for the Raytheon Guards participants is excluded for funding purposes because it was adopted after the valuation date. However, it is included for fiscal year ending December 31, 2014 expense determination.
- **Late retirement increases:**
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase.
- **Late retirement increases only for participants of the former IBEW Local 1505 Raytheon Hourly Pension Plan:**
 - *Deferred vested participants:* Current deferred vested participants over normal retirement age are not valued including the late retirement actuarial increase.
- **IRC Section 415(b) benefit limitations:** The limitations of Internal Revenue Code Section 415(b) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60 percent of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.

Plan Provisions Specific to Funding***Additional Benefits Included or Excluded***

- **IRC Section 436 benefit restrictions:**
 - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
 - *Plan amendments:* See above.
 - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
 - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
 - *Scheduled benefit increases:* Scheduled benefit increases effective after the end of the current plan year are excluded from minimum funding requirements.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.

Plan Provision Changes Since Prior Valuation Funding

- Maximum compensation and maximum benefits under IRS rules were updated from 2013 to 2014.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

**Schedule SB, Line 7 — Explanation of Discrepancy in Prior Year Funding
Standard Carryover Balance or Prefunding Balance**

For the 2013 Schedule SB, the Carryover Balance shown in the Balance at beginning of current year in line 13 does not include the Carryover Balance from the former IBEW Local 1505 Raytheon Hourly Pension Plan.

In the 2014 Schedule SB, the Balance at beginning of prior year after applicable adjustments in line 7 does include the Carryover Balance from the former IBEW Local 1505 Raytheon Hourly Pension Plan.

The above explanations are the reason why line 7 on the 2014 Schedule SB does not equal line 13 from the 2013 Schedule SB.

Independent Auditor's Report

To the Administrator of Raytheon Company Pension Plan for Hourly Employees

We have audited the accompanying financial statements of Raytheon Company Pension Plan for Hourly Employees (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2014 and December 31, 2013, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2014 and changes therein for the year then ended and its financial status as of December 31, 2013, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Raytheon Company Pension Plan for Hourly Employees

Notes to Financial Statements

December 31, 2014 and 2013

1. Plan Description

The following description of the Raytheon Company Pension Plan for Hourly Employees (the "Plan") is for general purposes only. Participants should refer to the Summary Plan Description or the Plan document for a complete description of the Plan's provisions.

General

The Plan is a defined benefit plan that covers a substantial portion of hourly employees of the Raytheon Company and certain of its subsidiaries (the "Company"). Effective December 31, 2012, the Retirement Plan for Hourly Employees of Raytheon IIS-Garland and the Retirement Plan for Hourly Employees of Raytheon NCS-Florida were merged into and became a part of the Plan.

Investments are held in the Raytheon Master Pension Trust ("Master Trust"). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Benefits, Eligibility and Vesting

The Plan provides specified retirement and death benefits to be paid from the net assets available for benefits. For employees not covered by a collective bargaining agreement, the level of benefits is primarily based upon the greater of a formula based principally upon years of service and average compensation and a minimum guarantee formula. For employees covered by a collective bargaining agreement, the level of benefits is negotiated and determined by the union contract in effect at the time of termination. The standard form of retirement benefit to unmarried participants is a monthly payment beginning the month following retirement and continuing until death. The standard form of benefit to married participants is a reduced monthly payment for the participant's life and one-half of that payment for the life of the participant's surviving spouse. Other optional forms of benefits are also available.

Employees who retire between the age of 55 and the normal retirement age shall be entitled to a percentage of the normal retirement benefit, with the percentage increasing as the retirement age approaches the normal retirement age. Employees of the Company, who meet the eligibility requirements, as defined by the Plan, may participate in the Plan. Each employee becomes a participant in this Plan on their date of hire. Participants are fully vested upon completion of five years of vesting service, as defined in the Plan document.

