TIMET DEFINED BENEFIT RETIREMENT PLAN
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2014 AND 2013

1 - DESCRIPTION OF PLAN

The following brief description of the TIMET Defined Benefit Retirement Plan ("Plan") is provided for general informational purposes only. Participants should refer to the Plan documents for more complete information.

GENERAL

The Plan is a non-contributory defined benefit plan providing benefits for salaried employees of Titanium Metals Corporation ("Company" or "TIMET"). Salaried employees hired from January 1, 1987 through December 31, 1988, who attained the age of 21 and completed one year of continuous service, were eligible to participate in the Plan. Effective January 1, 1989, the Plan was closed to new participants, and participants ceased accruing additional service credit under the Plan. Effective April 2, 1994, participants also ceased accruing credit for additional salary increases. Benefits accruing to salaried employees prior to January 1, 1987, were provided through the TMC Retirement Plan ("Prior Plan") and were fully vested as of December 31, 1986. Such accrued benefits are funded by annuities purchased from Metropolitan Life Insurance Company and American International Life Assurance Company of New York as discussed further below.

The Plan also provides benefits to substantially all individuals who were hourly employees of TIMET at the Toronto, Ohio and Henderson, Nevada plants prior to July 1, 1995 and April 1, 1994, respectively. The Plan was closed to new participants effective July 1, 1995 for the Toronto, Ohio plant and effective April 1, 1994 for the Henderson, Nevada plant. Hourly employees at the applicable plants who attained the age of 21 and completed one year of continuous service prior to the closure dates were eligible to participate in the Plan.

The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). The Plan is subject to amendment by the Company from time to time, subject to applicable restrictions imposed by law. During 2013, the Plan was amended to define spouse under current federal law.

BENEFITS AND VESTING

Monthly benefit payments are determined for each participant according to the retirement option selected. Pension benefits for salaried participants are based on compensation through April 2, 1994 and years of service in the Plan through December 31, 1988. Pension benefits for hourly participants are based on years of continuous service, as defined by the Plan agreement, multiplied by specified dollar amounts. Specific terms of the Plan provide other retirement options with a combination of age and years of credited service factors. Vesting occurs upon the completion of five years of service or age 65. Monthly benefit payments by the Plan are reduced by amounts funded by annuity contracts purchased from insurance companies to provide for benefits accrued prior to December 31, 1986, under the Prior Plan.

1 - DESCRIPTION OF PLAN (Continued)

BENEFITS AND VESTING (Continued)

Annuities were purchased to fund certain benefits accrued under the Prior Plan. The insurance companies remit funds to the Plan's trust account on a monthly basis and payments to participants for benefits accrued under the Prior Plan are made from the respective trust accounts. Benefits paid to participants are shown net of \$1,771,215 and \$1,917,579 of funds received from the insurance companies for the years ended December 31, 2014 and 2013, respectively, as these funds are immediately remitted to the retirees and are not obligations of the Plan.

ADMINISTRATION

The Company's board of directors has established an administrative committee ("Administrative Committee") to oversee and administer Plan activities subsequent to the purchase. The TIMET benefits department provides the day-to-day administration of the Plan. Certain administrative expenses, including trustee, investment advisor, actuarial and consulting fees, are absorbed by the Plan. Other administrative expenses are absorbed by the Company.

2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF ACCOUNTING

The financial statements of the Plan are prepared on the accrual basis of accounting in accordance with U.S. generally accepted accounting principles ("GAAP").

INVESTMENTS

As of December 31, 2014 and 2013, the Plan's assets were invested in the Master Trust ("Master Trust") with Bank of New York Mellon ("BNY Mellon"). The Plan's investments in the Master Trust are stated at fair value as further discussed in Note 3.

INCOME RECOGNITION

Purchases and sales are recorded on a trade-date basis. Interest income is recognized in the period earned. Dividends are recognized as of the ex-dividend date. Net appreciation (depreciation) includes the Plan's gains and losses on investments bought and sold as well as held during the year.

2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

CONTRIBUTIONS

Employer contributions are recorded on the accrual basis and are determined and paid annually in amounts sufficient to meet the minimum funding requirements of ERISA and to not exceed the maximum amounts currently deductible for federal income tax purposes.

