Nursery Supplies, Inc. 401(k) Profit Sharing Plan

Notes to Financial Statements
December 31, 2014 and 2013

Note 1 - Description of Plan

The following brief description of the Nursery Supplies, Inc. 401(k) Profit Sharing Plan (the Plan) is provided for general information purposes only. Participants should refer to the plan agreement for more complete information.

General

The Plan is a defined contribution pension plan covering substantially all employees of Nursery Supplies, Inc. (the Company). In order to be eligible to make salary deferrals, employees must have three months of service and be age 18 or older. In order to be eligible for employer discretionary contributions, employees must have one year of service and be age 18 or older. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA).

Contributions

Effective January 1, 2014, participants may contribute up to 100% of pre-tax annual compensation, as defined in the Plan. For 2013 and prior, participants could contribute up to 80% of pre-tax annual compensation, as defined in the Plan. Effective January 1, 2014, participants may designate all or a portion of their deferral contributions as after-tax contributions into a Roth account. Participants who have attained age 50 before the end of the year are eligible to make catch-up contributions. Participants may also contribute amounts representing distributions from certain other qualified defined benefit or defined contribution plans. Participants direct the investment of their contributions into various investment options offered by the Plan. For the years ended December 31, 2014 and 2013, the Company made matching contributions of 100% of the first 3% of compensation deferred plus 50% of the next 2% of compensation deferred. The Company may make discretionary profit-sharing contributions. Contributions are subject to certain IRS limitations.

Participant Accounts

Each participant's account is credited with the participant's contribution and an allocation of (a) the Company's contribution and (b) plan earnings. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Notes to Financial Statements

Note 1 - Description of Plan (continued)

Vesting

Participants are immediately vested in their contributions and the Company's safe harbor matching contributions plus actual earnings thereon. Vesting in the remainder of their accounts is based on years of continuous service. A participant is 100% vested after six years of credited service, based on the following vesting schedule:

<u>Years of Service</u>	<u>Vesting Percentage</u>
0-1	0%
2	20%
3	40%
4	60%
5	80%
6	100%

Notes Receivable from Participants

Participants in the Plan may request loans equal to a maximum of the lesser of 50% of their vested balance or \$50,000, reduced by the total of the participant's highest outstanding loan balance from this Plan and all plans of the employer during the 12-month period ending on the day prior to the date the loan is made. Repayment of the loan must be made at least quarterly, on an after-tax basis, in level payments of principal and interest and must be repaid within five years, unless the loan is taken for the purchase of a primary residence. The loans are secured by the balance in the participant's account and bear interest at rates which are commensurate with local prevailing rates as determined by the plan administrator.

Payment of Benefits

On termination of service due to death, disability, retirement or for other reasons, a participant will receive the value of the vested interest in his or her account as either a lump-sum distribution or installments not to exceed expected future lifetime.

Forfeited Accounts

Forfeitures of employer contributions will be used first to reduce employer contributions under the Plan. Any remaining forfeitures will be used first to offset administrative expenses and then reallocated to employees in the same manner as employer contributions. At December 31, 2014 and 2013, forfeited nonvested accounts totaled \$-0-. In 2014 and 2013, employer contributions were reduced by \$18,332 and \$38,611, respectively, from forfeited nonvested accounts.

Note 2 - Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting.

Investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The provisions of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 have not been applied to the statement of net assets available for benefits since the difference between contract value and fair value is not material.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and changes therein and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Investment Valuation and Income Recognition

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Notes Receivable from Participants

Notes receivable from participants are measured at their unpaid principal balance plus any accrued but unpaid interest. Delinquent loans are treated as distributions based upon the terms of the plan document.

Payment of Benefits

Benefits are recorded when paid.

Note 2 - Summary of Significant Accounting Policies (continued)

Administrative Expenses

Certain expenses of maintaining the Plan are paid directly by the Company and are excluded from these financial statements. Fees related to the administration of notes receivable from participants are charged directly to the participant's account and are included in administrative expenses. Investment related expenses are included in net appreciation in fair value of investments.