Effective January 1, 2007, employees who are either hired or rehired (after the period of eligible recall) subject to any applicable collective bargaining agreements are not eligible to participate in the Plan. In addition, former employees who are rehired on or after March 1, 2007 and have received or are receiving payment from a Company-sponsored pension plan are not eligible to participate in the Plan, subject to applicable collective bargaining agreements.

Effective March 2, 2014, the pension minimum guarantee for the Raytheon Guards Association participants increased from \$49 to \$53 per month per year of service.

Effective September 27, 2014, the pension minimum guarantee for the IBEW 1505 participants increased from \$50 to \$53 per month per year of service.

Contributions

The Company makes contributions to the Plan to ensure assets are sufficient to pay the benefits of the Plan. The Plan does not require contributions by participants.

Notes to Financial Statements

December 31, 2014 and 2013

Plan Transfers

Transfers out are assets transferred from the Plan to the Raytheon Company Pension Plan for Salaried Employees for retirees with service under both plans, and whose benefit and liability were transferred to the Raytheon Company Pension Plan for Salaried Employees.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying financial statements are prepared on the accrual basis of accounting.

Investment Valuation and Income Recognition

The Plan and 401(h) account's interest in the Master Trust is stated at fair value. Net investment income / (loss) from the Master Trust is allocated proportionately on a monthly basis based on the Plan and 401(h) account's interest in the Master Trust. See Note 5 and Note 7 for additional information.

Contributions

Employer contributions are funded and recorded as determined by actuarial computation. See Note 4 for additional information.

Benefit Payments

Benefit payments to participants are recorded when paid.

Administrative Expenses

The Plan is administered by the Plan Administrator appointed by the Company's Vice President of Human Resources and Global Security. All expenses of the Plan, which primarily consist of professional and administrative fees, are paid by the Plan. Expenses specifically related to the Plan are included in the Statements of Changes in Net Assets Available for Benefits under "Administrative expenses." Additionally, expenses paid directly by the Master Trust, which primarily consist of investment management fees, are allocated proportionally on a monthly basis based on the Plan's interest in the Master Trust and are included in the Statements of Changes in Net Assets Available for Benefits under "Raytheon Master Pension Trust investment income."

Use of Estimates

The Plan's financial statements have been prepared in conformity with U.S. Generally Accepted Accounting Principles ("GAAP") and require the Plan Administrator to make significant estimates and assumptions that affect the reported amounts of net assets available for benefits at the date of the financial statements and the actuarial present value of accumulated plan benefits as of the benefit information date, the changes in net assets available for benefits during the reporting period and, when applicable, the disclosures of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

New Accounting Pronouncements

In May 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2015-07 "Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)." For all investments for which fair value is measured using the net asset value per share practical expedient, ASU 2015-07 removes the requirement to make certain disclosures and to categorize them within the fair value hierarchy. The new standard is preferable for disclosure as it removes inconsistency of the leveling of certain investments. As these investments have been removed from the fair value hierarchy tabular disclosure, the change

Raytheon Company Pension Plan for Hourly Employees

Notes to Financial Statements

December 31, 2014 and 2013

in accounting policy has resulted in a reconciliation of investment assets between the fair value hierarchy disclosure and the Master Trust net assets disclosure.

These disclosure changes are required for annual reporting periods beginning after December 15, 2016, and interim periods within those annual periods. The Plan's financial statements reflect the early adoption, including the retrospective application, as allowed by the accounting standard.

In July 2015, FASB issued ASU No. 2015-12 "I. Fully Benefit-Responsive Investment Contracts, II. Plan Investment Disclosures, III. Measurement Date Practical Expedient." Under Part I of the update, fully benefit-responsive investment contracts are measured, presented and disclosed only at contract value for defined contribution and health and welfare benefit plans. Part II of the update eliminates the requirement to disclose individual investments that represent 5 percent or more of net assets available for benefits and the net appreciation or depreciation for investment by general type. Additionally, Part II will require that investments of employee benefit plans be grouped only by general type, eliminating the need to disaggregate the investment in multiple ways. Part III of the update provides a practical expedient to permit plans to measure investment and investment-related accounting as of a month-end date that is closest to the plan's fiscal year-end, when the fiscal period does not coincide with a month-end.

