Squire Patton Boggs Cash Balance Pension Plan

Notes to the Financial Statements

December 31, 2014 and 2013

Note 1: Description of Plan

The following description of the Squire Patton Boggs Cash Balance Pension Plan (the “Plan”) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan’s provisions.

General

The Plan is a cash balance defined benefit plan that covers all partners, and senior partners that are designated individuals, of Squire Patton Boggs (US) LLP (the “Firm”) (i) who are U.S. citizens and participate in the Squire Patton Boggs Retirement Savings Plan (the “RSP”), as well as (ii) who are not U.S. citizens, but are resident in a U.S. office and are subject to U.S. federal income taxes and participate in the RSP. Legacy Patton Boggs partners and designated individual employees were eligible to participate in the Plan as of June 1, 2014.

The Plan is administered by the Firm’s Retirement Plan Committee (the “Committee”). The Committee has overall responsibility for the operation and administration of the Plan. The Committee determines the appropriateness of the Plan’s investment and monitors investment performance.

Each participant is placed into a Basic Contribution Credit Tier based on points assigned by the Firm’s Management Committee as of his or her entry date. A participant’s Plan benefit is determined by the percentage of his or her distributable net income, up to \$200,000, credited to his or her notional Cash Balance Account, as a Basic Contribution Credit, which is determined by the tier in which he or she is placed. Each Plan year the Cash Balance Account of each participant, who is credited with at least 1,000 hours of service under the Plan, will be credited with an annual Basic Contribution Credit. In addition, Cash Balance Accounts receive an annual Interest Credit which is equal to the net rate of return on Plan assets for the Plan year multiplied by the balance in the Cash Balance Account. A participant is fully vested in his or her Plan benefit after three years of service.

Effective January 1, 2014, the Firm amended the Plan to temporarily suspend the benefit accruals under the Plan. The Plan was subsequently amended on May 30, 2014 for the continuation of benefit accruals as of January 1, 2014.

The Plan complies with Section 401(a) of the Internal Revenue Code of 1986, as amended (the “Code”) and is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”). The Firm received a favorable determination letter from the Internal Revenue Service regarding the tax qualification status of the Plan on August 2, 2012.

Effective June 1, 2014, the name of the Plan was changed from Squire Sanders Cash Balance Pension Plan.

Pension Benefits

Participants are entitled to receive their accrued Plan benefit after separation from service. Participants may elect to receive their Plan benefit in a lump-sum distribution or life annuity. If a participant separates from service with the Firm for reasons other than death or disability and prior to normal retirement age with less than three years of vesting service, he or she will forfeit his or her accrued Plan benefits.

Note 1: Description of Plan (continued)

Pension Benefits (continued)

Participants who attain normal retirement age (as defined by the Plan) have the option to transfer their account balance to the RSP. During 2014, these transfers for 2013 totaled \$3,740,735. Subsequent to December 31, 2014, balances for 2014 totaling \$2,158,014 were transferred to the RSP.

In the event a participant dies, a benefit equal to the deceased participant's vested accrued Plan benefit is payable to his or her surviving spouse or beneficiary as set forth in the Plan document.

Forfeited Benefits

At December 31, 2014 and 2013, forfeited nonvested benefits totaled \$507 and \$250, respectively. Forfeitures are to be used to reduce future Firm contributions or to pay administrative expenses of the Plan.

Note 2: Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Basis of Presentation

The Plan follows authoritative guidance issued by the Financial Accounting Standards Board ("FASB") which established the FASB Accounting Standards Codification ("ASC") as the single source of authoritative accounting principles generally accepted in the United States of America.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated Plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Note 2: Summary of Significant Accounting Policies (continued)

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Committee determines the Plan's valuation policies utilizing information provided by its investment advisers and custodians. See Note 6 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Actuarial Present Value of Accumulated Plan Benefits

The actuarial present value of a participant's accumulated Plan benefit is the value of such participant's Cash Balance Account as of the determination date. Each Plan participant has a notional account to which Basic Contributions Credits and Interest Credits are credited and which is used to determine the amount of the benefit payable to the participant. The actuarial present value of an annuity under the Plan is based upon an interest rate of (i) 4.00% or (ii) the applicable interest rate for the Plan year under Section 417(e)(3)(A)(11)(II) of the Code, whichever is less, and the IRS Static Mortality Table. It is assumed, however, the Plan benefits will be paid in a lump-sum form and equal the value of a participant's Cash Balance Account.

The actuarial present value of accumulated Plan benefits is determined by the actuary for the Plan, Fidelity Consulting Services, and is equal to the present value of all benefits for inactive participants plus the present value of accrued Plan benefits for active participants, in accordance with the Plan document and applicable law.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Administrative Expenses

The administrative expenses of the Plan are paid from the Plan assets, unless the Firm elects to pay such expenses. Certain investment related expenses are included in net appreciation of fair value of investments in the accompanying statement of changes in net assets available for benefits.

Subsequent Events

The Plan has evaluated subsequent events through August 13, 2015, the date the financial statements were available to be issued.

Note 3: Funding Policy

Note 4: Information Certified by the Trustee

Certain information related to investments disclosed in the accompanying financial statements and supplemental schedules, including investments held at December 31, 2014 and 2013, and net appreciation in fair value of investments, interest and dividends for the year ended December 31, 2014, was obtained or derived from information supplied to the Plan Administrator and certified as complete and accurate by Branch Banking and Trust Company (the trustee of the Plan).

