EMERY OLEOCHEMICALS RETIREMENT PLAN

Notes to Financial Statements

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying financial statements of the Emery Oleochemicals Retirement Plan (the "Plan") have been prepared on the accrual basis.

Investment Valuation

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an ordinary transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurements.

Investment transactions are accounted for on the trade date (the date the order to buy or sell is executed). The cost of investments sold is computed on an average cost basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Investment securities, in general, are exposed to various risks such as interest rate, credit and overall market volatility risks. Due to the level of risk associated with certain investments, it is reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statements of net assets available for benefits.

Payment of Benefits

Benefit payments to participants are recorded upon distribution.

Expenses

In 2014 and 2013, certain expenses and costs of administering the Plan were paid by Emery Oleochemicals, LLC (the "Plan Sponsor") and, accordingly, are not reflected in the Plan's financial statements.

Estimates

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires the Plan administrator and actuary to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Related Party Transactions

Certain Plan investments are invested in accounts managed by The Northern Trust Company (the "Trustee"). The Northern Trust Company is the Trustee as defined by the Plan and, therefore, these transactions qualify as parties-in-interest.

Several employees of the Plan Sponsor provide administrative services to the Plan. These services include Plan oversight and day-to-day Plan administration. The Plan is not charged by the Plan Sponsor for the services of the employees of the Plan.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Subsequent Events

The Plan has evaluated subsequent events through September 29, 2015, which is the date the financial statements were available to be issued, and have determined that there are no subsequent events that require disclosure under applicable GAAP for subsequent events.

NOTE 2 DESCRIPTION OF THE PLAN

The following description of the Emery Oleochemicals Retirement Plan provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General

The Plan is a defined benefit pension plan covering certain represented and non-represented employees of the Plan sponsor. The Plan sponsor contributes such amounts as are necessary on an actuarial basis to provide the Plan with assets sufficient to meet the benefits to be paid to Plan members. The contributions are designed to fund the Plan's normal service costs on a current basis. The Northern Trust Company is the Plan's asset trustee. Mercer is the Plan's actuary. The Plan is administered by the Plan Sponsor. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA) and the Internal Revenue Code.

Benefits under the Plan are funded by the Plan Sponsor. Contributions are made based on recommendations by the actuary, who performs annual valuations of the Plan. The funds are held, invested, and disbursed by the asset custodian.

Employees with five or more years of service are fully vested and entitled to pension benefits beginning at normal retirement age, which is 65. Pension benefits for service prior to January 1, 2004 are equal to 1.15% of their average monthly earnings for the highest four consecutive calendar years during the last ten calendar years of service up to the Social Security Earnings Base, plus 1.55% of such average monthly earnings in excess of the Social Security Earnings Base, multiplied by the number of years of credited benefit service (maximum 30 years). Benefits for those retiring beginning January 1, 2004 are equal to the benefit calculated in the previously discussed manner for service prior to January 1, 2004 plus an additional future service benefit amount for service after December 31, 2003. The future service benefit is equal to the sum of 1% of compensation for each Plan year beginning on and after January 1, 2004, divided by 12. Reduced early retirement benefits may be elected by a participant who reaches age 55 and has at least five years of credited service. Former participants of certain predecessor plans shall have their benefit calculated under this Plan offset by their benefit under the predecessor plan.

If an employee transfers employment, the terms and conditions of which were subject to a collective bargaining agreement, and becomes a participant in this Plan, any benefit accrued with respect to the prior employment of such employee under another defined benefit plan of the employer shall be transferred to this Plan. In such event, the accrued benefit of such participant shall be the sum of the transferred accrued benefit and the benefit accrued under this Plan.

NOTE 2 DESCRIPTION OF THE PLAN (CONTINUED)

Generally, payment of benefits will be in the form of a single life annuity for unmarried participants and a joint and survivor annuity for married participants, unless the employee, with spousal consent, elects another form of benefit permitted by the Plan. Other optional forms of pension benefit are available at the participant's option.

Death and Disability Benefits

A participant who becomes disabled while an employee of the Plan sponsor is eligible to receive a benefit commencing at normal retirement based on continuous service, determined as though the participant had continued in active employment to age 65.