The update is effective for fiscal years beginning after December 15, 2015. Earlier application is permitted. Management is currently evaluating the impact ASU 2015-12 will have on the Plan's financial statements and disclosures.

3. Actuarial Present Value of Accumulated Pension Plan Benefits

Accumulated plan benefits are those future periodic payments that are attributable under the Plan's provisions to the service employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of deceased employees, and (c) active employees or their beneficiaries. Benefits are based principally upon years of service and compensation. Benefits payable under all circumstances - retirement, death, and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by the Company's consulting actuary, Mercer, and is the amount which results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of the money (through discounts for interest) and the probability of payment (by means of decrements for death, withdrawal, or retirement) between the valuation date and the expected date of payment.

Raytheon Company Pension Plan for Hourly Employees

Notes to Financial Statements

December 31, 2014 and 2013

The significant actuarial assumptions used in the valuation as of December 31, 2013 and 2012, are as follows:

Assumed rate of return on investment for accumulated benefits	8.75%
Mortality basis

Assumption Changes

There have been changes in the actuarial assumptions since the prior valuation of the Plan, as follows:

- Healthy mortality was updated from section 430(h)(3) prescribed separate static annuitant and non-annuitant mortality tables to a modified version of the RP-2014 employee / retiree no collar tables, which has the projection scale backed off to 2007 and projected future generational mortality improvement based on a modified version of the MP-2014 scale, which reflects a 10-year downgrade period and an ultimate rate of improvement of 0.75%.
- Disability mortality was updated for participants of the Raytheon Company Pension Plan for Hourly Employees before the merger from 1985 Pension Disability Mortality for males and females to be the same as the mortality tables used for healthy participants.

The above changes were made to better reflect anticipated demographic experience.

As of December 31, 2013, the most recent valuation date, the actuarial present value of accumulated benefits is as follows:

Vested benefits	
Participants receiving benefits	\$435,501,706
Participants with deferred benefits	130,723,855
Active participants	<u>235,748,951</u>
Total vested benefits	801,974,512
Nonvested benefits	<u>4,575,742</u>
Total actuarial present value of accumulated plan benefits	<u>\$806,550,254</u>

The Plan includes assets of \$1,028,721 and \$899,956 at December 31, 2013 and 2012, respectively, which are funds that were voluntarily contributed by participants of the Plan to provide for a supplemental pension benefit. Voluntary contributions were discontinued effective December 31, 1995, however, accumulated contributions that have not been withdrawn by participants remain invested with Plan assets. Participants continue to earn interest on their contributions according to the Plan until they are withdrawn or paid as a supplemental pension benefit. Participants are always vested in their contributions and interest in the Plan. The supplemental pension benefits are paid from these contributed funds, and are not included in the total actuarial value of accumulated plan benefits shown above. There was \$7,877 of supplemental pension benefit payments made in 2013 from the voluntary contributions of participants.

The following is an analysis of changes in the present value of accumulated plan benefits:

Actuarial present value of accumulated plan benefits as of December 31, 2012	\$756,559,343
Benefits accumulated and non-investment (gains)/ losses	8,201,932
Increase for interest due to decrease in discount period	63,635,905
Benefit payments	(54,078,948)
Change in actuarial assumptions	<u>32,232,022</u>

4. Funding Policy

Pension Benefits

The employer's contributions are actuarially determined to fund the Plan's current normal costs on a current basis and to generally fund the existing unfunded liability related to qualified service prior to the valuation date in accordance with the amortization schedules prescribed by ERISA minimum funding requirements (as amended by the Pension Protection Act). At the Company's discretion, and to the extent allowable under maximum tax deductibility regulations, contributions above the ERISA minimum requirements may be made to the Plan. Contributions for the years ended December 31, 2014 and 2013 met the minimum funding requirements of ERISA.

