Statement by Enrolled Actuary
To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

To the Plan Administrator
Georgia-Pacific LLC Hourly Pension Plan

Report on the financial statements

We were engaged to audit the accompanying financial statements of the **Georgia-Pacific LLC Hourly Pension Plan** (the “Plan”), which comprise the statements of net assets available for benefits as of December 31, 2014 and 2013, and the related statement of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for disclaimer of opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the certified information described in Note 3, except for comparing such information with the related information included in the financial statements. We have been informed by the Plan administrator that the certifying entity meets the requirements of 29 CFR 2520.103-8. The Plan administrator obtained a certification from this entity as of December 31, 2014 and 2013, and for the years then ended, stating that the certified information provided to the Plan administrator is complete and accurate.

Disclaimer of opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Report on form and content in compliance with DOL rules and regulations

The form and content of the information included in the financial statements, other than that derived from the certified information described in Note 3, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

Notes to financial statements

1 Description of the Plan

The following description of the Georgia-Pacific LLC Hourly Pension Plan (the Plan) provides only general information. Participants should refer to the Plan document for more complete information.

General

The Plan is a noncontributory defined benefit pension plan, established to provide retirement, death, and disability benefits. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). The Plan covers certain groups of non-union hourly employees and union hourly employees of Georgia-Pacific LLC, a Delaware limited liability company, and its affiliates (the Employer or Company). Certain non-union hourly employees are eligible to participate upon the participant's date of hire. Certain groups of union hourly employees are eligible to participate as of their initial dates of hire, if participation in the Plan is negotiated in the collective bargaining agreement governing their employment. A leased employee, as defined in Section 414(n) of the Internal Revenue Code (the Code) is not eligible to participate in the Plan.

The trustee of the Plan, Bank of New York Mellon/BNY Mellon, N.A., formerly Mellon Bank, N.A. (the trustee), and the Koch Industries, Inc. Investment Committee manage the Plan's investment assets. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).

Funding Policy

The Company makes contributions to the Plan based on the funding recommendations of the Plan's independent consulting actuary to meet the minimum requirements under ERISA. The Plan was in compliance with applicable ERISA funding requirements for 2014 and 2013.

Vesting

Participants become 100% vested upon completion of five years of vesting service or attainment of normal retirement age (age 65) while still an employee of the Company. If a participant terminates employment before satisfying these vesting requirements, that participant forfeits the right to receive the benefits accumulated.

Pension Benefits

At normal retirement, participants are entitled to monthly pension benefits based on years of credited service, as defined by the Plan document. A participant may elect early retirement at age 55 with five or more years of vesting service, as defined by the Plan document. Early retirement benefits payable before age 62 are reduced as defined by the Plan from the normal retirement benefit. The amount of the monthly pension benefit is specified in the individual exhibits to the Plan document.

The normal form of payment is a single life annuity if the participant is not married. The normal form of payment for a married participant is a joint and 50% survivor (spouse) annuity, unless an election is made to receive the benefit in another form.

Disability Benefits

Active participants who have completed five years of service and who become permanently and totally disabled are eligible to receive the normal monthly retirement benefits, commencing six months following the last day worked by the participant. Benefits cease upon recovery and the participant's return to service or at age 65 when normal retirement benefits become payable.

Death Benefits

The spouse of any active or terminated participant who has completed five years of service is entitled to a pre-retirement survivor benefit payable in the event of the participant's death prior to actual retirement.

2 Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared under the accrual method of accounting.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts of assets and liabilities and changes therein, disclosures of contingent assets and liabilities and the actuarial present value of accumulated plan benefits at the date of the financial statements. Accordingly, actual results may differ from those estimates.

Investment Valuation and Income Recognition

The Plan's investment in the Koch Companies Defined Benefit Master Trust (Koch Master Trust) is stated at fair value (Note 3). Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (Note 4).

Investments held by the master trust that are traded on a national securities exchange are valued at the last reported sales price on the last business day of the Plan year. Investments in preferred stocks, government bonds, corporate bonds, other corporate debt securities, and cash equivalents are valued based on yields available on comparable securities. Investments in common trust funds are based on quoted redemption values on the last business day of the Plan year, as determined by the trustee of the Plan. Investments in limited partnerships are valued at appraised values at the end of the Plan year as reported by the partnerships' respective general partners and the trustee of the Plan. Appraised values are developed using various modeling techniques, including, but not limited to, the strong correlation of the underlying security to one or more broad-based securities market indices and/or other financial instruments. Other investments consist primarily of synthetic equity options that are indexed to specific equity market benchmarks and are valued based upon observable market data. Investments in derivative instruments are marked to market daily based on quoted prices or widely accepted models that use readily observable market parameters as their basis. Amounts owed or due on open derivative contracts are recorded as receivables or payables to the master trust. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Investment related expenses of the master trust, such as trustee and investment manager fees, are paid by the master trust and are netted against (added to) net investment gain (loss) from the master trust.

Payment of Benefits

Benefits are recorded in the year in which they are paid.

