EIN 58-1290226/PN 002
Attachment to 2014 Schedule SB Part V – Statement of Actuarial Assumptions/Methods

Methods

Valuation date	First day of plan year
Funding target	Present value of accrued benefits
Target normal cost	Present value of benefits expected to accrue during plan year plus plan-related expenses expected to be paid from plan assets during plan year
Actuarial value of assets	<p>Average of the fair market value of assets on the valuation date and the two immediately preceding valuation dates, adjusted for contributions, benefits, administrative expenses and expected earnings of 7.00% for the preceding plan year and 7.25% for the second preceding plan year during the 12 month periods preceding the valuation date (with such expected earnings limited as described in IRS Notice 2009-22). The average asset value must be within 10% of fair value, including discounted contributions receivable (discounted using the effective interest rate for the 2013 plan year).</p> <p>The method of computing the actuarial value of assets complies with rules governing the calculation of such values under the Pension Protection Act of 2006 (PPA). These rules produce smoothed values that reflect the underlying market value of plan assets but fluctuate less than the market value. As a result, the actuarial value of assets will be lower than the market value in some years and greater in other years. However, over the long term under PPA's smoothing rules, the method has a significant bias to produce an actuarial value of assets that is below the market value of assets.</p>
Benefits not valued	<p>All significant benefits described in the Plan Provisions section were valued except, if applicable (1) plant shutdown and other "unpredictable contingent event benefits" which are not valued until and unless the triggering event occurs (unless otherwise noted) and (2) automatic lump sum distribution in the event that the present value of benefits is no more than \$1,000 (or \$5,000 for survivor benefits). Towers Watson has reviewed the plan provisions and, based on that review, is not aware of any significant benefits required to be valued that were not.</p>
Other changes	<p>The segment interest rates used to calculate the funding target and target normal cost were updated from an applicable month of September 2012 to September 2013. For the 2013 plan year, Lafarge elected not to apply the HATFA corridor extension for benefit restriction purposes (IRC §436) or for funding (IRC §430) purposes. The HATFA corridor extension applies for all purposes for the 2014 plan year.</p> <p>The required mortality table used to calculate the funding target and target normal cost was updated to include one additional year of projected mortality improvements.</p> <p>The administrative expense assumption was updated.</p>
Data sources	<p>Towers Watson used asset data and retiree data supplied by the trustees. Lafarge North America Inc. furnished other participant data, the dates and amounts of the contributions that were paid in 2014 for the 2013 plan year, and funding balance elections. Data were reviewed for reasonableness and consistency, but no audit was performed. Assumptions or estimates were made by the Towers Watson actuaries when data were not available. We are not aware of any errors or omissions in the data that would have a significant</p>
