To the Participants and Administrator
of the TGL Pension Plan

Report on the Financial Statements

We were engaged to audit the accompanying financial statements of the TGL Pension Plan, which comprise the statement of net assets available for benefits as of December 31, 2014 and 2013, the related statement of changes in net assets available for benefits for the years ended December 31, 2014 and 2013, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audits in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the plan administrator instructed us not to perform, and we did not perform, any auditing procedures with respect to the information summarized in Note 4, which was certified by The Northern Trust Company, the trustee of the Plan, except for comparing such information with the related information included in the financial statements. We have been informed by the plan administrator that the trustee holds the Plan's investment assets and executes investment transactions. The plan administrator has obtained a certification from the trustee as of and for the years ended December 31, 2014 and 2013, that the information provided to the plan administrator by the trustee is complete and accurate.

Disclaimer of Opinion

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Report on Form and Content in Compliance With DOL Rules and Regulations

The form and content of the information included in the financial statements, other than that derived from the information certified by the trustee, have been audited by us in accordance with auditing standards generally accepted in the United States of America and, in our opinion, are presented in compliance with the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974.

1. DESCRIPTION OF PLAN

The following brief description of the TGL Pension Plan (the "Plan"), formerly the Tyco/Grinnell/Ludlow Pension Plan for Certain Hourly Employees, is provided for general information purposes only. Selected Plan provisions are described below. Participants should refer to the Plan document and summary of Plan description for more complete information regarding the terms of the Plan.

General

The Plan is a trusteed, noncontributory, defined benefit pension plan covering certain hourly employees of Grinnell Corporation, Gimpel Corporation, Ludlow Corporation, and certain employees of Batts, Inc. and Forever Hangers, Inc. (collectively, the "Company"). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA") and the Internal Revenue Code of 1986, as amended (the "Code").

Effective December 31, 2001, the benefit accruals and future participation under the Plan for the employees of GFPS (Lubbock) division were frozen.

Effective as of January 1, 2012, the assets and liabilities of the Graphic Controls division of the ADT Security Services Pension Plan ("ADT Plan") were spun off from the ADT Plan to the Plan, which is a tax-qualified defined benefit retirement plan sponsored by the Plan Sponsor. In connection with the transfer of assets and liabilities, the Plan assumed the aggregate liability for the benefits accrued by participants in the Graphic Controls division of the ADT Plan as of December 31, 2011, and such persons cease to have a right to any benefit under the ADT Plan.

The Company is part of a controlled group of entities with Tyco International Management Company, LLC ("TIMCO LLC"), which is the Plan Sponsor.

Funding Policy

The Plan Sponsor's funding policy is to make all required contributions to the pension plan in accordance with applicable pension laws and regulations. Additional, voluntary contributions (in excess of required minimum amounts) are periodically considered based on their individual merits. No Company contributions were necessary during 2014 and 2013 in order to meet the minimum funding requirements under ERISA.

Although it has not expressed any intention to do so, the Company has the right under the Plan to terminate the Plan subject to the provisions set forth in ERISA.

Pension Benefits

The pension benefit calculations vary due to the merger of a number of TIMCO LLC subsidiary pension plans into the Plan. The merging plans continue to calculate their pension benefit in accordance with each plan, as in effect immediately prior to the merger. Participants who have completed five or more years of continuous service are entitled to annual pension benefits. For a more complete schedule of pension benefits, participants should refer to the Plan document.

Disability and Death Benefits

Participants who terminate employment due to total and permanent disability or spouses of vested participants who die may be entitled to receive benefits under this Plan.

Administrative Expenses
Insurance premiums, trustee service charges, audit fees, investment related fees and certain administrative and actuarial fees are paid by the Plan. All other expenses associated with the administration of the Plan are paid by the Company.

Plan Administration
The Plan has an Administrative Committee and an Investment Committee. The Administrative Committee acts in the capacities of Plan administrator and Plan fiduciary. The Investment Committee acts in the capacity of Plan fiduciary. Committee members are appointed by the Board of Directors of TIMCO LLC. The Investment Committee appoints the investment managers to manage the assets of the Tyco Master Trust (the "Master Trust").

