Hourly-Rated Employees' Pension Plan

Notes to Financial Statements

December 31, 2014 and 2013

1. Description of the Plan

The following brief description of the Robert Bosch Fuel Systems LLC Hourly-Rated Employees' Pension Plan (the "Plan") is provided for general information purposes only. Participants should refer to the Plan document for a more complete description.

The assets of the Plan are invested in the Robert Bosch LLC Master Retirement Trust ("Master Trust").

General

The Plan is a noncontributory, defined-benefit pension plan that is administered by a pension committee composed of representatives of Robert Bosch Fuel Systems LLC (the "Company" or "Plan Sponsor"). The Plan was created to provide pension benefits for permanent full-time hourly employees of the Company, who are represented by the DTC/UAW DDC/EMD Labor Agreement, for past credited service accrued through October 31, 1988, as certain former General Motors Corporation ("GM") hourly employees, and for credited service accrued since November 1, 1988, as employees of the Company. Under the terms of the DTC/GM Sales Agreement, the Company must assume the specific pension benefit levels and conditions as prescribed in the General Motors Supplemental Agreement of Hourly-Rated Pension through September 14, 1990. For those participants who subsequently transferred back to GM, amounts representing the present value of their accumulated benefits earned during their period of service with the Company, and associated net assets, were transferred to GM as described below. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

In April 2012, the Company finalized the pension asset transfer in accordance with the terms and conditions of the asset transfer agreement between the Company and GM. Assets of the Plan that were transferred to GM for participants who subsequently transferred back to GM through March 2012 under this agreement totaled \$14,625,006. Corresponding accumulated plan benefits, as measured under IRC section 414(I) were also transferred to GM. Under ASC 960, such accumulated plan benefits totaled \$14,576,923.

An employee of the Company is a participant in the Plan if they have attained age 21 and have completed one year of service, as defined in the Plan document, or were in the bargaining unit defined in the collective bargaining agreement between GM and the UAW, effective October 8, 1987, which became applicable to the Company as a successor employer on November 1, 1988. Effective August 9, 2011, participation in the Plan was frozen to newly hired employees. Current plan participants will continue to receive vesting service and credit service under the terms of the Plan document after August 9, 2011.

During 2003, the Company approved a Closure Agreement for its Kentwood, Michigan plant. The plant closure, originally effective December 31, 2003, has been subsequently extended to no later than October 16, 2015.

Contributions

The Company has agreed to voluntarily contribute such amounts as are necessary to provide assets sufficient to meet the funding requirements of ERISA. The Plan has met the ERISA minimum funding requirements for 2014 and 2013.

Robert Bosch Fuel Systems LLC

Hourly-Rated Employees' Pension Plan

Notes to Financial Statements

December 31, 2014 and 2013

Benefit Payments

A participant is eligible for normal retirement benefits on or after the attainment of age 65. For normal retirement, a pension is payable monthly for the life of the participant based on the number of years of credited service at the time of retirement and the applicable monthly benefit factor, which is determined by the position held by the employee at the time of retirement.

A participant is eligible for early retirement benefits, subject to certain restrictions as defined in the Plan document. Pension benefits will be reduced by a set percentage per year based upon age, as defined in the Plan document, for each year a participant receives benefits before his or her 62nd year.

An employee who is totally and permanently disabled prior to attaining age 65 and has at least 10 years of credited service shall be eligible for disability pension as provided for in the Plan.

Participants may be entitled to receive certain supplemental early retirement benefits as defined in the Plan document. Certain participants affected by the Closure Agreement may elect to receive a "mutually satisfactory" (as defined by the Plan document) supplemental early retirement benefit if they have attained age 50 and have at least 10 years of credited service.

A participant with five years of credited service, as defined in the Plan document, is fully vested.

Pensions and supplements are paid monthly. The Plan provides surviving spouse and joint and survivor coverage benefits, as defined in the Plan document.

Plan Termination

Although it has not expressed any intent to do so, the Company has the right to terminate the Plan subject to the provisions of ERISA and as described in the Plan document. Should the Plan terminate at some future time, its net assets will generally not be available on a pro rata basis to provide participants' benefits. Whether a particular participant's accumulated plan benefits will be paid depends on the priority of those benefits, the financial condition of the Company, and the level of benefits guaranteed by the Pension Benefit Guaranty Corporation ("PBGC") at that time. Some benefits may be fully or partially provided for by the then-existing assets and the PBGC guarantee, while other benefits may not be provided for at all.

Administrative Expenses

Substantially all allowable administrative expenses are paid by the Plan.

2. Significant Accounting Policies

Basis of Accounting

The financial statements of the Plan have been prepared on the accrual basis of accounting and in conformity with accounting principles generally accepted in the United States of America ("GAAP").