Medical Benefits

The medical benefits to be provided through the 401(h) account will be funded by participant and employer contributions. Company contributions to the Plan, which are specifically designated by the Company at the time made as contributions to fund medical benefits, are maintained in a separate Medical Retiree Account (Note 5). To the extent assets in this account are not sufficient to fund such medical benefits, such benefits shall be paid from such other funding vehicles as the Company may establish, or in the absence of such other funding vehicles, directly by the Company. Assets designated for pension benefits may not be used to pay for medical benefits.

5. 401(h) Account

The Plan includes a medical-benefit component in addition to the normal retirement benefits to fund a portion of the postretirement obligations for retirees and their beneficiaries in accordance with Section 401(h) of the Internal Revenue Code (IRC). A separate account has been established and maintained in the Plan for the net assets related to the medical-benefit component (401(h) account). In accordance with IRC Section 401(h), the Plan's investments in the 401(h) account may not be used for, or diverted to, any purpose other than providing health benefits for retirees and their beneficiaries. Any assets transferred to the 401(h) account from the defined benefit pension plan in a qualified transfer of excess pension plan assets (and any income allocable thereto) that are not used during the plan year must be transferred out of the account to the pension plan. The obligations related to the health benefits are not included in this plan's present value of accumulated plan benefits but are reflected as obligations in the financial statements of the Raytheon Retiree Health Benefits Plan. Employer contributions or qualified transfers to the 401(h) account are determined annually and are at the discretion of the plan sponsor. Certain of the Plan's net assets are restricted to fund a portion of postretirement health benefits for retirees and their beneficiaries in accordance with IRC Section 401(h).

The following table presents the components of the net assets as of:

7. Master Trust

Summary Financial Information

The Plan's assets are held in the Master Trust, which was established for the investment of assets of the Plan and several other Company sponsored retirement plans. The assets of the Master Trust are held by the Bank of New York Mellon ("BNY Mellon"), the Trustee. The Investment Committee, appointed by the Chairman and CEO of the Company, periodically reviews the asset allocation and performance of the investments held in the Master Trust. The investment policy, as approved by the Investment Committee, permits asset diversification to include a combination of cash and cash equivalents, publicly traded equity securities, private equity funds, fixed-income securities, private real estate funds, commingled funds and other investments such as insurance contracts, derivatives and repurchase agreements.

Investment securities are exposed to various risks, such as interest rate, market, currency, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the value of investment securities will occur and such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Fair Value Measurements

The accounting standard for fair value measurements provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. Fair value is defined as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. The accounting standard established a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. The following summarizes the three levels of inputs required as well as the assets and liabilities that we value using those levels of inputs.

- Level 1:** Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2:** Observable inputs, other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs which are observable or have been corroborated by observable market data for substantially the full term of the related assets or liabilities.
- Level 3:** Unobservable inputs supported by little or no market activity that are significant to the fair value of the assets or liabilities.

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. See valuation policy section for further information.

Changes in Fair Value Levels

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

For the years ended December 31, 2014 and December 31, 2013, there were no transfers in or out of Levels 1, 2 or 3.

Valuation Policy

The Plan's interest in the Master Trust is stated at fair value. The Trustee values Master Trust investments as follows:

Cash and cash equivalents are valued at amortized cost, which approximates fair value.

Investments in equity securities (common and preferred) and equity securities sold short, if any, are valued at the exchange traded closing price if available.

Investments in fixed income securities (U.S. Government, domestic and foreign bonds, asset backed securities and term loans) are valued by a pricing service which determines valuations for normal institutional-size trading units of such securities using methods based upon market transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders, or at fair value as determined in good faith by the Trustee of the Master Trust and management.

Investments denominated in foreign currencies are translated into U.S. Dollars using the last reported exchange rate.

Investments in registered investment companies are valued at their last reported net asset value.