BENEFIT PAYMENTS

Benefit payments to participants are recorded upon distribution.

USE OF ESTIMATES

The preparation of the Plan's financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits and changes therein at the date of the financial statements. Actual results could differ from those estimates.

RISKS AND UNCERTAINTIES

The Master Trust invests in various securities and/or other investments. Investment securities are exposed to various risks such as interest rate, market and credit. Due to the level of risk associated with certain investment securities and the level of market volatility resulting in changes in the value of investment securities, it is possible that changes in risks could materially affect amounts reported in the financial statements.

Contributions to the Plan and the actuarial present value of accumulated plan benefits are calculated and reported based on certain assumptions pertaining to interest rates, inflation rates and employee compensation and demographics. Due to the changing nature of these assumptions, it is at least reasonably possible that changes in these assumptions will occur in the near-term and, due to the uncertainties inherent in setting assumptions, that the effect of such changes could be material to the financial statements.

3 - FAIR VALUE MEASUREMENTS

Under the Fair Value Measurements and Disclosures topic of the Codification, ASC 820, disclosures are required about how fair value is determined for assets and liabilities and a hierarchy for which these assets and liabilities must be grouped is established, based on significant levels of inputs as follows:

- Level 1 - Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
- Level 2 - Quoted prices in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability; and
- Level 3 - Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable.

The asset allocation strategies of the Master Trust are designed to balance the objectives of achieving the asset return assumption consistently over the long-term while minimizing the volatility of the funded status. Asset classes with differing expected rates of return, return volatility and correlations are utilized to control risk and provide diversification. The asset categories are described below, along with the valuation methodologies and investment level classifications. There have been no changes in the methodologies used at December 31, 2014 and 2013.

The following is a description of the valuation methodologies used for the Master Trust's investments measured at fair value:

Public Equity Securities (Long/Hedged) - Long equity investments consist of publicly traded equity securities that are well-diversified across managers, styles, sectors and countries. Hedged equity investments typically add short positions in equities or equity futures in order to generate absolute returns regardless of equity market direction. Public equity investments made directly through managed (separate) account structures and valued based upon closing prices reported in the active trading markets are classified as level 1. Equity investments made indirectly via pooled funds offering daily to quarterly liquidity and valued at the net asset value ("NAV") of the fund are classified as level 2. Such investments are typically valued at the most recently published NAV of the fund, which may be derived from underlying investment values one quarter earlier, unless management believes an adjustment to NAV is warranted based on changes in observable inputs or an expectation that an investment will be sold at a value other than NAV.

NOTES TO FINANCIAL STATEMENTS

(Continued)

3 - FAIR VALUE MEASUREMENTS (Continued)

Private Equity - Private equity investments consist of investments in limited partnerships or commingled vehicles with managers who purchase interests in non-public companies. Sub-categories of private equity may include venture capital, early stage, special situations or restructuring funds. Private equity funds typically have low liquidity, a 10 year or longer investment commitment, and valuation methodologies that require the use of significant unobservable inputs. Private equity investments are classified as Level 3 and are typically valued at the most recently published NAV of the fund, unless management believes an adjustment is warranted as described above. For the years ended December 31, 2014 and 2013, no material adjustments were made to fund NAVs. As of December 31, 2014 and 2013, unfunded capital commitments to private equity investments were approximately \$18 million and \$15 million, respectively.

Absolute Return (Market Sectors/Arbitrage) - Absolute return strategies are investments with managers who seek specified levels of absolute returns with minimal correlation to market movements. Absolute return managers typically invest in futures, forwards or options on a variety of asset classes. Market sector strategies seek to capitalize on movements in commodity, currency, interest rate and/or other traditional markets while arbitrage strategies focus on credit, volatility or other alternative asset classes. Investments are typically made in limited partnerships and classified Level 2 when funds offer daily to quarterly liquidity at fund NAVs and reported values are based on significant observable inputs. All other investments are classified as Level 3 and are typically valued at the most recently published NAV of the fund, unless management believes an adjustment is warranted as described above. As of December 31, 2014 and 2013, unfunded capital commitments to absolute return investments were approximately \$3 million.