Plan Termination
In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

1. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable, or would have been payable, during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
2. Other vested benefits insured by the Pension Benefit Guaranty Corporation (the "PBGC"), a U.S. government agency, up to the applicable limitations.
3. All other vested benefits; that is, vested benefits not insured by the PBGC.
4. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Plan's sponsor and the level of benefits guaranteed by the PBGC.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Actuarial Valuation Method and Assumptions
Independent actuaries are employed by the Company to determine the Plan's required contributions, present value of accumulated plan benefits, and prior service costs using the traditional unit credit method. The significant actuarial assumptions including mortality, salary increases, and investment returns, used by the independent actuaries in the January 1, 2014 valuation are summarized as follows:

Investment Return Rate:	4.45% effective interest rate based on nonstabilized funding segment rates: 1.25% for the first 5 years, 4.06% for the next 15 years, and 5.08% for years after 20 years
Retirement:	Weighted average age 62
Mortality:	MRP-2007 mortality tables for males and females without collar adjustment projected with generational mortality improvements using MMP-2007 mortality improvement scale.

Certain actuarial assumptions discussed above have changed since the January 1, 2013 valuation. The actuarial assumption used in the January 1, 2013 valuation was the effective investment return of 4.77% based on nonstabilized funding segment rates: 1.62% for the first 5 years, 4.40% for the next 15 years, and 5.45% for years after 20 years. The mortality assumptions used in the January 1, 2013 valuation were based on IRC Section 430(h)(3) prescribed separate static annuitant and nonannuitant mortality tables.

The effect of these changes is included in note 3 under the caption change in actuarial assumptions.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated Plan benefits.

Basis of Accounting
The financial statements of the Plan are presented on the accrual basis of accounting.

Investment Valuation and Income Recognition
The investment in the Master Trust is shown at estimated fair value based on the fair values of the underlying investments held in the Master Trust. The Plan's interest in the Master Trust is based on the beginning of the year value of the Plan's interest in the Master Trust plus actual contributions and allocated net investment income or loss (including interest, dividends, net unrealized and realized gains and losses) less actual distributions and allocated administrative expenses. Net investment income or loss and certain administrative expenses are allocated to the individual plans based upon the ratio of the plans holdings in the Master Trust of the prior month end.

Other significant accounting policies include: investment transactions are recorded on the trade date, net appreciation (depreciation) in fair value of investments includes gains and losses on investments bought and sold as well as held during the year. Interest income is recorded on the accrual basis. Dividend income is recorded on the ex-dividend date.

Investment Valuation and Income Recognition, continued

Fair value is the price that would be received by the Plan to sell an asset or paid by the Plan to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date in the Plan's principal or most advantageous market for the asset or liability. The Plan's Investment Committee determines the Plan's valuation policies utilizing information provided by its investment advisers and custodians. The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy places the highest priority on unadjusted quoted market prices in active markets for identical assets or liabilities (level 1 measurements) and gives the lowest priority to unobservable inputs (level 3 measurements). The three levels of inputs within the fair value hierarchy are defined as follows:

> Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the plan has the ability to access.
>
> Level 2: Inputs to the valuation methodology include: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation or other means.
>
> If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.
>
> Level 3: Inputs for the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of the observable inputs and minimize the use of unobservable inputs.

The fair values of the underlying investments of the Master Trust are determined as follows:

Cash and cash equivalents are primarily investments in various money market funds. The fair value is determined by obtaining quoted prices on nationally recognized securities exchanges (level 1 inputs).

Common stocks are valued by obtaining prices on recognized and highly liquid exchanges (level 1 inputs).

Common collective trusts are valued based upon their net asset values, as reported by custodians of the common collective trusts and as supported by actual redemption prices (level 2 inputs). Included in the common collective trusts are money market funds which are valued at the net asset value per share as quoted by such companies or funds as of the valuation date. The money market funds are institutional commingled funds. Although not traded on active markets the net asset value per share is observable. Cash is valued at the amounts deposited in the fund, plus accrued interest (level 1 inputs).

