Report on the Financial Statements

We were engaged to audit the accompanying financial statements of Hiram College Retirement Plan (the Plan), which comprise the statements of net assets available for benefits as of December 31, 2014 and 2013 and the related statement of changes in net assets available for benefits for the year ended December 31, 2014 and the notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States of America. Because of the matters described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

Basis for Disclaimer of Opinion

As permitted by 29 CFR 2520.103-8 of the United States Department of Labor Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974, the Plan Administrator instructed us not to perform and we did not perform, any auditing procedures with respect to the information summarized in Note 3, which was certified or provided by the Teachers Insurance and Annuity Association – College Retirement Equities Fund (TIAA-CREF) as issuer for certain investments and as agent for JP Morgan Chase Bank, N.A., a custodian of certain other investments of the Plan, except for comparing this information with the related information included in the financial statements. We have been informed by the Plan Administrator that the issuer or custodian holds the Plan's assets and executes transactions. The Plan Administrator has obtained a certification from the issuer/agent as of December 31, 2014 and 2013 and for the year ended December 31, 2014, that the information provided to the Plan Administrator by the custodian is complete and accurate.

In addition, the Plan has not maintained sufficient accounting records and supporting documents relating to certain annuity and custodial accounts issued to current and former employees prior to January 1, 2009. Accordingly, we were unable to apply auditing procedures sufficient to determine the extent to which the financial statements have been affected by these conditions.

Independent Auditor's Report (Continued)

Further, as described in Note 10, the Plan has excluded from investments in the accompanying statements of net assets available for benefits certain annuity and custodial accounts issued to current and former employees prior to January 1, 2009, as permitted by the Department of Labor's Field Assistance Bulletin No. 2009-02, Annual Reporting Requirements for 403(b) Plans. The investment income and distributions related to such accounts have also been excluded from the accompanying statement of changes in net assets available for benefits. Under accounting principles generally accepted in the United States of America, these accounts and the related income and distributions should have been included in the accompanying financial statements. The effects of these excluded annuity and custodial accounts and the related income and distributions are not determinable.

Disclaimer of Opinion

Because of the significance of the matters described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

Other Matter - Supplemental Schedule

The supplemental schedule of assets (held at end of year) as of or for the year ended December 31, 2014, is presented for the purposes of additional analysis and is not a required part of the financial statements but is required by the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. Because of the significance of the matters described in the Basis for Disclaimer of Opinion paragraphs we do not express an opinion on the supplemental schedule.

Notes to Financial Statements

Note 1. Plan Description

The following description of the Hiram College Retirement Plan (the Plan) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

General: The Plan is a defined contribution retirement plan covering professional staff, non-exempt staff, faculty and adjunct faculty of Hiram College (the College). The Plan has two basic parts – a defined contribution part (DC part) and an employee elective deferral part (EE part). All employees, except for adjunct faculty and enrolled students, that have attained the age of 18 and have completed one year of service, as defined in the Plan document, are required to participate in the DC part. All employees, except for enrolled students, are eligible immediately to participate in the EE part. The Plan is subject to provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

Contributions: Participants in the DC part of the Plan are required to contribute a percentage of pretax annual compensation ranging from 2% to 5% based on years of eligible service, as defined in the Plan document. Participants may elect to contribute the maximum required contribution of 5% when they first become eligible to participate in the Plan. Employer matching contributions were suspended from September 7, 2012 through October 31, 2013. Effective November 1, 2013, the College reinstated the employer matching contributions portion of the Plan ranging from 2% to 3% of pretax annual compensation.

Eligible participants in the EE part of the Plan may elect to contribute up to the maximum amount of pretax annual compensation as defined in the Plan document and as allowable under the Internal Revenue Code (IRC). Participants who have attained age 50 before the end of the Plan year are eligible to contribute additional catch-up contributions, as allowable under the IRC. Also, any participant who has 15 years of service with a qualified organization may make Special Code Section 403(b) Catch-up Contributions.

Participants may also contribute amounts representing distributions from other qualified defined benefit or defined contribution plans. Participants direct the investment of their contributions into various investment options offered by the Plan.

Participant accounts: Each participant's account is credited with the participant's contributions, the College's contributions and Plan earnings. Allocations are based on participant account balances or employee compensation, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Vesting: Participants are immediately vested in all contributions plus actual earnings thereon.

Investment options: Upon enrollment in the Plan, a participant may direct their contributions in a variety of investment choices as more fully described in the Plan's literature and participants may change their investment options at any time. The Plan currently offers guaranteed annuity contracts, pooled separate accounts and several variable annuity contracts and registered investment companies (mutual funds), as investment options.

