Notes to Financial Statements

Note 1. Description of the Plan

The following description of the Dayton Freight Lines, Inc. Employee 401(k) Retirement Plan (the Plan) is provided for general information purposes only. Participants should refer to the Summary Plan Description for more complete information.

General: The Plan is a defined contribution 401(k) profit sharing plan, which covers substantially all employees of Dayton Freight Lines, Inc. (the Company, the Employer or Plan Sponsor) who have been employed at least three months. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions: Each year, participants may contribute up to 50% of their pre-tax annual compensation. The Company's matching contributions to the Plan are at its discretion in an amount equal to a percentage of the eligible contributions by each eligible participant during the contribution period. Contributions may be subject to certain limitations under the Internal Revenue Code.

Rollovers: The Plan accepts rollovers from a qualified retirement plan of a prior employer with approval from the Company.

Participant accounts: Individual accounts are maintained for each Plan participant. Each participant's account is credited with the participant's contributions, allocations of the Company's discretionary matching contributions and actual earnings and charged with withdrawals. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting: Participants are immediately vested in their contributions and actual earnings thereon. The Company's matching contributions and actual earnings thereon vest at a rate of 20% per year beginning with the second year and participants are fully vested after six years.

Payment of benefits: Upon retirement or termination of service, a participant receives a single lump-sum payment.

Basis of accounting: The accompanying financial statements are prepared in conformity with accounting principles generally accepted in the United States of America in accordance with the Financial Accounting Standards Board Accounting Standards Codification.

Note 2. Summary of Significant Accounting Policies

Use of estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts and disclosures reported in the financial statements and accompanying notes. Actual amounts could differ from those estimates.

Investment valuation and income recognition: The Plan's investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Purchases and sales of securities are recorded on a trade-date basis. Dividends are recorded on the ex-dividend date. Capital gain distributions are included in dividend income.

Investment contracts held by a defined-contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined-contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. As required by accounting standards, the statements of net assets available for benefits present the fair value of the Plan's investment contract as well as the adjustment of the investment contract from fair value to contract value. The statement of changes in net assets available for benefits is prepared on a contract-value basis.

Notes to Financial Statements

Note 2. Summary of Significant Accounting Policies (Continued)

Forfeited accounts: Forfeited, nonvested accounts totaled \$11,981 and \$38,517 at December 31, 2014 and 2013, respectively. These amounts will be used to offset future Employer contributions or administrative expenses of the Plan.

Plan expenses: Substantially all of the Plan's administrative expenses are paid by the Plan Sponsor.

Payments of benefits: Benefits are recorded when paid.

Subsequent events: Subsequent events have been evaluated through August 12, 2015, the date the financial statements were available to be issued.

Note 3. Information Certified by the Plan's Trustees

The investment information included throughout the Plan's financial statements and supplemental schedule as of December 31, 2014 and 2013 and for the year ended December 31, 2014 was prepared by or derived from information provided by the trustees and furnished to the Plan administrator. The Plan administrator has obtained certifications from the trustees that information provided to the Plan administrator by the trustees related to these investments is complete and accurate. Accordingly, as permitted by 29 CFR 2520.108-8 of the DOL's Rules and Regulations for Reporting and Disclosure under ERISA, the Plan administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to information which appears throughout the financial statements and supplemental schedule related to the Plan's investments.

Notes to Financial Statements

Note 5. Fair Value Measurements

The Plan has determined the fair value of certain assets through application of accounting guidance that establishes a framework for measuring fair values. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value.

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under this standard are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2014 and 2013.

Mutual funds: Valued at the closing price reported on the active market on which the individual securities are traded.

Common/collective trust: Valued at the net asset value (NAV) of shares held by the Plan at year end, as reported to the Plan by the custodian. A fund's NAV reflects an exit price, is the same for all holders of the fund and provides the basis for current transactions. The common/collective trust fund consists of the Invesco Stable Value Retirement Trust, which is primarily invested in guaranteed investment contracts and synthetic investment contracts. Participant-directed redemptions have no restrictions; however, the Plan is required to provide a two-year redemption notice to liquidate its entire share in the fund. Additionally, the Plan may provide a ten-day redemption notice, however, the shares will be redeemed at the lesser of the market value or book value. The fair value of this fund has been estimated based on the fair value of the underlying investment contracts in the fund as reported by the issuer of the fund. The fair value differs from the contract value. As previously disclosed in Note 2, contract value is the relevant measurement attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Notes to Financial Statements

Note 7. Income Tax Status

The Plan obtained its latest determination letter on March 31, 2008, in which the Internal Revenue Service stated that the Plan, as then designed, was in compliance with the applicable requirements of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. The Plan administrator believes the Plan is designed and being operated in compliance with the applicable requirements of the IRC.

The Plan administrator evaluated the Plan's tax positions and concluded that there were no uncertain tax positions that require recognition or disclosure in the financial statements. With few exceptions, the Plan is no longer subject to income tax examinations by tax authorities for years before 2011.

Note 8. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Fidelity Management Trust Company is the trustee as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions.