Recent Accounting Pronouncement

In May 2015, the FASB issued Accounting Standards Update (ASU) 2015-07, *Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*. The amendments in ASU 2015-07 remove the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. The amendments also remove the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the net asset value per share practical expedient. Rather, those disclosures are limited to investments for which the entity has elected to measure the fair value using that practical expedient. ASU 2015-07 is effective for annual periods beginning after December 15, 2016, and interim periods within those fiscal years, with early adoption permitted. The Plan is currently evaluating the impact that the adoption of ASU 2015-07 will have on its financial statements.

Note 3 - Information Certified and Provided by Principal Trust Company and Bank of America, N.A.

The following is a summary of the Plan's asset information as of December 31, 2014 and 2013, and for the years then ended, included throughout the Plan's financial statements and supplemental schedule that was prepared by or derived from information provided by the trustees and furnished to the plan administrator. The plan administrator has obtained certifications from the current trustee, Principal Trust Company, and the former trustee, Bank of America, N.A., that information provided to the plan administrator by the trustees related to the following assets is complete and accurate. Accordingly, as permitted by 29 CFR 2520.103-8 of the Department of Labor's Rules and Regulations for Reporting and Disclosure under ERISA, the plan administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to information which appears throughout the financial statements and supplemental schedule related to the following assets. Investments that represent 5% or more of the Plan's net assets at December 31, 2014 and 2013 are separately identified.

Note 4 - Fair Value Measurements

FASB ASC 820, *Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described as follows:

Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 - Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following are descriptions of the valuation methodologies used for assets measured at fair value. As a result of the addition of a guaranteed investment contract during 2014, there has been a change in the methodologies used at December 31, 2014 and 2013.

Registered investment companies are valued at the net asset value of shares held by the Plan at year-end.

The Plan's interests in collective trust funds are based on the fair value of the collective trust funds' underlying investments as based on information reported by the trustee using the audited financial statements of the collective trust funds.

Nursery Supplies, Inc. 401(k) Profit Sharing Plan**Notes to Financial Statements**

December 31, 2014 and 2013

Note 4 - Fair Value Measurements (continued)

The guaranteed investment contract is valued at contract value by the insurance company. Contract value is the aggregation of contributions plus interest, less withdrawals, if any. Since most participant transactions are executed using contract value without adjustment, the insurance company believes that contract value is a good proxy for fair value. In determining the reasonableness of the methodology, the trustee evaluates a variety of factors including review of existing contracts, economic conditions, industry and market developments, and overall credit ratings. Certain unobservable inputs are assessed through review of contract terms (for example, duration or payout date) while others are substantiated utilizing available market data (for example, swap curve rate).

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following summary sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2014 and 2013:

Fair Value Measurements at December 31, 2014

Changes in Fair Value Levels

The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

We evaluated the significance of transfers between levels based upon the nature of the financial instrument and the size of the transfer relative to total net assets available for benefits. The following table sets forth a summary of changes in the fair value of the Plan's Level 3 assets for the year ended December 31, 2014:

	Guaranteed Investment Contract
Balance at beginning of year	\$ -
Purchases	2,204,588
Sales	(738,530)
Earnings	25,705
Fees	(1,420)
Balance at end of year	\$ 1,490,343

Unrealized gains (losses) from the guaranteed investment contract are not included in the statement of changes in net assets available for benefits as the contract is recorded at contract value for purposes of the net assets available for benefits.

Note 4 - Fair Value Measurements (continued)

Quantitative Information about Significant Unobservable Inputs Used in Level 3 Fair Value Measurements

The following table represents the Plan's Level 3 financial instruments, the valuation techniques used to measure the fair value of those financial instruments, the significant unobservable inputs and the ranges of values for those inputs:

Instrument	As of December 31, 2014				
	Fair Value	Principal Valuation Technique	Unobservable Inputs	Range of Significant Input Values	Weighted Average
Guaranteed investment contract	\$ 1,490,343	Discontinuation Value	Composite Crediting Rate	2.00%	2.00%
			Surrender Charge	5.00%	

In estimating fair value of the investments in Level 3, the plan administrator may use third-party pricing sources or appraisers. In substantiating the reasonableness of the pricing data provided by third parties, the plan administrator evaluates a variety of factors, including review of methods and assumptions used by external sources, recently executed transactions, existing contracts, economic conditions, industry and market developments, and overall credit ratings.