Payment of benefits: On termination of service due to death, disability, or retirement, a participant may elect to receive a lump-sum amount equal to the value of the participant's vested interest in his or her account, a partial payout, or installment payments. A participant is also entitled to apply their individual account toward the purchase of an annuity contract. If service terminates for other reasons and the vested account balance exceeds \$1,000, a participant must consent to receive payment of benefits. A participant may also make an in-service withdrawal from the EE part of the Plan upon attainment of age 59½ or due to financial hardship.

Note 2. Summary of Significant Accounting Policies

Basis of accounting: The financial statements are prepared under the accrual method of accounting.

Investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. Accounting principles generally accepted in the United States of America require the statements of net assets available for benefits to present the fair value of the investment contracts, as well as the adjustment of the fully benefit-responsive investment contracts from fair value to contract value. The changes in value of these investments are reflected on the statement of changes in net assets available for benefits on a contract value basis.

Use of estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the Plan's management to make estimates and assumptions that affect the reported amounts of net assets available for benefits and changes therein and disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Investment valuation and income recognition: Except for certain contracts held by TIAA-CREF described in Note 5, investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 4 for discussion of fair value measurements.

Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Net appreciation includes the Plan's gains and losses on investments bought and sold as well as held during the year.

Contributions: Participant and employer contributions are recognized when the participants' contributions are withheld from earnings.

Payment of benefits: Benefits are recorded when paid.

Administrative expenses: Administrative expenses of the Plan are paid by the College. The expenses paid by the College are not reflected in the accompanying financial statements.

Recently issued accounting pronouncements: In May 2015, the Financial Accounting Standards Board issued Accounting Standards Update No. 2015-07, *Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent)*. The amendments in this update remove the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. However, sufficient information must be provided to permit reconciliation of the fair value of assets categorized within the fair value hierarchy to the amounts presented in the statement of financial position. The amendments also remove the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the net asset value per share practical expedient. The amendments in this Update are effective for public business entities for fiscal years beginning after December 15, 2015. For all other entities, the amendments in this update are effective for fiscal years beginning after December 15, 2016. Early adoption is permitted. Upon adoption, the amendments shall be applied retrospectively to all periods presented. Plan management is currently evaluating the impact this update will have on the Plan's financial statements.

Note 2. Summary of Significant Accounting Policies (Continued)

In July 2015, the Financial Accounting Standards Board issued Accounting Standards Update No. 2015-12, *Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965) – (I) Fully Benefit-Responsive Investment Contracts, (II) Plan Investment Disclosures, and (III) Measurement Date Practical Expedient (a consensus of the FASB Emerging Issues Task Force)*. The purpose of this Update is to simplify plan accounting.

- The amendments in Part I of this Update designate contract value as the only required measure for direct investments in fully benefit-responsive investment contracts. Fully benefit-responsive investment contracts will be presented at contract value; accordingly there will no longer be an adjustment from fair value to contract value on the face of the financial statements.
- The amendments in Part II of this Update will eliminate the requirements for plans to disclose (1) individual investments that represent 5 percent or more of net assets available for benefits and (2) the net appreciation or depreciation for investments by general type for both participant-directed investments and nonparticipant-directed investments. The net appreciation or depreciation in investments for the period will still be required to be presented in the aggregate. In addition, if an investment is measured using the net asset value per share (or its equivalent) practical expedient in Topic 820 and that investment is in a fund that files a U.S. Department of Labor Form 5500, *Annual Return/Report of Employee Benefit Plan*, as a direct filing entity, disclosure of that investment's strategy will no longer be required.
- The amendments in Part III of this Update reduce complexity in employee benefit plan accounting by providing a practical expedient that permits plans to measure investments and investment-related accounts as of a month-end date that is closest to the plan's fiscal year-end, when the fiscal period does not coincide with month-end.

The Update may be adopted in whole or by part (I, II, and III), as applicable. The amendments in this Update are effective for fiscal years beginning after December 15, 2015. Early adoption is permitted. Upon adoption, the amendments in Parts I and II shall be applied retrospectively to all periods presented; the amendments in Part III shall be applied prospectively. Plan management is currently evaluating the impact this Update will have on the Plan's financial statements.

Subsequent events: The Plan Administrator has evaluated subsequent events for potential recognition and/or disclosure through October 7, 2015, the date the financial statements were available to be issued.