Investment Valuation and Income Recognition, continued

Corporate bonds primarily consist of more than 200 corporate investment grade and high yield credit bonds ("Corporate credits"), as well as asset backed securities ("ABS"). The Corporate credits are generally priced using the most recent bid prices or potentially the mean of the latest bid and ask prices. ABS are generally valued using matrix pricing through recognized financial models utilized by the investment manager and the custodian that incorporate other observable inputs such as cash flow, security structure, or market information, when there is no broker/dealer quote available (level 2 inputs).

U.S. government securities are direct obligations of the U.S. government or its agencies. These securities are generally priced using the most recent bid prices or potentially the mean of the latest bid and ask prices. This category also includes mortgage backed securities ("MBS") issued by U.S. government agencies that may utilize models, such as a single cash flow model, that incorporate data on interest rate movements, pass-thru securities markets, bid evaluations, and other pertinent data (level 2 inputs).

Registered investment companies are valued by obtaining quoted prices on nationally recognized securities exchanges (level 1 inputs). Some registered investment companies have private open-ended mutual funds which are valued based on their net asset values, as reported by custodians of the registered investment companies and as supported by actual redemption prices (level 2 inputs).

Other investments includes derivative futures, municipal bond, non-U.S. government bonds, and sundry assets which are valued either by obtaining quoted prices on nationally recognized securities exchanges (level 1 inputs) or by third party pricing sources obtained by the custodian which may utilize models that incorporate pertinent data to determine pricing and non-U.S. sovereign debt securities, where the custodian will utilize available broker/dealer quotes (level 2 inputs).

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date. There have been no changes in the methodologies used at December 31, 2014 and 2013.

Payment of Benefits

Benefits are recorded when paid.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts of assets, liabilities, and changes therein; disclosure of contingent assets and liabilities; and the actuarial present value of accumulated plan benefits at the date of the financial statements, and changes therein. Actual results could differ from those estimates.

Federal Income Tax Status

The Internal Revenue Service has determined and informed the Company by a letter dated December 12, 2002, that the Plan and related trust are designed in compliance with applicable sections of the Code. The Plan has been amended since receiving the determination letter. However, the Plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code. Therefore, no provision for income taxes is required.

The plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The Plan administrator believes it is no longer subject to income tax examinations for years prior to 2011.

New Accounting Standards

In May 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2015-07, Fair Value Measurement ("Topic 820"): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent) ("ASU 2015-07"). ASU 2015-07 removes the requirement to include investments in the fair value hierarchy for which fair value is measured using the net asset value per share practical expedient under ASC 820. ASU 2015-07 is effective for the Plan retrospectively for the year ending December 31, 2016 with early adoption permitted. The Plan's managing committee is currently evaluating the impact of the pending adoption of ASU 2015-07 on the Plan's financial statements and has chosen not to early adopt for the plan year ending December 31, 2014.

In July 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update No. 2015-12, Plan Accounting Defined Benefit Pension Plans ("Topic 960"), Defined Contribution Pension Plans ("Topic 962"), Health and Welfare Benefit Plans ("Topic 965"): I. Fully Benefit-Responsive Investment Contracts, II. Plan Investment Disclosures, III. Measurement Date Practical Expedient ("ASU 2015-12"). ASU 2015-12 Part I removes the requirement to provide a reconciliation of contract value to fair value for fully benefit-responsive investment contracts on the face of the plan financial statements. ASU 2015-12 Part II eliminates the requirement of individual investments that represent 5 percent or more of net assets available for benefits and the net appreciation or depreciation for investments by general type. In addition, if an investment is measured using the net asset value per share (or its equivalent) practical expedient and that investment files a Form 5500, as a direct filing entity, disclosure of that investment's strategy will no longer be required. ASU 2015-12 Part III provides a practical expedient to permit plans to measure investments and investment related accounts as of a month-end that is closest to the plan's fiscal year-end, when the fiscal period does not coincide with ta month-end. ASU 2015-12 is effective for the Plan retrospectively for the year ending December 31, 2016 with early adoption permitted. The Plan's managing committee is currently evaluating the impact of the pending adoption of ASU 2015-12 on the Plan's financial statements and has chosen not to early adopt for the plan year ending December 31, 2014.