New Accounting Pronouncements

In May 2015, the Financial Accounting Standards Board issued ASU 2015-07, *Fair Value Measurement (Topic 820) Disclosures for Investments in Certain Entities that Calculate Net Asset Value per Share (or Its Equivalent) (the "Update")*, which removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. The reporting entity should continue to disclose information on

Robert Bosch Fuel Systems LLC
Hourly-Rated Employees' Pension Plan
Notes to Financial Statements
December 31, 2014 and 2013

investments for which fair value is measured at net asset value (or its equivalent) as a practical expedient to help users understand the nature and risks of the investments and whether the investments, if sold, are probable of being sold at amounts different from net asset value. ASU 2015-07 will be effective for the Plan beginning in the first quarter of 2017, however early adoption is allowed. Management has elected to adopt ASU 2015-07 effective with the December 31, 2014 financial statements. As required by the Update, previously reported financial information pertaining to 2013 has been restated to present that information on a comparable basis. Adoption of the Update did not have a material impact on the financial statements.

In July 2015, the FASB issued ASU 2015-12, Plan Accounting: Defined Benefit Pension Plans (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): (Part I) Fully Benefit-Responsive Investment Contracts, (Part II) Plan Investment Disclosures, (Part III) Measurement Date Practical Expedient. Part I is not applicable to the Plan. Part II eliminates the requirements to disclose individual investments that represent 5 percent or more of net assets available for benefits and the net appreciation or depreciation in fair value of investments by general type. Part II also simplifies the level of disaggregation of investments that are measured using fair value. Plans will continue to disaggregate investments that are measured using fair value by general type; however, plans are no longer required to also disaggregate investments by nature, characteristics and risks. Further, the disclosure of information about fair value measurements shall be provided by general type of plan asset. Part III is not applicable to the Plan. The ASU is effective for fiscal years beginning after December 15, 2015, with early adoption permitted. Part II is to be applied retrospectively. Management has elected to adopt Part II of ASU 2015-12 effective with the December 31, 2014 financial statements. The adoption did not have a material impact on the financial statements.

Benefit Payments

Benefits are recorded when paid.

Investment Valuation and Income Recognition

The Master Trust's investments are stated at fair value. The fair value of the participation units in the common collective trusts is based on the net asset value ("NAV") of units held on the last business day of the Plan year. The NAV as provided by the trustee is used as a practical expedient to estimate fair value. Securities such as common stock, preferred stock, registered investment companies and real estate investment trusts traded on a national securities exchange are valued at the last reported sales price on the last business day of the Plan year; investments traded in the over-the-counter market and listed securities for which no sale was reported on that date are valued at the average of the last reported bid and ask prices. Fixed income securities such as corporate debt instruments and U.S. government securities are valued based on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available, the bond is valued using matrix pricing or models from reputable pricing vendors. Partnerships/JV interest funds are valued based on the Master Trust's interest in the NAV of the funds' underlying assets using statements provided by the fund manager. The NAV as provided by the fund manager is used as a practical expedient to estimate fair value.

Investment transactions of the Master Trust are recorded on the trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Actuarial Present Value of Accumulated Plan Benefits

Accumulated plan benefits (Note 3) are those estimated future periodic payments, including lump-sum distributions, that are attributable under the Plan's provisions to services rendered by the employees to the valuation date. Accumulated plan benefits include benefits expected to be paid

Robert Bosch Fuel Systems LLC
Hourly-Rated Employees' Pension Plan
Notes to Financial Statements

to: (a) retired or terminated employees or their beneficiaries; and (b) present employees or their beneficiaries. Benefits payable under all circumstances - retirement, death, disability, and termination of employment - are included to the extent they are deemed attributable to employee service rendered to the valuation date.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires the plan administrator to make estimates and assumptions that affect the reported amounts of assets, liabilities and changes therein, disclosure of contingent assets and liabilities, and the actuarial present value of accumulated plan benefits at the date of the financial statements. Actual results could differ from those estimates.

Administrative Expenses

Administrative expense includes both identified fees specific to the Plan as well as periodic fees allocated from the Master Trust. Periodic fees allocated from the Master Trust are \$204,472 and \$165,064 at December 31, 2014 and 2013, respectively.

3. Accumulated Plan Benefits

An independent actuary estimates the actuarial present value of accumulated plan benefits, which is the amount that results from applying actuarial assumptions to adjust the accumulated plan benefits earned by the participants to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements such as for death, disability, withdrawal, or retirement) between the valuation date and the expected date of payment.

