1. Plan Description

The following description of the Wyle Retirement Plan (the Plan) provides only general information. Participants should refer to the plan document for a more complete description of the Plan's provisions.

a. General

The Plan, as revised and effective January 1, 2012, is a noncontributory defined benefit plan covering all eligible employees of Wyle Inc. (the Company). Effective January 1, 1998, the Plan was frozen. It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

b. Vesting

Vesting in the Company's contribution is based on years of continuous service. Participants become fully vested after five years of credited service.

c. Plan Benefits

The Plan provides for normal retirement benefits upon reaching age 65 and five years of vesting service equal to 50 percent of a participant's final average compensation less 50 percent of the primary Social Security benefit multiplied by a fraction, as defined by the plan document. The Plan has provisions for early and late retirement, termination, and death benefits. Participants may elect to receive their pension benefits from various forms of joint and survivor annuities.

2. Summary of Significant Accounting Policies

a. Basis of Accounting

The financial statements of the Plan are prepared under the accrual method of accounting.

b. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

c. Investment Valuation and Income Recognition

Investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for discussion of fair value. Purchases and sales of securities are recorded on a trade-date basis. Net realized and unrealized appreciation in fair value of investments includes the Plan's gains and losses on investments bought and sold as well as held during the year.

d. Net Appreciation in Fair Value of Investments

Realized gains and losses on investments are based on the market value of the asset at the beginning of the year, or at the time of purchase for assets purchased during the year, and the related fair value on the day the investments are sold during the year. Unrealized gains and losses on investments are based on the market value of the assets at the beginning of the year, or at the time of purchase for assets purchased during the year, and the related fair value at the end of the year. Net realized and unrealized appreciation in fair value of investments is reflected in the accompanying Statements of Changes in Net Assets Available for Plan Benefits.

e. Payment of Benefits

Benefits are recorded when paid.

f. Administrative Expenses

Administrative expenses are paid for by the Plan.

g. Subsequent Events

The Plan has evaluated the subsequent events through July 31, 2015, the date the financial statements were available to be issued.

3. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investments, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the Statements of Net Assets Available for Plan Benefits.

4. Funding Policy

Contributions to provide benefits under the Plan are made solely by the Company. The Company's funding policy is to make cash contributions to the Plan in amounts computed by the Plan's actuary using the projected-unit-credit-cost-method. Under this actuarial method, the cost attributed to past service is determined on the valuation date as the present value of the benefits actually earned as of that date. It is the intention of the Company's funding policy, based on the actuarial assumptions referred to in Note 11, that all eligible participants' benefits will be fully provided for by the time they retire. During 2014 and 2013, the Plan exceeded the minimum funding requirements of ERISA. Plan participants may not make contributions to the Plan.

5. Fair Value Measurement

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurement*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1	Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.
Level 2	Inputs to the valuation methodology include • quoted prices for similar assets or liabilities in active markets; • quoted prices for identical or similar assets or liabilities in inactive markets; • inputs other than quoted prices that are observable for the asset or liability; • inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.
Level 3	Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

5. Fair Value Measurement (Continued)

Following is a description of the valuation methodology used for assets measured at fair value. There have been no changes in the methodology used at December 31, 2014 and 2013.

Pooled separate accounts: The pooled separate account unit value constitutes the exit or selling price at the valuation date, which is considered by plan management to be the best approximation of fair value. The unit values of pooled separate accounts are calculated based on the observable net asset value of the underlying investments.

Funds held in pooled separate accounts may be redeemed daily without restriction.

The Plan has identified the following classes of investment for its pooled separate accounts based on the nature and risks of the underlying investments. The fair values for each major class of investment are disclosed in the tables below.

The following describes the significant investment strategies of each major class of investment.

- U.S. equity: Funds are invested directly and/or indirectly in a diversified portfolio of domestic stocks to achieve a variety of investment goals including capital appreciation, current income, and/or domestic equity index replication (e.g., the S&P 500 Index).
- International equity: Funds are invested directly and/or indirectly in a diversified portfolio of stocks of companies internationally to achieve a variety of investment goals including capital appreciation, current income, and/or international equity index replication (e.g., the MSCI EAFE Index).
- Balanced: Funds are invested in actively managed portfolios of stocks, bonds, other debt securities, money market instruments, and/or other investments, both domestically and internationally, with the goal of achieving a targeted balance of capital preservation, capital appreciation, and current income.
- Fixed income: Some funds in this category are primarily invested in money market instruments and other short-term securities with the goal of maintaining liquidity, investment quality and stability of capital. Other funds in this category invest in debt securities such as bonds, U.S. government and agency securities, mortgage-backed securities, and zero coupon securities with the goal of current income, capital preservation, and, to a lesser extent, capital appreciation.
- Real estate: The U.S. Property Separate Account-R6 is primarily invested in commercial real estate and related investments, including mortgage loans backed by the associated properties, with the goal of providing lease income and capital appreciation.