3. ACCUMULATED PLAN BENEFITS

The actuarial present value of accumulated plan benefits is as follows:

	January 1, 2014	
Vested benefits:		
Participants or beneficiaries currently receiving payments	$	8,799,65
Other participants		10,611,71
	19,411,369	
Nonvested benefits		8
Total actuarial present value of accumulated plan benefits	$	19,412,2

The change in the actuarial present value of accumulated plan benefits is as follows:

	Year Ended January 1, 2014	
Actuarial present value of accumulated plan benefits at beginning of year	$	18,827,5
Increase (decrease) during the year attributable to:		
Benefits accumulated		(250,14
Change in actuarial assumptions		1,618,96
Increase for interest due to decrease in discount period		855,70
Benefits paid		(1,639,89
Total changes		584,6
Actuarial present value of accumulated plan benefits at end of year	$	19,412,2

The actuarial present value of accumulated plan benefits as of January 1, 2014 is based upon an effective interest rate of 4.45% based on nonstabilized funding segment rates. See Note 2.

4. INFORMATION CERTIFIED BY THE TRUSTEE

The following summarized information and certain underlying detail included in the accompanying financial statements was obtained from data that has been prepared and certified to as complete and accurate by The Northern Trust Company, the trustee for the Plan as of and for the years ended December 31, 2014 and 2013.

	December 31, 2014	December 31, 2013
Investment in the Tyco Master Trust	$ 18,232,875	$ 17,853,435
Plan Interest in the Tyco Master Trust Net Investment Income	$ 1,905,318	$ 2,437,638

5. INVESTMENT IN THE MASTER TRUST

As of December 31, 2014 and 2013 the Plan's sole investment is in the Master Trust, which was established for the investment of assets of the Plan and several other TIMCO LLC and affiliated companies' sponsored retirement plans. The assets of the Master Trust are held by its trustee, The Northern Trust Company, for the years ended December 31, 2014 and 2013. Each participating retirement plan has an undivided interest in the assets of the Master Trust except for any other securities, which, if applicable, are identifiable with individual plans. The Plan's interest in the net assets of the Master Trust is approximately 3% at December 31, 2014 and 2013, respectively.

The following financial information was obtained from data that has been prepared and certified to as complete and accurate by the trustee of the Master Trust. Such financial information has not been audited by the Plan's independent accountants.

The following table presents the net assets of the Master Trust. Investments that represent 5 percent or more of the Master Trust's net assets have been separately identified.

The Master Trust did not have any investments measured at fair value on a recurring basis using significant unobservable inputs (level 3) for the years ended December 31, 2014 and 2013.

Transfers Between Levels

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

Management or the Plan Sponsor evaluated the significance of transfers between levels based upon the nature of the financial instruments and size of the transfer relative to total net assets available for benefits. For the years ended December 31, 2014 and 2013, there were no significant transfers in or out of any levels.

7. DERIVATIVE FINANCIAL INSTRUMENTS

The Plan (through the Master Trust) may use derivative financial instruments to meet fund objectives and manage exposure to foreign currency, interest rates and market fluctuations. These instruments involve market risk, credit risk or both kinds of risks. Risk arises from the possible inability of counterparties to meet the terms of their contracts. The following is a description of the types of derivate contracts the Master Trust may enter into.

Foreign exchange contracts: Foreign currency exchange rate movements create a degree of risk by affecting the U.S. dollar value of instruments denominated in foreign currencies. Forward contracts are used by investment managers to manage foreign exchange rate risks associated with certain investments. These contracts are presented net (buy side of the contract as a receivable netting against the sell side of the contract as a payable) in the Master Trust.

Interest rate contracts: Interest rate movements create a degree of risk by affecting the amount of interest payments and the value of debt instruments. Investment managers may use interest rate swaps, total return swaps, futures contracts, options and swaptions to manage interest rate risk.

During 2014 and 2013, the Master Trust was a party to futures contracts held for trading purposes for U.S Treasury Bonds and Notes and Eurodollars. At December 31, 2014, other investments of the Master Trust include derivative investment assets with a notional value of approximately $1.9 million which were offset by derivative investment liabilities with a notional value of $1.9 million. At December 31, 2013, other investments of the Master Trust include derivative investment assets with a notional value of approximately $14.4 million which were offset by derivative investment liabilities with a notional value of $14.4 million. Realized and unrealized gains and (losses) on derivative contracts entered into by the Master Trust of approximately $299,000 and $(143,000) for the years ended December 31, 2014 and 2013, respectively, were recorded as net appreciation (depreciation) in the fair value of investments by the Master Trust.