Fair Value of Investments in Certain Entities that Calculate Net Asset Value Per Share (or its Equivalent)

The following table summarizes investments measured at fair value based on net asset value (NAV) per unit as of December 31, 2014 and 2013:

	Fair Value		Unfunded Commitment	Redemption Frequency	Redemption Notice Period
	December 31, 2014	December 31, 2013			
Collective Trust Funds					
Balanced	(a) \$ 1,784,524	\$ -	\$ -	Immediate	None

- (a) The funds within this asset class invest principally in mutual funds, collective trusts and pooled separate accounts. The funds seek total return consisting of long-term growth of capital and current income, consistent with the investment strategy of investors based on their age. Investments in this class can be redeemed daily at the current net asset value per share based on the fair value of the underlying investments. The fair value of the investments in this class has been estimated using the net asset value per share of the underlying investments.

Note 5 - Investment Contract with Insurance Company

In 2014, the Plan entered into a fully benefit-responsive investment contract with Principal Life Insurance Company. Principal Life Insurance Company maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. The guaranteed investment contract issuer is contractually obligated to repay the principal and a specified interest rate that is guaranteed to the Plan.

As described in Note 2, because the guaranteed investment contract is fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the guaranteed investment contract. Contract value, as reported to the Plan by with Principal Life Insurance Company, represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

There are no reserves against contract value for credit risk of the contract issuer or otherwise. Interest is credited on contract balances using a Composite Crediting Rate approach. Under this methodology, a single interest crediting rate is applied to all contributions, regardless of the timing of those contributions. The crediting interest rate is based on many factors, including current economic and market conditions, the general interest rate environment, and both the expected and actual experience of a reference portfolio within the issuer's general account. These rates are established without the use of a specific formula. The minimum crediting rate under the contract is 1.00%. Interest crediting rates are reviewed on a semi-annual basis for resetting.

Certain events limit the ability of the Plan to transact at contract value with the issuer. Such events include the following: (a) amendments to the Plan documents (including complete or partial plan termination or merger with another plan), (b) changes to the Plan's prohibition on competing investment options or deletion of equity wash provisions, (c) bankruptcy of the plan sponsor or other plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that cause a significant withdrawal from the Plan or (d) the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under ERISA. The plan administrator does not believe that any events which would limit the Plan's ability to transact at contract value with participants are probable of occurring.

The guaranteed investment contract does not permit the insurance company to terminate the agreement prior to the scheduled maturity date.

The average yields earned by the guaranteed investment contract are as follows:

	<u>2014</u>
Average Yields	
Based on actual earnings	2.00%
Based on interest rate credited to participants	2.00

Note 6 - Tax Status

Effective January 1, 2014, the Company adopted a nonstandardized form of a prototype plan sponsored by Principal Financial Group. The prototype plan has received an opinion letter from the National Office of the Internal Revenue Service dated March 31, 2008 stating that the prototype plan is qualified under the appropriate section of the Internal Revenue Code (IRC). The prototype opinion letter has been relied upon by the Plan. The Plan has been amended since receiving the opinion letter. The plan administrator believes that the Plan is designed and is currently being operated in compliance with the applicable provisions of the IRC. The Plan is exempt from federal and state income taxes under current regulations.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan. Management evaluated the Plan's tax positions and concluded that the Plan had maintained its tax-exempt status and had taken no uncertain tax positions that require recognition or disclosure in the financial statements. Therefore, no provision or liability for income taxes has been included in the financial statements. With few exceptions, the Plan is no longer subject to income tax examinations by the U. S. Federal, state or local tax authorities for years before 2011.

Note 7 - Plan Termination

Although it has not expressed any intent to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA. In the event of plan termination, participants would become 100% vested in their nonsafe harbor employer contributions.

Note 8 - Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.

Note 9 - Related Party Transactions and Party-in-Interest Transactions

Certain plan investments are shares of registered investment companies, collective trust funds and a guaranteed fixed income contract managed by Principal Financial Group or Principal Trust Company and Principal Life Insurance Company, members of Principal Financial Group. Principal Financial Group is the trustee as defined by the Plan and, therefore, these transactions qualify as party-in-interest transactions.