The actuarial present value of accumulated plan benefits as of December 31, 2013 was as follows:

Vested benefits

Participants currently receiving benefits	\$ 50,634,884
Other participants	<u>21,063,863</u>
Total vested benefits	71,698,747

Nonvested benefits

	<u>2,773,736</u>
Total actuarial present value of accumulated plan benefits	<u>\$ 74,472,483</u>

Robert Bosch Fuel Systems LLC
Hourly-Rated Employees' Pension Plan
Notes to Financial Statements
December 31, 2014 and 2013

The following summarizes the significant components of the change in the present value of accumulated plan benefits from December 31, 2012 to 2013:

Actuarial present value of accumulated plan benefits as of December 31, 2012	\$ 70,534,872
Increase (decrease) during the year attributable to	
Benefits accumulated and actuarial experience gain/loss	473,274
Interest due to change in discount period	4,341,221
Benefits paid	(4,406,200)
Assumption changes	<u>3,529,316</u>
Actuarial present value of accumulated plan benefits as of December 31, 2013	<u>\$ 74,472,483</u>

Significant assumptions underlying the actuarial computations are as follows:

Interest rate	6.35%
Retirement rate	Less than 30 years service - 10% by age 55; 25% by age 62; 50% by age 65; 100% by age 70 30 years service or more - 25% by age 55; 50% by age 65; 100% by age 70
Mortality	Aggregate RP2014 with Scale MP2014 as of December 31, 2013 and RP - 2000, Combined Health, projected with AA on a static basis for 7 - 15 years past the valuation date as of December 31, 2012

Assumption changes for the year ended December 31, 2013 are attributable to an update to the mortality assumption from RP-2000 Combined Health to RP2014 with Scale MP2014.

These actuarial assumptions are based on the presumption that the Plan will continue. Were the Plan to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

4. Certification of Investment Information

All investment information disclosed in the accompanying financial statements, including plan interest in Robert Bosch LLC Master Retirement Trust at December 31, 2014 and 2013, plan interest in net investment income of Robert Bosch LLC Master Retirement Trust for the years then ended, and the investments and investment income information of the Master Trust presented in Note 5, was obtained or derived from information supplied to the plan administrator and certified as complete and accurate by The Northern Trust Company ("Trustee"), except as noted below.

The Master Trust's investment in Partnership/JV interest as of December 31, 2014 and 2013 of \$45,005,263 and \$44,329,148, respectively, and the Plan's proportionate share of that investment of \$2,340,274 and \$2,349,445, respectively, were not certified. Accordingly, the net appreciation in the fair value of the Master Trust's investment in Partnership/JV interest for the years ended

December 31, 2014 and 2013 of \$676,115 and \$3,004,855, respectively, and the Plan's proportionate share of that net appreciation of \$35,158 and \$159,257, respectively, also were not certified.

5. Investment in Master Trust

The Plan's investments are in the Master Trust, which was established for the investment of assets of the Plan, and several other retirement plans sponsored by Robert Bosch LLC. Each participating retirement plan has an undivided interest in the Master Trust. At December 31, 2014 and 2013, the Plan's interest in the net assets of the Master Trust was approximately 5.2% and 5.3%, respectively. The value of the Plan's interest is determined on the basis of cumulative funds specifically contributed on behalf of the Plan, net of funds withdrawn for benefit payments and expenses specific to the Plan and adjusted for an allocation of investment income and investment expenses. Investment income and expenses are allocated monthly to the Plan based upon its pro rata share in the net assets of the Master Trust.

The following table presents the net assets of the Master Trust at December 31:

6. Fair Value Measurements

The FASB established a framework to increase consistency and comparability in fair value measurements. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described as follows:

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Master Trust has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Robert Bosch Fuel Systems LLC
Hourly-Rated Employees' Pension Plan
Notes to Financial Statements
December 31, 2014 and 2013

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

For a description of the valuation methodologies used for assets measured at fair value see Investment Valuation and Income Recognition under Note 2. There have been no changes in the methodologies used at December 31, 2014 and 2013. In determining the reasonableness of the methodology, the Investment Committee evaluates a variety of factors including review of existing contracts, economic conditions, industry and market developments, and overall credit ratings. These methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

For the years ended December 31, 2014 and 2013, there were no significant transfers in or out of levels 1, 2 or 3.

- (a) In accordance with Subtopic 820-10, certain investments that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statements of net assets available for benefits.

Common collective trusts and the Partnership/JV interest consist of pools of investments used by institutional investors to obtain equity and fixed income market exposures by investing in funds which are intended to mirror market indices. They are valued on the basis of the relative interest of each participating investor in the fair value of the underlying assets of each of the respective common collective trusts and Partnership/JV. The funds are valued using NAV as provided by the investment account manager as a practical expedient. Generally, common collective trust investments can be redeemed after a 60 day notice period, while the Partnership/JV interest can be redeemed after a 30 day notice period. As of December 31, 2014 and 2013, the Master Trust is

not holding any unfunded commitments. Common collective trusts and the partnership/JV interest included in the Master Trust are:

7. Risks and Uncertainties

The Master Trust invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the statement of net assets available for benefits.