Royalty Investments - Royalty investments are made through a limited partnership which purchases income-producing royalties derived from sales of pharmaceutical products. Valuation of the fund is determined from an independent appraisal process whereby significant observable inputs are used in determining the fund's NAV. Liquidity is typically arranged in the secondary market with trades occurring at the most recently published NAV. Royalty investments are classified as level 2 and are typically valued at the most recently published NAV of the fund, unless management believes an adjustment is warranted as described above.

3 - FAIR VALUE MEASUREMENTS (Continued)

Fixed Income (Investment/Non-Investment Grade) - Fixed income investments consist of public and private fixed income securities of U.S. and non-U.S. government and corporate issuers, fixed income mutual funds, and interest rate derivatives intended to hedge a portion of the pension plan's sensitivity to interest changes. As of December 31, 2014 and 2013, the Master Trust held \$0 and approximately \$327 million of notional interest rate derivatives, respectively. Fixed income investments made directly through managed (separate) account structures and valued based upon closing prices reported in the active trading markets are classified as Level 1. Over-the-counter derivatives and fixed income investments made indirectly via pooled funds offering daily to quarterly liquidity and valued at the NAV of the fund are classified as Level 2. Fixed income investments with low liquidity and valuation methodologies that require the use of significant unobservable inputs are classified as Level 3. As of December 31, 2014 and 2013, unfunded capital commitments to fixed income investments were approximately \$19 million and \$24 million, respectively.

Cash/Other - Cash and other investments include highly liquid money market securities, demand deposits and other cash equivalents. Cash and other investments are classified as level 1.

4 - ACTUARIAL VALUATION

The actuarial present value of accumulated plan benefits is estimated by independent actuaries based upon the latest actuarial determination, as of January 1, 2014. The valuations were determined using the unit credit cost method. Significant actuarial assumptions used in the valuations are principally as follows: (a) discount rate of 7.75% at January 1, 2014, (b) mortality rate based on the RP-2000 Combined Healthy Mortality Table and (c) normal retirement at age 65.

The actuarial present value of accumulated plan benefits as of January 1, 2014 is as follows:

Vested benefits:	
Participants and beneficiaries currently receiving payments	\$ 45,033,654
Other participants	20,561,637
	<hr/>
	65,595,291
Non-vested benefits	703,183

(Continued)

4 - ACTUARIAL VALUATION (Continued)

The changes in the actuarial present value of accumulated plan benefits are as follows for the year beginning January 1, 2014:

Actuarial present value of accumulated plan benefits at beginning of year	<u>\$ 66,735,750</u>
(Decrease) increase during the year attributable to:	
Benefits paid	(5,881,603)
Benefits accumulated (including noninvestment experience)	(395,600)
Assumption changes	731,805
Increase for interest due to decrease in the discount period	<u>5,108,122</u>
Net decrease	<u>(437,276)</u>
Actuarial present value of accumulated plan benefits at end of year	<u><u>\$ 66,298,474</u></u>

5 - FUNDING POLICY

Company contributions are calculated on an actuarial basis using certain actuarial assumptions. The contributions of the Company are designed to fund each employee's benefits under the Plan in installments which are level as a percent of compensation per active employee, starting at the original participation date, and continuing until the assumed retirement, termination, disability or death. The Company makes contributions no later than the date of filing its income tax return for each fiscal year. The Company is under no obligation to make any contributions, which are not deductible for income tax purposes in the applicable fiscal year. The Company has complied with the minimum funding requirements of ERISA for the years ended December 31, 2014 and 2013.

6 - PLAN TERMINATION

Although it has not expressed any intention to do so, the Company has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions set forth in ERISA. Under the provisions of ERISA, if the Plan is terminated, the Company may be obligated to make termination payments to the Plan and Plan participants may be eligible for continuation of benefits under insurance provided by the Pension Benefit Guaranty Corporation ("PBGC"). Payment of a Plan participant's accumulated plan benefits depends on the priority of those benefits and the level of those benefits guaranteed by the PBGC at that time. Certain benefits may be fully or partially provided for by the then existing assets of the Plan, insurance contracts and/or the PBGC guaranty. However, because the PBGC does not guarantee all types of benefits and the amount of benefit protection is subject to certain limitations, there is the possibility that some benefits may not be provided for at all. A description of the priority order of Plan participants' claims to the assets of the Plan upon termination is published in the Plan document and made available to Plan participants.