Note 3. Information Certified and Provided by Teachers Insurance and Annuity Association – College Retirement Equities Fund (TIAA-CREF)

The following is a summary of the Plan's asset information as of December 31, 2014 and 2013 and for the year ended December 31, 2014, included throughout the Plan's financial statements and supplemental schedule, that was prepared by or derived from information provided by TIAA-CREF, the issuer for certain investments and as agent for JP Morgan Chase Bank, N.A., a custodian of certain other investments and furnished to the Plan Administrator. The Plan Administrator has obtained a certification from the issuer/agent that information provided to the Plan Administrator by the issuer/agent related to the following assets is complete and accurate. Accordingly, as permitted by 29 CFR 2520.103-8 of the Department of Labor's (DOL) Rules and Regulations for Reporting and Disclosure under ERISA, the Plan Administrator instructed the Plan's independent auditors not to perform any auditing procedures with respect to information which appears throughout the financial statements and supplemental schedule related to the following assets.

Note 4. Fair Value Measurements

FASB ASC 820, *Fair Value Measurements and Disclosures*, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are described below:

Level 1: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

Level 2: Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2014 and 2013.

Variable annuity contracts: Valued at the total of the net asset value (NAV) of investments and cash held by the account at year-end. The Plan's interest in the variable annuity contracts is valued based on the information reported by the contract holder.

Registered investment companies: Valued at quoted market prices which represent the net asset value of the shares held by the Plan at year end.

Pooled separate accounts: Valued at the total of the NAV per share of investments held by the account at year-end.

Guaranteed annuity contracts: The fixed annuity contracts are reported at contract value which approximates fair value (See Note 5). This determination is based on TIAA's credit rating and yield during 2014 and 2013 being comparable to similar alternative investments and the interest rate which re-sets annually being comparable to a ten year treasury bond.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Plan believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Note 4. Fair Value Measurements (Continued)

To assess the appropriate classification of investments within the fair value hierarchy, the availability of market data is monitored. Changes in economic conditions or valuation techniques may require the transfer of investments from one fair value level to another. In such instances, the transfer is reported at the beginning of the reporting period.

The Plan evaluates the significance of transfers between levels based upon the nature of the investment and size of the transfer relative to total net assets available for benefits. For the year ended December 31, 2014, there were no significant transfers in or out of Levels 1, 2, or 3.

Level 3 Gains and Losses

The table below sets forth a summary of changes in the fair value of the Plan's Level 3 assets for the period ended December 31, 2014:

	Guaranteed Annuity Contracts
Balance, beginning of year	\$ 21,915,453
Unrealized gains relating to investments still held at the reporting date	209,348
Realized gains	517,831
Interest credited	224,085
Purchases	4,060,162
Sales	(5,076,609)
Balance, end of year	\$ 21,850,269

The following table represents the Plan's Level 3 assets as of December 31, 2014, the valuation techniques used to measure the fair value of those assets and the significant unobservable inputs and the ranges of values of those inputs.

^(a) The U.S./international equity category includes a variable annuity account whose objective is to seek a favorable long-term rate of return through capital appreciation and investment income by investing primarily in a broadly diversified portfolio of common stocks. The account typically invests at least 80% of its assets in a broadly diversified portfolio of domestic and foreign equity securities. The account uses a variety of different investment strategies to focus on companies it believes are attractively priced based on a detailed analysis of their prospects for growth in earnings, cash flows, revenues and other relevant measures. Management also looks for companies whose assets are undervalued in the market. The account may invest in companies of any market capitalization size, including small companies. Typically, the account seeks to maintain the weightings of its holdings as approximately 70-75% domestic equity, 25-30% foreign equities, with up to 5% emerging markets investments.

Notes to Financial Statements

Note 4. Fair Value Measurements (Continued)