Commingled funds, private equity funds and private real estate funds are generally valued at their last reported net asset value. Certain commingled funds, private equity funds and private real estate funds are recorded at fair market value which considers, but is not limited to fair values reported by the investment advisor, audited financial statements, and independently appraised values. In the event that audited financial statements for these investments are not available in time to prepare our financial statements or management believes the value reported by the investment advisor does not accurately reflect fair value due to an event in the market place, such as a prime-broker filing for bankruptcy, management will adjust the reported value to fair value based upon information provided by the investment manager or independent valuation experts.

Unallocated insurance contracts are valued at their contract price which approximates fair value.

Securities and other assets for which market quotations are not readily available or for which the above valuation procedures are deemed not to reflect fair value are valued in a manner that is intended to reflect their fair value.

Valuation policies for derivative investments are disclosed in the Derivative Policy paragraph.

Investment Income (Loss)

The Trustee maintains separate records of each plan's proportionate share in the Master Trust's investment accounts. The Plan's share of investment income (loss) and net appreciation (depreciation) in the fair value of investments of the Master Trust is included in the Statements of Changes in Net Assets Available for Benefits as Master Trust investment income (loss). The net appreciation (depreciation) in the fair value of investments consists of the realized gains (losses) and the change in unrealized appreciation (depreciation) on those investments.

Under the Master Trust Agreement, each plan's assets are jointly invested. The Plan uses the unit participation method to calculate the Plan's interest in the Master Trust. Under this method, contributions made to and benefits paid from the Master Trust result in increases or decreases in units of participation. All Master Trust income or loss results in a change in unit value.

Dividends are recorded on the ex-dividend date and interest income is accrued as earned. All security transactions are recorded on the trade date. Premiums and discounts on debt securities are amortized to maturity. Gains or losses on sales of securities are based on average cost.

Investments Sold Short

As of December 31, 2014 and 2013, the Master Trust was not invested in any securities sold short.

The Master Trust may sell a security it does not own in anticipation of a decline in the fair value of that security or as part of its core investment strategy. The Master Trust, in "selling short," sells borrowed securities that must at some date be repurchased and returned to the lender. The risk associated with this practice is that if the market value of the securities sold short increases, the Master Trust may realize losses upon repurchase at prices which may exceed the proceeds received from the sale of the security. Further, in unusual circumstances, the Master Trust may be unable to purchase securities to close its short positions. The Master Trust is obligated to pay a prime broker interest based on the value of the securities sold short and any dividends declared on the securities sold short. Such fees and dividends are recorded on the accrual basis as an expense to the Master Trust.

Repurchase Agreements

As of December 31, 2014 and 2013, the Master Trust was not directly invested in any repurchase agreements.

The Master Trust may lend extra cash through the use of repurchase agreements whereby the Master Trust agrees to purchase and automatically agrees to sell certain securities at a mutually agreed-upon date and price. At the same time, the counterparty to this agreement agrees to pledge some of its securities. The underlying collateral securities consist of securities in which the Master Trust is permitted to invest.

Securities Lending Program

The Master Trust previously participated in a securities lending program with the Trustee and exited the program by December 31, 2013. The program allowed the Trustee to loan securities, which are assets of the Master Trust, to approved brokers (the "Borrowers"). The Trustee required Borrowers, pursuant to a security loan agreement, to deliver collateral to secure each loan. The collateral required 102% of the fair value of U.S. securities borrowed and 105% for non-U.S. securities borrowed. The Master Trust bore the risk of loss with respect to the unfavorable change in fair value of the invested cash collateral. However, the Borrower bore the risk of loss related to the decrease in the fair value of the securities collateral and, therefore, will have to deliver additional securities to maintain the required collateral. In the event of default by the Borrower, the Trustee shall indemnify the Master Trust by purchasing replacement securities equal to the number of unreturned loaned securities or, if replacement securities are not able to be purchased, the Trustee shall credit the Master Trust for the market value of the unreturned securities. In each case, the Trustee would apply the proceeds from the collateral for such a loan to make the Master Trust whole.

