Independent Auditor's Report

To the Administrator of Retirement Income Guarantee Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards

We have audited the accompanying financial statements of Retirement Income Guarantee Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards (the "Plan"), which comprise the statements of net assets available for benefits as of December 31, 2014 and December 31, 2013, and the related statements of changes in net assets available for benefits for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, information regarding the Plan's net assets available for benefits as of December 31, 2014 and changes therein for the year then ended and its financial status as of December 31, 2013, and changes therein for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Notes to Financial Statements
December 31, 2014 and 2013**

1. Description of the Plan

The following description of the Xerox Corporation Retirement Income Guarantee Plan (the "Plan") provides only general information. Participants should refer to the plan document for a more complete description of the Plan's provisions. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA").

General

The Plan is a noncontributory defined benefit pension plan covering substantially all U.S. employees, full and part-time, covered by a Rochester Regional Joint Board on Behalf of Itself and Other Joint Boards collective bargaining agreement who were hired before January 1, 2006.

As discussed in Notes 2 and 7, plan assets are held under The Xerox Trust Agreement to Fund Retirement Plans ("Master Trust").

The Plan received a favorable IRS determination letter dated April 29, 2013.

Plan Benefits

The Plan provides participants with the greater of the following benefits:

- (i) 1.4% Retirement Income Guarantee Plan ("RIGP") Formula - This is a monthly benefit determined by multiplying .117% (1.4% annual benefit divided by twelve) times the average pay for the five highest calendar years of eligible compensation, multiplied by the number of full and fractional years of participation, up to 30 years, less the monthly normal retirement benefit to which the member is entitled with respect to any benefit accrued under the XDS Retirement Income Plan (the "XDS Plan") if the service reflected in such benefit is included in years of participation. Any member who is a former participant in the XDS Plan and where the liability of the XDS Plan attributable to such member's accrued benefit under the XDS Plan was transferred to the Plan, is entitled at his/her normal retirement age to a monthly normal retirement benefit equal to the monthly normal retirement benefit accrued under the XDS Plan as of the date of such transfer reduced by one-half of 1% for each full month by which the commencement of the benefit preceded the last day of the month in which the member's normal retirement age occurs. No member shall receive a duplication of benefits under the Plan and/or XDS Plan.
- (ii) 1.0% RIGP Formula – This is a monthly benefit determined by multiplying .083% (1.0% annual benefit divided by twelve) times the average pay for the five highest calendar years of compensation, multiplied by the number of full and fractional years of participation, less the monthly normal retirement benefit to which the member is entitled with respect to any benefit accrued under the XDS Plan if the service reflected in such benefit is included in years of participation. Any member who is a former participant in the XDS Plan and where the liability of the XDS Plan attributable to such member's accrued benefit under the XDS Plan was transferred to the Plan, is entitled to his/her normal retirement age to a monthly normal retirement benefit equal to the monthly normal retirement benefit accrued under the XDS Plan as of the date of such transfer reduced by one-half of 1% for each full month by which the commencement of the benefit preceded the last day of the month in which the member's normal retirement age occurs. No member shall receive a duplication of benefits under the Plan and/or XDS Plan.

**Retirement Income Guarantee Plan of Xerox Corporation
and the Xerographic Division, Rochester Regional Joint Board
on Behalf of Itself and Other Regional Joint Boards
Notes to Financial Statements
December 31, 2014 and 2013**

Participants with fewer than forty-two years of service as of January 1, 2009, with respect to benefits accrued after November 30, 2009, will not accrue any further benefits under the 1.0% RIGP Formula.

- (iii) Transitional Retirement Account ("TRA") - Effective January 1, 1990, the employees' retirement accounts under the Savings Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards were transferred to the Plan and renamed TRAs. The TRA balances change based upon subsequent investment results of the funds in which they are invested. As further described in Note 4, the TRAs are fully funded by assets that have been specifically allocated for this purpose ("TRA assets").
- (iv) Cash Balance Retirement Account ("CBRA") - Effective January 1, 1990, CBRA accounts were established and credited with a notational amount equal to the employee's retirement account balance under the Savings Plan of Xerox Corporation and the Xerographic Division, Rochester Regional Joint Board on Behalf of Itself and Other Regional Joint Boards. The notational value of the CBRA account grows in two ways. First, the account is credited annually with an amount equal to 4% of a participant's eligible compensation, as defined in the Plan. Second, the account is credited daily with interest earned at a fixed annual rate. This annual crediting rate, which is determined before the beginning of the year and varies from year to year, is based upon the average effective yield of the one-year Constant Maturity Treasury as of the first business day of each of the 12 months of the preceding year (as published by the Federal Reserve Board), plus 1%. The CBRAs are not funded by assets specifically designated for this benefit.

Individuals who commenced employment with the Company on or after January 1, 2006 are not eligible to participate in the Plan.

Effective January 1, 2013, the RIGP formula benefit as described in subsections (i) and (ii) was frozen.

The RIGP Unallocated portion of the Plan is comprised of assets in excess of those specifically allocated to fund the TRA accounts. This portion of the Plan funds the benefits described in parts (i), (ii) and (iv) of Plan Benefits.