The preceding method described may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation method is appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

5. Fair Value Measurement (Continued)

The following tables set forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2014 and 2013.

The Custodian of the Plan certified certain information, which was not audited in accordance with the plan administrator's instructions and as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA. Information certified by the Custodian consists of the following:

- Fair value of investments as reflected in the Statements of Net Assets Available for Plan Benefits as of December 31, 2014 and 2013.
- Net realized and unrealized appreciation in fair value of investments as reflected in the Statements of Changes in Net Assets Available for Plan Benefits for the Years Ended December 31, 2014 and 2013.
- Investment information as reflected in Notes 5 and 6 to these financial statements.
- Investment information reflected in the Schedule H, line 4i - Schedule of Assets (Held at End of Year) as of December 31, 2014.
- Investment information reflected in the Schedule H, line 4j - Schedule of Reportable Transactions for the Year Ended December 31, 2014.

The Plan's independent public accountants did not perform auditing procedures with respect to the above information, except for comparing such information to the related information included in the financial statements and supplemental schedules.

8. Tax Exempt Status

The Internal Revenue Service (IRS) has determined and informed the Company by a letter dated August 13, 2013, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (IRC). The plan administration believes that the Plan is currently designed and operated in compliance with the applicable requirements of the IRC.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the organization has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS or other applicable taxing authorities. The plan administrator has analyzed the tax positions taken by the Plan and has concluded that as of December 31, 2014, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for plan years ended December 31, 2010, or prior.

9. Related Party Transactions

Principal Life Insurance Company is the Custodian of the Plan and holds and manages investments. Transactions with Principal Life Insurance Company are party-in-interest transactions, as defined by ERISA.

10. Plan Termination

In the event that the Plan is terminated, the net assets of the Plan will be allocated for payment of plan benefits to the participants in an order of priority determined in accordance with ERISA, applicable regulations thereunder, and the plan document.

Certain benefits under the Plan are insured by the Pension Benefit Guaranty Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal-age retirement benefits, early retirement benefits, and certain disability and survivors' pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed to the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For plan terminations occurring during 2014 and 2013, the ceiling is $4,943 and $4,790 per month. The ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the ceiling is actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the Company and the level of benefits guaranteed by the PBGC.

11. Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions, which are attributable under the Plan's provisions to the services employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. The accumulated plan benefits for active employees are based on years of service and the participants' average compensation for the five years ending December 31, 1999.

The actuarial present value of accumulated plan benefits has been determined by an independent actuary and is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money and the probability of payment between the valuation date and the expected payment dates. The effect of plan amendments on accumulated plan benefits is recognized during the year in which such amendments become effective. The actuarial valuation is as of January 1, 2014, which is the beginning of the plan year and is presented in the Statement of Accumulated Plan Benefits as of December 31, 2013.

The significant actuarial assumptions used in determining accumulated plan benefits as of December 31, 2013, are as follows:

Investment return	5.5%
Mortality	RP-2000 tables

11. Actuarial Present Value of Accumulated Plan Benefits (Continued)

The following summarizes the significant changes in actuarial assumptions and methods between December 31, 2013 and 2012.

- The effective interest rates within the pension stabilization corridors under the Moving Ahead for Progress in the 21st Century Act (MAP-21) were changed.

The net impact of these changes on the actuarial present value of accumulated plan benefits is reported as the change in actuarial assumptions on the Statement of Changes in Accumulated Plan Benefits.

The foregoing actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

New or rehired employees

It was assumed there will be no new or rehired employees.

Plan-related Expenses

The amount included this year for plan-related expenses is $18,634. This amount is the prior year's actual expenses increased for interest.

SCHEDULE SB ATTACHMENTS

Mortality

- Healthy — Separate rates for non-annuitants (based on RP-2000 “Employees” table without collar or amount adjustments, projected to 2029 using Scale AA) and annuitants (based on RP-2000 “Healthy Annuitants” table without collar or amount adjustments, projected to 2021 using Scale AA).

- Disabled — Separate rates for non-annuitants (based on RP-2000 “Employees” table without collar or amount adjustments, projected to 2029 using Scale AA) and annuitants (based on RP-2000 “Healthy Annuitants” table without collar or amount adjustments, projected to 2021 using Scale AA).

Retirement

For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), it is assumed that participants will retire upon becoming eligible for normal retirement.