A portion of the income generated upon investment of cash collateral is remitted to the Borrowers, and the remainder is allocated between the Master Trust and the Trustee in its capacity as a security agent. Securities lending income allocated to the Master Trust amounted to \$34,763 as of December 31, 2013. Securities lending income allocated to the Trustee amounted to \$8,762 as of December 31, 2013.

Derivative Policy

The Master Trust enters into contractual arrangements classified as derivatives in carrying out its investment strategy, principally to: (1) hedge a portion of the Master Trust's portfolio to limit or minimize exposure to certain risks, (2) gain exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) increase investment returns by reducing the cost of structuring the portfolio or capturing value disparities between financial instruments. The Master Trust may utilize both exchange traded investment instruments such as equity and fixed income futures and options contracts and over-the-counter derivatives such as forward contracts and swaps. Select major financial institutions are used in derivatives transactions. When engaging in over the counter derivatives and forward foreign exchange contracts, there is exposure to credit loss in the event of nonperformance by the counterparties to these transactions. The Master Trust manages this exposure through credit approvals, limits, monitoring procedures, and to the extent possible, by restricting the period over which unpaid balances are allowed to accumulate. The Master Trust does not anticipate nonperformance by counterparties to these contracts.

The following tables present the values of derivatives carried on the Statement of Net Assets and the Statement of Changes in Net Assets of the Master Trust as of and for the year ended December 31, 2014:

The following is a summary of the significant accounting policies associated with the Master Trust's use of derivatives:

Forward Foreign Currency Exchange Contracts

A forward foreign currency exchange contract ("forward currency contract") is a commitment to purchase or sell a foreign currency at a future settlement date and at a negotiated rate.

Forward currency contracts are utilized to hedge a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies.

Forward currency contracts are marked-to-market at the prevailing forward exchange rate of the underlying currencies and the difference between contract value and market value is recorded as unrealized appreciation (depreciation) in Master Trust net assets. When the forward exchange contract is closed, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Sales and purchases of forward currency contracts having the same settlement date and broker are offset and any gain (loss) is realized on the date of offset.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to hedge, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract.

Futures Contracts

A futures contract is a contractual agreement to make or take delivery of a standardized quantity of a specified grade or type of commodity or financial instrument at a specified future date in accordance with terms specified by a regulated futures exchange.

The Master Trust may use equity index, fixed income, cash and cash equivalents and commodities futures contracts to manage exposure to the market. Buying futures tends to increase the Master Trust's exposure to the underlying instrument. Selling futures tends to decrease the Master Trust's exposure to the underlying instrument held, or hedge the fair value of other fund investments.

Futures contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a futures contract, the Master Trust is required to deposit either in cash or securities an amount equal to a certain percentage of the nominal value of the contract ("initial margin"). Pursuant to the futures contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are recorded as "margin flows," and the accumulated balances resulting from those flows are represented on the balance sheet as "cash held at broker" and "cash due to broker." The Master Trust will also record an unrealized gain or loss on futures, which is calculated as the difference between the notional cost and the notional market value of open futures contracts.

Futures contracts involve, to varying degrees, credit and market risks. The Master Trust enters into futures contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the futures contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instrument or if there is an illiquid secondary market for the contracts. In addition, there is the risk that there may not be an exact correlation between a futures contract and the underlying index or security.

At December 31, 2014, U.S. Government Bonds with a par value of \$20,209,000 (\$20,316,268 fair value) were pledged as collateral for open equity, fixed income and cash and cash equivalents futures positions. These bonds are restricted from trading until the futures positions for which they are pledged as collateral are settled. A cash balance of \$31,406,093 was pledged to cover margin requirements for open futures contracts.

At December 31, 2013, U.S. Government Bonds with a par value of \$21,140,000 (\$20,754,673 fair value) were pledged as collateral for open equity and fixed income futures positions. These bonds are restricted from trading until the futures positions for which they are pledged as collateral are settled. A cash balance of \$3,342,273 was posted to cover margin requirements for open futures contracts.