Plan Termination

Although it has not expressed any intention to do so, the Company expressly reserves the right under the Plan to terminate the Plan at any time. In the event the Plan terminates, the TRA assets are reserved to fully fund the TRAs. The remaining net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- (i) Vested benefits insured by the Pension Benefit Guaranty Corporation ("PBGC") up to the applicable limitations (discussed below).
- (ii) Vested benefits not insured by the PBGC.
- (iii) All non-vested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. However, the

**Retirement Income Guarantee Plan of Xerox Corporation
and the Xerographic Division, Rochester Regional Joint Board
on Behalf of Itself and Other Regional Joint Boards
Notes to Financial Statements
December 31, 2014 and 2013**

PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are insured by the PBGC at the level in effect on the date of the Plan's termination.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial condition of the plan sponsor and the level of benefits guaranteed by the PBGC.

Vesting

Prior to January 1, 2008, participants in the Plan became 100% vested in their calculated retirement benefits upon completing five years of service or attaining age 65. Participants in the Plan are fully vested in their RIGP benefits if they are in Xerox employment on or after January 1, 2008.

Administration

The Joint Administrative Board ("JAB") is responsible for the general administration of the Plan and for carrying out the plan provisions. The trustee of the Plan is State Street Bank and Trust Company (the "Trustee"). Effective January 1, 2013, the Plan's record keeper changed from AON Hewitt to Xerox HR Solutions, LLC.

Benefit Payments and Annuity Purchases

Benefit payments and annuity purchases include payments relating to the TRA and the RIGP Unallocated portion of the Plan. The CBRA benefits are paid from the RIGP Unallocated portion of the Plan. See Note 4 for further information on TRA payments.

Effective July 2013, RIGP annuity benefits are paid directly by the Plan, instead of being provided via contracts from an insurance company.

Administrative Expenses

Certain administrative expenses, such as trustee, custodian, recordkeeping and investment manager fees, are paid by the Master Trust and are netted against Master Trust investment income (loss). Certain other administrative expenses are paid by the Company and not included in these financial statements. Expenses paid directly by the Plan include actuarial, legal fees, audit fees, and PBGC premiums.

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Benefit Payments

Benefit payments are recorded when paid.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, accumulated benefits and changes therein, and disclosure of contingent assets and liabilities. Actual results could differ from these estimates.

**Retirement Income Guarantee Plan of Xerox Corporation
and the Xerographic Division, Rochester Regional Joint Board
on Behalf of Itself and Other Regional Joint Boards
Notes to Financial Statements
December 31, 2014 and 2013**

Basis of Presentation

The assets of the Plan are held in the Xerox Corporation Trust Agreement to Fund Retirement Plans (the "Master Trust"). The value of the Plan's interest in the Master Trust is based on the beginning of year value of the Plan's interest in the Master Trust, plus contributions and allocated investment income (loss), less distributions and allocated administrative expenses. For financial reporting purposes, income or loss on plan assets and any realized or unrealized gains or losses on such assets and expenses in the Master Trust are allocated to the Plan based on the Plan's balances.

The Master Trust holds assets for other Company-sponsored plans, some of which may be defined benefit plans and some defined contribution plans. Because the Plan's interest in the Master Trust is not based on participant investment options, such as those offered by the defined contribution plans, there are certain Master Trust investments in which the Plan does not invest.

Valuation of Investments and Income Recognition

The Plan's investment in the Master Trust is recorded at an amount equal to the Plan's interest in the underlying investments of the Master Trust. Investments of the Master Trust are stated at fair value. Shares of registered investment company funds are valued at the net asset value as reported by the fund managers at year-end. Common and preferred stock are stated at fair value based on published market closing prices. Fixed income investments are valued on the basis of valuations furnished by Company-approved independent pricing services. These services determine valuations for normal institutional-size trading units of such securities using valuation models or matrix pricing, which incorporates yield and/or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date and quotations from security dealers to determine current value. If these valuations are deemed to be either not reliable or not readily available, the fair value will be determined in good faith by the Company. The fair value of the common collective trusts are valued at the net asset value on the last business day of the year. Limited partnerships including real estate trusts, are valued at estimated fair value based on fair value as reported in their audited financial statements, as well as information received from the investment advisor. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Risks and Uncertainties

Investments are exposed to various risks, such as interest rate and market risk. Due to the risk associated with certain investments and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that the changes in values of investments in the near term could materially affect the amount reported in the statements of net assets available for benefits and the statement of changes in net assets available for benefits.

The Master Trust invests a portion of its assets in securities with contractual cash flows, such as asset backed securities, collateralized mortgage obligations and commercial mortgage-backed securities. The value, liquidity, and related income of these securities are sensitive to changes in economic conditions, including real estate value, delinquencies and/or defaults and may be adversely affected by shifts in the market's perception of the issuers, including the issuers' creditworthiness. Early repayment of principal on some mortgage – related securities may expose the plan to a lower rate of return upon reinvestment of the principal.

The Master Trust also invests in foreign securities. Investing in foreign securities may include certain risks and considerations not typically associated with investing in U.S. securities, such as

**Retirement Income Guarantee Plan of Xerox Corporation
and the Xerographic Division, Rochester Regional Joint Board
on Behalf of Itself and Other Regional Joint Boards
Notes to Financial Statements
December 31, 2014 and 2013**

fluctuating currency values and changing local and regional economic, political and social conditions, which may result in greater market volatility. In addition, certain foreign securities may not be as liquid as U.S. securities.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term could be material to the financial statements.

Recent Accounting Pronouncements

In May 2015, the Financial Accounting Standards Board (FASB) issued ASU 2015-07 (*Fair Value Measurement (Topic 820) Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*). ASU 2015-07 removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. ASU 2015-07 is effective for the fiscal year ending December 31, 2016, with early adoption permitted. This standard involves presentation and disclosure and, therefore, is not expected to have a material impact on the Plan's Statement of Net Assets Available for Benefits.