If an active employee or a vested participant dies, then the employee's pension is payable to the surviving spouse. If the participant dies after age 55, then the surviving spouse would receive the same benefit that would have been payable to the spouse had the participant retired on the day before his or her death. If the participant dies before age 55, then the surviving spouse would receive the same benefit that would be payable to the spouse had the participant survived to age 55.

Vesting Provisions

An employee is not vested in the Plan until completion of five years of service with the Plan sponsor or attainment of age 65 while still employed by Emery Oleochemicals LLC. After five years of service, a participant is fully vested in the Plan.

NOTE 3 INVESTMENT IN MASTER TRUST

At December 31, 2014 and 2013, the Plan had a 100% undivided beneficial interest in the Emery Oleochemicals LLC Master Retirement Trust (the Master Trust).

	2014	2013

Total appreciation (depreciation)	747,179	2,860,911
	$ 894,105	$ 2,969,184

Contributions to the Plan, payments of retirement benefits, and certain administrative expenses paid by the Plan are accounted for specifically by the Plan. Net income (investment income, realized gains and losses, unrealized increases and decreases in the fair value of investments, and investment advisory services) of the Master Trust is completely allocated to the Plan. Certain investments within the Master Trust participate in securities lending.

NOTE 4 FAIR VALUE MEASUREMENTS

Financial Accounting Standards Board (FASB) *Accounting Standards Codification (ASC) 820, Fair Value Measurements and Disclosures*, provides the framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs.

The hierarchy is broken down into three levels based on the ability to observe inputs as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2 – Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

NOTE 4 FAIR VALUE MEASUREMENTS (CONTINUED)

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in methodologies used at December 31, 2014 and 2013.

Mutual funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Plan are open-ended mutual funds that are registered with the Security and Exchange Commission. These funds are required to publish their daily net asset value (NAV) and to transact at that price. The mutual funds held by the Plan are deemed to be actively traded.

Common collective trusts: Valued at fair value of the collective trust's underlying investments based on information reported by the investment advisor using the audited financial statements of the collective trust at year-end. The collective trust's fair value for U.S. and foreign securities listed or traded on any generally recognized securities exchange or quoted in the NASDAQ National Market System are valued at the regular trading session closing price on the exchange or system in which such securities are principally traded. Securities traded in the over-the-counter market that are not reported in the NASDAQ National Market System or on any generally recognized securities exchange are valued at the closing representative bid price. Other investments are valued on quotations from independent brokers. Shares of open-end investment companies are valued at net asset value. Fixed income securities may be valued on the basis of evaluated prices provided by independent pricing services when such prices are believed to reflect the fair value of such securities. Any securities for which no current quotations are readily available are valued at fair value as determined in good faith by the trustee.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2014:

	Level 1	Level 2	Level 3	Total
Common collective trusts	$ -	$ 21,213,204	$ -	$ 21,213,204
Mutual funds	3,379,900	-	-	3,379,900
Total assets at fair value	$ 3,379,900	$ 21,213,204	$ -	$ 24,593,104

NOTE 4 FAIR VALUE MEASUREMENTS (CONTINUED)

The following table sets forth by level, within the fair value hierarchy, the Plan's assets at fair value as of December 31, 2013:

	Level 1	Level 2	Level 3	Total
Common collective trusts	$ -	$ 18,614,612	$ -	$ 18,614,612
Mutual funds	3,577,492	-	-	3,577,492
Total assets at fair value	$ 3,577,492	$ 18,614,612	$ -	$ 22,192,104

NOTE 5 ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS

Accumulated plan benefits are those future periodic payments including lump-sum distributions that are attributable under the Plan's provisions to the service that employees have rendered to date and that are expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) present employees or their beneficiaries, and (c) beneficiaries of employees who have died. Benefits for retired or terminated employees or their beneficiaries are based on actual benefits earned during their term of employment. The accumulated plan benefits for active employees are based on their actual compensation over their respective years of service, utilizing various benefit formulas as specified by the Plan. Benefits payable under all circumstances – retirement, death, disability, and termination of employment – are included to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payments (by means of decrements such as for death, disability, withdrawal, retirement, or termination of employment) between the valuation date and the expected dates of payment. The actuarial assumptions below are based on the assumption the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