Disability rates

The rates at which participants become disabled by age and gender based upon Wyatt’s Disability Study – Class 2 are shown below:

Percentage becoming disabled during the year		
Age	**Males**	**Females**
20	.06%	.06%
30	.15%	.15%

Future increases in Maximum Benefits and Plan Compensation Limitations

SCHEDULE SB ATTACHMENTS

Accrued benefits projected to be paid in future years are limited to the maximum presently allowed under IRC Section 415. Plan compensation is limited to the maximum presently allowed under IRC Section 401(a)(17). No provision is made for future increases in the maximum annual benefit or compensation limit.

Termination

Representative termination rates

Attained Service	Percentage leaving during the year	
	Males	**Females**
0-4 years	21.0%	21.0%
5-9 years	10.0%	10.0%
10-19 years	5.0%	5.0%
20+ years	2.5%	2.5%

Form of payment

Participants are assumed to elect the normal form for single participants.

Marriage

It is assumed that 75% of all active and terminated employees are married to an eligible spouse. Wives are assumed to be 3 years younger than husbands.

Employees

It was assumed that there will be no new or rehired employees.

At-risk assumptions

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the life-only form of payment.

SCHEDULE SB ATTACHMENTS

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions with Wyle Inc. and, based on that review, is not aware of any significant benefits required to be valued that were not.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month.

Valuation date

First day of plan year.

Funding target

Present value of accrued benefits.

Target normal cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.

Employee data was supplied electronically as of the valuation date.

Plan-related Expenses

The amount included this year for plan-related expenses is $18,634. This amount is the prior year's actual expenses increased for interest.

SCHEDULE SB ATTACHMENTS

Mortality

- Healthy — Separate rates for non-annuitants (based on RP-2000 "Employees" table without collar or amount adjustments, projected to 2029 using Scale AA) and annuitants (based on RP-2000 "Healthy Annuitants" table without collar or amount adjustments, projected to 2021 using Scale AA).

- Disabled — Separate rates for non-annuitants (based on RP-2000 "Employees" table without collar or amount adjustments, projected to 2029 using Scale AA) and annuitants (based on RP-2000 "Healthy Annuitants" table without collar or amount adjustments, projected to 2021 using Scale AA).

Retirement

For purposes of determining the Funding Target and Target Normal Cost (both disregarding at-risk assumptions), it is assumed that participants will retire upon becoming eligible for normal retirement.

Disability rates

The rates at which participants become disabled by age and gender based upon Wyatt's Disability Study – Class 2 are shown below:

Percentage becoming disabled during the year		
Age	**Males**	**Females**
20	.06%	.06%
30	.15%	.15%
40	.33%	.33%
50	.84%	.84%
60	2.11%	2.11%

Compensation increases

Not applicable – plan is frozen.

Future increases in Social Security

Not applicable – plan is frozen.

Future increases in Maximum Benefits and Plan Compensation Limitations

SCHEDULE SB ATTACHMENTS

Accrued benefits projected to be paid in future years are limited to the maximum presently allowed under IRC Section 415. Plan compensation is limited to the maximum presently allowed under IRC Section 401(a)(17). No provision is made for future increases in the maximum annual benefit or compensation limit.

Termination

Representative termination rates

Attained Service	Percentage leaving during the year	
	Males	**Females**
0-4 years	21.0%	21.0%
5-9 years	10.0%	10.0%
10-19 years	5.0%	5.0%
20+ years	2.5%	2.5%

Form of payment

Participants are assumed to elect the normal form for single participants.

Marriage

It is assumed that 75% of all active and terminated employees are married to an eligible spouse. Wives are assumed to be 3 years younger than husbands.

Employees

It was assumed that there will be no new or rehired employees.

At-risk assumptions

For at-risk calculations, all participants eligible to elect benefits during the current and subsequent ten plan years are assumed to commence benefits at the earliest possible date under the plan, but not before the end of the current plan year, except in accordance with the regular valuation assumptions. In addition, all participants (not just those eligible to begin benefits within the next 11 years) are assumed to elect the most valuable form of benefit under the plan, which is usually the life-only form of payment.

SCHEDULE SB ATTACHMENTS

Benefits not valued

All benefits described in the Plan Provisions section of this report were valued. Towers Watson has reviewed the plan provisions with Wyle Inc. and, based on that review, is not aware of any significant benefits required to be valued that were not.

Timing of benefit payments

Annuity payments are payable monthly at the beginning of the month.

Valuation date

First day of plan year.

Funding target

Present value of accrued benefits.

Target normal cost

Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year.

Actuarial value of assets

Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of market value, including discounted contributions receivable (discounted using the effective interest rate for the prior plan year.)

The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.