In July 2015, the FASB issued ASU 2015-12 *Balance Sheet (Topic 210): Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): (Part I) Fully Benefit-Responsive Investment Contracts, (Part II) Plan Investment Disclosures, (Part III) Measurement Date Practical Expedient*. Part II of the ASU eliminates the requirement to disclose investments that represent 5% or more of net assets available for benefits and the net appreciation or depreciation for investments by general type. Additionally, Part II will require that investments of employee benefit plans be grouped only by general type, eliminating the need to disaggregate the investment in multiple ways. ASU 2015-12 is effective for the fiscal year ending December 31, 2016, with early adoption permitted. The applicable section of the ASU involves presentation and disclosure and, therefore, is not expected to have a material impact on the Plan's financial statements and disclosures.

3. Actuarial Present Value of Accumulated Plan Benefits in Excess of Employees' TRAs

Accumulated plan benefits are estimated future benefit payments attributable to service rendered to date in excess of an employee's TRA assets. Such accumulated benefits arise when an employee's RIGP formula or CBRA benefit exceeds the employee's TRA. Accumulated plan benefits include benefits expected to be paid to:

- (i) Retired or terminated employees or their beneficiaries,
- (ii) Beneficiaries of employees who have died, and
- (iii) Current employees upon termination or retirement, or their beneficiaries upon the employee's death. With respect to the RIGP formula benefit, which is based on the highest average pay, the accumulated plan benefits for active employees is based upon the highest five-year average pay prior to the date the benefit information is presented as of December 31, 2013.

**Retirement Income Guarantee Plan of Xerox Corporation
and the Xerographic Division, Rochester Regional Joint Board
on Behalf of Itself and Other Regional Joint Boards
Notes to Financial Statements
December 31, 2014 and 2013**

Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included, to the extent that they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits in excess of employees' TRAs is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of death, disability or retirement) between the valuation date and the expected date of payment. The significant actuarial assumptions used in the valuation as of December 31, 2013 and 2012 were:

- (i) Mortality Rates: As of December 31, 2013, for recurring benefit payments and pre-retirement discounting is the RP-2014 Mortality Tables projected with Mortality Improvement Scale MP-2014. Lump sums, for years prior to 2016, are determined according to current applicable table projected with past improvements. For years after 2016, lump sums are determined using the aggregate RP-2014 Mortality Tables, blended 50% male/50% female under Scale MP-2014. As of December 31, 2012, for recurring benefit payments and pre-retirement discounting is the RP-2000 CH generational table projected with Scale AA. Lump sums are determined according to current applicable table projected with past improvements for years after 2013 under scale AA.
- (ii) Retirement Age: For December 31, 2013 and 2012, the average retirement age is based on rates from age 55 to 70 (150% of the rates for those with more than 30 years of service below age 64) with an average retirement age of 62.9.
- (iii) Interest Rate: 7.5% (net of assumed administrative expenses of 0.25%), as of December 31, 2013 and 2012.
- (iv) Lump Sum Interest Rate: 6.0% as of December 31, 2013 and 2012.
- (v) Cash Balance Interest Crediting Rate: 4.25% as of December 31, 2013 and 2012.
- (vi) Assumed Percentage Married: 75% of employees are assumed to be married as of December 31, 2013 and 2012. Males are assumed to be 3 years older than their spouses.
- (vii) Assumed Percentage Electing Lump Sums: 85% and 100% as of December 31, 2013 and 2012, respectively.

5. Funding

The Plan is in compliance with the minimum funding standards of ERISA. There was a \$9,000 contribution to the Plan for the year ended December 31, 2014. There was no contribution to the plan for the year ended December 31, 2013.

6. Tax Status

The Plan obtained its latest determination letter from the Internal Revenue Service ("IRS") on April 29, 2014, indicating that the Plan, as designed, was in compliance with the applicable requirements of the Internal Revenue Code (the "IRC"). The Plan has been amended since receiving the determination letter. The plan administrator believes that the Plan, as currently designed and operated, is in compliance with the applicable requirements of the IRC. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by

the Internal Revenue Service. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2014, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes it is no longer subject to income tax examinations for years prior to 2010.

7. Master Trust

As discussed in Note 2, the Plan participates in the Master Trust. The Trustee holds the Master Trust's investment assets, provides administrative functions for each of the Plans participating in the Master Trust, and executes investment transactions as directed by participants.

The following Xerox employee benefit plans represent the following percentages in the net assets of the Master Trust, for the year ended December 31:

Investment Strategy Fiduciary

The named fiduciary with respect to the overall investment strategy for the Master Trust investments, along with all other day to day fiduciary investment responsibilities, is the Xerox Retirement Investment Committee (XRIC). The Xerox Corporate Treasurer chairs the XRIC, which is composed of corporate members who oversee the management of the funds on a regular basis.

The Master Trust's investments (including investments bought, sold, and held during the year) appreciated (depreciated) in value as follows (*in thousands*) for the years ended December 31:

	2014	2013
Fixed income investments	\$ 172,461	\$ (169,968)

8. Fair Value Measurement

ASC 820, *Fair Value Measurements and Disclosures*, defines fair value, establishes a market-based framework hierarchy for measuring fair value, and expands disclosures about fair value measurements in the notes to the financial statements. ASC 820 is applicable whenever another accounting pronouncement requires or permits assets and liabilities to be measured at fair value.