Administrative Expenses

Administrative expenses include Pension Benefit Guaranty Corporation premiums, record keeping, legal, and other administration fees directly incurred by the Plan.

Accounting Standards Update

In July 2015 the Financial Accounting Standards Board issued Accounting Standards Update 2015-12 for Accounting Standards Codification Topic 960. The update eliminates the requirement to disclose (1) individual investments that represent 5 percent or more of net assets available for benefits and (2) the net appreciation or depreciation for investments by general type. The Plan has elected to early adopt the amendment and has retrospectively applied the changes to these comparative financial statements.

Subsequent Events

The Plan administrator has evaluated subsequent events through September 15, 2015, the date the financial statements were available to be issued.

3 Financial Information of Master Trust

The Koch Master Trust was established for the collective investment of the assets of participating employee benefit plans of Koch Industries, Inc. and certain subsidiaries. Fund assets are allocated among participating plans by assigning to each plan those transactions (primarily contributions, benefit payments, and specific administrative expenses) which can be specifically identified. Income and expenses resulting from the collective investment of the assets are allocated (on a monthly or daily basis) in proportion to the fair value of the assets assigned to each plan.

The assets of the Koch Master Trust are accounted for on a units-of-participation basis. At December 31, 2014 and 2013, the Plan held 2,833,448,257 and 2,693,363,012 units of the Koch Master Trust with an individual unit estimated fair value of \$1, respectively. The Plan's unit holdings at December 31, 2014 and 2013 had fair values of \$2,833,448,257 and \$2,693,363,012, respectively, which represented approximately 51.7% and 51.6% of the net assets of the Koch Master Trust.

The trustee of the Plan has certified the completeness and accuracy of substantially all investments reflected in the accompanying statements of net assets available for benefits and substantially all of the related investment activity reflected in the statements of changes in net assets available for benefits of the Plan. The net assets of the Koch Master Trust certified as complete and accurate by the trustee totaled \$5,458,619,094 and \$5,214,257,991 at December 31, 2014 and 2013, respectively. Net investment gain (loss) of the Koch Master Trust certified as complete and accurate by the trustee totaled \$371,252,470 and \$320,123,802, and excluded \$18,374,631 and \$7,904,702 of net investment gain related to certain investments in limited partnerships and investment expenses for the years ended December 31, 2014 and 2013, respectively. The Plan's independent auditors have not audited investment information certified by the trustee of the Plan.

A summary of the net assets of the Koch Master Trust is as follows:

December 31	2014	2013
Assets:		
Investments at fair value:		
Cash and cash equivalents	\$ 1,963,884,942	\$ 2,724,740,354

Net assets	\$ 5,476,993,725	\$ 5,222,162,690

(a) In 2013, \$2,655,437,953 was recategorized from common trust funds to cash and cash equivalents based on the Trust trading activity.

Net investment gain (loss) for the Koch Master Trust is as follows:

For the years ended December 31	2014	2013
Net investment gain:		
Net appreciation in fair value of investments	\$200,592,598	\$177,916,070
Interest, dividend and other income	195,608,230	144,712,266
Investment expenses	(14,478,430)	(5,676,729)
Net investment gain of Koch Companies Defined Benefit Master Trust	\$381,722,398	\$316,951,607

The Koch Master Trust's overall strategy is to provide investment diversification to minimize risk and maximize long-term investment returns while maintaining sufficient liquidity. As a part of this strategy, the master trust holds certain investments that have redemption restrictions, future funding commitments, and other requirements that vary by individual investment. Redemption restrictions are generally short term with the exception of certain limited partnership investments, of which funds frequently cannot be withdrawn for the life of the investment. At December 31, 2014 and 2013, the Koch Master Trust had noncancelable commitments to make future investments in certain limited partnerships totaling \$1,678,436,691 and \$756,247,807, respectively. The commitments mature at various dates designated by the respective fund agreements.

At December 31, 2014 and 2013, the Koch Master Trust held \$1,844,516,044 and \$2,655,437,953, respectively, of collective trust funds managed by Bank of New York Mellon/BNY Mellon, N.A. In addition, fees paid by the Koch Master Trust to the trustee, or an affiliate thereof, for trustee and investment management services totaled \$1,103,584 and \$1,268,441 for the years ended December 31, 2014 and 2013, respectively. Transactions with Bank of New York Mellon/BNY Mellon, N.A., qualify as party-in-interest transactions.

During 2014 and 2013 the Koch Master Trust invested in a limited number of derivative financial instruments. Certain investment managers were allowed to use derivatives for such strategies as portfolio structuring, return enhancement, and hedging against deterioration of investment holdings from market and interest rate changes. Derivatives are also used as a hedge against foreign currency fluctuations. Derivative instruments included equity index, government and money market forwards and futures, credit default swaps, as well as interest rate swaps and options. The resulting fair value changes of derivative instruments were included in the net appreciation in fair value of investments. Derivative positions held at December 31, 2014 and 2013 were not material and the use of derivative instruments was not believed to materially increase the credit or market risk of the master trust's investments.