NOTE 5 ACTUARIAL PRESENT VALUE OF ACCUMULATED PLAN BENEFITS (CONTINUED)

The components of the actuarial present value of accumulated plan benefits as of January 1, 2014 and 2013 are:

	2014	2013
Vested benefits		
Participants currently receiving payments	$ 8,762,029	$ 7,452,234
Other participants	13,748,996	13,114,889
Total vested benefits	22,511,025	20,567,123
Nonvested benefits	239,919	254,094
Total actuarial present value of accumulated plan benefits	$ 22,750,944	$ 20,821,217

The actuarial value of Plan assets was $21,835,143 and $18,578,614 as of January 1, 2014 and 2013, respectively.

The components of the changes in accumulated plan benefits for the years ended January 1, 2014 and 2013 are:

	2014	2013
Actuarial present value of accumulated plan benefits as of January 1, 2013 and 2012, respectively	$ 20,821,217	$ 18,382,915
Increase (decrease) during the year attributable to:		
Additional benefits accumulated	907,596	1,325,704
Interest due to decrease in the discount period	1,428,151	1,268,993
Benefits paid	(773,653)	(469,745)
Plan provision changes	-	78,062
Assumption changes	367,633	235,288
Net increase	1,929,727	2,438,302
Actuarial present value of accumulated plan benefits as of January 1, 2014 and 2013, respectively	$ 22,750,944	$ 20,821,217

Assumption changes in 2014 primarily represent the adoption of updated mortality tables.

Due to inherent uncertainties in actuarial estimates, it is reasonably possible that actuarial estimates could change in the near term.

NOTE 6 GENERAL ACTUARIAL DATA

The more significant assumptions underlying the actuarial computations for the 2014 and 2013 valuations were as follows:

Plan's Actuary	Mercer
Assumed Rate of Return on Investments	7.00% per annum for 2014 and 2013, compounded annually
Salary Increases	4.5% per year
Mortality	PPA prescribed combined static annuitant and nonannuitant mortality tables

Years of Service	Percent Terminating Per Year

NOTE 6 GENERAL ACTUARIAL DATA (CONTINUED)

Assumptions Made In Valuing Spouse's Benefit	80% of active employees assumed to be married, wives three years younger than husbands.
Form of Payment	All participants are assumed to elect payment in the form of a single life or 50% joint and survivor annuity except for former Quantum participants for whom the 12/31/1988 Quantum accrued benefit is assumed to be paid as a lump sum if the participant terminates or retires on or after age 50.
Disability Incidence	1985 Pension Disability Table
Actuarial Method of Calculation	Traditional Unit Credit for the minimum funding method Projected Unit Credit for the maximum funding method
Assumed Expense	For 2014: $300,000 added to current year normal cost For 2013: $260,000 added to current year normal cost

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Interest discounts and mortality rates have been updated to better reflect expected Plan experience.

As of January 1, 2014, interest discounts and mortality rates were updated from 2013 to 2014 in accordance with PPA. The expenses in the target normal cost increased from $260,000 in 2013 to $300,000 in 2014 to reflect expectations for the current Plan year.

As of January 1, 2013, interest discounts and mortality rates were updated from 2012 to 2013 in accordance with PPA. The expenses in the target normal cost increased from $225,000 in 2012 to $260,000 in 2013 to reflect expectations for the current Plan year.

NOTE 7 FUNDING POLICY

For the years ended December 31, 2014 and 2013, the funding policy was to contribute at least the minimum amount required under ERISA, as calculated by the Plan's actuary. During 2014 and 2013, contributions were made to meet the minimum funding requirements of ERISA.

NOTE 8 TAX STATUS

The Plan obtained its latest determination letter on May 20, 2014, in which the Internal Revenue Service stated that the Plan is in compliance with the applicable requirements of the Internal Revenue Code.

NOTE 9 INFORMATION CERTIFIED BY THE TRUSTEE (UNAUDITED)

The following information provided by The Northern Trust Company was certified to be accurate and complete with respect to the following:

(a) The assets held by The Northern Trust Company at December 31, 2014 and 2013, as well as the transactions involving these assets for the years ended December 31, 2014 and 2013.