Note 6: Fair Value Measurements

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to unobservable inputs (level 3). The three levels of the fair value hierarchy are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 Inputs to the valuation methodology include:

- quoted prices for similar assets or liabilities in active markets;
- quoted prices for identical or similar assets or liabilities in inactive markets;
- inputs other than quoted prices that are observable for the asset or liability; and
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The fair value measurement level within the fair value hierarchy of an asset or liability is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodology used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2014 and 2013.

Shares of registered investment companies: Mutual funds are valued at quoted market prices, which represent the net asset value of shares held by the Plan at year-end.

The following table sets forth by level the Plan's assets at fair value as of December 31, 2014:

	Level 1	Level 2	Level 3	Total

Note 9: Party-in-Interest Transactions

Stanley, Hunt, DuPree & Rhine (“SHDR”), a division of BB&T, the trustee of the Plan, serves as the investment manager for the Plan. Additionally, during the years ended December 31, 2014, the Plan invested in a money market fund managed by a subsidiary of BB&T. Therefore, these entities qualify as a party-in-interests. During 2014, the Firm provided legal services to BB&T.

Fidelity Consulting Services provides actuarial and recordkeeping services to the Plan. During 2014, Fidelity Management Trust Company, a related party to Fidelity Consulting Services, is the trustee of the RSP. Therefore, Fidelity Consulting Services qualifies as a party-in-interest.

Note 10: Plan Termination

Although it has not expressed any intent to do so, the Firm has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of the Plan and ERISA. In the event of Plan termination, all participants would become fully vested in their Plan benefits.

Note 11: Tax Status

The Plan obtained its latest determination letter on August 2, 2012, in which the Internal Revenue Service states that the Plan, as then designed, was in compliance with the applicable sections of the Code. The Plan has been amended since receiving the determination letter. However, the Plan Administrator believes that the Plan is currently designed and being operated in compliance with the applicable requirements of the Code.

Accounting principles generally accepted in the United States of America require Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by taxing authorities. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. During the year ended December 31, 2012, the Internal Revenue Service undertook an audit of the 2010 plan year. The inquiry was completed and a satisfactory closing letter was issued on January 15, 2014. The Plan Administrator believes it is no longer subject to income tax examinations for years prior to 2013.

Note 12: Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated Plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Actuarial Assumptions and Methods (continued)

Actuarial Value of Plan Assets for Funding Purposes: The actuarial value of assets is equal to the market value of assets (including discounted employer contributions receivable) on the valuation date.

Actuarial Cost Method: The unit credit cost method is used for ERISA funding target (FT) and FASB ASC 960 accumulated benefit obligation (ABO) purposes. Under this method, accrued pension benefits are determined for all eligible active participants. These benefits reflect service, salary and negotiated benefit increases to date. The liability is then equal to the present value of all benefits (PVAB) for inactive participants plus the PVAB for active participants.

The normal cost is determined on an individual basis for all active participants who have not attained the assumed retirement age and is equal to the present value of the difference between the current accrued benefit and the anticipated accrued benefit one year later, with the accrued benefit based upon earnings, or negotiated benefit increases, to date in both cases. The total normal cost is based upon the sum of the individual normal costs.

The projected unit credit method is used for IRS maximum deductible limit cushion amount purposes. Under this method, accrued pension benefits are determined for all eligible active participants. These benefits reflect service to date and anticipated salary and negotiated benefit increases to the assumed retirement age. The liability is then equal to the present value of all benefits for inactive participants plus the PVAB for active participants.

The normal cost is determined on an individual basis for all active participants who have not attained the assumed retirement age and is equal to the present value of the difference between the current accrued benefit and the anticipated accrued benefit one year later, with the accrued benefit based upon earnings and negotiated benefit increases projected to assumed retirement age in both cases. The total normal cost is based upon the sum of the individual normal costs.

Actuarial Assumptions and Methods (continued)

Actuarial Value of Plan Assets for Funding Purposes: The actuarial value of assets is equal to the market value of assets (including discounted employer contributions receivable) on the valuation date.

Actuarial Cost Method: The unit credit cost method is used for ERISA funding target (FT) and FASB ASC 960 accumulated benefit obligation (ABO) purposes. Under this method, accrued pension benefits are determined for all eligible active participants. These benefits reflect service, salary and negotiated benefit increases to date. The liability is then equal to the present value of all benefits (PVAB) for inactive participants plus the PVAB for active participants.

The normal cost is determined on an individual basis for all active participants who have not attained the assumed retirement age and is equal to the present value of the difference between the current accrued benefit and the anticipated accrued benefit one year later, with the accrued benefit based upon earnings, or negotiated benefit increases, to date in both cases. The total normal cost is based upon the sum of the individual normal costs.

The projected unit credit method is used for IRS maximum deductible limit cushion amount purposes. Under this method, accrued pension benefits are determined for all eligible active participants. These benefits reflect service to date and anticipated salary and negotiated benefit increases to the assumed retirement age. The liability is then equal to the present value of all benefits for inactive participants plus the PVAB for active participants.

The normal cost is determined on an individual basis for all active participants who have not attained the assumed retirement age and is equal to the present value of the difference between the current accrued benefit and the anticipated accrued benefit one year later, with the accrued benefit based upon earnings and negotiated benefit increases projected to assumed retirement age in both cases. The total normal cost is based upon the sum of the individual normal costs.