4 Fair Value Measurements

FASB ASC 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

- Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
- Level 2: Inputs to the valuation methodology include:
- Quoted prices for similar assets or liabilities in active markets;
 - Quoted prices for identical or similar assets or liabilities in inactive markets;
 - Inputs other than quoted prices that are observable for the asset or liability;
 - Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

- Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The valuation methods described in Note 2 may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. There have been no changes in the methodologies used at December 31, 2014 and 2013.

The following table sets forth by level, within the fair value hierarchy, a summary of the Koch Master Trust's investment assets at fair value as of December 31, 2014.

The table below sets forth more detailed assumptions used in developing the fair values of the Koch Master Trust's level 3 investment assets for as of December 31, 2014.

Fund Type	Valuation Technique	Significant Unobservable Inputs	Range
Common and preferred stocks	Valued at probable realization value using cost price or values for recent transactions	Quotes from brokers active in trading the particular security type	
Corporate bonds and other debt instruments	Valued at probable realization value using cost price or values for recent transactions	Quotes from brokers active in trading the particular security type

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

Certain pension assets were reclassified between levels based on additional information related to the underlying assets. Such reclassifications were immaterial to the Plan financial statements.

Plan management evaluates the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits. For the year ended December 31, 2014, there were no significant transfers in or out of levels 1, 2 or 3.

5 Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the services rendered by the employees to the valuation date. The actuarial present value of accumulated plan benefits is determined by the Plan's actuary and is the amount that results from applying actuarial assumptions to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The actuarial present value of accumulated plan benefits is presented based on a beginning-of-year benefit information date.

The significant actuarial assumptions used in the December 31, 2013 valuation are as follows:

Method of valuation	Unit credit cost method
Assumed rate of return on investments	7.25%
Mortality	RP-2000 projected with Scale AA to 2021 with a blue collar adjustment
Average age of participants receiving benefits	71.7

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

The actuarial present value of accumulated plan benefits of the Plan is as follows:

December 31	2013
Accumulated benefits:	
Participants currently receiving payments	\$ 1,529,468,355
Other participants	928,459,642
Nonvested benefits	29,841,918
Total	\$ 2,487,769,915

The changes in the actuarial present value of accumulated plan benefits consist of the following:

For the year ended December 31	2013
Actuarial present value of accumulated plan benefits, beginning of year	\$ 2,397,679,657
Increase for interest due to the decrease in the discount period	173,233,920
Benefits paid	(179,024,562)
Assumption changes	63,839,213
Benefits accumulated and other changes	32,041,687
Actuarial present value of accumulated plan benefits, end of year	\$ 2,487,769,915

Assumption changes include a change in the Plan's assumed rate of return of investments from 7.50% to 7.25%. In addition, there was a change in the mortality tables from RP-2000 projected with Scale AA to 2020 with a blue collar adjustment to RP-2000 projected with Scale AA to 2021 with a blue collar adjustment.

6 Related-Party Transactions

Certain Plan investments are managed by the trustee and therefore, these transactions qualify as party-in-interest transactions.

7 Plan Termination

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- Benefits attributable to employee contributions, taking into account those paid out before termination.
- Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan.
- Other vested benefits insured by the PBGC up to the application limitations discussed below.
- Vested benefits not insured by the PBGC.
- All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal retirement age benefits, early retirement benefits and certain disability and survivor benefits. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations, and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

8 Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated August 22, 2008, that the Plan and related trust are designed in accordance with applicable sections of the Code. The Plan has been amended since receiving the determination letter. However, the Plan administrator and the Plan's tax counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code.

US GAAP requires plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS or other applicable taxing authorities. The Plan administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2014 and 2013, and for the year ended December 31, 2014, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the Plan's financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, the Plan is not currently under audit with respect to any tax periods in progress.

9 Risks and Uncertainties

The Plan through the Koch Master Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

The Plan through the Koch Master Trust invests in securities with contractual cash flows, such as asset-backed securities, collateralized mortgage obligations and commercial mortgage backed securities, including securities backed by subprime mortgage loans. The value, liquidity and related income (loss) of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies or defaults, or both, and may be adversely affected by shifts in the market's perception of the issuers and changes in interest rates.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimation and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

Spouse age

Wife three years younger than husband.

Administrative expense

Prior year administrative expenses paid, adjusted for expected deviations and PBGC premiums for the year. For 2014 an amount of \$17,780,000 was included in the target normal cost.

At-risk assumptions

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the 50% Joint and Survivor form of payment.

Methods

Valuation date

First day of plan year.

Funding target

Present value of accrued benefits.

Target normal cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the dates 12 and 24 months before the valuation date, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable.

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions with Georgia-Pacific and, based on that review, is not aware of any significant benefits required to be valued that were not.

Change in assumptions and methods since prior valuation

The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2012 to September 2013. The segment rates used to determine minimum funding requirements and benefit restrictions were revised by applying the corridors of MAP-21 as updated by HATFA.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.