(b) The amount of investment income for the years ended December 31, 2014 and 2013.

NOTE 10 PLAN TERMINATION

The Company expects the Plan to be continued indefinitely, but reserves the right to terminate the Plan and contributions thereunder, in whole or in part, at any time by action of its Trustees. If the Plan is terminated or partially terminated, benefits will be distributed pursuant to the terms of the Plan. Its net assets generally will not be available on a pro-rata basis to provide participants' benefits. Generally, the Plan provides the following priorities:

1. Annuity benefits that former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired when benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under Plan provisions in effect at any time during the five years preceding Plan termination.
2. Vested benefits insured by the Pension Benefit Guarantee Corporation.
3. Other noninsured vested benefits.
4. All other nonvested benefits.

Certain benefits under the Plan are insured by the Pension Benefit Guarantee Corporation (PBGC) if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations. Vested benefits under the Plan are guaranteed at the level in effect on the date of the Plan's termination. However, there is a statutory ceiling, which is adjusted periodically, on the amount of an individual's monthly benefit that the PBGC guarantees. For Plan terminations occurring during 2014 and 2013, that ceiling is $4,943 and $4,790 per month, respectively. That ceiling applies to those pensioners who elect to receive their benefits in the form of a single-life annuity and are at least 65 years old at the time of retirement or Plan termination (whichever comes later). For younger annuitants or for those who elect to receive their benefits in some form more valuable than a single-life annuity, the corresponding ceilings are actuarially adjusted downward.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations and may also depend on the financial conditions of the Plan sponsor and the level of benefits guaranteed by the PBGC. PBGC insurance guarantees are backed by the solvency of the PBGC – a U.S. Government agency. Should the PBGC become insolvent, additional appropriations to the agency would need to be authorized by the U.S. Government in order to pay guaranteed benefits.

Schedule SB, Part V — Summary of Plan Provisions

Benefits Included or Excluded

Unless noted below, all benefits provided by the plan, as restated and amended through Amendment #3, are included in this valuation.

- **Most recent plan amendments included:** Amendment #3 is included because it was adopted and effective by the valuation date.
- **Plan amendments excluded:** None
- **Late retirement increases:**
  - *Active participants:* The plan provides benefit suspension notices to participants who work beyond normal retirement; therefore, late retirement actuarial increases only apply to participants who defer retirement beyond age 70½. This valuation does not include increases for current participants over age 70.
  - *Deferred vested participants:* Current deferred vested participants over normal retirement age are valued including the late retirement actuarial increase.
- **Internal Revenue Code limitations:** The limitations of Internal Revenue Code Section 415(b) and 401(a)(17) have been incorporated into our calculations.
- **IRC Section 416 rules for top-heavy plans:** We did not test whether this plan is top-heavy (when the present value of benefits for key employees equals or exceeds 60% of the present value for all participants). However, we expect that the plan is not top-heavy due to the large number of rank-and-file participants; therefore, the funding target and target normal cost do not reflect any liability for top-heavy benefit accruals.
- **IRC Section 436 benefit restrictions:**
  - *Unpredictable contingent event benefits:* This valuation excludes restricted contingent event benefits that occurred before the valuation date but includes contingent event benefits which are expected to occur on or after the valuation date regardless of anticipated funding-based limitations.
  - *Plan amendments:* See above.
  - *Prohibited payments:* Limitations on prohibited benefits (if any) are reflected for annuity starting dates before the valuation date but are ignored for annuity starting dates on or after the valuation date.
  - *Benefit accruals:* The plan's funding target does not reflect any limitation on benefit accruals. The target normal cost does not reflect any limitation on benefit accruals.
- **Scheduled benefit increases:** Scheduled benefit increases effective after the end of the current plan year are excluded from minimum funding requirements.
- **Unpredictable contingent event benefits:** The plan does not have any unpredictable contingent event benefits.

Plan Provision Changes Since Prior Valuation

Maximum compensation amounts and maximum benefit amounts under IRS rules were updated from 2013 to 2014.