Plan contributions are made and the actuarial present value of accumulated plan benefits is reported based on certain assumptions pertaining to interest rates, inflation rates and employee demographics, all of which are subject to change. Due to uncertainties inherent in the estimations and assumptions process, it is at least reasonably possible that changes in these estimates and assumptions in the near term would be material to the financial statements.

8. Tax Status

The Internal Revenue Service ("IRS") has determined and informed the Company in a letter dated March 20, 2014, that the Plan and related trust are designed in accordance with applicable sections of the Internal Revenue Code (the "Code"). Although the Plan has been amended since the date covered by the letter, the plan administrator and the Plan's ERISA counsel believe that the Plan is designed and is currently being operated in compliance with the applicable requirements of the Code and therefore believe that the Plan is qualified and the related trust is tax-exempt.

Robert Bosch Fuel Systems LLC
Hourly-Rated Employees' Pension Plan
Notes to Financial Statements
December 31, 2014 and 2013

Accounting principles generally accepted in the United States of America require plan management to evaluate tax positions taken by the Plan and recognize a tax asset or liability if the Plan has taken an uncertain position that more likely than not would not be sustained upon examination by the IRS. The plan administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2014 and 2013, there are no uncertain positions taken or expected to be taken that would require recognition of an asset or liability or disclosure in the financial statements. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to income tax examinations for years beginning prior to January 1, 2011.

9. Party-in-Interest Transactions

The Master Trust invests in common collective trusts managed by the Trustee or its affiliates. These transactions qualify as exempt party-in-interest transactions. Fees paid to the Trustee by the Master Trust for 2014 and 2013 were \$831,262 and \$790,261, respectively.

10. Subsequent Events

The Plan has evaluated the events and transactions that have occurred through October 13, 2015, the date the financial statements were available to be issued, and noted no items requiring adjustment to the financial statements or additional disclosure.

Valuation of Plan Assets

Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

If the participant files his application for benefits within five years of termination, a monthly supplement allowance shall be paid until age 62, determined as follows:

- (1) At least 30 years of credited service: The early retirement supplement is equal to the minimum monthly benefit minus regular early retirement benefit:

Commencement Date	Minimum
4/1/2008–3/31/2009	\$2,817.56
4/1/2009–3/31/2010	\$2,804.36
4/1/2010–3/31/2011	\$2,898.70
4/1/2011 and after	\$2,947.43

- (2) Less than 30 years of credited service: The interim supplement is calculated as years of credited service multiplied by an amount determined in connection with the attained age at retirement as follows:

Attained Retirement Age	Payment Start Date			
	4/1/2008–3/31/2009	4/1/2009–3/31/2010	4/1/2010–3/31/2011	4/1/2011 and after

60–61	\$43.86	\$43.66	\$45.13	\$45.89

For both (1) and (2) above, for each year during the life of the collectively bargained agreement, the rates will be adjusted by the percent change in the official Consumer Price Index for Urban Wage Earners and Clerical Workers published by the Bureau of Labor Statistics during the previous calendar year. Per 2011 union negotiations, there will be no further CPI adjustments.

If the total of the monthly pension and the early retirement supplement or interim supplement exceeds 80% of the final base pay, the supplement (but not the monthly pension) will be reduced such that the total equal 80% of the final base pay.

Commencement Date	Amount
4/1/2008–3/31/2009	\$45.02
4/1/2009–3/31/2010	\$44.81

Valuation of Plan Assets

Smoothed fair market value of assets over the current and prior two years, adjusted for contributions, benefit payments, administrative expenses, and expected earnings. The average value of assets calculated in this manner is further limited to not less than 90% nor more than 110% of fair market value.

A characteristic of this method is that the expected distribution of the value of plan assets is skewed toward understatement relative to the corresponding market values for expected long-term rates of return in excess of the third segment rate under IRC section 430(h)(2)(C)(iii).

If the participant files his application for benefits within five years of termination, a monthly supplement allowance shall be paid until age 62, determined as follows:

- (1) At least 30 years of credited service: The early retirement supplement is equal to the minimum monthly benefit minus regular early retirement benefit:

Commencement Date	Minimum
4/1/2008–3/31/2009	\$2,817.56
4/1/2009–3/31/2010	\$2,804.36

- (2) Less than 30 years of credited service: The interim supplement is calculated as years of credited service multiplied by an amount determined in connection with the attained age at retirement as follows:

	4/1/2008–3/31/2009	4/1/2009–3/31/2010	4/1/2010–3/31/2011	4/1/2011 and after

Per 2011 union negotiations, there will be no further CPI adjustments.

If the total of the monthly pension and the early retirement supplement or interim supplement exceeds 80% of the final base pay, the supplement (but not the monthly pension) will be reduced such that the total equal 80% of the final base pay.
