Actuarial Cost Method

An Actuarial Cost Method is an allocation of the expected cost of a pension plan on a year-by-year basis. The primary objective of an Actuarial Cost Method is to accumulate enough assets prior to each participant's retirement to provide the promised pension benefits. The amount of assets that must be accumulated is the same under all Actuarial Cost Methods. It is the rate at which the assets are accumulated that distinguishes one Actuarial Cost Method from another.

Under all Actuarial Cost methods, the Actuarial Present Value of future contributions equals the Actuarial Present Value of future benefits and expenses minus the Actuarial Value of the Assets. The Actuarial Cost Method may divide the Actuarial Present Value of future contributions into two amounts:

1. The Actuarial Present Value of Future Normal Costs, to be funded by Normal Cost payments
2. The Unfunded Actuarial Accrued Liability, to be funded by amortization payments

In some cases Ancillary Benefits are funded through One-Year Term Costs. These One-Year Term Costs are included in the Normal Cost.

Each Actuarial Cost Method involves a way to reflect differences between the plan's expected past experience (based on the Actuarial Assumptions used) and the plan's actual experience as measured in the valuation process. This difference is the plan's Experience Gain or Loss. Some Actuarial Cost Methods fund the Experience Gain or Loss through amortization payments, and others include the Experience Gains or Losses in the Actuarial Present Value of Future Normal Costs, funding the Experience Gains or Losses through the Normal Cost.

The Plan Sponsor or Plan Administrator is responsible for the selection of the Actuarial Cost Method, which must meet the requirements of the IRS regulations concerning Reasonable Funding Methods. Once established, the Actuarial Cost Method cannot be changed without the approval of the IRS.

The Unit Credit Actuarial Cost Method

The Actuarial Cost Method used in completing this Actuarial Valuation is known as the *Unit Credit Actuarial Cost Method*. Under this method, the accrued benefit is determined as the benefit earned up to the beginning of the current plan year. The Funding Target is equal to the Actuarial Present Value of all accrued benefits (measured as of the Valuation Date). The Target Normal Cost is the Actuarial Present Value, as of the Valuation Date, of the expected increase in accrued benefits attributable to service expected to be completed during the Plan Year and/or changes in average compensation between the beginning of the plan year and the end of the plan year.

As further required by PPA, the Target Normal Cost includes the expenses expected to be paid from plan assets during the current plan year and, if applicable, is net of any mandatory employee contributions expected to be made during the current plan year.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

NOTE A - DESCRIPTION OF THE PLAN (CONTINUED)

Pension Benefits (Continued)

The Plan permits early retirement after age 62 with 10 or more years of vesting service; however, the accrued benefit to date of early retirement, as determined above, is reduced by 1/2% for each month by which early retirement precedes age 65. The normal form of retirement income is a life annuity with monthly payments commencing on a participant's retirement date. Married participants receive their pension benefits in the form of a qualified joint and survivor annuity. Participants may elect certain optional forms of benefit payments.

Death and Disability Benefits

If an active employee dies while otherwise eligible for early retirement, the surviving spouse shall be entitled to a death benefit as specified in the Plan provided the employee elected such pre-retirement death protection, in which event his accrued pension benefits are reduced for each month of coverage. If a participant becomes totally and permanently disabled after having completed 10 years of credited service and having attained age 35, but having not attained age 62, he shall receive monthly disability benefits determined as of the date disability first commences equal to his or her accrued benefit converted to an actuarial equivalent life annuity. Disability benefits are paid until normal retirement age at which time disabled participants begin receiving normal retirement benefits equal to the actuarial equivalent of a life annuity equal to his or her monthly disability benefit.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Accrual Basis

The financial statements of the Plan are presented on the accrual basis of accounting.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires the Plan administrator to make estimates and assumptions that affect the reported amounts of Plan assets available for benefits and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates. The Plan uses an actuary to determine the actuarial present value of accumulated plan benefits. A change in the actuarial assumptions used could significantly change the amount of the actuarial present value of accumulated plan benefits reported in the accompanying financial statements.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Valuation of Investments and Income Recognition

The Plan's group annuity contract is with Great-West Life & Annuity Insurance Company. The Plan's group annuity contract is valued at contract value. Contract value represents contributions made under the contract, plus interest at the contract rate, less funds used to pay retirement benefits and administrative expenses charged by the life insurance company.