- (b) The money market category includes a variable annuity account whose objective is to seek high current income consistent with maintaining liquidity and preserving capital. The account invests primarily in high-quality, short-term instruments, such as commercial paper, bank obligations and U.S. government-issued securities. It can invest up to 30% of its assets in money market and debt instruments of foreign issuers denominated in U.S. dollars.
- (c) The balanced category includes a variable annuity account whose objective is to seek a favorable long-term rate of return that reflects the investment performance of the financial markets while giving special consideration to certain social criteria. The account typically invests in a broadly diversified portfolio of domestic and foreign stocks (60%) and fixed-income securities (40%). In the case of equities and corporate bonds, the account invests only in companies that meet its screening criteria. Using specific environmental, social and governance criteria, the evaluation process seeks out companies that are: strong stewards of the environment, committed to serving local communities where they operate and to human right and philanthropy, devoted to high labor standards and those managed in an ethical manner.
- (d) The fixed income - inflation-linked bond category includes a variable annuity account whose objective is to seek a long-term rate of return that outpaces inflation, primarily through investment in inflation-indexed bonds, which are fixed-income securities whose returns are designed to track a specified inflation index over the life of the bond. The account typically invests at least 80% of its assets in U.S. Treasury Inflation-Indexed Securities. It can also invest in other inflation-indexed bonds issued or guaranteed by the U.S. government or its agencies and by corporations and other U.S. domiciled issuers as well as foreign governments. The account may also invest in money market instruments or other short-term securities. It may also invest up to 25% of its assets in inflation-indexed bonds issued or guaranteed by foreign governments and their agencies, as well as other foreign issuers.
- (e) The fixed income - bond market category includes a variable annuity account whose objective is to seek a favorable long-term rate of return, primarily through high current income consistent with preserving capital. The account invests at least 80% of its assets in a broad range of debt securities, including U.S. government and agency securities, investment-grade corporate bonds and mortgage-backed or other asset-backed securities. The account will overweight or underweight individual securities or sectors, depending on where the management team finds undervalued, overlooked or misunderstood issues that offer the potential for superior returns compared to the benchmark index. The account can invest up to 20% of its assets in below-investment-grade securities and in unrated securities.
- (f) The world equity category includes a variable annuity account whose objective is to seek a favorable long-term rate of return through capital appreciation and income from a broadly diversified portfolio that consists primarily of foreign and domestic common stocks. The account invests at least 80% of assets in equity securities. The account uses a variety of different investment strategies to seek out attractively priced companies, of any capitalization size, that management believes is undervalued based on the company's prospects for growth in earnings, cash flows, revenues and other relevant measures. Particular focus is placed on companies with shareholder-oriented management teams dedicated to creating shareholder value.
- (g) The U.S. equity - growth category includes a variable annuity account whose objective is to seek a favorable long-term rate of return, mainly through capital appreciation, primarily from a diversified portfolio of common stocks that present the opportunity for exceptional growth. The account invests 80% of assets in common stocks and other equity securities. The account invests primarily in large, well-known, established companies, particularly those with new or innovative products, services, or processes that enhance future earnings prospects. The account may also invest in smaller companies with higher growth potential as well as companies in new and emerging areas of the economy. It may also invest in companies in order to benefit from a prospective acquisition, reorganization or corporate restructuring. The account may also invest up to 20% of its assets in foreign securities.

Note 4. Fair Value Measurements (Continued)

- (h) The U.S. equity - index category includes a variable annuity account whose objective is to seek a favorable long-term rate of return from a diversified portfolio selected to track the overall market for common stocks publicly traded in the United States, as represented by a broad stock market index. The account buys most, but not necessarily all, of the stocks in its benchmark index and will attempt to create a portfolio that closely matches the overall investment characteristics of this index.
- (i) The real estate category includes a pooled separate account whose objective is to seek favorable long-term returns primarily through rental income and appreciation of real estate related investments owned by the account. It seeks to invest between 75% and 85% of its assets directly in real estate or real estate-related securities. The account purchases direct ownership interests in income-producing real estate, such as office, industrial, retail and multi-family residential properties. It may also hold other real estate or real estate-related investments through joint ventures, real estate partnerships or real estate investment trusts. The account can also hold foreign investments, although they are not expected to exceed 25% of the account's total assets. Investments in the variable annuity account within participant accounts can be redeemed daily at the net asset value per unit.

Note 5. Investment Contracts with TIAA-CREF

The Plan has guaranteed fixed annuity investment contracts with TIAA-CREF. Under these contracts are sub-contracts, some of which are fully benefit-responsive while others are not. TIAA-CREF maintains the contributions in a general account. The account is credited with earnings on the underlying investments and charged for participant withdrawals and administrative expenses. Each premium allocated to the guaranteed fixed annuity investment contracts buys a guaranteed minimum amount of lifetime income based on the rate schedule in effect at the time the premium is credited.

For investment contracts that are fully benefit-responsive, contract value is the relevant measurement attribute for that portion of the net assets available for benefits attributable to the guaranteed investment contracts. These contracts are included in the financial statements at contract value, as reported to the Plan by TIAA-CREF. Contract value represents contributions made under the contracts, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value.

There are no reserves against contract value for credit risk of the contract issuer or otherwise. TIAA-CREF indicates that contract value approximates fair value for these investments at December 31, 2014 and 2013. The crediting interest rate is based on a formula agreed upon with the issuer, but it may not be less than 3%. Such interest rates are reviewed on an annual basis for resetting.