8. MASTER NETTING AGREEMENTS

The Master Trust is subject to master netting agreements, or netting arrangements, with certain counterparties. These agreements govern the terms of certain transactions and reduce the counterparty risk associated with relevant transactions by specifying offsetting mechanisms and collateral posting arrangements at pre-arranged exposure levels. Since different types of transactions have different mechanics and are sometimes traded out of different legal entities of a particular counterparty organization, each type of transaction may be covered by a different master netting arrangement possibly resulting in the need for multiple agreements with a single counterparty. Master netting agreements are specific to each different asset type; therefore, they allow the company to close out and net its total exposure to a specified counterparty in the event of a default with respect to any and all the transactions governed under a single agreement with the counterparty.

The following is a summary of the Master Trust's net exposure to derivative assets and liabilities, by financial instrument type, available for offset and net of collateral under master netting agreements as of December 31, 2014 and December 31, 2013:

December 31, 2014			
Derivative Type	Gross Amounts of Recognized Derivative Assets	Gross Amounts of Recognized Derivative Liabilities	Net Amount of Derivatives Presented in the Statement of Net Assets
Futures Contracts			
Interest Rate	$ 1,879,313	$ 1,879,313	$ -
Total	$ 1,879,313	$ 1,879,313	$ -

December 31, 2013			
Derivative Type	Gross Amounts of Recognized Derivative Assets	Gross Amounts of Recognized Derivative Liabilities	Net Amount of Derivatives Presented in the Statement of Net Assets
Futures Contracts			
Foreign Currency	$ 14,163,225	$ 14,163,225	$ -
Interest Rate	256,625	256,625	-
Total	$ 14,419,850	$ 14,419,850	$ -

9. RISKS & UNCERTAINTIES

The Master Trust invests in a highly diversified portfolio of investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated Plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates, and employee demographics, all of which are subject to change. Due to uncertainties inherent in the use of estimates and the assumption setting process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

10. RELATED PARTY AND PARTY-IN-INTEREST TRANSACTIONS

Certain investments of the Master Trust are managed by The Northern Trust Company, the trustee for the Plan. As described in Note 1, the Plan paid certain expenses related to Plan operations and investment activity to various service providers. These transactions are party-in-interest transactions under ERISA.

11. SUBSEQUENT EVENTS

The Plan Sponsor has evaluated subsequent events through September 29, 2015, which is the date the financial statements were available to be issued.

417(e) lump sums

Liabilities are determined based on the underlying annuity used by the plan to determine the lump sum amount, rather than valuing the lump sum payment. This annuity is valued based on funding interest rates rather than 417(e) rates and current year 417(e) unisex mortality.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

Actuarial Methods

Asset Methods

The asset valuation method is an average of the adjusted market value for each year during the last 2 years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110% and no less than 90% of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date. For this purpose, participants with a break in service on the valuation date are treated as terminated participants.
- **Insurance contracts**: The plan does not have any insurance contracts.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Statement by Enrolled Actuary

To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, Part V — Summary of Plan Provisions

Benefits Included or Excluded

Unless noted below, all benefits provided by the plan, are included in this valuation:

- **Plan amendments excluded:** Amendments adopted after the valuation date or effective after the current plan year are excluded from the valuation.
- **Late retirement increases:**
  - *Active participants:* The plan applies late retirement actuarial increases for all participants who defer retirement beyond their normal retirement date and this valuation includes those increases.
  - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.
- **IRC Section 436 benefit restrictions:**
  - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
  - *Plan amendments:* See above.
  - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
  - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.

Plan Provision Changes Since Prior Valuation

Maximum compensation amounts and maximum benefit amounts under IRS rules were updated from 2013 to 2014.

Schedule SB, line 24 — Change in Actuarial Assumptions

- The expense component of normal cost decreased from $490,000 to $400,000 to reflect our expectations for the current plan year.
- As of January 1, 2014, the expected investment return decreased from 8.00% to 7.50% to reflect updates in the capital market environment.