In accordance with ASC 820, fair value is defined as the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date in the principal or most advantageous market of the asset.

ASC 820 established a three-tier hierarchy based on transparency of inputs to the valuation of an asset or liability:

- Level 1: Unadjusted quoted prices in active markets for identical, unrestricted assets or liabilities.
- Level 2: Prices determined using other significant observable inputs. Observable inputs are inputs that other market participants would use in valuing a portfolio instrument. These may include quoted prices for similar securities, interest rates, foreign exchange rates, prepayment speeds, credit risk and others.

**Retirement Income Guarantee Plan of Xerox Corporation
and the Xerographic Division, Rochester Regional Joint Board
on Behalf of Itself and Other Regional Joint Boards
Notes to Financial Statements
December 31, 2014 and 2013**

Level 3: Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used. Unobservable inputs reflect the Plan Administrator's own assumptions about the factors market participants would use in valuing a portfolio instrument, and would be based on the best information available.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The primary Level 3 assets are Real Estate and Private Equity/Venture Capital investments. The fair value of the real estate investment funds are based on the Net Asset Value (NAV) of the ownership interest in the funds. NAV information is received from the investment advisers and is primarily derived from third-party real estate appraisals for the properties owned. The fair value for the private equity/venture capital partnership investments are based on our share of the estimated fair values for the underlying investments held by these partnerships as reported in their audited financial statements. The valuation techniques and inputs for the Level 3 assets have been consistently applied for all periods presented. The investment advisers are selected by the XRIC. The authority for monitoring the valuation process of all investments is delegated by the XRIC to the Chief Investment Officer to whom the Xerox Trust Investment group reports. The Trust Investment group meets with investment advisers and performs quarterly reviews of the funds' fair value measurements with investment advisers comparing those valuations to similar funds' valuations outside of the Master Trust. Any changes in the fair value measurements are followed up and brought to the XRIC's attention at their quarterly meetings.

According to the hierarchy, each fund was assigned a level 1, 2 or 3, based on where each fund's assets were invested in.

Level 3 Investment Assets

The level 3 investment assets represent approximately five percent of the total Master Trust investments and are comprised of the partnerships, real estate funds and investments in restricted stock. The table below sets forth a summary of changes in the fair value of the Master Trust's level 3 investment assets for

the year ended December 31, 2014. The classification of an investment within level 3 is based upon the significance of the unobservable inputs to the overall fair value measurement.

¹ These categories represent investments in Common Collective Trusts investing in domestic equity, international equity, and fixed income securities. All the Common Collective Trust funds have daily liquidity and are not subject to any redemption restrictions at the measurement date. The funds have different trading terms varying from one to three days.

² This category includes three partnership funds that invest in international equity. The funds allow for monthly redemptions and contributions on the first of each month. The fund manager must be notified by the 15th of the preceding month for redemptions and contributions.

³ This category includes 17 partnership funds that invest in private equity both domestically and internationally. These investments can never be redeemed during the life of the funds. Instead, distributions are received through the liquidation of the underlying assets of the funds. It is estimated that the underlying assets will be liquidated over the next 1 to 5 years. Unfunded commitments of \$145.1 million remain in nine of the funds.

⁴ This category includes 10 investments in domestic and international real estate funds. The fair value of these investments is estimated using the NAV of the Trust's ownership interest in partners' capital. The valuation inputs of these investments are derived from third party appraisals. These investments can never be redeemed during the life of the funds. Distributions from each fund will be received as the underlying investments if the funds are liquidated over the next 1 to 6 years. Unfunded commitments of \$2.3 million remain in three of the funds.

9. Derivative Policy

The Master Trust may enter into contractual arrangements (derivatives) in carrying out its investment strategy, and is limited to the use of derivatives allowed by the Investment Policy Statement, principally to: (1) hedge a portion of the Master Trust's portfolio to limit or minimize exposure to certain risks, (2) gain an exposure to a market more rapidly or less expensively than could be accomplished through the use of the cash markets, and (3) reduce the cost of structuring the portfolio or capture value disparities between financial instruments. The Master Trust may utilize both exchange traded investment instruments such as equity and fixed income futures and options on fixed income futures, forward currency contracts, interest rate swaps, credit default swaps (CDS), swaptions and options. When engaging in forward currency contracts and any other over-the-counter derivatives, there is exposure to credit risk in the event of non-performance by the counterparties to these transactions. The Master Trust manages this exposure through credit approvals and limited monitoring procedures. Procedures are in place to regularly monitor and report market and counterparty credit risks associated with these instruments. This counterparty risk is further mitigated through the netting provisions of various agreements with certain counterparties that permit net settlement under specific conditions and, for certain counterparties, by providing collateral. These netting provisions may be part of an International Swap and Derivative Association agreement (ISDA) or other types of agreements. Such netting provisions govern the ability to offset amounts the Master Trust owes a counterparty against amounts the counterparty owes the Master Trust (net settlement). The agreements are specific to an individual counterparty within a particular investment account and generally allow net settlement in the event of contract termination. Furthermore, these agreements generally permit termination by either party prior to maturity upon the occurrence of certain stated events, such as failure to pay or bankruptcy. In addition, ISDAs specify other events, the occurrence of which would allow one of the parties to terminate. Collateral requirements are determined based on the net aggregate unrealized gain or loss on all bilateral derivatives with each counterparty, subject to minimum transfer amounts. Any additional collateral required due to changes in securities values is transferred the next business day.

