Note 1 - Description of Plan (Continued)

Notes to Financial Statements
December 31, 2014

Note 2 - Summary of Accounting Policies – (Continued)

b) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

c) Basis of Accounting

The financial statements of the Plan are prepared under the accrual method of accounting.

Investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the plan. The Statement of Net Assets Available for Benefits presents the fair value of the Plan's investments excluding the guaranteed investment contracts which are stated at contract value that approximates fair value in all material respects. The Statement of Changes in Net Assets Available for Benefits is prepared on a contract value basis with respect to guaranteed investment contract transactions.

d) Notes Receivable from Participants

Notes receivable from participants are measured at the unpaid principal balance plus any accrued but unpaid interest. Delinquent participant loans are reclassified as distributions based on the terms of the Plan document.

e) Investment Valuation and Income Recognition

The Plan's investments are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See note 3 for discussion of fair value measurements. Securities traded on the national securities exchange are valued at the last reported sales price on the last business day of the Plan year.

Note 2 – Summary of Accounting Policies – (Continued)

Purchases and sales of securities are recorded on a trade-date basis. Interest and dividend income are recorded on the cash basis. Net appreciation includes the plan's gains and losses on investments bought and sold as well as held during the year.

f) Operating Expenses

Certain administrative expenses are paid by the Employer which reserves the right to charge such expenses to the Plan in the future.

Note 3 - Fair Value Measurements

The Plan's investments are reported at fair value in the accompanying statement of net assets available for benefits. The methods used to measure fair value may produce an amount that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The fair value measurement accounting literature establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy consists of three broad levels: Level 1 inputs consist of unadjusted quoted prices in active markets for identical assets and have the highest priority, Level 2 inputs consist of observable inputs other than quoted prices for identical assets, and Level 3 inputs are unobservable and have the lowest priority. The Plan uses appropriate valuation techniques based on the available inputs to measure the fair value of its investments. When available, the Plan measures fair value using Level 1 inputs because they generally provide the most reliable evidence of fair value.

Level 1 Fair Value Measurements

The fair value of mutual funds, common stock, corporate bonds and U.S. Government securities are based on quoted market prices.

Level 2 Fair Value Measurements

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset, either directly or indirectly.

Note 3 – Fair Value Measurements (Continued)

Level 3 Fair Value Measurements

For those assets with fair value measured using Level 3 inputs, the plan administrator determines the fair value measurement policies and procedures in consultation with the Company's chief financial officer and the Plan trustee. Those policies and procedures are reassessed at least annually to determine if the current valuation techniques are still appropriate. At that time, the unobservable inputs used in the fair market value measurements are evaluated and adjusted, as necessary, based on current market conditions and other third-party information.

The following tables set forth, by level within the fair value hierarchy, the Plan's investments at fair value as of December 31, 2014 and 2013:

Note 10 - Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statement of net assets available for benefits.