- Disabled participants: Revenue Ruling 96-7 table for participants who became disabled before 1995

417(e) lump sums

Liabilities are determined based on the underlying annuity used by the plan to determine the lump sum amount, rather than valuing the lump sum payment. This annuity is valued based on funding interest rates rather than 417(e) rates and current year 417(e) unisex mortality

- Salary increases: 4.50% per year
- Expected investment return: 7.00% per year for years 2012 through 2014

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

Asset Methods

The asset valuation method is an average of the adjusted market value for each year during the last two years preceding the valuation date. The adjusted market value is the market value at each determination date adjusted to the valuation date based on actual cash flows and expected interest at the lesser of the expected rate of return and the third segment rate. This amount is adjusted to be no greater than 110 percent and no less than 90 percent of the fair market value, as defined in IRC Section 430.

A characteristic of this asset method is that, over time, it is slightly more likely to produce an actuarial value of assets that is less than the market value of assets than an actuarial value that is greater than the market value.

Participant Methods

Participants or former participants are included or excluded from the valuation as described below:

- **Participants included:** The plan sponsor provides us with data on all employees as of the valuation date, but only those employees who have completed the plan's eligibility requirements are included in the valuation of liabilities.
- **Participants excluded:** No actuarial liability is included for nonvested participants who terminated prior to the valuation date.
- **Insurance contracts**: The plan does not have any insurance contracts.

Minimum Funding Methods

The funding target for minimum funding calculations is computed using the traditional unit credit method of funding. The objective under this method is to fund each participant's benefits under the plan as they accrue. Thus, the total pension to which each participant is expected to become entitled at retirement is broken down into units, each associated with a year of past or future credited service.

A detailed description of the calculation follows:

- The plan's valuation date is the beginning of the plan year.
- An individual's **funding target** is the present value of future benefits based on credited service and average pay as of the beginning of the plan year, and an individual's **target normal cost** is the present value of the benefit expected to accrue in the plan year. If multiple decrements are used, the funding target and the target normal cost for an individual is the sum of the component funding targets and target normal costs associated with the various anticipated separation dates.
- This plan provides disability/death benefits that are only partially based on a participant's accrued benefit or years of service. This benefit is allocated to funding target based on the accrued benefit on the valuation date plus a portion of the excess of the benefit over the accrued benefit multiplied by the ratio of the participant's service at the beginning of the plan year to their service at each decrement age. This benefit is allocated to target normal cost based on the proportionate benefit attributable to the increase in the participant's service and compensation during the plan year.

Schedule SB, Part V — Statement of Actuarial Assumptions/Methods

- The plan's **target normal cost** is the sum of the individual target normal costs, and the plan's **funding target** is the sum of the individual funding targets for all participants under the plan.

Schedule SB, line 32 — Schedule of Amortization Bases

The total shortfall amortization charge is the sum of the individual shortfall amortization installments for each plan year since the IRC Section 430 changes made by the Pension Protection Act of 2006 (PPA) took effect for the plan. Although an individual shortfall amortization installment can be negative, the combined shortfall amortization charge cannot be less than $0.

Shortfall bases					
Year established		**Outstanding balance**	**Years remaining**		**2014 Installment**
2008	$	961,147	1	$	961,147
2009		(192,205)	2		(98,442)
2010		532,339	3		186,154

2014		(857,999)	7		(143,594)
Total	$	1,963,351		$	1,218,752

Schedule SB, line 24 — Change in Actuarial Assumptions

- Interest discounts and mortality rates were updated from 2013 to 2014 in accordance with PPA.
- The expense component of normal cost was increased from $260,000 to $300,000 to reflect our expectations for the current plan year

Schedule SB, line 22 — Description of Weighted Average Retirement Age

Each employee is assumed to retire in accordance with the table of retirement rates. The proportion of employees expected to retire at each potential retirement age is shown below. The average retirement age is 61.

70	100.00%	0	0	0
Total			10,000	612,462
Average				61.25

The weighted average retirement age is the total for column E divided by the total for column D rounded to the nearest integral age. It should be noted that while only integral values are shown in the table, the full content of each cell, including decimal portions, is used in the calculations.