The Master Trust discloses all derivatives on the Statement of Net Assets of the Master Trust (Footnote 4) on a gross basis. All collateral amounts (pledged and received) for the individual types of derivatives are disclosed in the following notes.

During the year ended December 31, 2014 and 2013, derivatives were used only in the defined benefit plans of the Master Trust.

Prior year derivative disclosures were revised to conform to current year derivative disclosures presentation.

The following is a summary of the significant accounting policies associated with the Master Trust's use of derivatives.

Forward Foreign Currency Exchange Contracts

Forward currency contracts are generally utilized to hedge a portion of the currency exposure that results from the Master Trust's holdings of equity and fixed income securities denominated in foreign currencies.

Forward currency contracts are generally marked-to-market at the prevailing forward exchange rate of the underlying currencies and the difference between contract value and market value is recorded as unrealized appreciation (depreciation) in Master Trust net assets. When the forward currency contract is closed, the Master Trust transfers the unrealized appreciation (depreciation) to a realized gain (loss) equal to the change in the value of the forward exchange contract when it was opened and the value at the time it was closed or offset. Sales and purchases of forward currency contracts having the same settlement date and broker are offset, and any gain (loss) is realized on the date of offset.

Certain risks may arise upon entering into a forward currency contract from the potential inability of counterparties to meet the terms of their contracts. Additionally, when utilizing forward currency contracts to hedge, the Master Trust gives up the opportunity to profit from favorable exchange rate movements during the term of the contract. As of December 31, 2014 and 2013, the value of currencies under forward currency contracts represents less than 1% of total investments.

Future Contracts

The Master Trust used equity index and fixed income futures contracts to manage exposure to the market. Buying futures tends to increase the Master Trust's exposure to the underlying instrument. Selling futures tends to decrease the Master Trust's exposure to the underlying instrument held or hedge the fair value of other fund investments. The Master Trust does not employ leverage in its use of derivatives. Futures contracts are valued at the last settlement price at the end of each day on the exchange upon which they are traded. Upon entering into a futures contract, the Master Trust is required to deposit either in cash or securities an amount (initial margin) equal to a certain percentage of the nominal value of the contract. Pursuant to the futures contract, the Master Trust agrees to receive from, or pay to, the broker an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin" which are generally settled daily and are included in the unrealized gains (losses) on futures contracts. The Master Trust will record a variation margin receivable or payable in the Master Trust net assets for variation margins which have not yet been paid at the end of the year.

Futures contracts involve, to varying degrees, credit and market risks. The Master Trust enters into futures contracts on exchanges where the exchange acts as the counterparty to the transaction. Thus, credit risk on such transactions is limited to the failure of the exchange. The daily settlement on the futures contracts serves to greatly reduce credit risk. Losses in value may arise from changes in the value of the underlying instruments or if there is an illiquid secondary market for the contracts. In addition, there is the risk that there may not be an exact correlation between a futures contract and the underlying index or security. As of December 31, 2014 and 2013, the unrealized gain/loss of future contracts represents less than 1% of total investments.

As of December 31, 2014 and 2013, U.S. Government Securities with market value of \$383,000 and \$600,375, respectively, and cash balances of \$113,000 and \$983,000, respectively, were pledged to cover margin requirements for open futures contracts.

Interest Rate and Credit Default Swaps and Swaptions

The Master Trust may invest in interest rate swap contracts. The Master Trust uses interest rate swap contracts to manage its exposure to interest rates. Interest rate swap contracts typically represent the exchange between the Master Trust and a counterparty of respective commitments to make variable rate and fixed rate payments with respect to a notional amount of principal. Such contracts have a term coincident with the maturity date of the Master Trust, with settlement scheduled for the termination date of the contract.

During the period that the swap contract is open, the contract is marked-to-market as the net amount due to or from the Master Trust in accordance with the terms of the contract based on the closing level of the

and the Xerographic Division, Rochester Regional Joint Board
on Behalf of Itself and Other Regional Joint Boards

relevant index or security and interest accrual through the valuation date. Swaps are marked-to-market daily based upon values from third party vendors or quotations from market makers to the extent available and the change in value, if any, is recorded as an unrealized gain or loss on the Statement of Net Assets Available for Benefits. Periodic cash settlements on interest rate swaps are recorded as realized gains or losses. Interest rate swap contracts may include extended effective dates.

Entering into a swap contract involves, to varying degrees, elements of credit, market and/or interest rate risk in excess of the amounts reported in the Statement of Net Assets of the Master Trust. Notional principal amounts are used to express the extent of involvement in the transactions, but are not delivered under the contracts. Accordingly, credit risk is limited to any amounts receivable from the counterparty. To reduce credit risk from potential counterparty default, the Master Trust enters into swap contracts with counterparties whose creditworthiness has been approved by the Company. The Master Trust bears the market risk arising from any change in index or security values or interest rates. Under certain circumstances, the Master Trust may be required to pledge collateral to or may receive collateral from swap counterparties. Initial upfront payments received or made upon entering into a swap contract are included in the fair value of the swap.

CDS contracts are agreements in which one party pays fixed periodic payments to a counterparty in consideration for a guarantee from the counterparty to make a specific payment should a specified negative credit event(s) take place. The Master Trust entered into CDS contracts to hedge the Master Trust's exposure on a debt security that it owns or in lieu of selling such debt security.