The Plan's other investments are stated at fair value. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Payment of Benefits

Benefits are recorded when paid.

Expenses of the Plan

The Plan's administrative expenses are paid by either the Plan or the Plan sponsor as provided by the Plan document. PBGC premiums and ERISA audit fees have historically been paid by the Plan sponsor. Amounts paid by the Plan sponsor for the Plan year ended December 31, 2014 amounted to \$28,979.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits are those future periodic payments, including lump-sum distributions that are attributable under the Plan's provisions to the service that employees have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated employees or their beneficiaries, (b) beneficiaries of employees who have died, and (c) present employees or their beneficiaries. Benefits under the Plan are based on employees' years of credited service up to a maximum of 30 years. The accumulated plan benefits for active employees are based on their years of credited service ending on the date as of which the benefit information is presented (the valuation date). Benefits payable under all circumstances - retirement, death, disability and termination of employment - are included, to the extent they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of accumulated plan benefits is determined by an actuary from FASCore, LLC and is that amount that results from applying actuarial assumptions to adjust the accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Actuarial Present Value of Accumulated Plan Benefits (Continued)

Significant assumptions used in the valuations as of December 31, 2014 and 2013 were:

- Actuarial cost method 2014 and 2013
Unit Credit Actuarial Cost Method
- Retirement age 2014 and 2013
Age 65
- Assumed rate of return on investments
The yield curve interest rates mandated by Pension Protection Act of 2006 have been used:
2014
0-5 years: 4.72% compounded annually
5-20 years: 6.11% compounded annually
20+ years: 6.81% compounded annually
2013
0-5 years: 4.43% compounded annually
5-20 years: 5.62% compounded annually
20+ years: 6.22% compounded annually
- Life expectancy
The mortality tables mandated by Pension Protection Act of 2006 have been used:
2014
In accordance with sex-distinct pre-retirement and post-retirement mortality rates for males and females as promulgated by the IRS for purposes of determining the Funding Target during the 2015 plan year.
2013
In accordance with sex-distinct pre-retirement and post-retirement mortality rates for males and females as promulgated by the IRS for purposes of determining the Funding Target during the 2014 plan year.
- Disability benefit 2014 and 2013
One year term Cost based on 50% of rates from 1952 T.S.A. Disability Study (Period 2, Benefit 5) – approximated by 6% in 2014 and 2013 of Target Normal Cost

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Actuarial Present Value of Accumulated Plan Benefits (Continued)

- Expenses 2014 and 2013
Target Normal Cost increased by expected expenses (assumed to be equal to actual expenses paid by the plan during the prior plan year)
- Pre-Retirement Death Benefits 2014 and 2013
80% assumed married with 3 year age difference

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

NOTE C - FAIR VALUE MEASUREMENTS

The Plan's investments are reported at fair value in the accompanying statements of net assets available for benefits. The methods used to measure fair value may produce an amount that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

FASB ASC 820, Fair Value Disclosures establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels: Level 1 inputs consist of unadjusted quoted prices in active markets for identical assets and have the highest priority, Level 2 inputs consist of observable inputs other than quoted prices for identical assets, and Level 3 inputs have the lowest priority. The Plan uses appropriate valuation techniques based on the available inputs to measure the fair value of its investments. When available, the Plan measures fair value using Level 1 inputs because they generally provide the most reliable evidence of fair value. Level 3 inputs were only used when Level 1 or Level 2 inputs were not available.

Level 1 Fair Value Measurements

The fair value of mutual funds is based on quoted net asset values of the shares held by the Plan at year-end. The fair values of common stock, corporate bonds, and U.S. Government securities are based on quoted market prices. The fair value of investments in bank and investment house common/collective investment trusts and insurance company pooled separate accounts for which quoted market price are not available are reported at the value reported to the Plan by those entities. Generally quoted market prices are used to value the underlying investments in these accounts. These investments are diversified across various sectors.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

NOTE C - FAIR VALUE MEASUREMENTS (CONTINUED)

Level 2 Fair Value Measurements

The group annuity contract with an insurance company was not actively traded; however, existing contracts with and financial information for the issuing institution are readily available, and are considered observable inputs. Since the group annuity contract was an insurance contract it was valued at contract value as described in Note B.