Certain events limit the ability of the Plan to transact at contract value with the issuer. Such events include the following: (1) amendments to the plan documents (including complete or partial plan termination or merger with another plan), (2) changes to the Plan's prohibition on competing investment options or deletion of equity wash provisions, (3) bankruptcy of the plan sponsor or other plan sponsor events (for example, divestitures or spin-offs of a subsidiary) that cause a significant withdrawal from the Plan, or (4) the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under ERISA. The Plan Administrator does not believe that any events which would limit the Plan's ability to transact at contract value with participants are probable of occurring.

Note 5. Investment Contracts with TIAA-CREF (Continued)

The contracts do not permit the insurance company to terminate the agreement prior to the scheduled maturity date.

	2014	2013
Based on actual earnings	4.35%	4.18%
Based on interest rate credited to participants	3.60%	3.75%

Investment contracts that are not fully benefit responsive are included in the financial statements at contract value as reported by TIAA-CREF. TIAA-CREF indicates that contract value approximates fair value for these investments at December 31, 2014 and 2013.

Note 6. Related Party Transactions

Certain Plan investments are managed by TIAA-CREF, the issuer for certain investments and agent for JPMorgan Chase Bank, N.A., a custodian of certain other investments and therefore these transactions qualify as party-in-interest.

Certain employees of the College provide administrative services for the Plan and are not reimbursed for their services from the Plan.

Note 7. Tax Status

The Plan has been designed to qualify under Section 403(b) of the Internal Revenue Code (Code). The terms of the Plan have been prepared to conform with the sample language provided by the Internal Revenue Service (IRS) in Revenue Procedure 2007-71. The Plan is required to operate in conformity with the Code to maintain the tax-exempt status for plan participants under Section 403(b). No provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. With few exceptions, the Plan is no longer subject to income tax examinations by the U.S. federal, state, or local tax authorities for years before 2011.

Note 8. Plan Termination

Although it has not expressed any intent to do so, the College has the right under the Plan to discontinue its contributions at any time and to terminate the Plan subject to the provisions of ERISA.

Note 9. Risks and Uncertainties

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits.

Note 9. Risks and Uncertainties (Continued)

At December 31, 2014 and 2013, approximately 63% and 65%, respectively, of the Plan's investments are held in three accounts with TIAA-CREF. As such, this is considered to be a concentration of credit risk.

Accounting principles generally accepted in the United States of America require the financial statements to present the fair value of investments. The guaranteed annuity contracts have been presented at contract value, which approximates fair value, as reported to the Plan by TIAA-CREF. This determination is based on TIAA's credit rating and yield during 2014 and 2013 being comparable to similar alternative investments and the interest rate which re-sets annually being comparable to a ten year treasury bond. In subsequent periods, if market conditions change, such as the insurance company credit rating or interest rate environment, the difference between contract value and fair value could become significant causing the financial statements to become materially misstated.

Note 10. Excluded Contracts

The Plan Administrator has elected to exclude from investments certain annuity and custodial accounts which may have been issued to current and former employees without the Plan Administrator's knowledge prior to January 1, 2009, as permitted by the Department of Labor's Field Assistance Bulletin No. 2009-02, *Annual Reporting Requirements for 403(b) Plans*. The investment income and distributions related to such accounts have also been excluded from the statements of changes in net assets available for benefits. Accounting principles generally accepted in the United States of America require that these accounts and the related income and distributions be included in the accompanying financial statements. The Plan Administrator is not able to determine the amount of these excluded annuity and custodial accounts and the related income and distributions because records relating to these are not available or do not exist.

Note 11. Plan Loans

Participants may borrow from TIAA-CREF using a portion of their EE part of the plan as security for the loan. The maximum loan amount may be the lesser of \$50,000 or 50% of their account balance. The loans bear interest at rates that range from 4.38% to 5.68%, which are commensurate with local prevailing rates as determined periodically by TIAA-CREF. Principal and interest is paid ratably through monthly or quarterly payments by the participants to TIAA-CREF. The Plan Administrator has concluded that these loans are not plan assets and that such arrangements are exempt transactions.

The loan balances as of December 31, 2014 and 2013 were \$96,445 and \$95,323, respectively. Participant loans are coordinated between the participant and TIAA-CREF. Under the borrowing terms, Plan assets totaling these outstanding loan balances serve as collateral to these loans. In the event of default, such loans are reportable to participants as taxable income but remain outstanding and continue to accrue interest until repaid by the participant or the participant becomes eligible to receive a distribution under the terms of the Plan.