As the purchaser of a CDS contract, the Master Trust purchases protection by paying a periodic interest rate on the notional amount to the counterparty. The interest amount is accrued daily as a component of unrealized appreciation (depreciation) and is recorded as a realized loss upon payment. If a credit event

and the Xerographic Division, Rochester Regional Joint Board
on Behalf of Itself and Other Regional Joint Boards
Notes to Financial Statements

as specified in the contract occurs, the Master Trust may have the option either to deliver the reference obligation to the seller in exchange for a cash payment of its par amount, or to receive a net cash settlement equal to the par amount less an agreed-upon value of the reference obligation as of the date of the credit event. The difference between the value of the obligation or cash delivered and the notional amount received will be recorded as a realized gain (loss).

As the seller of a CDS contract, the Master Trust sells protection to a buyer and will generally receive a periodic interest rate on the notional amount. The interest amount is accrued daily as a component of unrealized appreciation (depreciation) and is recorded as a realized gain upon receipt of the payment. If a credit event as specified in the contract occurs, the Master Trust may either be required to accept the reference obligation from the buyer in exchange for a cash payment of its notional amount, or to pay the buyer a net cash settlement equal to the notional amount less an agreed-upon value of the reference obligation as of the date of the credit event. The difference between the value of the obligation or cash received and the notional amount paid will be recorded as a realized gain (loss). The maximum potential amount of undiscounted future payments the Master Trust could be required to make as the seller of protection under a CDS contract is equal to the notional amount of the reference obligation.

As a protection seller, the Master Trust bears the risk of loss from the credit events specified in the contract. Although specified events are contract specific, credit events are generally defined as bankruptcy, failure to pay, restructuring, obligation acceleration, obligation default, or repudiation/moratorium. For CDS contracts on credit indices, quoted market prices and resulting market values serve as an indicator of the current status of the payment/performance risk. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the reference entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the contract. CDS contracts are valued daily, and the change in value is recorded as unrealized appreciation (depreciation) until the termination of the swap, at which time a realized gain (loss) is recorded.

CDS contracts can involve greater risks than if a plan had invested in the reference obligation directly since, in addition to general market risks, CDS's are subject to counterparty credit risk, leverage risk, hedging risk, correlation risk and liquidity risk. The Master Trust will enter into CDS transactions only with counterparties that meet certain standards of creditworthiness.

At December 31, 2014, the Master Trust had pledged cash collateral of \$2,625,000 and Government Securities of \$4,077,000 to swap counterparties.

The Master Trust may write or purchase interest rate swaption agreements which are options to enter into a pre-defined swap agreement by some specified date in the future. The writer of the swaption becomes a counterparty to the swap if the buyer exercises. The interest rate swaption agreement will specify whether the buyer of the swaption will be a fixed rate receiver or a fixed rate payer upon exercise. Options on swap contracts are considered over-the-counter financial derivative instruments that derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These contracts are normally valued on the basis of broker dealer quotations or by pricing service providers.

In 2014, total premiums received was \$5,105,209. At December 31, 2014, the Master Trust was in receipt of cash collateral of \$590,000 from the broker for swaptions.

Options Contracts

The Master Trust may purchase and sell put and call options on securities. The Master Trust uses options to manage against changes in the market value of the Master Trust's investments, mitigate exposure to fluctuations in currency values, or interest rates, or protect the Master Trust's unrealized gains. In addition, the Master Trust may use options to facilitate investment transactions by protecting the Master Trust against a change in the market price of the investment, enhance potential gains, or as a substitute for the purchase or sale of securities or currency.

Exchange-traded options are valued using the National Best Bid and Offer (NBBO) close price. If the NBBO close price is not available, the NBBO bid (for long positions) or NBBO Ask (for short positions) will be used to value the option contract. Options traded over-the-counter are valued using a broker quotation or an internal valuation using an options pricing model such as Black-Scholes.

When the Master Trust writes an option, the premium received is recorded as a liability and is subsequently adjusted to the current fair value of the option written. Premiums received from writing options that expire unexercised are treated by the Master Trust on the expiration date as realized gains from written options. The difference between the premium and the amount paid for a closing purchase, including brokerage commissions, is also recorded as a realized gain/(loss). When an instrument is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of an instrument acquired or deducted from (or added to) the proceeds of the instrument sold.

Writing puts and buying calls may increase the Master Trust's exposure to changes in the value of the underlying instrument. Buying puts and writing calls may decrease the Master Trust's exposure to such changes. Losses may arise when buying and selling options if there is an illiquid secondary market for the options, which may cause a party to receive less than would be received in a liquid market, or if the counterparties do not perform under the term of the options.

At December 31, 2014, the Master Trust had written foreign currency options outstanding in the notional amount of \$9,000,000 and a value of \$290,000. These options expire in 2015. There were no purchased or written options outstanding as of December 31, 2013.

During the year ended December 31, 2014, the Master Trust used purchased and written options to protect the portfolio from adverse movements in securities prices and enhance return.

10. Securities Lending

The Master Trust is not restricted from lending securities to other qualified financial institutions, provided such loans are callable at any time and are at all times fully collateralized by cash (including both U.S. and foreign currency), cash equivalents or securities issued or guaranteed by the U.S. government or its agencies and the sovereign debt of foreign countries. The portfolios may bear the risk of delay in recovery of, or even of rights in, the securities loaned should the borrower of the securities fail financially. Consequently, loans of portfolio securities will only be made to firms deemed by the sub-advisors to be creditworthy. The portfolios receive compensation for lending their securities either in the form of fees or by retaining a portion of interest on the investment of any cash received as collateral. Cash collateral, if any, is invested in the State Street Quality A Short Term Investment Fund. There were no securities loaned by the Master Trust at December 31, 2014 and 2013.