Level 3 Fair Value Measurements

There are no Level 3 fair value measurements for the years ended December 31, 2014 and 2013.

NOTE D - FUNDING POLICY

The Company's funding policy is to contribute an amount equal to the maximum employer contribution permitted under the Employee Retirement Income Security Act of 1974. However, the Company may reduce its contribution below the maximum if appropriate to its tax and cash position and the Plan's funded status. Employee contributions have been discontinued effective January 1, 1987.

For 2014, the Company did not make a contribution to the Plan because, in accordance with certain provisions of the Pension Protection Act of 2006, it elected to apply part of the "carryover balance" as defined in the Act towards the required contribution for the 2014 Plan year because the Funding Target Attainment Percentage for the 2013 Plan year was at least 80%. The amount applied for 2014 after the Company's contribution (\$316,925) equaled the minimum funding requirements of ERISA (as amended by the Pension Protection Act of 2006).

For 2013, the Company did not make a contribution to the Plan because, in accordance with certain provisions of the Pension Protection Act of 2006, it elected to apply part of the "carryover balance" as defined in the Act towards the required contribution for the 2013 Plan year because the Funding Target Attainment Percentage for the 2012 Plan year was at least 80%. The amount applied for 2013 after the Company's contribution (\$350,195) equaled the minimum funding requirements of ERISA (as amended by the Pension Protection Act of 2006). However, in 2013, the Company did elect to make a contribution of \$250,000 to the Plan.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

NOTE D - FUNDING POLICY (CONTINUED)

For 2014 the minimum contribution was \$301,460 and the maximum contribution was \$8,759,621. For 2013 the minimum contribution was \$333,228 and the maximum contribution was \$8,379,920.

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA.

NOTE E - PLAN TERMINATION

In the event the Plan terminates, the net assets of the Plan will be allocated, as prescribed by ERISA and its related regulations, generally to provide the following benefits in the order indicated:

- a. Benefits attributable to employee contributions, taking into account those paid out before termination,
- b. Annuity benefits former employees or their beneficiaries have been receiving for at least three years, or that employees eligible to retire for that three-year period would have been receiving if they had retired with benefits in the normal form of annuity under the Plan. The priority amount is limited to the lowest benefit that was payable (or would have been payable) during those three years. The amount is further limited to the lowest benefit that would be payable under plan provisions in effect at any time during the five years preceding plan termination,
- c. Other vested benefits insured by the Pension Benefit Guaranty Corporation (PBGC) (a U.S. Governmental agency) up to the applicable limitations (discussed below),
- d. All other vested benefits not insured by the PBGC,
- e. All nonvested benefits.

Certain benefits under the Plan are insured by the PBGC if the Plan terminates. Generally, the PBGC guarantees most vested normal age retirement benefits, early retirement benefits, and certain disability and survivor's pensions. However, the PBGC does not guarantee all types of benefits under the Plan, and the amount of benefit protection is subject to certain limitations.

Whether all participants receive their benefits should the Plan terminate at some future time will depend on the sufficiency, at that time, of the Plan's net assets to provide for accumulated benefit obligations, and may also depend on the financial condition of the Plan sponsor and the level of benefits guaranteed by the PBGC.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

NOTE F - INVESTMENTS

The Plan's investments are held primarily by an insurance company; however, the Plan's investment in MetLife, Inc. common stock is held by the Plan sponsor.

On April 7, 2000, pursuant to the demutualization of MetLife, Inc., the Plan received 16,476 shares of MetLife, Inc. common stock. As of the date of demutualization, the stock had a value of \$14.25 per share, or \$234,783. In 2004 the Plan recorded as an asset an additional 945 shares of MetLife, Inc. common stock from the former Shepler-Moomaw division of the Company. The value of the additional shares was approximately \$38,660 when received in 2004.

The following table presents the fair values of investments. Single investments that represent 5% or more of the Plan's net assets at December 31, 2014 and 2013 are separately identified.

	<u>2014</u>	<u>2013</u>

NOTE L - RISKS AND UNCERTAINTIES

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits are reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

NOTE M - SUBSEQUENT EVENT

Effective September 24, 2015, the Plan changed its third-party administrator and recordkeeper.