Options

As of December 31, 2014, the Master Trust was not invested in any options.

The Master Trust may invest in option contracts. An option contract is a contract in which the writer of the option grants the buyer of the option the right to purchase from ("call option"), or sell to ("put option"), the writer a designated instrument at a specified price within a specified period of time. Certain options, including options on indices, will require cash settlement by the Master Trust if the option is exercised. The Master Trust may enter into put or call option contracts in order to: hedge against potential adverse price movements in the value of the portfolio assets, as a temporary substitute for selling selected investments; to lock in the purchase price of a security or currency that it expects to purchase in the near future, as a temporary substitute for the purchase of selected investments; and to enhance potential gain.

When the Master Trust purchases or writes an option, an amount equal to the premium paid or received by the Master Trust is recorded as an asset or liability and is subsequently adjusted to the current market value of the option purchased or written. Options purchased or written are valued at the last sale price or, in the absence of a sale, the mean between the closing bid and asked prices or at the most recent asked price (bid for purchased options) if no bid and asked price are available. Over-the-counter purchased or written options are valued using dealer supplied quotations. Gain and loss is recognized when the option contract expires or is closed.

If the Master Trust writes a covered call option, the Master Trust foregoes, in exchange for the premium, the opportunity to profit during the option period from an increase in the value of the underlying security above the exercise price. If the Master Trust writes a put option, it accepts the risk of a decline in the value of the underlying security below the exercise price. Over-the-counter options have a risk of the potential inability of counterparties to meet the terms of their contracts. The Master Trust's maximum exposure to purchased options is limited to the premium initially paid. In addition, certain risks may arise upon entering into option contracts prior to the expiration date and that a change in value of the option contract may not correlate exactly with changes in the value of the securities or currencies hedged.

A summary of open purchased equity options as of December 31, 2013 is presented below:

Swaps

As of December 31, 2014 and 2013, the Master Trust was not invested in any swaps.

The Master Trust may invest in interest rate swap contracts. The Master Trust uses interest rate swap contracts to manage its exposure to interest rates. Interest rate swap contracts entered into by the Master Trust typically represent the exchange by the Master Trust with a counterparty of a commitment to make variable rate and fixed rate payments with respect to a notional amount of principal. Such contracts may have a term of one to ten years, but typically require periodic interim settlement in cash, at which time both the value of the index or security and the specified variable interest rate are reset for the next settlement period. During the period that the swap contract is open, the contract is marked-to-market as the net amount due to or from the Plan in accordance with the terms of the contract based on the closing level of the relevant index or security and interest accrual through the valuation date. Changes in the value of the swap contract are recorded as unrealized gains or losses, while periodic cash settlements are recorded as realized gains or losses.

The Master Trust may invest in credit default swaps. Credit default swap contracts entered into by the Master Trust typically represent the exchange by the Master Trust with a counterparty of a commitment to provide a level of credit protection for a commitment to receive interest at a fixed rate based on the potential risk of default of the relevant underlying issuer. Providing credit protection to a counterparty tends to increase a Master Trust's exposure to the underlying instrument. Receiving credit protection from a counterparty tends to decrease a Master Trust's exposure to the underlying instrument held by a Master Trust, or hedge the fair value of other Master Trust investments. Such contracts may have a term of one to ten years, but typically require periodic interim settlement in cash. During the period that the credit default swap contract is open, the contract is marked-to-market in accordance with the terms of the contract based on the current interest rate spreads and credit risk of the referenced obligation of the underlying issuer and interest accrual through valuation date. Changes in the value of the credit default swap are recorded as unrealized gains or losses, while periodic cash settlements are recorded as realized gains or losses.