11. Related Party Transactions

The Plan pays administrative expenses related to salaries of Xerox employees responsible for plan administration. The plan also allowed rollovers to an affiliated plan, the Xerox Corporation Savings Plan, in the amount of \$1,581,580 and \$2,078,754 as of December 31, 2014 and 2013, respectively. These transactions qualify as party-in-interest transactions. Administrative expenses paid to the Trustee and administrative expenses paid to funds managed by an affiliate of the Trustee, also qualify as party-in-interest transactions. Personnel and facilities of the Company have been used to perform administrative functions for the Plan. The Company pays fees to Xerox HR Solutions, LLC as record keeper of the Plan.

12. Commitments and Contingencies

In the normal course of business, the Plan enters into agreements that contain a variety of representations and warranties which provide general indemnifications. The Plan's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Plan that have not yet occurred. However, based on experience, the Plan expects the risk of loss to be remote.

The Master Trust is committed to invest \$982,020,061 in certain private equity and real estate funds, of which \$834,693,095 has been contributed as of December 31, 2014.

13. Subsequent Events

The Plan has evaluated subsequent events through October 12, 2015, the date the financial statements were available to be issued. All subsequent events requiring recognition have been incorporated into these financial statements.

Statement by Enrolled Actuary
 To the best of my knowledge, the information supplied in this schedule and accompanying schedules, statements and attachments, if any, is complete and accurate. Each prescribed assumption was applied in accordance with applicable law and regulations. In my opinion, each other assumption is reasonable (taking into account the experience of the plan and reasonable expectations) and such other assumptions, in combination, offer my best estimate of anticipated experience under the plan.

Schedule SB, line 22—Description of Weighted Average Retirement Age

The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation. All retirements are assumed to occur at beginning of year.

(a) Age	(b) Rate	(c) Weight	(d) Product (a) × (b) × (c)
55	5.00%	1.0000	2.75
56	2.00%	0.9500	1.06
57	2.00%	0.9310	1.06
58	2.00%	0.9124	1.06
59	3.00%	0.8941	1.58
60	7.50%	0.8673	3.90
61	7.50%	0.8023	3.67
62	30.00%	0.7421	13.80
63	15.00%	0.5195	4.91
64	10.00%	0.4415	2.83
65	65.00%	0.3974	16.79
66	25.00%	0.1391	2.29
67	30.00%	0.1043	2.10
68	35.00%	0.0730	1.74
69	50.00%	0.0475	1.64
70	100.00%	0.0237	1.66
Weighted Average			62.84

The weighted average retirement age is 63. The retirement rates for employees with 30 years of service are 150% of the retirement rates for employees with fewer than 30 years of service for ages up to 63. The average age upon which employees would have 30 years of service is between ages 58 and 59. Therefore, we have included the retirement rates for employees with fewer than 30 years of service at ages 58 and younger and retirement rates for employees with 30 years of service at ages 59 to 63.

Schedule SB, Part V—Summary of Plan Provisions

Effective Date July 1, 1977, as amended through January 1, 2013.

Eligibility All employees covered by a collective bargaining agreement between the Company and The Xerographic Division, Union of Needleworkers, Industrial and Textile Employees, A.F.L.-C.I.O.-C.L.C. which provides for coverage under the Plan and the Plan is adopted for such employee population. Effective January 1, 2006, the Plan was closed to new hires (April 1, 2006 for Local 142).

Retirement Dates

Normal Retirement	Age 65.
Early Retirement	Age 55 and 10 years of service.
Deferred Vested	Immediate for current employees as of January 1, 2008.
Disability	Any age and receiving disability benefits under the U.S. Social Security Act.
Preretirement Death	5 years of service and an eligible spouse to receive in excess of the greater of CBRA or TRA.

Retirement Benefits

Normal Retirement	The larger of (a), (b), (c), or (d) below: (a) 1.4% of average monthly compensation, times years of participation up to 30; (b) 1% of average monthly compensation times years of participation;

Schedule SB, Part V—Summary of Plan Provisions

Normal Retirement
(continued)

- (c) The benefit that can be provided by the participant's Cash Balance Retirement Account converted at the applicable rates. The annual cash balance credit is 4% of compensation (was 5% prior to 2006) plus interest, or;
- (d) The benefit that could be provided by the participant's Transitional Retirement Account converted at the applicable rates.

The minimum benefit provided to an employee who was covered by the XDS Retirement Plan and became covered by this Plan is his accrued benefit earned in that plan, plus the greater of (c) or (d).

Effective November 30, 2009, the formula under (b) above will only apply to those participants with 42 years of service as of January 1, 2009. Others will be entitled to the benefits accrued under this formula to November 30, 2009 as a minimum benefit.

The benefits under 1(a), (b) and (c) are frozen as of December 31, 2012.

In addition to the benefits described above, participants will accumulate a separate, additional benefit provided by a new Cash Balance Retirement Account which is initially \$0 as of January 1, 2013 converted at the applicable rates. The annual cash balance credit is 4% of compensation plus interest for 2013 and later periods.

Early Retirement

The normal retirement benefit based on years of participation and average monthly compensation on the date of termination. If benefit payments are to commence prior to age 65, the benefit determined under (a) or (b) above will be reduced $1/240^{\text{th}}$ for each month by which the commencement of benefits precedes age 65, or age 62 if the employee had 30 or more Years of Service at retirement.

The Cash Balance Retirement Account and the Transitional Retirement Account will be converted based on an immediate annuity factor at early retirement age.