7- INTEREST IN THE MASTER TRUST WITH BNY MELLON (UNAUDITED)

All assets of the Plan are invested in the Master Trust, a trust established for the collective investment of assets of participating plans sponsored by the Company or its subsidiary companies. Each participating plan has an undivided interest in the Master Trust, which is valued on a monthly basis. The Master Trust investment income and related expenses are allocated to plans based on weighted average assets held in the trust for such monthly period.

The value of the Plan's interest in the Master Trust is based on the beginning of year value of the Plan's interest in the trust, plus actual contributions and allocated investment income (loss), less actual distributions and allocated administrative expenses. At December 31, 2014 and 2013, the Plan's interest in the net assets of the Master Trust was 6.3% and 6.5%, respectively.

The following table presents the fair values of net assets at December 31, 2014 and 2013, for the Master Trust:

Transfers between levels - The availability of observable market data is monitored to assess the appropriate classification of financial instruments within the fair value hierarchy. Changes in economic conditions or model-based valuation techniques may require the transfer of financial instruments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

Plan management evaluates the significance of transfers between levels based upon the nature of the financial instrument and size of the transfer relative to total net assets available for benefits.

8 - INVESTMENTS

During the year ended December 31, 2013, the Plan realized gains (losses) on the investments totaling \$1,487,437 as follows:

Registered investment companies	\$ 49,693
Common stock	<u>1,437,744</u>
	<u>\$ 1,487,437</u>

9 - TAX STATUS

The Internal Revenue Service (“IRS”), has determined and informed the Company by a letter dated December 20, 2011, that the Plan, as amended through September 1, 2010, is qualified and the trust established under the Plan is tax-exempt, under the appropriate sections of the Internal Revenue Code (“Code”). The Plan has been amended subsequent to September 1, 2010; however, the Plan administrator believes the Plan is currently designed and being operated in compliance with the applicable sections of the Code. Therefore, no provision for income taxes has been included in the Plan’s financial statements.

GAAP requires Plan management to evaluate tax positions taken by the Plan and recognize a tax liability (or asset) if the Plan has taken an uncertain position that more than likely than not would not be sustained upon examination by the IRS. The Plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2014 and 2013, there are no uncertain positions taken or expected to be taken that would require recognition of a liability (or asset) or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress.

10 - INFORMATION CERTIFIED BY THE PLAN’S TRUSTEE

BNY Mellon, the trustee, holds all investments and executes all transactions on behalf of the Plan. The Plan administrator has elected the method of compliance permitted by 29 CFR 2520.103-8 of the Department of Labor’s Rules and Regulations for Reporting and Disclosure under ERISA. Accordingly, the Plan administrator has obtained a certification from the Plan trustee that information regarding the fair value and cost of all investments, plus all investment interest and dividend income and net appreciation (depreciation) in fair value of investments and gains and losses is complete and accurate at December 31, 2014 and 2013, and for the years then ended. In addition, certain investment information included in Note 7 is provided by or compiled from information certified by BNY Mellon.

11 - EXEMPT PARTY-IN-INTEREST TRANSACTIONS

Certain Plan investments are managed by BNY Mellon. BNY Mellon is a trustee, as defined by the Plan, these transactions qualify as exempt party-in-interest transactions. Fees paid by the Plan for investment management services were not significant for the years ended December 31, 2014 and 2013.

12 - CHANGE IN ACTUARIAL ASSUMPTIONS AND METHODS

The discount rate used was lowered from 8.00% to 7.75% to better reflect future expectations, and the mortality and disability assumptions used were updated to include a Scale AA projection to 2022. Assumed retirement rate for ages 65-69 were lowered from 100% to 35% in order to reflect recent Plan experience and future expectations. These changes increased the actuarial present value of accumulated plan benefits by approximately \$1.7 million.

The statutory segment interest rates for determining contribution requirements and potential benefit restrictions have been changed from 4.94%, 6.15% and 6.76% per year to 4.99%, 6.32%, and 6.99% per year, respectively. The segment rates used for the maximum deductible contribution and Pension Benefit Guaranty Corporation variable rate premiums were similarly updated to reflect current market conditions. The statutory mortality tables have also been updated as required by law.