Entering into a swap contract involves, to varying degrees, elements of credit, market and interest rate risk in excess of the amounts reported in the statement of net assets available for benefits. Notional principal amounts are used to express the extent of involvement in the transactions, but are not delivered under the contract. Accordingly, credit risk is limited to any amounts receivable from the counterparty. To reduce credit risk from potential counterparty default, the Master Trust enters into swap contracts with counterparties whose creditworthiness has been approved by the Trustee of the Trust. The Master Trust bears the market risk arising from any change in index or security values or interest rates.

8. Termination Policies

The Company has not expressed any intent to terminate the Plan or discontinue its contributions. However, in the event the Plan is discontinued:

- a) The assets comprising the Plan, including the net income/ (loss) of the Plan shall be revalued at market by the Trustee.
- b) The Plan provides that the net assets of the Plan shall be allocated among the participants and beneficiaries of the Plan in the order provided by ERISA.
- c) To the extent unfunded vested benefits exist, ERISA provides that such benefits are payable by the Pension Benefit Guaranty Corporation (the "PBGC") to participants, up to specified limitations, as described in ERISA.

Whether all participants receive their full or partial benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated plan benefit obligations, and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

The Company may terminate the Plan in whole or in part at any time. This summary of termination priorities is provided for general information purposes only. Participants should refer to the Plan document for more information.

9. Party-in-Interest Transactions

The Bank of New York Mellon ("BNY Mellon") is the Trustee and Custodian of the Plan, and is therefore a party-in-interest with respect to the Plan. Certain investments within the Master Trust were advised by or affiliated with BNY Mellon. For the years ended December 31, 2014 and 2013, expenses specifically related to the Plan of \$153,251 and \$190,748, respectively, were paid to BNY Mellon and were incurred and included in "Administrative expenses." Additionally, the Plan was allocated approximately \$306,608 and \$254,240 of expenses paid directly by the Master Trust to BNY Mellon for the years ended December 31, 2014 and 2013, respectively, and those amounts are included in "Raytheon Master Pension Trust investment income."

As of December 31, 2014 and 2013, expenses to be paid to BNY Mellon of \$99,591 and \$98,444, respectively, were accrued. Accrued expenses to be paid to BNY Mellon specifically related to the Plan are included in "Accrued administrative expenses" and the Plan's allocation of master Trust accrued expenses to be paid to BNY Mellon are included in "Other liabilities."

All of these transactions either fall outside the scope of, or are exempt from, ERISA's prohibited transaction rules.

10. Tax Status

The Internal Revenue Service (the "IRS") has determined and informed the Company by letter dated September 23, 2013, that the design of the Plan meets the requirements for qualification under Code section 401(a), on which the tax exemption of the Trust under Code section 501(a) is based. The Plan has been amended since receiving the determination letter. The Plan Administrator and the Company's benefits counsel believe that the current design and operation of the Plan are

consistent with continued qualification of the Plan and exemption of the Trust in the context of applicable IRS procedures.

The Plan adopted the provisions of uncertain tax positions that provide criteria for the recognition, measurement, presentations and disclosure of uncertain tax positions beginning January 1, 2009. The Plan may from time to time hold investments that give rise to certain tax liabilities. Based upon management's assessment, the Plan has not recognized any tax liabilities at December 31, 2014 and 2013, respectively. The Plan is subject to examinations by taxing jurisdictions; however, there are currently no audits for any tax period in progress. The Plan Administrator believes the Plan is no longer subject to federal tax examination for years prior to 2012.

11. Risks and Uncertainties

The Plan financial statements are based on the application of U.S. GAAP, which require the Plan to make estimates and assumptions about future events that affect the amounts reported in financial statements and the accompanying notes.

Contributions to the Plan are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements. The investments of the Plan, which are held in the Master Trust, are exposed to various risks, such as interest rate, market and credit risks. See Note 7 for additional information with respect to investment risk.

12. Subsequent Events

The Plan has evaluated subsequent events and transactions subsequent to December 31, 2014 through the date the Plan's financial statements were available to be issued, September 25, 2015.