Schedule SB, Part V—Summary of Plan Provisions

Deferred Vested	The normal retirement benefit based on years of participation and average monthly compensation on the date of termination. This benefit is payable in full beginning at age 65 or in an actuarially reduced form as of any earlier age.
Disability	A member continues to accrue years of service and cash balance credits until the earlier of when he ceases to be disabled, becomes an inactive participant, or becomes eligible for a normal retirement benefit.
Preretirement Death	A benefit of 50% of the excess of the benefit [greater of (a) or (b)] the member would have received if he had survived to his earliest retirement age and retired the day before his death, over the annuity value of the greater of the Cash Balance Retirement Account or the Transitional Retirement Account, and is payable for the life of the participant's spouse. In addition, the greater of the Cash Balance Retirement Account or Transitional Retirement Account is payable in any event upon the participant's death.
Normal Form of Payment	Life annuity. A member who is married at the time he retires shall have his unreduced benefit paid on a 50% joint and survivor basis unless he elects to the contrary. A terminated employee who later reaches retirement age will receive an actuarially reduced benefit payable as a 50% joint and survivor unless he elects to the contrary.
Optional Forms of Payment	5, 10, 15, 20 Year Certain & Life; 50%, 66 2/3%, 75%, 100% Joint & Survivor; Lump Sum. All options available with or without cash refund.
Years of Service	All periods of employment measured on an elapsed time basis. ERISA break-in-service rules apply except that periods of employment which terminated before January 1, 1976 shall be excluded.

Schedule SB, line 22—Description of Weighted Average Retirement Age

The average retirement age shown in line 22 has been calculated by assuming the following retirement rates and no decrements other than retirement for this calculation. All retirements are assumed to occur at beginning of year.

(a) Age	(b) Rate	(c) Weight	(d) Product (a) × (b) × (c)
55	5.00%	1.0000	2.75
56	2.00%	0.9500	1.06
57	2.00%	0.9310	1.06
58	2.00%	0.9124	1.06
59	3.00%	0.8941	1.58
60	7.50%	0.8673	3.90
61	7.50%	0.8023	3.67
62	30.00%	0.7421	13.80
63	15.00%	0.5195	4.91
64	10.00%	0.4415	2.83
65	65.00%	0.3974	16.79
66	25.00%	0.1391	2.29
67	30.00%	0.1043	2.10
68	35.00%	0.0730	1.74
69	50.00%	0.0475	1.64
70	100.00%	0.0237	1.66
Weighted Average			62.84

The weighted average retirement age is 63. The retirement rates for employees with 30 years of service are 150% of the retirement rates for employees with fewer than 30 years of service for ages up to 63. The average age upon which employees would have 30 years of service is between ages 58 and 59. Therefore, we have included the retirement rates for employees with fewer than 30 years of service at ages 58 and younger and retirement rates for employees with 30 years of service at ages 59 to 63.

Schedule SB, Part V—Summary of Plan Provisions

Effective Date July 1, 1977, as amended through January 1, 2013.

Eligibility All employees covered by a collective bargaining agreement between the Company and The Xerographic Division, Union of Needleworkers, Industrial and Textile Employees, A.F.L.-C.I.O.-C.L.C. which provides for coverage under the Plan and the Plan is adopted for such employee population. Effective January 1, 2006, the Plan was closed to new hires (April 1, 2006 for Local 142).

Retirement Dates

Normal Retirement Age 65.

Early Retirement Age 55 and 10 years of service.

Deferred Vested Immediate for current employees as of January 1, 2008.

Disability Any age and receiving disability benefits under the U.S. Social Security Act.

Preretirement Death 5 years of service and an eligible spouse to receive in excess of the greater of CBRA or TRA.

Retirement Benefits

Normal Retirement The larger of (a), (b), (c), or (d) below:

(a) 1.4% of average monthly compensation, times years of participation up to 30;

(b) 1% of average monthly compensation times years of participation;

Schedule SB, Part V—Summary of Plan Provisions

Normal Retirement
(continued)

- (c) The benefit that can be provided by the participant's Cash Balance Retirement Account converted at the applicable rates. The annual cash balance credit is 4% of compensation (was 5% prior to 2006) plus interest, or;
- (d) The benefit that could be provided by the participant's Transitional Retirement Account converted at the applicable rates.

The minimum benefit provided to an employee who was covered by the XDS Retirement Plan and became covered by this Plan is his accrued benefit earned in that plan, plus the greater of (c) or (d).

Effective November 30, 2009, the formula under (b) above will only apply to those participants with 42 years of service as of January 1, 2009. Others will be entitled to the benefits accrued under this formula to November 30, 2009 as a minimum benefit.

The benefits under 1(a), (b) and (c) are frozen as of December 31, 2012.

In addition to the benefits described above, participants will accumulate a separate, additional benefit provided by a new Cash Balance Retirement Account which is initially \$0 as of January 1, 2013 converted at the applicable rates. The annual cash balance credit is 4% of compensation plus interest for 2013 and later periods.

Early Retirement

The normal retirement benefit based on years of participation and average monthly compensation on the date of termination. If benefit payments are to commence prior to age 65, the benefit determined under (a) or (b) above will be reduced $1/240^{\text{th}}$ for each month by which the commencement of benefits precedes age 65, or age 62 if the employee had 30 or more Years of Service at retirement.

The Cash Balance Retirement Account and the Transitional Retirement Account will be converted based on an immediate annuity factor at early retirement age.