13 - SUBSEQUENT EVENTS

Plan management evaluated subsequent events after the statement of net assets available for benefits date of December 31, 2014 through October 9, 2015, which was the date the financial statements were available to be issued, and concluded that no additional disclosures are required.

Actuarial Cost Method

For purposes of calculating the Funding Target, we calculated the actuarial present value of benefits accrued as of the beginning of the plan year. This cost method is typically referred to as the Unit Credit method.

Actuarial Value of Assets

For funding requirements, the Plan uses the 24 month average value of assets per IRS Notice 2009-22.

Discount Rates

As selected by TIMET, the rates for calculating the PPA Funding Target are the September 2013 segment rates. As prescribed by HATFA, in 2014 these rates must be between 90% and 110% of the 25-year average rates published by the IRS.

- PPA Funding Target (adjusted for HATFA)
 - Segment 1 payments under 5 years 4.99%
 - Segment 2 payments between 5 and 20 years 6.32%
 - Segment 3 payments after 20 years 6.99%
 - Effective Interest Rate 6.35%

Salary Scale

Pay rates were assumed to increase 3.00% per year for Toronto, Ohio, and Henderson, Nevada, bargaining plant participants. Pay rates are included in the calculation of the Special Payment Benefit.

Compensation for salaried members was frozen April 1, 1994, so the salary scale does not apply for salaried participants.

Future Service

Each active participant is assumed to earn one year of service in each future plan year prior to the year of retirement, death or withdrawal.

Withdrawal

Withdrawals prior to retirement for reasons other than death were developed by the prior actuary based on experience. Withdrawal rates at sample ages are shown below:

Age	Salaried	Toronto, OH	Henderson, NV
25	9.30%	7.90%	11.85%
30	7.40%	5.80%	8.70%
35	5.80%	4.20%	6.30%
40	4.44%	3.10%	4.65%
45	3.30%	2.20%	3.30%
50	1.99%	1.40%	2.10%

60	0.41%	0.40%	0.60%
64	0.14%	0.14%	0.21%

Retirement

Eligible employees were assumed to retire prior to normal retirement according to the following table:

Age(s)	Salaried		Toronto, OH	Henderson, NV	
	Service <30	Service >30		Service <30	Service >30
55	7.0%	15.0%	-	-	2.7%

70	100.0%	100.0%	100.0%	100.0%	100.0%

Assumed retirement dates for vested terminated participants were provided by the plan administrator.

Mortality

For calculating the Funding Target, mortality follows the RP-2000 annuitant and non-annuitant mortality tables for 2014 as prescribed by the IRS for all participants.

Disability

Termination rates due to disability were developed by the prior actuary. Disability rates at sample ages are shown below:

Age	Salaried	Toronto, OH and Henderson, NV
25	0.03%	0.08%
30	0.03%	0.10%
35	0.04%	0.14%
40	0.08%	0.21%
45	0.17%	0.34%
50	0.36%	0.59%
55	0.75%	1.09%

Administrative Expenses

Administrative expenses are estimated to be the sum of the prior year expenses, less the prior year PBGC premium, plus the current year PBGC premium, payable at the beginning of the year.

Probability of Marriage

85% of non-retired participants are assumed to be married. A three-year age difference between spouses is assumed with the males being older.

Form of Benefit

Non-retired participants are assumed to elect from the following forms of payment at retirement at the rates shown:

Probability	Form of Payment
40%	Single Life Annuity
60%	50% Joint & Survivor Annuity

Change in Actuarial Assumptions

- Assumed retirement rates for ages 65-69 were lowered from 100% to 35% in order to reflect recent plan experience and future expectations.
- The Funding Target discount rates and mortality assumption were updated as required and as described above.

Total Weighted Average Retirement Age			63

The weighted average retirement age was calculated by multiplying each possible retirement age by the probability of not retiring before that age and then retiring. These products were then summed to produce the weighted average retirement age.

Change in Actuarial Assumptions

- Assumed retirement rates for ages 65-69 were lowered from 100% to 35% in order to reflect recent plan experience and future expectations.
